Treasure Hunting Pays Off!

The Consumer BUYER'S GUIDE

"Garrett's new A·D·S· Detectors have won international acclaim for their super deep detection of coins, caches, relics, and superior performance in prospecting. "I know you will be more successful with a Garrett A·D·S·!"

Charles Garrett

Introducing the **GARRETT A·D·S·***
*AUTOMATIC DETECTION SYSTEM

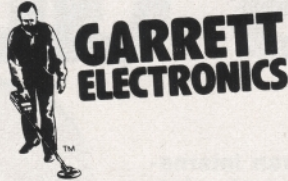

GARRETT

THE WORLD'S FINEST QUALITY METAL DETECTORS!

The Garrett Assurance of Quality

ACKNOWLEDGED WORLD-WIDE LEADER
Quality-Built Metal Detectors

Dear Friend,

This publication has been prepared to introduce you to the great, internationally recognized outdoor hobby of treasure hunting. It is our sincere desire to share with you the enjoyment and expertise gained from our many years of experience in all the related fields of treasure hunting.

In the following pages we will show you the people, facilities, and the quality line of handcrafted metal detectors and accessories responsible for so much of the rapid growth of the hobby. You will meet some of the world's accomplished treasure hunters and read tips on why they continue to be successful. You will also be introduced to the books written by many of these experts. These "how to" books will speed you on your way to success.

The Garrett Museum of Treasures Found is maintained here at the factory for our visitors. We welcome your letters and 'phone calls and encourage you to visit us soon.

Sincerely,

Charles Garrett

2814 National Drive • Garland, Texas 75041 • 214/278-6151

LIMITED TWO (2) YEAR WARRANTY

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. Garrett assures you of the finest electronic equipment and service.

Garrett Electronics, Inc. ("Garrett") warrants that each metal/mineral detector manufactured by it will be free from defects in materials and workmanship for a period of two (2) years. (Warranty is transferable during this period.)

Should any failure to conform to the foregoing warranty appear within the two (2) year warranty period, Garrett will, upon written notification to it at 2814 National Drive, Garland, Texas 75041, at its option repair or replace the defective detector without charge, except any transportation charges for the return of the detector to Garrett. This warranty does not cover any detector that has been abused, tampered with, or repaired by an unauthorized party.

**GARRETT
ELECTRONICS**

Meet Charles Garrett...

Internationally Known Electronics Engineer, Treasure Hunter, Author, and Manufacturer... Your Assurance of Quality, Performance, and Dependability.

Charles Garrett, President of Garrett Electronics, began treasure hunting in 1947. Following a four-year Navy tour of duty he earned his Bachelor of Science degree in Electrical Engineering. During the next few years with Texas Instruments and Teledyne-Geotech, his electronic designs included military and aerospace equipment such as radar circuits, satellite components, and seismograph circuitry used on the moon by Apollo astronauts.

In 1966 Mr. and Mrs. Charles Garrett founded Garrett Electronics. They recognized that the metal detector industry needed new ideas and a new line of versatile, quality instruments. During the years that followed,

Garrett's customer service and quality of product have always been emphasized. As a result, Garrett Electronics has become the industry's leader in advanced electronic metal detector instrumentation.

Mr. Garrett's personal enjoyment of treasure hunting and the need for extensive field testing of all new Garrett detectors has led him to many different parts of the globe. The expertise acquired on these trips and through association with many of the world's professional treasure hunters is reflected in his products. The quality, versatility, and dependability of his instruments have brought world-wide acclaim from treasure hunters.

Charles is an internationally known author, having written numerous technical papers, treasure magazine articles, and such widely distributed books as *Successful Coin Hunting* and *Treasure Hunting Pays Off!* He is co-author of two other books, *Electronic Prospecting* and *The Complete VLF/TR Metal Detector Handbook*.

Mr. Garrett's team of carefully selected, widely experienced personnel share in his enthusiasm and his desire to continue to provide the very best in metal detection equipment and customer service. This total involvement by the man and his people is your personal guarantee of quality, performance, and dependability... from Garrett!

Charles Garrett and Bob Pódrasky, Chief Engineer, study the circuit of the highly successful VLF/TR's that have not been matched or duplicated by the industry. Charles and Bob work closely on all new ideas and advanced circuitry.

From the gold mining districts of the Northwest to Europe's phenomenal treasure hunting sites, Charles travels extensively, using and testing Garrett equipment, insuring its continued performance regardless of the climate or field environment. In the top photograph, Roy Lagal and Charles prospect electronically for wire gold pockets. (Lower photo.) In Greece Charles and Vaughan Garrett search a 400 B.C. site for coins and ancient relics.

"I love to write," says Charles. "I find tremendous enjoyment in sharing with all the treasure hunting and metal detecting knowledge I have gained from my thirty-plus years in this fascinating field."

"The world over," says Charles, "people are the same. The thrill of discovery makes treasure hunting one of the most enjoyable and rewarding activities in God's great outdoors!" Charles and Vaughan Garrett and Frank Mellish of London, England, search for coins at this windmill park site in Holland.

Charles' twenty years of military, space, and detector equipment manufacturing experience are reflected in every detector instrument manufactured by Garrett. Douglas Hardin, responsible for purchasing and production planning, and the entire staff at Garrett Electronics take pride in the fact that the detectors they produce are of the best in quality, materials, and workmanship.

Garrett Electronics Close-Up...

We want you to feel a part of the great Garrett team. We are proud of our company and our leadership role in the industry. Our engineers will continue their exhaustive research

and development while maintaining close contact with both the professional and the hobbyist in the field. Our office, production, and customer service personnel are dedicated to

providing you with the best possible service and product quality. The Garrett team effort is your assurance of the finest in metal detector instrumentation!

1. Whenever you are in the Garland area (near Dallas), stop by for a visit. You are always welcome!

2. All kinds of "treasure found" are displayed in the museum. In our demonstration area the operating capabilities of all our detection equipment are explained to customers.

3. Bill Bosh is Garrett's Dealer Coordinator. Garrett detectors are marketed in every state in the U.S. and in several foreign countries.

4. On a continual basis, our engineering and design team, led by Bob Podhrasky, improve and update our products, as well as develop new and more efficient detector instrumentation.

5. This is our final assembly area where all Garrett detectors are carefully assembled and tested. Charles Garrett personally oversees all operations.

6. Each Garrett detector receives 300% inspection. Every part and assembly is 100% quality control inspected at least three times. Garrett detectors are built to last!

7. Detector orders come in from all over the world. Orders are speeded through our computerized system. Fast, accurate shipping to our customers and dealers, regardless of destination, is our byword.

8. Our shipping personnel make an early start each day to insure that all orders are shipped, usually, by the first day following their receipt.

9. Our customer service and repair departments speedily take care of any problems or service requirements you have.

10. We maintain a continuing "in touch" program of factory seminars, training and informing Garrett dealers of the latest in detectors and products and know-how so that they may serve you better.

11. Garrett detectors have become known world-wide through our international expansion program. Charles Garrett visits Frank Mellish, our United Kingdom representative, at his London treasure hunting supplies shop.

12. Garrett's new and up-dated equipment is demonstrated to factory dealers so that they know how to instruct their customers in the correct use of the newest and best equipment.

Detector series – how they compare

DEEPSEEKER

ADVANTAGES: Extreme Depth, particularly in the VLF ground canceling mode, readily detecting deeper than air tests. Universal capabilities, especially A•D•S• models, include SUPER DEPTH and unparalleled performance in CACHE, COIN and RELIC HUNTING and PROSPECTING. **DISADVANTAGES:** Excessive trash (nails, etc.) may present problems, but if super-sensitivity is desired, some junk must be dug. TR mode produces excellent depth, even with full discrimination, but mineralized ground operation requires extra skill.

