## ENGINEERED FOR

### BOUNTY HUNTER TRACKER IV

#### DUAL DISCRIMINATOR

The DUAL DISCRIMINATOR SYSTEM with GROUND TRAC® offers options for finding more valuables and less trash. 'Tone Discrimination' gives a Low Tone for nickels, pull-tabs and most trash items, High Tone for most coins and silver.

Can be adjusted so pull-tabs give an in between broken sound, making them easy to identify, thus allowing for finding of nickels and gold rings along with other coins.

On 'Full Discrimination', the detector will reject trash and other unwanted items and emit a High Tone for desired targets.

The Tracker IV will ground balance automatically in all types of soil conditions.

With Motion All Metals mode, the Tracker IV has the ability to find **GOLD NUGGETS IN BLACK SAND!** It is additionally capable of finding large treasures and relics at amazing depths.

The Tracker IV offers powerful basic features contributing to ease of use with professional performance.

- ◆ Three-Position Mode Switch
- ◆ Motion All Metal Mode
- ◆ Full Discriminate Mode
- ◆ Dual-Tone Discriminate Mode
- ◆ Sensitivity Adjustment
- ◆ Discriminate Adjustment
- ◆ Intensity Meter System
- ◆ Low Battery Indicator
- ◆ Waterproof 8" Coil System

### BOUNTY HUNTER LAND STAR™

Breaking New Ground In Precision Engineering, The Land Star Detector Will Locate Buried Objects Virtually Anywhere. Find Gold, Silver, Coins & Valuable Relics with True Accuracy.

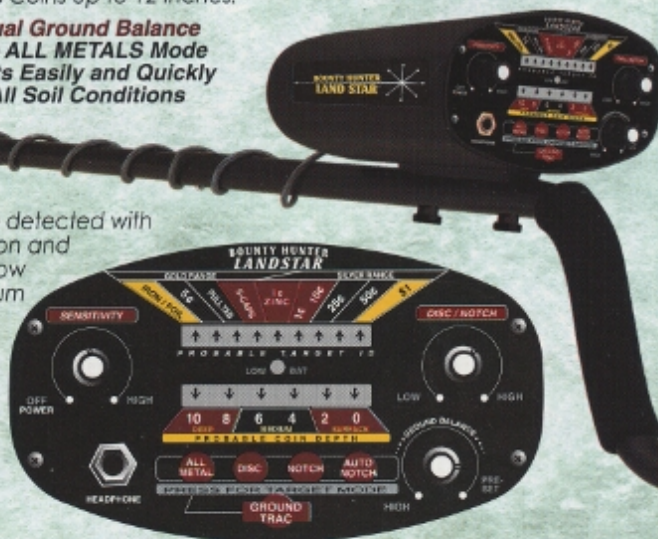

Three-Tone Audio Discrimination. No Motion All Metals Threshold pinpointing and powerful depth capabilities make your hunting easier and more rewarding. Notch and Auto Notch eliminate pull-tabs and still detect nickels and most gold rings. Detects Coins up to 12 Inches.

**Manual Ground Balance in the ALL METALS Mode Adjusts Easily and Quickly in All Soil Conditions**

Press ALL METAL pad and all metals are detected with a medium tone. Press DISC to detect iron and desired targets with Three-Tone Audio—Low Tone for small gold, iron and nickels, Medium Tone for pull-tabs, screw caps and zinc pennies. High Tone for other coins and silver. Press NOTCH to reject iron and pull-tabs, yet detect nickels and other good targets. Press AUTO NOTCH and automatically reject most trash items while still detecting treasure items.

**Has Both NO MOTION ALL METALS and MOTION ALL METALS with Iron Discrimination by Size.**

The Dual LCD Readout will simultaneously "lock" onto Target ID and Depth. No switching back and forth needed. Low Battery Indicator will come on and stay on when batteries are low. DISC/NOTCH Variable Control allows for precise separation of trash from treasure.

