Dr. Gerhard Fisher

was founded in 1931 by Dr. Gerhard Fisher in his Palo Alto garage. Improving on technology he developed for direction finding on planes at sea, Dr. Fisher and four employees began producing the Metallascope, or M-Scope, the *first* patented metal detector. Today, Fisher M-Scope is the registered

trademark on all Fisher products and a sure sign that you're buying the best detectors available. If it's quality, service, performance, reputation *and a Lifetime Warranty** you're after, find it... with Fisher.

the **BEST**
in the **BUSINESS**

LIFE

We at Fisher are proud of the products we produce. The quality and performance of our detectors has, for over 70 years, earned us a reputation of excellence. Now, our **LIFE-TIME WARRANTY***, the best in the industry, backs this

belief in our detectors. We are

committed to producing the best detectors available while supporting you, our valued customers, with superior service. Find what you want *and* what you deserve... with Fisher.

*Roger Cimino, President,
Fisher Research Laboratory*

TARGET ID

CZ-5

deep search detector

The Fisher CZ-5 has it all: high performance, deep search capability, & visual target identification.

\$849.95*

The CZ-5 is easy to use, just turn on and go with pre-set control markings. It offers three tone audio target ID, big target alert, depth reading, push button pinpointing, wet-sand operation, deep-target audio boost and a built in speaker. It uses two 9V batteries for up to 20 hours of operation and comes standard with a 3 piece breakdown handle for easy transport. Plus, the control box can be handle or hip mounted. Backed by Fisher's Lifetime Warranty*.

ALL HOBBY DETECTORS

WARRANTY

TIME*

*Warranty may vary outside of the United States. See your dealer for details.

programmable target ID CZ-7a Pro

Hipmountable, deep-seeking target ID detector in a rugged, rainproof package.

\$1095.95*

Fishers CZ-7a Pro offers LCD target ID with three distinct target tones and a soft bell tone for large shallow objects. With the easy to program notch, you can reject or accept any combination of seven target categories. The CZ-7a Pro offers surface mount electronics with zero battery drain for last setting turn-on and faster pinpoint-mode response, a hot wide scan, all-metal, auto tune mode, a wet sand mode and touch VCO pinpointing. The control box of the Pro is belt, hip, or even chest mountable with the optional harness. Backed by Fisher's Lifetime Warranty*.

*Manufacturers suggested retail price for units with 8" search coils.

RELIC & COIN

silent, discriminating, body-mount

1236-X2

\$499.95*

Fisher's "Quiet one" is a do-it-all detector with variable frequency... a must for the competition hunter!

Fisher's 1236-x2 offers coin and beach hunters all the sensitivity they've asked for plus a newly developed third derivative silencer mode that helps to eliminate excessive pops and clicks when searching in trashy areas. Fisher has provided audio threshold at the maximum setting so the faintest target signal can be heard. The 1236-x2 also offers a preset iron discrimination setting,

deep search, all purpose

1266-X

Engineered for extreme depth & also one of the lightest high performance detectors.

No tuner, no meter, no ground adjust, no nonsense. Just pick it up and start searching. Compare it to any detector made at any price and you'll agree, the 1266-x is the one to beat! A deep seeking detector isn't doing the job if its response is too faint to hear... you're missing small targets. Not with the 1266-x. It will sound off louder and crisper over those small targets. You'll hear more and you'll find more. Backed by Fisher's Lifetime Warranty*.

\$599.95*

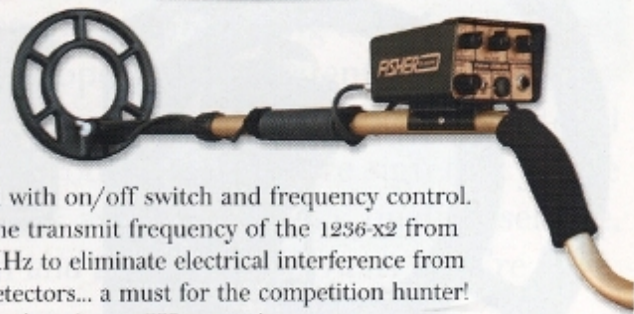

3 piece breakdown

1266-XB

\$699.95*

Fisher's breakdown version of the 1266-x complete with a compact, rugged, hard-shell carrying case small enough for most airlines.

volume control with on/off switch and frequency control. You can vary the transmit frequency of the 1236-x2 from 5.5KHz to 5.9 KHz to eliminate electrical interference from nearby metal detectors... a must for the competition hunter! Backed by Fisher's Lifetime Warranty*.

MADE IN

QUA

THE USA

A 1786 half Escuda found March of 2000 with a Fisher metal detector *manufactured in the 1970's and still finding treasure today!*

*Manufacturers suggested retail price for units with 8" search coils.