"GROUNDHOG"

ADVANTAGES: Offers SUPERIOR COIN HUNTING DETECTION! Outstanding performance in TR Discriminate mode. Lightweight, compact, A•D•S• models. Universal capabilities include CACHE and RELIC HUNTING and PROSPECTING using a combination of both VLF and TR modes. **DISADVANTAGES:** Less depth in VLF ground canceling mode when compared to Deepseeker. Heavy mineralization causes TR operating difficulty. Overcome with correct usage and understanding of controls.

ADVANTAGES: TR's are excellent for coin hunting if you do not want the VLF's super-depth and mineral-free operation. Correctly designed discriminating TR's with Push Button Tuning are easy to use and their lower cost makes them popular coin hunting detectors. **DISADVANTAGES:** The TR's operating characteristics make them difficult to operate over highly mineralized soil. Not recommended for Cache and Relic Hunting and Prospecting.

ADVANTAGES: Good performance in all phases of treasure hunting. Excellent discrimination capabilities. Reasonable performance over iron mineralized soil. **DISADVANTAGES:** Definitely not as sensitive as other series. The greater the ground mineralization, the greater the difficulty in operating the BFO. No push button necessitates greater control manipulation.

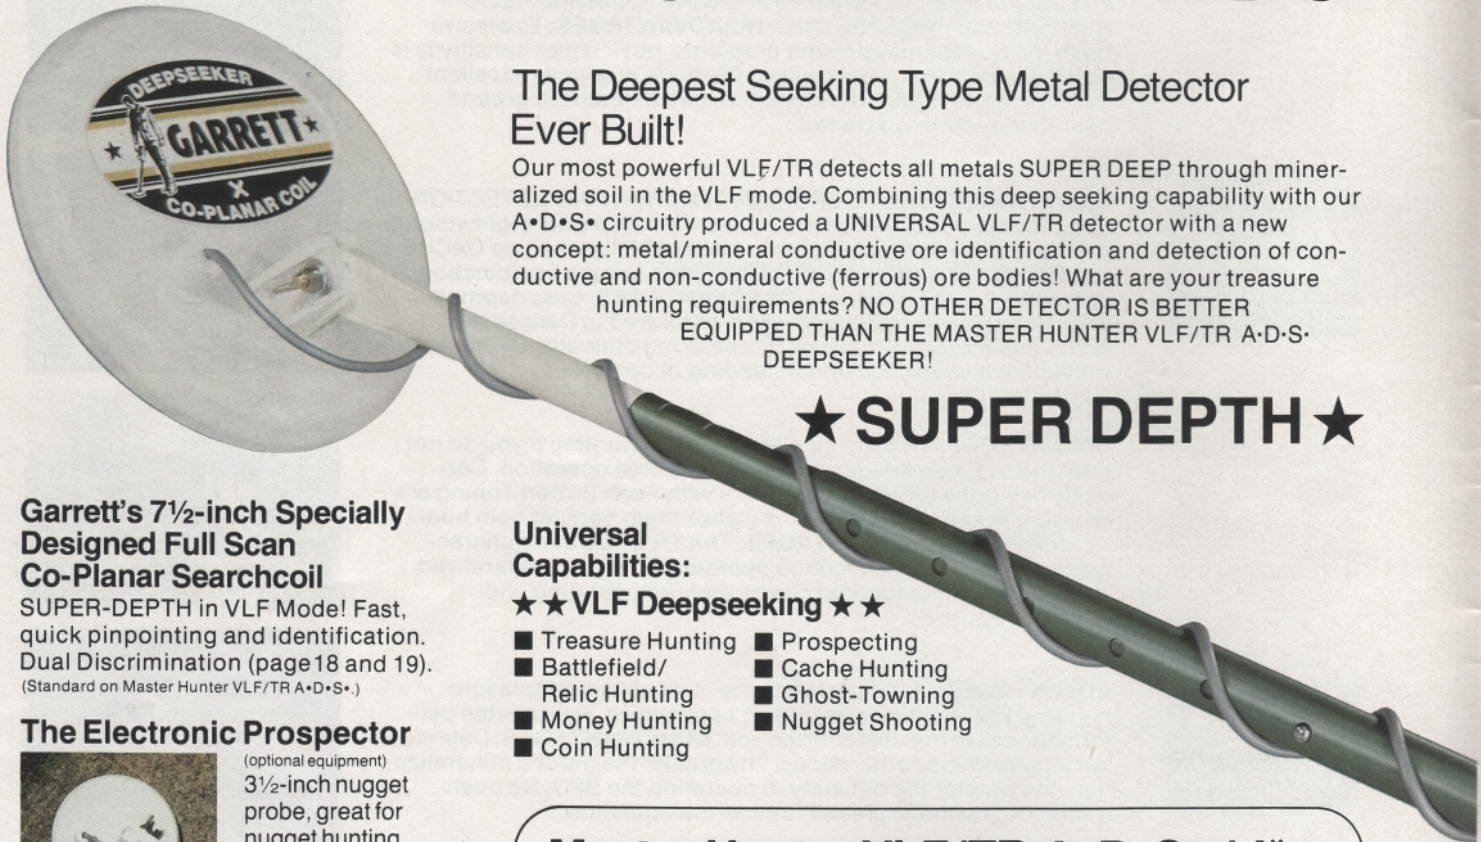

NOTE: All Garrett detectors have discriminating (trash rejecting) capabilities.

INTRODUCING...A SUPERIOR METAL DETECTOR!
The **MASTER HUNTER** A•D•S•
VLF/TR DEEPSEEKER

The Deepest Seeking Type Metal Detector Ever Built!

Our most powerful VLF/TR detects all metals SUPER DEEP through mineralized soil in the VLF mode. Combining this deep seeking capability with our A•D•S• circuitry produced a UNIVERSAL VLF/TR detector with a new concept: metal/mineral conductive ore identification and detection of conductive and non-conductive (ferrous) ore bodies! What are your treasure hunting requirements? NO OTHER DETECTOR IS BETTER EQUIPPED THAN THE MASTER HUNTER VLF/TR A•D•S• DEEPSEEKER!

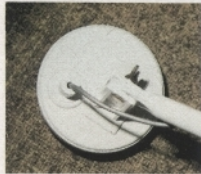

★ SUPER DEPTH ★

Garrett's 7½-inch Specially Designed Full Scan Co-Planar Searchcoil

SUPER-DEPTH in VLF Mode! Fast, quick pinpointing and identification. Dual Discrimination (page 18 and 19). (Standard on Master Hunter VLF/TR A•D•S•.)

The Electronic Prospector

(optional equipment)
3½-inch nugget probe, great for nugget hunting and ore sampling.
Model 22091
\$49.95

8" Co-Axial Searchcoil

(optional equipment)
EXTREMELY RUGGED, submersible, gives great depth. For use especially in mines and open

areas where 60-cycle interference is an EXTREMELY DIFFICULT PROBLEM.

Model 22086 \$59.95.

10½" Underwater Searchcoil

(optional equipment)
Can be lowered 50 feet to detect coins and large objects at great distances below searchcoil. Use

with all Garrett VLF/TR Deepseekers. 50 feet nylon cord.
Model 22022 \$99.95.

Universal Capabilities:

★★ VLF Deepseeking ★★

- Treasure Hunting
- Battlefield/Relic Hunting
- Money Hunting
- Coin Hunting
- Prospecting
- Cache Hunting
- Ghost-Towning
- Nugget Shooting

Master Hunter VLF/TR A•D•S• 14"

(with 7½" and 14" searchcoils) The 14-inch searchcoil produces the UTMOST IN EXTREME DEPTH on caches, relics, veins, large nuggets and buried treasure. Meets the needs of all treasure hunters, prospectors, utilities, and field crews. (14" coil Model 22107, \$119.95 can be used on other Deepseekers.)

\$399⁹⁵

Model 11093

Master Hunter VLF/TR A•D•S• 10½"

(with 7½" and 10½" searchcoils) The 10½-inch searchcoil detects coin sized and larger objects to EXTREME DEPTHS. This detector is our LIGHTEST WEIGHT Deepseeker. For use by all who are involved in cache, relic, and coin hunting; prospecting; and deep searching. (10½" coil Model 22106, \$79.95. can be used on other Deepseekers.)

