

Find gold with the Fisher Gold Bug!

The metal detector engineered for one job ... find gold nuggets in mineralized soil.

Many gold bearing areas are literally peppered with small nuggets just inches below the surface. The trouble is, most metal detectors pass right over them. The nuggets are too small and the ground too mineralized. But not for the Gold Bug. It performs where others can't. User's have already reported finding thousands and thousands of nuggets in highly mineralized soil from here to Australia.

Only 2.9 pounds with a cushioned arm rest and grip, double locking fiberglass stem, push-button retune and double derivative, quartz crystal locked electronics. All backed by a 5 year Limited Warranty and the world's oldest and proudest name in metal detectors.

Instant hipmount! Just slip the control housing off the handle and onto your belt. No nuts, bolts or extra parts.

Three hot all-metal modes manually ground compensated by two knobs: a small, single-turn coarse adjust stacked on a large, 16 turn superfine adjust.

Waterproof search coils for just about any situation: optional wide-scan, deep-search 14" elliptical; standard all-purpose 10" elliptical; optional 6-1/2" elliptical for tight spots and uneven mineralization.

- FEATURES -

- Powerful 19 KHz VLF-ground rejection. High sensitivity to gold
- 16-turn, fine-tune ground adjust
- Auto-Tune and No-Motion modes with threshold tone; silent running Motion Mode
- Double-derivative, quartz-crystal locked electronics
- Push-button instant retune
- Convertible to hipmount
- Only 2.9 pounds. Cushioned arm rest and grip
- Standard 10 inch elliptical search coil; optional 14 inch elliptical, 6-1/2 inch elliptical
- Double locking fiberglass stem
- Built-in detector stand
- Drop-in batteries, long battery life
- Five year limited warranty

SPECIFICATIONS¹

• Length ²	Extended..... 55"	• Search Coil.....	Type.....	Elliptical, Co-Planar
	Collapsed..... 46"		Size.....	10" X 5"
• Weight ²	Complete..... 2.9 lbs.		Shielding.....	100% E.S.I. ⁵
	Control Housing..... 1.0 lbs.		Interchangeable.....	Yes
	Handle and Coil..... 1.9 lbs.		Waterproof.....	Yes
• Frequency.....	VLF Search..... 19.2 KHz		Cable Length.....	7'
	Audio Target	• Audio Output.....	Speaker.....	2", Moisture Resistant
	Response..... (VCO) ³		Headphone Jack.....	1/4"
• Operating Modes.....	1. All Metal..... Auto Tune with			stereo/mono
	threshold ⁴	• Handle Mount/Hip Mount		
	2. All Metal..... Motion,	Convertible.....		Yes
	no threshold ⁴	• Built-in Arm Rest and		
	3. All Metal..... No Motion,	Detector Stand.....		Yes
	with threshold	• Batteries.....	Type.....	(2) 9V Transistor
• Trash Discrimination.....	No		Life-Carbon Zinc.....	15-20 Hours ²
• Manual Ground Adjust.....	Yes		Life-Alkaline.....	35-50 Hours ²
• Manual Threshold Tuning.....	Yes (Auto Tune	• Warranty ⁶		5 Year Gold Seal
	and No-Motion			Limited
	Modes)			

CONTROLS

- **THRESHOLD:** Small shaft on rear of control housing. Controls threshold tone in Auto-Tune and No-Motion modes.
- **MODE:** Three-position toggle switch: 1. Motion Mode for maximum sensitivity in low to moderately mineralized ground. 2. No-Motion Mode for pinpointing or working in confined areas. 3. Auto-tune. The operating mode of choice for nugget hunting in highly mineralized soil.
- **BATTERY TEST/SENSITIVITY:** Dual purpose potentiometer with switch for audio-tone battery test. Controls sensitivity to targets, electrical interference and ground minerals.
- **GROUND REJECT:** Dual knob control used to electronically tune the search coil to ignore ground minerals. A small, single-turn coarse adjust knob is stacked on a large, 16-turn fine tuning control.
- **VOLUME:** Turns the power on and controls signal response volume.
- **HEADPHONES:** Jack for most mono and stereo headphones with 1/4 inch plug.
- **RETUNE:** Retunes the Gold Bug to operator's preset threshold tone in no-motion mode. Also used to narrow target response of large targets for pinpointing in no-motion mode.

OPTIONAL ACCESSORIES

- 6.5 inch Elliptical Search Coil
- 14 inch Elliptical Search Coil
- Coil Covers
- Carrying Bag
- Hard Carrying Case
- Stereo Headphones
- Book: Advanced Nugget Hunting With The Fisher Gold Bug
- Raincover for Control Housing
- Holster for Control Housing

1. Subject to improvement or modification without notice.
2. Approximate.
3. Voltage Controlled Oscillator. Volume and frequency increase as target is approached. This effect is most pronounced in the No-Motion mode.
4. The Gold Bug is a "motion" detector in the Auto-Tune and Motion modes. The search coil must be moving at least slightly to detect a target.
5. Electro-Static-Insulated to eliminate certain types of false signals.
6. U.S.A. warranty is one year parts and labor plus four years parts only. See warranty card for details. See local distributor for warranty outside U.S.A. Fisher Research Laboratory does not warrant suitability to specific use. Fisher Research Laboratory shall in no event be liable for any direct, incidental, consequential or indirect damages.