GOLD HUNTERS

19 kHz Deep Search Nugget Hunter

Gold Bug

Engineered for one job...
finding gold nuggets!

\$499.95*

Many gold bearing areas are literally peppered with small nuggets just inches below the surface. The trouble is, most metal detectors pass right over them. The nuggets are too small or the ground is too heavily mineralized. But not for the

Gold Bug! It performs where others can't. Hundreds of Gold Bug users from the U.S. to Australia have reported amazing gold finds. There is no meter, no discrimination, no nonsense. The Gold Bug is lightweight, comfortable, and easy to operate. It comes with a cushioned arm rest and grip, double locking fiberglass stem, push button retune, and double derivative, quartz crystal-locked electronics. The Gold Bug is hip-mountable and comes with either a 6 1/2" or a 10" elliptical search coil for the same great price. Backed by Fisher's Lifetime Warranty*.

HAND CRAFTED
LITTY
WITH PRIDE

71 kHz Deep Search Nugget Hunter

Gold Bug-2

Take prospecting to new levels
with the next generation of Gold Bug, \$789.95*
the ultra high frequency
Gold Bug-2.

Fisher engineers worked for years to build a detector that would carry on the Gold Bugs well-deserved reputation as the worlds premier nugget hunter, and this is it!

Like the original Gold Bug, the Gold Bug-2 is designed for finding gold nuggets. It offers extraordinary sensitivity, ultra-high frequency (the highest operating frequency on the market), iron-discrimination, dust and moisture resistance, audio-boost and the ability to operate in extremely mineralized soil with a 3 position mineralization switch. It comes with either a 6 1/2" or a 10" elliptical search coil for the same great price. Backed by Fisher's Lifetime Warranty*.

Which Gold Bug to Choose? Both were designed for the sole purpose of finding gold nuggets but both are distinctly different. The Gold Bug-2 offers ultra-high frequency allowing the user to search deeper for the tiniest flakes. This frequency difference creates a real advantage in the ability to search side-by-side with the original Gold Bug.

*Manufacturers suggested retail price for units with 6 1/2" or 10" search coils.

UNDERWATER

high performance, submersible, target ID

CZ-20 Quicksilver

Underwater, in the surf,
on the beach, anywhere,
in all kinds of weather.

Go anywhere, do anything, with the all-weather target ID machine that's leakproof to 250 feet deep, the CZ-20 Quicksilver. Its patented electronics make it deep-seeking while it ignores the destabilizing effects of salt water, plus, it offers three tones to identify varying types of metal with faint-target audio boost. Backed by Fisher's Lifetime Warranty*.

Available with 10 1/2" search coil for \$1239.⁹⁵

\$1219.⁹⁵*

all-purpose detector

1280-X

Aquanaut \$679.⁹⁵*

CUSTOMER

SERV

Discriminating, simple to use,
rugged & affordable.

Available with 10 1/2" search coil for \$699.⁹⁵

WITH FISHER

The deep-seeking, submersible, Aquanaut features automatic turn on-and-go operation for salt water, fresh water or land use. VF discrimination, target strength LED and our patented quartz-crystal circuitry offers up to 75 hours of battery life. For added ease of use, the control box converts to a belt mount. Backed by Fisher's Lifetime Warranty*.

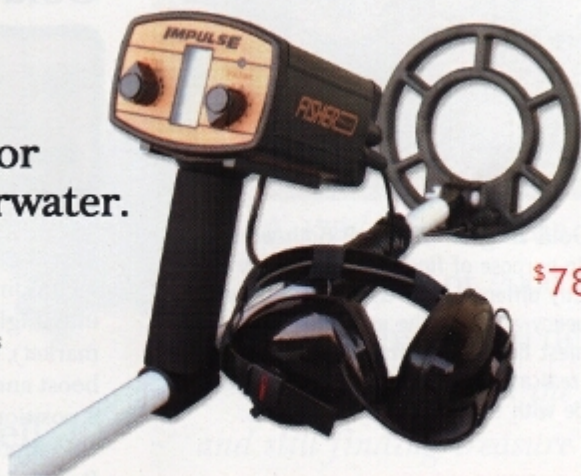

underwater pulse induction

Impulse

Easy to use,
on the beach or
250 feet underwater.

The Impulse offers black-sand and salt water operation and has a high sensitivity to silver and gold. It also detects all metals, and is built to take a beating. It is easy to use and provides over 100 hours of battery life. The Impulse includes a waterproof headset, and the control box easily converts to a belt mount unit. Backed by Fisher's Lifetime Warranty*.

\$789.⁹⁵*

Available with 10 1/2" search coil for \$809.⁹⁵

turn on & go detector

1212-X

Easy to use,
priced low,
& searches deep.