\$369⁹⁵

Model 11094

Designed for **EXTREME DEPTH** in VLF ground canceling mode: excels in Treasure, Cache, and Relic Hunting; Nugget Shooting; and Prospecting. Good Coin Hunting results may be obtained in TR Discrimination Mode in light to medium mineralized soil.

THE FIRST AUTOMATIC DETECTION SYSTEM

Garrett Electronics proudly presents the industry's first fully Automatic Metal Detection System. After countless hours of design, testing, and perfecting, we now add this Universal Applications detector... the Garrett Master Hunter VLF/TR A•D•S• Deepseeker... to our already famous line of Deepseeker detectors. The most remarkable feature of this new Garrett instrument is its totally automatic operation. After you initially tune and preset the discrimination level, you have true, one-hand operation. The

handle-mounted, spring-loaded Master Control does all the work... electronically! A slight pressure to the left activates the VLF ground canceling mode and the instrument is tuned exactly to your pre-determined level. A slight pressure to the right... the TR Discrimination mode is activated and the detector is retuned! And, as an added plus, a panel switch gives you the option of full-time automatic tuning! You'll love the convenience, ease of operation, and perfec-

tion we have built into this Automatic Detection System instrument! Respected the Treasure Hunting world over, Garrett's VLF Ground Canceling Circuitry, incorporated into this new A•D•S• detector, has been greatly improved. Maximum sensitivity with minimum battery drain has been achieved. The simplified control panel permits quick-to-learn, total control of this detector's superior capabilities. When you require the **Master's Touch**, there is only one... the Garrett A•D•S•!!

A•D•S• Master Control

Instant electronic mode-selection and re-tuning gives ease of operation never before achieved!

Patent Pending

FULLY ADJUSTABLE TR DISCRIMINATION
Gives perfect operation from total acceptance to total rejection of undesirable objects.

EASI-VIEW METER

NEW LOUD SIGNAL-ALERT SPEAKER.

SLIDE-IN BATTERY TRAY

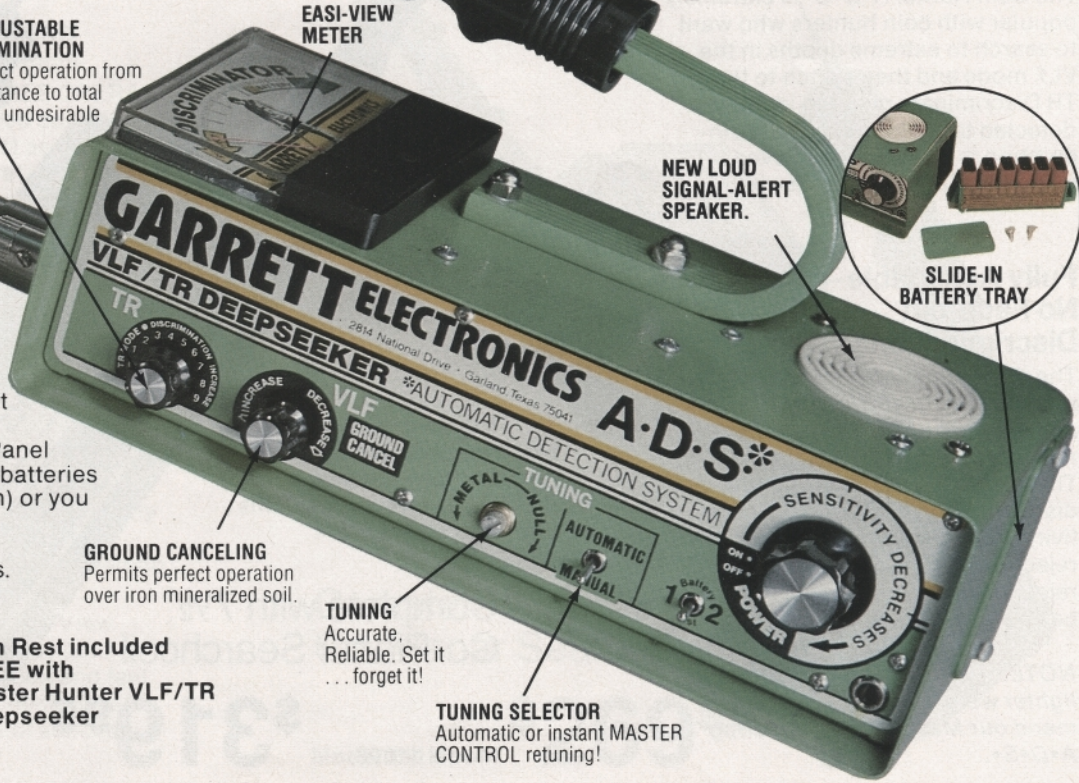

- Adjustable, Quick-Lock Stem
- Sling and Hip Mount Capabilities
- Protected Control Panel
- Six Eveready 9-volt batteries (15¢/hour operation) or you may use the new rechargeables!
- Weight: 4 lbs, 12 ozs. (2.15 kgs.)

GROUND CANCELING
Permits perfect operation over iron mineralized soil.

TUNING
Accurate. Reliable. Set it... forget it!

TUNING SELECTOR
Automatic or instant MASTER CONTROL retuning!

Arm Rest included FREE with Master Hunter VLF/TR Deepseeker

The **COIN HUNTER** A•D•S• VLF/TR DEEPSEEKER

**Garrett's
7 1/2-inch
Specially Designed
Co-Planar
Searchcoil**

5 KiloHertz Operation Produces Super Depth and Pinpoint Accuracy on Coins!

The Coin Hunter A•D•S• is extremely popular with coin hunters who want to search to extreme depths in the VLF mode and then switch to the TR Discriminate mode to identify detected targets quickly. Fast pinpointing is also easily achieved using the Master Control switch.

Fully Adjustable— No Fade-out Discrimination!

The discrimination control allows minute adjustments needed to achieve exacting acceptance or rejection of conductive targets. These detectors DO NOT suffer from discrimination FADE-OUT! Sensitivity is only SLIGHTLY reduced as rejection is increased to pulltab rejection. Nickels and small rings will be rejected at the pulltab setting.

NOTE: If you prefer a more compact, lighter weight detector, we recommend our Masterful "Groundhog" A•D•S•.

Super Depth, VLF Mode, Coin Hunting!

...This SUPER DEPTH detector is exactly the same instrument as our universally acclaimed Master Hunter VLF/TR A•D•S• Deepseeker (see pages 6 & 7), except it is equipped with just one searchcoil: Garrett's popular 7 1/2-inch searchcoil. You get Fully Adjustable Discrimination and Garrett's New Automatic Detection System control circuitry. The A•D•S• Master Control gives you instant electronic mastery over the detector's superior capabilities.

A•D•S• Master Control

Scan to super VLF depth! Then, instantly switch to TR for precise target identification!!! Retuning and mode selection occurs simultaneously.

Patent Pending

The Deepseeker searchcoils described on page 6 may be purchased for use with this instrument.

Complete with 7 1/2"
Co-Planar Searchcoil

PUSH BUTTON DEEPSEEKER

The **MARKSMAN** P.B. VLF/TR DEEPSEEKER

Garrett's
7½-inch
Specially Designed
Full Scan
Co-Planar
Searchcoil

A Detector Worthy of Its Name!

This is the fifth year Garrett VLF/TR ground canceling, push button detectors have set their mark upon the treasure hunting world. Depths have been reached that were never before possible with other type detectors. Most of the earth's toughest iron mineral soil has been conquered. Operating ease, performance, and reliability have become our marks of excellence. Compare this quality instrument with competitive detectors costing up to \$400 and you'll see why the Marksman is a metal detector worthy of its name!