- ★ LCD Target Readout
- ★ LCD Depth Readout
- ★ Touchpad Selection
- ★ Manual Ground Balance
- ★ Ground Trac® Retune
- ★ Full Discrimination
- ★ Variable Notch
- ★ Auto Notch
- ★ Disc/Notch Level Control

# METAL DETECTORS

## SERIOUS TREASURE HUNTING

### BOUNTY HUNTER QUICK DRAW™ II Full Motion Detector

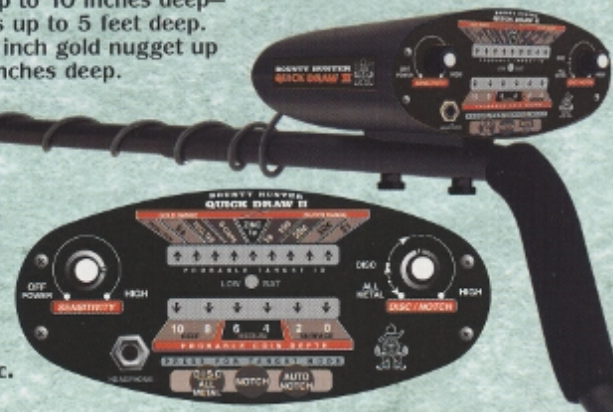

The Quick Draw II is equipped with a powerful ZILOG Z-86 computer circuit which combines with Bounty Hunter's Patented Technology to offer more features, performance and value than any other detector in its price range.

Detects coins up to 10 inches deep—  
Larger objects up to 5 feet deep.  
Detects a 1/4 inch gold nugget up  
to 4 inches deep.

- Target ID
- Depth Readout
- Sensitivity Control
- Full Discrimination
- Auto Notch
- Variable Notch
- Disc/Notch Level Control
- Low Battery Indicator
- 3-Tone Target Audio
- Auto Ground Balance
- 1/4-Inch Headphone Jack

Whether sweeping the searchcoil ultra fast or ultra slow, the Quick Draw II will detect targets with tremendous accuracy.

Has 3 Levels of Iron Discrimination.  
Tune out small nails, etc.  
and still detect larger relics and collectibles.

Touchpad Selection with Four Modes of Operation

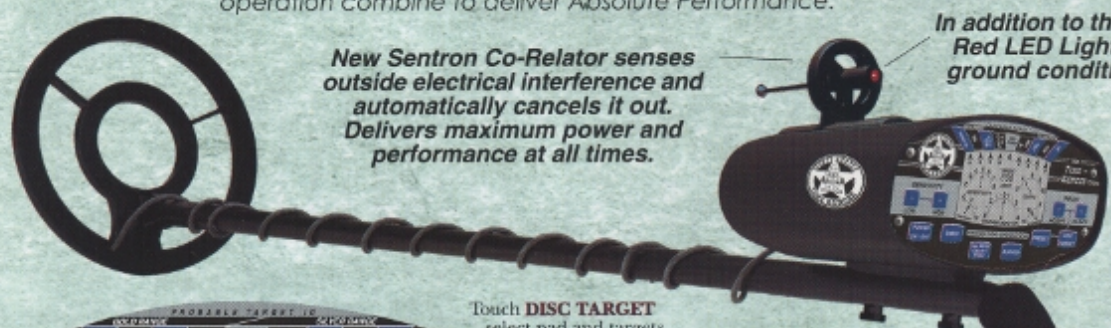

### TIME RANGER®

Now you can recover more relics and valuables from the past than ever before. Time Ranger's powerful circuitry and smooth operation combine to deliver Absolute Performance.

New Sentron Co-Relator senses outside electrical interference and automatically cancels it out. Delivers maximum power and performance at all times.

In addition to the LCD Ground Monitor, Red LED Light alerts you whenever ground conditions require updating.

- ★ LCD System Readout
- ★ Touchpad Control Selection
- ★ Programmable Target ID
- ★ Numbered Target Values
- ★ Smart Trac™ Ground Control
- ★ Microprocessor Circuitry
- ★ 3-Tone Audio Discrimination

Touch **DISC TARGET** select pad and targets appear one at a time on the LCD screen for you to Accept or Reject them. Program your own combination of targets.

Has Both **NO MOTION ALL METALS** and **MOTION ALL METALS** with 4 Levels of Iron Discrimination by Size.

Touch **PRESET** to Reject iron, foil and pull-tabs. Touch Preset again to Reject iron, foil, pull-tabs, screwcaps and zinc pennies.