\$199.95*

Easy to use, just turn on and go. No extras but lots of performance and the features that really count. Sometimes less is more; compare the 1212-x to any detector in its price range and you'll agree. Backed by Fisher's Lifetime Warranty*.

"I'm a "Fisher man" for life, not only because of a great product but because I called your factory and was greeted by the nicest people that made me feel my order was special."

Edward Fisk, Taunton, MA, February 2000

Find it... with FISHER

pg. 6

high performance detector

1225-X

High performance,
& deep detection,
for a low price!

\$349.95*

If you're looking for affordable depth, discrimination and ease of operation, this is the detector to check out. Fisher detectors are known for their extraordinary ability to penetrate mineralized soil. The 1225-x is no exception... it goes deep. VLF slow motion discrimination utilizes double derivative circuitry to ignore ground minerals and junk without having to whip the search coil back and forth. High performance for a low price. Backed by Fisher's Lifetime Warranty*.

*Manufacturers suggested retail price for units with 8" search coils.

SPECIALITY

cache finder

Gemini-3

\$599.95*

Fisher's two box has a reputation for being the best. Goes deeper, & traces farther!

Two box treasure hunters know that Fishers Gemini-3 has a reputation for being the best there is. Designed to locate deep objects; depending on ground mineralization and target size objects may be detected as deep as 20 feet! The Gemini-3 goes deeper, traces farther and is easier to use than any other cache finder in its class. Backed by Fisher's Lifetime Warranty*.

CW-10 concealed weapons metal detector

A hand-held detector easy to operate, balanced, lightweight, & dependable.

Safeguard secure-sensitive areas and other public places. Backed by Fisher's Industrial 2 year warranty.

\$200.00*

SIMPLE & EASY TO USE

PERFORM

"Having tested so many different brands, when maximum depth WITH target I.D. is called for, Fisher is the chosen brand."

Thomas J. Dankowski, NASA Engineering, Kennedy Space Center.

differential induction magnetometer

Fx-3 Ferro Probe

Designed to reach objects beyond the reach of ordinary detectors.

\$449.95*

Designed to locate iron and steel relics, property markers, pipes and other large ferrous objects buried beneath the reach of ordinary metal detectors. The Fx-3 is extremely sensitive to objects with large surface areas, highly magnetized objects and long objects buried vertically. It is a waterproof probe with simple, one knob operation. Backed by Fisher's Industrial 2 Year Warranty.

INDUSTRIAL

valve & box locator

M-65

All-metal, no-motion metal detector.

The M-65 provides ultra-sensitivity, uncanny accuracy and maximum ground penetration. These features combine to eliminate any guesswork in pinpointing "hidden" metal objects. The M-65 can tune out the semi-conductive ground, minerals, and vegetation, which can produce false responses from a detector.

valve & box locator

M-96

Push-button tuning, all-metal, no-motion.

The M-96 features push-button tuning, allowing the user to quickly and easily maintain optimum sensitivity to buried metallic objects for easy pinpointing. This is combined with special Auto-Tune circuitry that provides a continual, but gradual, retuning of the M-96 to counteract any drift caused by temperature and humidity changes.

THE FIRST THE BEST REPUTATION SINCE 1931

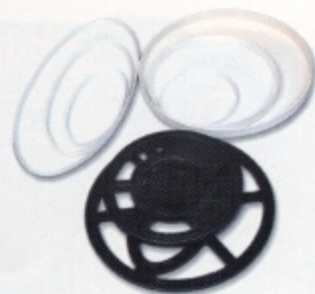

Our Fisher Family.

Fisher welcomes your comments, suggestions, stories, photos, literature, and odds & ends. You could even appear in Fisher's famous World Treasure News. Call, write, fax, e-mail or stop by our factory and show us what YOU found with your FISHER.

Coil Covers

Protect your search coil from wear and damage with these inexpensive, snap on, lightweight detector protectors.

Search Coils

The small coils are great for high density trash areas, highly mineralized soil and hard to reach tight spots. The big coils go 10-20 percent deeper and cover a lot more ground with each sweep. All are completely waterproof.

Headphones

Most treasure hunters agree, the most important accessory you can get is a good set of headphones. Reduce background noise and hear those faint, deep signals.

Recharge Kits

Never buy batteries again. Includes nicad batteries and two chargers: one for 12 volt, negative ground auto cigarette lighter and a 110 volt wall socket. Also available: a converter for foreign batteries.

Cases & Bags

Lightweight, tough, and good looking. These cases and vinyl bags are a great way to travel or store your detector.

Books

For how-to information on everything from coin shooting and nugget hunting to underwater treasure hunting.

Straps & Harnesses

Heavy duty straps & harnesses with velcro closure.

Fisher Gear

Look your best while using the best. Everything from hats & shirts to coffee cups and cash/trash aprons.

FISHER FEATURES

Subject to improvement, modification or change without notice.