Compare the Marksman Feature-For-Feature With Higher Priced Competitive Detectors:

1. PINPOINT ACCURACY AND SUPER-DEPTH in VLF mode.
2. SIMPLE, MINERAL-FREE OPERATION with a single knob adjustment! You operate just as if the ground were not there!
3. DUAL DISCRIMINATION at super-depths. All Garrett VLF/TR's are capable of up to 90% junk iron rejection (VLF mode) and full discrimination in the TR mode!
4. UNIVERSAL CAPABILITIES! The Marksman can perform just about any given task! For deeper seeking consider the optional 10½" searchcoil. Model 22106.
5. ROCK-SOLID STABILITY! The electronic and mechanical stability of Garrett detectors let you concentrate on hunting, not on keeping your detector tuned!
6. The protected panel, Easi-View meter, slide-in battery tray, and Garrett's impeccable look and feel of quality top off the check-list of features assuring you of success... with the Marksman!!!

Push Button Tuning

To retune the Marksman instantly and precisely... JUST PUSH A BUTTON!

The Deepseeker searchcoils described on page 6 may be purchased for use with this instrument.

Complete with 7½"
Co-Planar Searchcoil

\$269⁹⁵

Model 11110

A PERFORMANCE BREAKTHROUGH!

The **MASTER HUNTER** A•D•S•
VLF/TR "GROUNDHOG"

A Superior Coin Hunter with Universal Capabilities!

The "Groundhog" has long been known for its superb coin hunting achievements. With Garrett's new A•D•S• circuitry, the "Groundhog" has become a SUPERIOR, DISCRIMINATING COIN DETECTOR WITH UNIVERSAL CAPABILITIES! Whatever your requirements – the best in TR COIN HUNTING, deep searching for caches and relics, correct metal/mineral gold prospecting ability, or the ideal detector in a competition hunt – the MASTER HUNTER VLF/TR A•D•S• "GROUNDHOG" WILL DELIVER!

Garrett's 7½-inch, Specially Designed, Full Scan, Co-Planar Searchcoil

Best coin hunting searchcoil! Super depth, accurate pinpointing, Dual Discrimination (page 18), submersible, Faraday-shielded. Standard on Master Hunter A•D•S• "GROUNDHOG"!

10½-inch Specially Designed, Full Scan, Co-Planar Searchcoil

Same specifications as for the 7½-inch searchcoil, but designed for scanning wider,

deeper for coins, caches, relics. Slightly heavier. Standard on Master Hunter A•D•S• "GROUNDHOG."

Model 22105 \$79.95.

(Can be used on any other "Groundhog.")

10½-inch Underwater Searchcoil

Can be lowered 50 feet to detect coins and large objects at great distances below searchcoil. Use

with all Garrett VLF/TR "Groundhogs." With 50 feet nylon cord.

Model 22021 \$99.95.

Universal Capabilities:

★★ TR Coin Hunting ★★

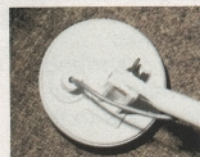

- Treasure Hunting
- Ghost-Towning
- Cache Hunting
- Nugget Hunting
- Money Hunting
- Relic Hunting
- Prospecting

Ground Canceling Mineral-Free Operation!

The "Groundhog" ... the Lightweight Compact Detector for the Serious Coin Hunter!

Our Master Hunter VLF/TR A•D•S• Deepseeker is *the* PROFESSIONAL'S DETECTOR. There are, however, those who prefer a lighter, more compact detector with excellent TR Discriminating Mode operation, even if they give up a slight amount of depth in VLF mode. If these are also your preferences, don't hesitate... choose the "Groundhog"!!

The Electronic Prospector

(optional equipment)
3½-inch nugget probe, great for nugget hunting and ore sampling.
Model 22090 \$49.95

7½-inch Co-Axial Coil

Rugged, submersible, uniform detection pattern. Eliminates back-reading. All-purpose searchcoil.

Model 22089. \$59.95.

The Famous Coin Hunting Garrett "Groundhog"

This internationally known detector has been named the "GROUNDHOG" because of its proven track record of reaching previously unobtainable TR Discriminating depths for those old, rare coins. Its ease, speed, and depth while searching outclasses them all!

Super-depth coin hunting detector in TR Discrimination Mode. Also excels in Cache, Relic, and Nugget Hunting in VLF Mode!

GARRETT'S A•D•S• AUTOMATIC DETECTION SYSTEM

Garrett Electronics proudly introduces the industry's newest, most advanced coin hunter... the Garrett "Groundhog" A•D•S•! This space-age cousin to the "Groundhog" family, which is widely respected in coin-hunting circles, uses the remarkable, new Garrett Automatic Detection System. After you initially tune and preset discrimination, you have instantaneous one-hand opera-

tion! Press the Master Control Switch momentarily to the left; the VLF mode is activated and tuned. Press to the right; the TR mode is activated and tuned... all electronically! And, a panel switch allows you to choose between manual or automatic tuning! By combining this superior electronic system with precise pinpointing and the power to punch through difficult ground conditions, we have

produced for you, the detector with more than enough ability to locate those old, deep and valuable coins others leave behind! At Garrett Electronics we use what we sell! Share in our success with the industry's Superior Coin Detector and acquire the Master's Touch with the GARRETT "GROUNDHOG" A•D•S•!!

A•D•S• Master Control

Instant electronic mode selection and retuning give ease of operation never before achieved...!

The **COIN HUNTER** A•D•S• VLF/TR "GROUNDHOG"

**Garrett's
7½-inch
Co-Planar
Full Scan
Searchcoil**

**Number One in
Pinpointing and Red-Hot
Coin Sensitivity**

**15 KiloHertz Operation
Combines Stability with
Super-sensitivity.**

While the 5 kHz Deepseeker frequency gives super VLF depth, the 15 kHz "Groundhog" is designed to give excellent TR Discriminating Mode operation over most mineralized ground. The frequency, searchcoil design, and Garrett VLF/TR A•D•S• circuit combine to produce an unbeatable series of stable coin hunting detectors.

**The Coin Hunter A•D•S•
"Groundhog" Will Meet
Almost Any Challenge!**

The greatest majority of detector owners are coin hunters. They search primarily for coins, but often a lead to a money cache or other treasure comes along that is too good to pass up. Don't worry that the "Groundhog" cannot perform well enough! You can expect superior performance and depth in any endeavor you wish to pursue. The "Groundhog" was designed, field tested, and proven to meet almost any challenge!

Professional Coin and Field Competition Detector

This Superior Coin Hunting detector is exactly the same instrument as our internationally acclaimed Master Hunter VLF/TR A•D•S• "Groundhog," except it is equipped with just one searchcoil: Garrett's popular 7½-inch coin hunting searchcoil that lets you find those old, rare and deep coins missed in areas worked many times by others. Even in trashy areas the Coin Hunter allows rapid coin isolation and identification. On salt water beaches you can expect outstanding results in the TR Discriminating AUTOMATIC Mode. In the gold country, search the most difficult mineralized ground for gold nuggets in the VLF ground canceling mode. A quick flip to the TR mode lets you instantly reject those troublesome mineralized "hot rocks" while positively identifying conductive metals.

In the important area of competition hunts, you can expect top performance from this detector. The record of winners using the Coin Hunter VLF/TR A•D•S• "Groundhog" proves it!

The A•D•S• Master Control

Provides instant retuning and super-accurate pinpointing, as well as effortless VLF-TR mode changes!

The GARRETT BFO

LARGER COIL FOR DEEPER SEEKING

SMALL COIL FOR COINS, SMALL OBJECTS, AND PINPOINTING

The General Purpose, Metal/Mineral Capabilities of the Garrett Hunter BFO Series:

Garrett BFO's are acknowledged world-wide as true masters of all Beat Frequency Oscillator Detectors. They perform well in practically every treasure hunting task. If you prefer BFO operation but realize the BFO will not produce depth equal to that of the VLF/TR, then buy a Garrett BFO with confidence!