Touch **SMIFF** pad, then "show" a target to the searchloop for **ACCEPT** or **REJECT** of that target only.

Touch **BLANKER** pad to eliminate surface metals. Adjustable from 2 to 4 inches deep.

Touch **ALL METAL** pad to detect all metals with "No Motion" Audio Threshold and Audio Pinpointing.

- > ID Arrow Locks On Good Targets
- > "R" Indicates Reject Selections
- > Deep Target Indicator
- > Depth Locks on for Coin-Sized Objects
- > Battery Indicator Functions at all Times
- > New Ground Monitor

## TRACKER IV SPECIFICATIONS

### Three-Position Joggle Switch

#### Controls:

On/Off Switch  
Sensitivity Control  
Disc/Notch Control

#### 3 Modes of Operation:

Motion All Metal  
Full Discriminate  
Dual-Tone Discriminate

When operating in the FULL DISCRIMINATE Mode, the DISC/NOTCH Control will increase the range of discrimination as it's turned clockwise.

When operating in the TONE DISCRIMINATE, the DISC/NOTCH Control can be adjusted to create two different tones, both low and high, to classify nickel/gold items from silver/copper and brass along with a broken tone for pull-tabs.

The Mode switch allows instant selection from 3 modes of operation: All Metal, Full Discriminate, and Tone Discriminate.

**I. FULL DISCRIMINATE:** Set the Mode Switch to DISC and most trash items can be rejected. Adjust the DISCRIMINATE control higher to increase the range of discrimination. Be aware that discrimination of Pull Tabs will cause nickels and some gold rings to also be rejected.

**II. ALL METAL:** Set the Mode Switch to the center position and the detector will detect all metals—Important when looking for iron objects that are mostly eliminated in Discrimination mode.

**III. TONE DISCRIMINATE:** When using the Tone Discriminator, a unique dual tone "beep" and automatic iron/foil rejection makes finding treasure easy and fun—Nickels and most gold rings will emit a low tone while most coins will emit a high tone.

## QUICK DRAW II SPECIFICATIONS

### Touchpad Operation Modes

#### Touchpad Controls:

Disc/All Metal  
Notch  
Auto Notch

#### Adjustment Controls:

Power On/Off Sensitivity  
Disc/Notch Control

With three types of Discrimination modes to choose from and an independent Motion All Metals operation, the Quick Draw II can be effectively used in many different ways. The DISC (Discriminate) Mode operates on the same touchpad as the ALL METAL mode. The position of the DISC NOTCH control will then determine the mode of operation. All modes can be fine-tuned by the DISC NOTCH control for a variety of specialized applications.

QUICK DRAW II LCD READOUT

The LCD Display emits "arrow" indications for the types of metal being detected. The general categories "GOLD RANGE" and "SILVER RANGE" allow for quick reference when hunting for specific types of metal. Under these broad categories fall more common types of metal objects found when detecting. These indications may also symbolize many other types of precious metal objects such as gold rings, medallions, tokens, and relics.

The Probable Depth Indicator works simultaneously with the Target Identification—each arrow will lock on and stay on estimated depth in inches for coin-sized objects until another target's depth is detected.

## LAND STAR SPECIFICATIONS

### Touchpad Operation

#### Touchpad Controls:

Disc  
Notch  
Auto Notch  
All Metal  
Ground Trac Re-Tune

#### Adjustment Controls:

Power On/Off Sensitivity  
Disc/Notch Control  
Manual Ground Balance

With four modes of operation and a separate Ground Trac Touchpad for Ground Balances Re-Tune, the Land Star can be effectively utilized for any metal detecting application conceivable:

- All Metal:** The All Metals Mode is an excellent mode for gold prospecting, cache hunting or pinpointing objects when coin-shooting.
- Disc:** The Disc Mode offers different levels of discrimination adjusted by the Disc/Notch Control. An excellent mode of choice when relic hunting since iron is detected at the Disc/Notch Control's lowest setting.
- Notch:** The Mode of choice when coin-shooting or ring hunting. Can selectively eliminate certain types of pull-tabs while still detecting nickels and gold rings.
- Auto Notch:** A fully automatic discrimination mode that allows the operator turn-on-and-hunt discrimination. The Disc/Notch Control can be adjusted to increase the width of the Notch making possible the rejection of screw caps and zinc pennies while still detecting copper pennies, silver coins, nickels and many gold rings.

