

# Hidden Treasure May Be Anywhere!

...And you can find it with the

## Treasure Tracker® I-D

### DUAL TONE DISCRIMINATOR

*The Treasure Tracker I is a Treasure Finder in the true sense of the word. It is so accurate and simple to operate that you'll be digging up treasures in no time.*

The Treasure Tracker I-D is Fully Automatic with Dual Trac Tuning. Ready for maximum performance at all times. Remains silent until metal is detected, then sounds off. Features Automatic Ground Balance with no loss of power.

The Treasure Tracker I-D is equipped with a Dual Tone Audio Target Identification (ATI) system to find all metals or to identify trash such as aluminum, foil, nails, bottles caps, etc. When using the Discriminator, a unique dual-tone "Beep" makes finding treasure fun and easy. Low Tone for Nickels and most trash items, High Tone for most other coins and silver. Will detect a 1/4" Nugget...even thru black sand!

### MOTION DISCRIMINATION

The Tracker I-D is a "motion" detector. This means that the search coil must be moving slightly to detect the presence of metal. This movement is required in both the 'Discrimination' mode and the 'All Metals' mode. The motion required is slight and pinpointing of a target is very easy.

### EASY TO USE...

#### ▶▶▶ FULLY AUTOMATIC TUNING

With Dual Trac Tuning, keeps your Treasure Tracker ready for maximum performance at all times. Remains silent until metal is detected, then sounds off.

### DEPTH ADJUSTMENT...

#### ▶▶▶ SENSITIVITY LEVEL CONTROL

Lets you adjust the depth at which the Dual Trac will respond.

### AUDIO IDENTIFICATION...

#### ▶▶▶ DUAL TONE

When using the Discriminator, two tones are emitted to help determine the different types of metal targeted.

### DISCRIMINATE TRASH FROM TREASURE...

#### ▶▶▶ DISCRIMINATION CONTROL

Allows the user to adjust the level of discrimination. It is possible to set the DISCRIMINATE level so that nickels have a low tone, larger coins have a high tone and pull tabs have an in-between "broken" tone, making them easily recognizable.

### HANDLE SYSTEM...

#### ▶▶▶ COMFORTABLE HANDLE SYSTEM

A pistol-grip, well-balanced handle system with forearm support for easy, lightweight maneuverability.

### LOUD ALERT...

#### ▶▶▶ EXTERNAL SPEAKER SYSTEM

Allows for the option of not having to use headphones.

### HEADPHONE READY...

#### ▶▶▶ HEADPHONE JACK

Fits 1/4-inch stereo plug. Assists easy detection in noisy areas and will increase battery life.

### METER SYSTEM

The meter system will give a visual indication with movement of the needle to the right when an object is detected. Probable depth can be estimated with practice.

### ALL METALS MODE

To detect all metals, including iron, turn the Discriminator off and the Tracker will be operating in "All Metals" mode. A versatile mode of operation for many types of detecting including: relic hunting and cache hunting.

### AUTOMATIC GROUND BALANCE

The Automatic Ground Balance feature allows operation in virtually any mineralization of ground.