Optional Treasure Hunter BFO Searchcoils

- 3½-inch Single. Model 22064. \$39.95.
- 13x24-inch Single. Model 22072. \$79.95.
- 5-inch Underwater, 50-foot cable, and nylon rope. Model 22023. \$89.95.
- 3½" & 6½" Dual, Model 22069. \$79.95
- 5" & 12" Dual, Model 22071. \$79.95

The Fully Adjustable Discriminating Capabilities:

Garrett "metered" discrimination gives you true BFO operation, plus the ability to reject nails, bottlecaps, aluminum pulltabs, and large metal objects. When you hear an audio response, a glance at the meter will tell you if the target should be dug.

A fully adjustable control lets you set discrimination precisely where you want it!

Zero Drift Stability

Only an occasional retuning is all that is ever necessary with Garrett's ZERO DRIFT STABILITY!

Garrett Patented Dual Coil, Zero Drift Circuitry!

Two independently operated searchcoils are encapsulated within each Dual Coil Search Head: the small coil for coins, small objects, and pinpointing... the larger for deeper searching. To change searchcoils, JUST FLIP A SWITCH! Garrett's patented ZERO DRIFT assures you of rock solid stability! Retuning during operation is practically eliminated!

Choose from 4 Quality Garrett BFO's

Special Prospector Package, Model 11068 with 3½" & 6½" and 5" & 12" Dual Coils and 13" x 24" Single Coil	\$349⁹⁵

Introducing Garrett's New 3-Way Universal Hip Mount!

HANDLE MOUNTED

HIP MOUNTED

SLING MOUNTED

Garrett is first to offer the ability to convert any Garrett detector (except American and International) into three popular configurations. *FIRST*, quickly convert your Garrett into a very efficient, light-weight hip mount detector. *SECOND*, the sling may be attached to the control housing, converting your Garrett into a portable, minimum-weight, sling mount configuration. And, *THIRD*, for the best balance when using larger coils or for extremely fast and wide-sweep coverage, you can attach the control housing to the end of the hip mount handle. Thus, you can see, with Garrett's Universal Hip Mount you have at your command the

greatest maneuverability, speed, and operational possibilities imaginable and without the extra cost of purchasing both a standard and a hip-mount detector. (When ordering separately, please give detector name and model number on which the Hip Mount will be used.) **VERSATILITY IS YOURS FROM GARRETT!!!**

- Hip Mount, A•D•S• Detectors.
Model 16014 \$59.95
- Hip Mount, Push Button Detectors.
Model 16019 \$39.95
- Hip Mount, BFO Detectors.
Model 16020 \$39.95

GET THOSE DEEPER COINS!

This superb 8-ohm headset may be used with any detector or in stereo with your hi-fi. Has coiled cord, 1/4-inch plug, and individual earpiece volume adjustment, thus letting you retain maximum sensitivity produced by full audio harmonic generation. Quality plus!

Model No. 16000 \$19.95

SPEAKER COVER

This quick-attaching cover protects your detector speaker against dust and rain. Fits all Garrett detectors, except American and International.

Model 16040 \$2.95

NEW! TRAVEL- ALL

CARRYING CASE

Ruggedly-built, yet handsome in appearance! All Garrett detectors (including the two-coil Master Hunters) fit snugly into specially-patterned, soft foam inserts. When closed, it looks just like a quality suitcase. The 13x24-inch and larger coils will not fit in this case.

Model No. 16021 \$39.50

ONE-POCKET SHOULDER BAG

Designed for detectors with 8-inch or smaller searchcoils. Naugahyde plastic, waterproof, zippered pockets. Back-packing strap. Protect your detector.

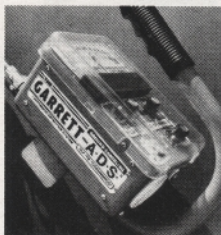

Model 16018 \$11.95

TWO-POCKET SHOULDER BAG

Will carry a detector, headphones, and a complete set of attachments, including coils as large as 13x24-inches. Same construction as one-pocket bag.

Model 16003 \$15.95

"GROUNDHOG" PANEL COVER

This clear plastic cover protects the "Groundhog" (and American) panel, meter, and controls from rain and blowing dust and sand.

Model 16039 \$7.95

DEEPSEEKER & BFO ARMREST

This armrest fits all Garrett Deepseeker and BFO models. Greatly facilitates operation, especially when larger coils are used.

Model 16016 \$10.95

Garrett Detector Series

SEARCHCOIL SKID PLATES

Protects your searchcoils from rock and sand abrasion.

- 7½" Standard. Model 16023 \$3.95
 - 10½" Standard. Model 16024 \$4.95
 - 14" Standard. Model 16044 \$9.95
 - 7½" Elevated. Model 16041 \$4.95
- (Elevates coil one inch above ground. Recommended for beginners.)

VISOR CAP

Colors coordinated with Garrett clothing patches. Crown is one-half mesh. One size fits all.

- Model 16620 \$4.95

COIN HUNTER'S "GOODIES" POUCH

Two pockets, one for coins, rings, and other valuables, and one for items you wish to discard. Constructed of quality, waterproof plastic to keep dirt and moisture from soiling your clothes.

- Model 16002 \$2.95

GARRETT SPEED HANDLE

A joy to use. Gives speed and maneuverability! A quick-adjustment feature gives five operating lengths. Reduces operator fatigue.

- Model 16015 \$14.95

TOUCH-UP PAINT

Small bottle of Garrett Green.

- Model 16042 \$1.95

BUMPER STICKER

Be proud of our great hobby of Treasure Hunting! Display this bumper sticker on your car bumpers. 4" x 12" vinyl.

- Model 15460 \$.65

"GROUNDHOG" ARMREST

Fits all Garrett "Groundhog" models. Greatly facilitates operation, especially with large coils.

- Model 16017 .. \$11.95

Find GOLD!

- NEW GRAVITY TRAP operation
- Injection Molded of High-Impact Plastic. Won't break, dent, or bend. No burning the pan... use acid and magnets to remove iron with ease.
- No greasy slick surface.
- Beautiful green color. Intensive laboratory research proves Gold, Garnets, Sapphires, Precious Gems, Black Sand show better on green.
- Personally autographed by Roy Lagal and Charles Garrett.
- 14-inch Diameter
- Investigate all Black Sand Pockets
- Approved and recommended by Gold Prospectors Association of America and the Lucky Leo's Prospecting School.

The Garrett

"GRAVITY TRAP"®

Gold Pan \$5⁹⁵

Model 16500 POSTPAID

Purchase Garrett's Exclusive "Gravity Trap" Gold Pan and Make Your Weekends and Vacations More Profitable!

This new "GRAVITY TRAP" gold pan, designed by Roy Lagal, life-long prospector and treasure hunter, from Lewiston, Idaho, has SHARP 90° riffles that permit either WET OR DRY panning with such improved efficiency that even beginners will find that "GRAVITY TRAP" GOLD PANNING IS EASY AND PROFITABLE. Recover GOLD, GARNETS, SAPPHIRES, and ANY MATERIAL OF HIGH SPECIFIC GRAVITY. Beginners, weekend hobbyists, rockhounds, and nugget hunters will find that it is FAST AND SURE, whether "WET" panning in streams or "DRY" panning in desert areas. And, let Garrett's "GRAVITY TRAP" gold pan go hand-in-hand with your METAL/MINERAL detector operation. Pan out all those detected black sand pockets. Combine FUN with PROFIT!

DEALERSHIPS AVAILABLE!

Be Sure!

SPECIAL NOTE: Lifetime Guarantee

If your Garrett "Gravity Trap" Gold Pan ever cracks or breaks, simply affix a shipping label to the pan (no packaging necessary) and send it to us by parcel post. We will immediately send a free replacement to you, postpaid, without obligation.

Gold Panning Is Easy

This book, described on page 23, shows you how to find and recover gold. Be successful. Learn the right way! Cat. No. 15054

Technical Product Information, Treasure Hunting Techniques, and Universal Applications....