LAND STAR LCD READOUT

## TIME RANGER SPECIFICATIONS

### Digital Readout

Numbered target values allows for accurate division of targets.

Level of sensitivity is always in view and is easily adjusted by "plus" and "minus" touchpads.

Battery levels are represented by: G=Good/F=Fair/L=Low/R=Replace

Ground Monitor alerts user when to push "SMART TRAC" for automatic Ground Balancing.

"A" indicates target is being detected.

"R" indicates target is rejected.

Depth Readout registers from 2 to 10 inches.

Blanker eliminates 2 or 4 inches of surface. Blanker is turned off on 0.

### Touchpad Operation

#### Touchpad Controls:

Power On/Off  
Sniff  
All Metal/Smart Trac  
Blanker  
Preset  
Disc Target  
Sensitivity Low/High  
Target Accept/Reject

The Time Ranger operates in every mode and function by touchpad controls. There are no moving parts to wear out and no open areas on the faceplate that allow dirt to enter which normally would erode parts and possibly damage sensitive circuitry. These touchpads are easily accessed by the operator's thumb or other free hand. Because there is no programming involved, other than selecting or deselecting desired targets, the Time Ranger is a turn-on-and-go detector. With quick response to the slightest push of the touchpads, automatic modes of operation (by pressing "PRESET"), and no hidden programming, the Time Ranger allows the operator to focus on finding treasure fast and efficiently.

## GENERAL SPECIFICATIONS

### Audio Target Identification

**3-TONE DISCRIMINATION** automatically classifies detected metal objects into 4 categories. 3-Tone Audio Discrimination is a valuable reference when trying to avoid digging trash items. With the external speaker or the use of stereo headphones, the detectorist always has a solid audio reference that ensures ease of use in determining trash from treasure.—on the Tracker IV, pull-tabs will have an in-between "broken" tone in place of a medium tone depending on DISC/NOTCH control adjustment.

## COMMON SPECIFICATIONS:

Weight: 3.5 lbs  
Operating Frequency (kHz): 6.6  
Motion Discrimination (Auto Ground)  
1/4" Headphone Jack  
Internal Speaker System  
8" Open-Face Coil System  
Requires Two 9-Volt Batteries  
S-Rod Handle System  
Adjustable Aluminum Stem  
Limited 5-Year Warranty

## FAST TRACKER SPECIFICATIONS

The FAST TRACKER is a user-friendly instrument, offering tremendous value for the money, while delivering effective performance over a wide range of conditions and applications.

Streamlined in appearance, with only two operating controls, the FAST TRACKER has eliminated the most difficult aspect of metal detector operation: Ground Balancing. With built-in Automatic Ground Trac, the FAST TRACKER balances for mineralization while you detect.

The FAST TRACKER will detect in extreme ground conditions from wet salt beaches to highly mineralized inland sites with no operator adjustments to the circuitry and with no loss of sensitivity. The FAST TRACKER offers 2-tone target identification for fun, easy discrimination capability.

**DUAL TONE DISCRIMINATION** classifies detected metal objects into 3 categories. Adjust the DISCRIMINATE control higher to increase the range of the low tone. It is possible to set the DISCRIMINATE level so that nickels have a low tone, larger coins have a high tone and pull tabs have an in-between "broken" tone, making them easily recognizable.

Weight: 3lbs  
 Operating Frequency (kHz): 6.6  
 Searchcoil Size: 7.25"  
 Low Battery Indicator (LED)  
 All Metal Motion  
 Motion Discrimination  
 2-Tone Target ID  
 Headphone Jack  
 Internal Speaker System  
 Waterproof Coil System  
 Adjustable Aluminum Stem  
 Limited 5-Year Warranty  
 Requires Two 9-Volt Alkaline Batteries

### Controls:

On/Off Switch  
 Sensitivity Control  
 Discriminate Control

### 2 Modes of Operation:

Motion All Metal  
 Dual-Tone Discriminate

5-YEAR  
 LIMITED  
 WARRANTY

### On/Off Sensitivity Control

After turning the On/Off Sensitivity Control to the "ON" position, and placing the Discriminate control at the "LOW" position, the unit will respond to any type of metal as long as the coil is in motion. Motion is also required in the other modes of operation. The Sensitivity is at its lowest setting when turning the unit on. To increase Sensitivity, simply turn the control clockwise towards the "HIGH" indication.

