

COMPASS'

INTRODUCTORY & CHRISTMAS SPECIALS

FREE GIFT OFFER with your purchase of a COMPASS Metal Detector!

A COMPASS FREE GIFT OFFER will be included with your purchase of any special package from October 3, 1983, through January 6, 1984. See your participating COMPASS Dealer today!

COMPASS' sensational "CHALLENGER" series is designed with the features and performance DEMANDED by professional and serious treasure hunters. If you are considering a stripped-down detector, study it very carefully. Later you may wish you had had purchased a detector with more capability.

We challenge you to compare price, features, and overall depth of detection of our "CHALLENGER" with any other detector. The X-70 is the world's most versatile and deepest detecting metal detector you have ever seen or used!

New for 1984

All-metal electronics housing for better shielding against electro-magnetic and radio frequency interference.

THE NEW TEAM TO BEAT!

**COIN
SCANNER
JR.**

**COIN
SCANNER
PRO**

We at Compass are proud to introduce a new generation of SCANNERS developed under the direction of project engineer, George Payne. During 20 years of innovative detector design, George was responsible for several patents. He has joined the Compass team to help us continue to set the standard for metal detector technology. George, John Earle, and the rest of the engineering staff welcome the challenge and responsibility of being THE TECHNOLOGY TEAM OF THE 90'S.

- More features
- More depth - up to 25% in most areas