GARRETT VLF (MINERAL-FREE) SEARCHING IN MINERALIZED GROUND: In the past, detector operators lived with a frustrating problem... ground iron mineralization! In some areas detectors could not even be used, but... no longer is this mineralization a problem!!! With a single knob adjustment on all Garrett VLF/TR's you can zero out iron minerals. Then, you operate just as if the ground were not there!

Garrett VLF/TR's do not have to be operated in some unusual manner, such as whipping or the adjusting of complicated controls. Garrett detector usage stays within tried, proven, and accepted operating methods familiar to all.

UNIVERSAL TREASURE HUNTING CAPABILITIES. Formerly, only BFO's were considered to be all-purpose treasure hunting instruments. Now, the performance of the Garrett VLF/TR detectors surpasses that of the BFO with depth detection many times greater than other type instruments. Garrett VLF/TR's are designed to be fully capable of performing perfectly in coin, cache, and relic hunting and in all phases of prospecting. We have spent thousands of hours in the field both at home and abroad testing, evaluating, and improving Garrett detectors to insure rugged and dependable performance regardless of the task.

DEEPSEEKING. In the past, iron minerals prevented detectors from obtaining deep detection. Now, with ground canceling circuitry, great detection depths have been achieved. Even small objects like Civil War Minie balls have been detected to depths greater than two feet. Read the various treasure periodicals and talk with professionals; you will see Garrett in use in the field where performance and depth really count.

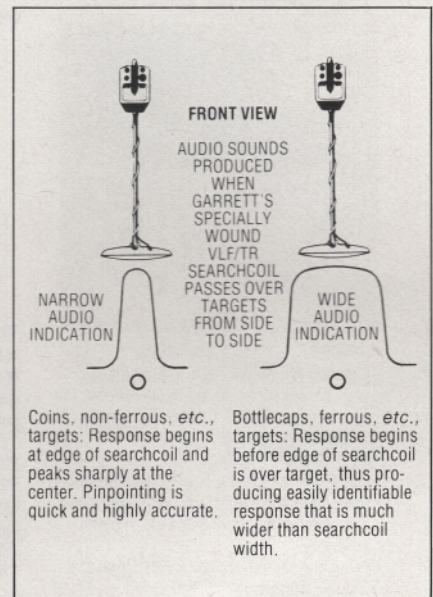

A•D•S• MASTER CONTROL. The Garrett A•D•S• control system is accepted as the most efficient detector control system ever devised. The conveniently located Master Control provides you with instantaneous control of the detector's main functions. Simply press the spring-return, handle-mounted switch momentarily to the left when you need VLF ground canceling operation. Within a fraction of a second, the VLF circuit is energized and precisely tuned to your preset tuning level. Then, when you need the performance of the TR discriminate mode, simply press the Master Control to the right. Instantly, the detector electronically shifts into the TR mode and retunes to your predetermined sound level. Release your thumb pressure from the Master Control, and the toggle returns to its center position, awaiting your next command.

GARRETT'S FULLY ADJUSTABLE ELECTRONIC DISCRIMINATION. Garrett's discrimination control is a continuous adjustment potentiometer (no discrete, fixed step settings) that allows even minute adjustments so necessary to achieve exacting acceptance and/or rejection of conductive (and certain non-conductive iron mineral) targets. A slight clockwise rotation from "zero" (see illustration) will cause nails and small iron objects to be rejected.

Further rotation causes bottlecaps and tinfoil to be rejected. Next aluminum pulltabs and nickels (all except WW II silver nickels) and all types of rings that are not 24 karat, etc., are rejected. Deeply buried coin or gold and silver targets always indicate as "good" in the TR discriminate mode.

GARRETT'S VLF/TR DUAL DISCRIMINATION. Gold, silver, copper, etc., targets produce a different response in the VLF mode than do ferrous (iron) ones. All iron targets respond across Garrett's full searchcoil width, thus sounding WIDE to the operator. The audio response on all gold, silver, etc., targets sounds NARROW to the operator. Distinguishing the difference between these sounds does take some practice, but the difference is quickly discernible, even to the novice.

SUCCESSFUL COIN HUNTING. Five-thousand or more coins is a success goal that many attain each year. Super-depth is needed because

most old and rare coins are to be found at great depths and in areas that have been "worked" many times by operators using other detector types, only deep coins are left. Garrett's VLF/TR Deepseeker and "Groundhog" instruments are designed to reach these coins. The Deepseeker models are designed to give maximum penetration in the VLF ground canceling mode. The "Groundhog" models are designed to give the easiest operation and greatest possible depth in the TR discriminating mode. Study the facts presented in this BUYER'S GUIDE to determine which of these two instruments is suited to deliver the performance you require.

GARRETT VLF/TR'S GIVE FULL PROSPECTING CAPABILITY. Because of Garrett's constant research and association with many modern-day prospectors, we have eliminated undesirable operational problems and have produced a new breed of full capability, universal detectors. All phases of prospecting can be achieved with these new VLF/TR's.

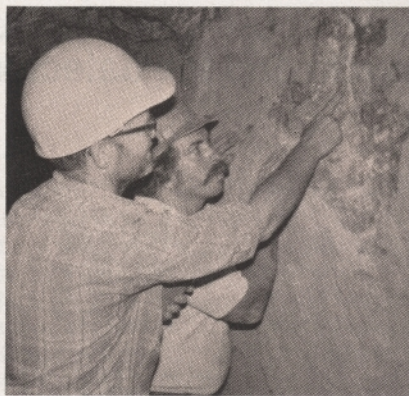

The Garrett Metal Detector OPERATING MANUAL describes the operational procedures and we recommend Ram's new book, ELECTRONIC PROSPECTING, which describes in detail the capabilities of universal VLF/TR instruments and how to use them in the field. A brief description is given below of several of the prospecting capabilities of Garrett VLF/TR detectors.

Distinguish Rich Ore from Pyrite, Iron, etc. Garrett's BFO and VLF/TR detectors are capable of accurate metal/mineral ore sample identification. Pyrite containing low grades of ore can be rejected while high grade specimens can be kept.

Find Gold Nuggets! In gold fields known to have yielded large nuggets, Garrett VLF/TR's are the only types recommended for searching these areas. You can search for nuggets in the VLF mode in creek and river beds, placer bars, in desert sand, and in discarded dredge tailings.

Find Lost Veins and Hidden Ore Pockets. Garrett VLF/TR's equipped with large searchcoils will detect

conductive veins and pockets at great depths. By paying careful attention to operating procedures you can distinguish between iron ore or low grade ore and rich conductive ore.

Charles Garrett and Javier Castellanos examine a silver vein that Charles detected several inches into the highly iron mineralized mine wall. A small dynamite charge blew out the wall's surface, exposing the vein. A few years ago discovery of this vein would have been mostly impossible, but with Garrett's new VLF/TR's, vein and pocket locating can be highly efficient and profitable operations.

CORRECTLY IDENTIFY "HOT ROCKS" WITH GARRETT VLF/TR DETECTORS. In many parts of the world, the soil contains magnetic, non-conductive "hot rocks" or "hot spots" that produce metallic sounds on all ground canceling detectors. Garrett VLF/TR's, equipped with the special multi-wound searchcoils can quickly identify these "false" signals.

SEARCH TRASH INFESTED AREAS SUCCESSFULLY! Abundant small metallic trash hinders efficient operation of any detector. Since Garrett detectors are very probably the world's most sensitive, they will detect targets smaller than a pin. Without this super-sensitivity, they would be inefficient in the recovery of deep coins, caches, nuggets, and ore pockets. The Garrett split-second tuning A•D•S• and push button controls allow the operator to detune the detector for precise target pinpointing when several targets are located close to each other. This

method can also be combined with sensitivity reduction when target litter is extremely bad. A highly sensitive detector that can be turned down has many advantages over a less sensitive detector that cannot be turned up! This is one of the key factors why Garrett is recognized world-wide as the leader in quality and performance.