### Tone Discriminate Control

To operate in the TONE DISCRIMINATE Mode, turn the DISCRIMINATE Control clockwise from the "LOW" position. The DISCRIMINATE Control will increase the range of discrimination as it's turned clockwise.

While operating in the TONE DISCRIMINATE, the DISCRIMINATE Control can be adjusted to create two different tones, both low and high, to classify nickel/gold items from silver/copper and brass along with a possible broken tone for pull-tabs.

## SHARP SHOOTER II SPECIFICATIONS

The Bounty Hunter Sharp Shooter II is a Digital LCD Readout System with No-Motion All Metals at an affordable price. It combines ease of use with a visual reference that allows the user to determine what type of metal is being detected. It also includes a Three-tone Audio reference which assists in further determining what type of metal is being detected.

The Sharp Shooter II detector was designed with exact specifications to fill the needs of the avid Treasure Hunter. The LCD readout will indicate the probable target ID of each target being detected. With an excellent recovery rate, easy operation, and lightweight, the Sharp Shooter II is truly a Treasure Hunter's dream.

Because of the No-Motion All Metals mode, this detector can also be applied effectively for all types of treasure hunting: relic hunting, cache hunting, or even gold prospecting.

Approx. Weight: 3.5 lbs  
 Operating Frequency (Hz): 6.6  
 Digital LCD Target & Mode  
 Readout  
 Low Battery Indicator (LCD)  
 All Metal No-Motion (Auto Ground)

 Notch Touchpad  
 Auto Notch Touchpad  
 Automatic Ground Balance  
 Disc./Notch Variable Control

5-YEAR  
 LIMITED  
 WARRANTY

When operating in the DISC mode, detected targets will have three distinct tones for helpful identification of the detected item. With some practice, it is easy to determine, most of the time, what type of metal is being detected just by the tones being emitted by the Sharp Shooter II. (See "Audio Target Identification" graph below)

## LAND RANGER SPECIFICATIONS

The LAND RANGER is a top-of-the-line professional metal detector offering high-end features indispensable for the serious metal detectorist. A large LCD panel displays current operating status at all times during in-the-field application. Target ID, Depth Readout, Sensitivity Level, Battery Level, Target Number Indication, Ground Balance Monitor, Target Accept/Reject, and Iron Level Discrimination are all displayed by the LCD panel.

The Land Ranger is designed for every metal detecting application conceivable at a professional level. All features and functions are highly visible with no hidden programming. The touchpads keep all modes of operation at quick and easy access while the LCD emits a constant reference source, maximizing every possibility for finding treasure.

Approx. Weight: 3.5 lbs  
 Operating Frequency (kHz): 6.6  
 Digital LCD Readout

## Accessories

### Bounty Hunter Headphones (39.95)

This set of headphones includes left/right individual volume controls. Stereo headphones with a 1/4-Inch Plug. These headphones are completely designed to be compatible with all current Bounty Hunter metal detectors. Read all safety precautions in your manual.

### Bounty Hunter Carrying Bag (29.95)

A lightweight, superior quality nylon carrying bag that adapts to the full S-Rod Handle System. Has the Bounty Hunter logo on the side and is double-stitched. Includes an outside zip-up pocket. Protect your investment...keeps your detecting equipment from getting damaged by certain weather conditions.

### Bounty Hunter Optional Search Coils

#### 4-Inch Gold Nugget Coil: (49.95)

Perfect for coin-shooting in trashy areas.

#### 10-Inch Magnum Coil: (59.95)

Improves depth for relic and cache hunting.

### Bounty Hunter Search Coil Covers (9.95ea)

These coil covers will protect the bottom of your searchcoil from getting scratched or damaged.

- All current sizes are available:
- 8-Inch Open-Faced Coil Cover
  - 4-Inch Close-Faced Coil Cover
  - 10-Inch Open-Faced Coil Cover
  - 7-Inch Close-Faced Coil Cover

### Bounty Hunter Ball Cap (7.95)

Has the Bounty Hunter logo on front.