DEEP SEARCHING FOR RELICS. In the field of relic hunting there is no match for the Garrett Master Hunter VLF/TR A•D•S• Deepseeker. The 10½-inch and 14-inch searchcoils have been field tested and proven to be far superior even in "worked out" areas. Single Minie balls have been found to depths exceeding two feet (the greatest depth reported is thirty inches) and twenty pound Parrott shells to four feet. Garrett detectors have started new coin and relic hunting booms by providing detector operators with the ability to reach down to untouched depths.

ALL GARRETT SEARCHCOILS ARE FARADAY-SHIELDED AND SUBMERSIBLE! Wet weeds and grass do not cause any kind of interference or false or static signals and all Garrett searchcoils are submersible approximately thirty inches to let you recover treasure lost in shallow water.

FAIR PRICES, TOP QUALITY. Garrett products are not distributed in the U.S. through distributors (middlemen)! Garrett sells directly to the retail dealer. This eliminates the add-on 10% to 25% most distributors require. And, Garrett dealers can serve you better because they are always in contact with the Garrett factory, not middlemen! Buy Garrett ... get Top Quality at fair prices!

GARRETT BUILDS ALL TYPES! Garrett Electronics designs, builds, and uses all the most popular types of metal detectors. Since we are experienced treasure hunters and know about all types of detectors, we are in the best position to advise our customers which types would be best suited for their needs. Our experience and expertise are yours ... you can rely upon us. Use Garrett instruments with confidence!

GOOD HUNTING!

“How to” hunting tips/guide to hidden wealth: coins, buried money, relics...

On these pages you will read about treasure hunters who have found their own hidden wealth and the detectors they use!!

Meet George Mroczkowski, professional treasure hunter, instructor, and author. Here George is working with a team of volunteers and a Garrett Deepseeker detector to recover irreplaceable medals and other artifacts from the ruins of the National Aerospace Museum in San Diego, CA, after the recent fire that totally destroyed the building. George has trained many new treasure hunters in the classes he teaches at his treasure shop and museum located at 2493 San Diego Avenue, San Diego, CA. Stop by and see him. George's advice to you: "Combine the best equipment with practice and expertise in operating it – success has to follow!"

Here is Betty Lincoln, wife of famed TH-er L. L. "Abe" Lincoln, of Rogers, Arkansas, with some of the tens of thousands of coins located with her Garrett detectors. Betty has few equals when it comes to coin hunting and offers this advice for your profit: "The great majority of coin hunters who don't find very much work too fast! Slow down; learn your detector; and listen carefully. The deep, old and rare coins can then be found."

Outlaw strongbox recovered in Illinois! After picking up a robbery lead in a very old newspaper, Rene LeNeve of Bloomington, Illinois, continued his research of the story until his efforts paid off! Here is the strongbox that Rene found. It contained the two pistols and an undisclosed (sorry!) amount of "hidden wealth." Rene has had a ring made with thirteen diamonds taken from lost rings found while coin hunting. Rene specializes in hunting abandoned house sites. The VLF/TR A•D•S• detectors provide the power he needs to locate those long forgotten and carefully hidden caches. Rene's advice: "Don't give up just because someone has looked a site over before you get there. Most treasures are recovered from supposedly 'worked out' sites."

Coin hunter finds \$12,000 Continental Dollar! Estimates of up to \$12,000 have been placed on the 1776 pewter Continental dollar found recently by Richard Smart with his Garrett detector. Richard has been an active and successful "hidden wealth" hunter for many years. During the past five years he has chosen and used Garrett detectors exclusively. He has amassed a large quantity of coins and jewelry while coin hunting, and he found a large money cache at an old homestead site. Richard will tell you that the correct choice of detectors and searchcoils can mean the difference between success and failure.

World-wide field testing under actual site conditions assures that Garrett ADS detectors will have universal capabilities. Here, we see Garrett representative, Frank Mellish of Pieces of Eight, 155 Robert Street, London NW 1, England, and Jonathan Patterson as they work the site of an ancient city in the Mediterranean area. Among their finds were a rare bronze statue and many coins over 2400 years old. Frank and Jonathan agree that Garrett ADS detectors make the difference when you are after deep targets.

Pictured here is a newspaper article from Western Australia about a modern "gold rush" for which Garrett is largely responsible. Garrett Australian representative, Peter Bridge of Victoria Park, Western Australia, reports frequent finds with Garrett Deepseeker detectors of gold nuggets weighing three pounds or more. Shown here are two successful Aussie prospectors, Tom Murray and Bob Sargent, who, between them, have found well over \$100,000 in gold nuggets with their Garretts. Both would agree... it doesn't cost to use the best equipment; it pays! If you get down to Australia, stop by to see Peter at Hesperian Detectors or write to P.O. Box 317, Victoria Park 6100, W.A. He'll show you the way to the gold fields.

THE I.T.H.S.

The International Treasure Hunting Society is a world-wide organization of amateur and professional treasure hunters united in a determined and co-ordinated effort to promote, preserve, and protect the hobby and profession of treasure hunting. The Society offers many benefits, including a periodical that will keep you up-to-date with what is happening throughout the treasure hunting world. All members are kept abreast of the latest news about equipment, equipment usage, treasure hunting, research techniques, treasure rights and laws. Join today or write to the Society; they will send you free literature. The address is: The International Treasure Hunting Society, P. O. Box 3007, Garland, Texas 75041, U.S.A.

This space given to The International Treasure Hunting Society courtesy Garrett Electronics.

Garrett supports the treasure hunting clubs!

From Pomeroy, Washington, comes Allan Cannon, again winning a first place trophy at a Spokane, Washington, hunt. Allan adds this trophy to his already impressive number of trophies and contest prizes. Allan specializes in coin and cache hunting with occasional dredging trips into the mountainous gold country of Idaho and Washington. There is a reason why Allan continues, day-in and day-out, to search for treasure... **SUCCESS!!!** Determination and the correct detector make it possible, Allan says.

Many of the more than 1200 contestants in The International Treasure Hunting Society's 1979 Grand Championship Hunt line up to take part in one of the events. Many treasure club members and other detector users attended this first-of-a-kind event near Dallas, Texas. The ITHS is a non-profit organization, sponsored by Garrett Electronics, which is dedicated to promoting, preserving, and protecting the hobby and profession of treasure hunting.

The cameras are rolling as Charles Garrett, second from left, and John Quade discuss a gold nugget during the filming of a new film about gold and treasure hunting. This and other films are available from Garrett Electronics for viewing by treasure clubs and other interested groups. To obtain a free loan of these 16 mm color/sound movies, write Garrett Electronics, 2814 National Drive, Garland, Texas 75041.

Treasure hunting is a rewarding life for Jack and Eleanor Hube and family of Enfield, Connecticut. They have found countless treasures, coins, gold rings and other jewelry, and a 1600 Spanish gold piece. They have made hundreds of new friends. Their trophy collection is very impressive, and Eleanor's record alone includes three first place wins in one year! Eleanor suggests careful study of your detector's instruction manual *before* you start out with a new instrument.

A SALUTE from GARRETT Electronics to... The Factory Authorized GARRETT DEALER

At Garrett Electronics we work hard through special training programs and selection procedures to insure that our world-wide family of dealers is the best in the business. Your local factory authorized representative has, in most cases, countless hours of metal detecting and treasure hunting experience to provide you with expert help as you begin and continue the great outdoor hobby of treasure hunting. Before buying, look for this sign displayed at your local dealer's place of business.

How to use your detector to find hidden wealth...

Knowledge is the key to success

"INCREASE YOUR CHANCES OF SUCCESS ONE-THOUSAND-FOLD WITH THE CORRECT KNOWLEDGE OF WHERE AND HOW TO SEARCH.

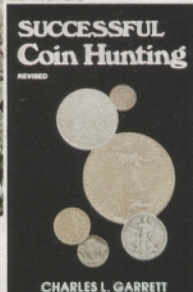

THESE BOOKS WILL SHOW YOU HOW!"

- 1 **DETECTOR OWNER'S FIELD MANUAL.** ROY LAGAL. This complete field manual fully explains BFO, TR, VLF/TR, PRG, PI, and other detector types and shows you exactly how to select and use each type in all treasure hunting situations. The MANUAL contains complete sections on all phases of coin, cache, and relic hunting; prospecting; nugget hunting; gold dredging; rockhounding; and includes true stories of money actually found. Reading this book could mean the difference between success and failure. If you could choose only ONE BOOK, this should be it! Many illustrations. 236 solid pages! No. 15041. \$6.95.
- 2 **TREASURE HUNTER'S MANUAL #7.** When you finish KARL VON MUELLER's book (you'll stay up all night reading it!), you will have NO DOUBT that lost treasure does exist. Karl tells you how to find it! Complete information on research, reasoning, law, taxes, tools, secrecy, and the what, who, when, why, where, and how of treasure hunting. Probably the best known TH-ing book. Many photos. 334 informative pages. No. 15036. \$7.95
- 3 **SUCCESSFUL COIN HUNTING.** CHARLES GARRETT. This book contains practically ALL the information that is known about coin hunting. Since more than 90 percent of all detector owners hunt for coins and related objects, SUCCESSFUL COIN HUNTING must be in your library. The author personally guarantees you'll find good, necessary information on EVERY PAGE! Don't waste time... read SUCCESSFUL COIN HUNTING. Start right and BE SUCCESSFUL! Over 100 photographs. 248 pages. No. 15015. \$6.95
- 4 **HOW TO TEST "Before Buying" DETECTOR FIELD GUIDE.** ROY LAGAL. If you are confused by words like "sensitivity," "mineralization," "Faraday shields," "tuning range," and hundreds of others, this technical guide will straighten you out. You will understand detector lingo and you will be able TO TEST ANY TYPE DETECTOR FOR YOURSELF before buying. No longer will you have to take the dealer's or manufacturer's word for it. Learn how NOT to be misled. Buy right the first time! Illustrated. 64 pages. No. 15032. \$3.95.
- 5 **TREASURE HUNTER'S MANUAL #6.** KARL VON MUELLER. Thousands of ideas, tips, state-by-state treasure leads, photos, and other valuable information to start all TH'ers on the road to successful treasure hunting. Completely different from THM #7. Illustrated. 318 pages. No. 15022. \$7.95

- 6 **THE JOURNALS OF EL DORADO.** BEING A DESCRIPTIVE BIBLIOGRAPHY ON TREASURE AND SUBJECTS PERTAINING THERETO, A WAYBILL TO DISCOVERY AND ADVENTURE. CONATSER, VON MUELLER. An invaluable reference work to save thousands of hours of research time. Countless sources of leads to unfound treasure, mineral wealth, relics, and artifacts all over the U.S. and in foreign countries. By far the world's greatest collection of treasure lead sources for treasure hunters, prospectors, and collectors. 380 pages. No. 15055. \$9.95.
- 7 **TREASURE HUNTING PAYS OFF!** CHARLES GARRETT. You will come away from this book with a capsule summary of the entire field of treasure hunting. It explains and illustrates what this fascinating and rewarding hobby is all about. You will learn where and how to find valuable relics and forgotten treasures of yesterday. You will discover that treasure hunting does PAY OFF and HOW IT CAN PAY OFF FOR YOU! Many photographs. 88 pages. No. 15044. \$3.95
- 8 **GOLD PANNING IS EASY.** ROY LAGAL. Where to find gold and how to pan it. All confusion surrounding old, established methods is removed. A NEW LOOK guaranteed to produce results with the "Gravity Trap" gold pan or any other pan. Special "how to" instructions on metal detecting, prospecting, rock hounding, and gold dredging. This book is a must for the beginner or professional! Fully illustrated. 96 pages. No. 15054. \$3.95.
- 9 **ELECTRONIC PROSPECTING.** CHARLES GARRETT, BOB GRANT, ROY LAGAL. A tremendous upswing in electronic prospecting for gold and other precious metals has recently occurred. Due to high gold prices and the unlimited capabilities of the new VLF/TR metal detectors, the increased activity in prospecting has led to many fantastic discoveries. Gold is there to be found. If you have the desire and want to be successful, then this book, written by top authorities, will give you the field/detector guidance you need. It will show you how to select (and use) from the many brands of VLF/TR's on the market those that are correctly calibrated to produce accurate metal vs. mineral identification which is so vitally necessary in the prospecting field. Illustrated. 96 pages. No. 15046. \$3.95.

- 10 **THE COMPLETE VLF/TR METAL DETECTOR HANDBOOK (ALL ABOUT GROUND CANCELING METAL DETECTORS).** ROY LAGAL, CHARLES GARRETT. The unparalleled capabilities of the new VLF/TR ground canceling metal detectors have proved these instruments to be popular. From History, Theory, and Development to Coin, Cache, and Relic Hunting to Prospecting... the widely recognized authors explain in detail the capabilities of the VLF/TR detectors and how they are used. Everything one needs to know about these instruments and how to use them is contained in these pages. Learn the new ground canceling detectors for the greatest possible success. Illustrated. 200 pages. No. 15045. \$7.95.
- 11 **PROFESSIONAL TREASURE HUNTER.** GEORGE MROCKOWSKI as told to Chara Bishop. It is well proved that research is 90 percent of the success of any treasure hunting endeavor. As you read this book, you will be amazed at how many treasure leads one man can come up with. You will learn how, through proper treasure hunting techniques, George was able to find treasure sites, obtain permission to search, select and use the proper equipment, and then, in many instances, recover treasure. Profusely illustrated. 132 pages. No. 15024. \$6.95.
- 12 **THE COMPLETE BOOK OF COMPETITION TREASURE HUNTING.** ERNIE "CAROLINA" CURLEE. As the title says, this book gives the details you need to know to sponsor or compete in an organized treasure hunt, practical information from the author who has sponsored and competed in many hunts himself. Separate sections on "HOW TO SPONSOR" and "HOW TO WIN," with a complete chapter on "Understanding Your Detector." Every metal detector owner/treasure hunter can benefit from Ernie's down-to-earth, plainly written information and instructions. Many illustrations. 88 pages. No. 15013. \$5.95

GARRETT

Acknowledged World-Wide as the Leader
in Obvious Quality Construction!

"GROUNDHOG" HITS JACKPOT! In just two years, John Williams of Las Vegas, Nevada, found over 60,000 coins with his Garrett "Groundhog" detector. He also found over 100 watches, several hundred rings, and several gold coins. We have reproduced the cover of *Treasure Magazine* which contains an article about John. We appreciate the efforts Ken Doe, publisher, is making to help the treasure hunter. To obtain a one-year subscription send \$13.50 to *Treasure Magazine*, Subscription Dept., 10968 Via Frontera, San Diego, CA 92127.

JOIN THE ITHS! All treasure hunters are invited to join The International Treasure Hunting Society. Sponsored by Garrett Electronics, the ITHS is a world-wide organization of amateur and professional treasure hunters united to promote, preserve, and protect the hobby. Members receive a periodical and the chance to take part in numerous Society-sponsored activities. The full-time headquarters is located at 2814 National Drive, Garland, Texas 75041. You may contact the Society by writing P.O. Box 3007, Garland, Texas 75041 or by calling 214-271-0800.

RELICS COME EASY WITH ADS DETECTORS! Three members of the Mid-South Relic Hunters Association examine a Civil War relic they've found. Hundreds of Civil War relic hunters who for years used other detector brands today are proclaiming the ease with which relics are found using the Garrett VLF/TR Deepseeker and "Groundhog" ADS detectors and the tremendous depth they are able to achieve. Our special thanks go to Ray Krupa, Managing Editor of *Western and Eastern Treasures Magazine* for permission to use this photo. For a year's subscription, send \$10 to *Western and Eastern Treasures*, Circulation Dept., P.O. Box 253, Mt. Morris, IL 61054.

Send check, money order, or we'll ship COD. If you order by Master Charge or VISA, we need account number, expiration date, and signature.
