WORLD FAMOUS

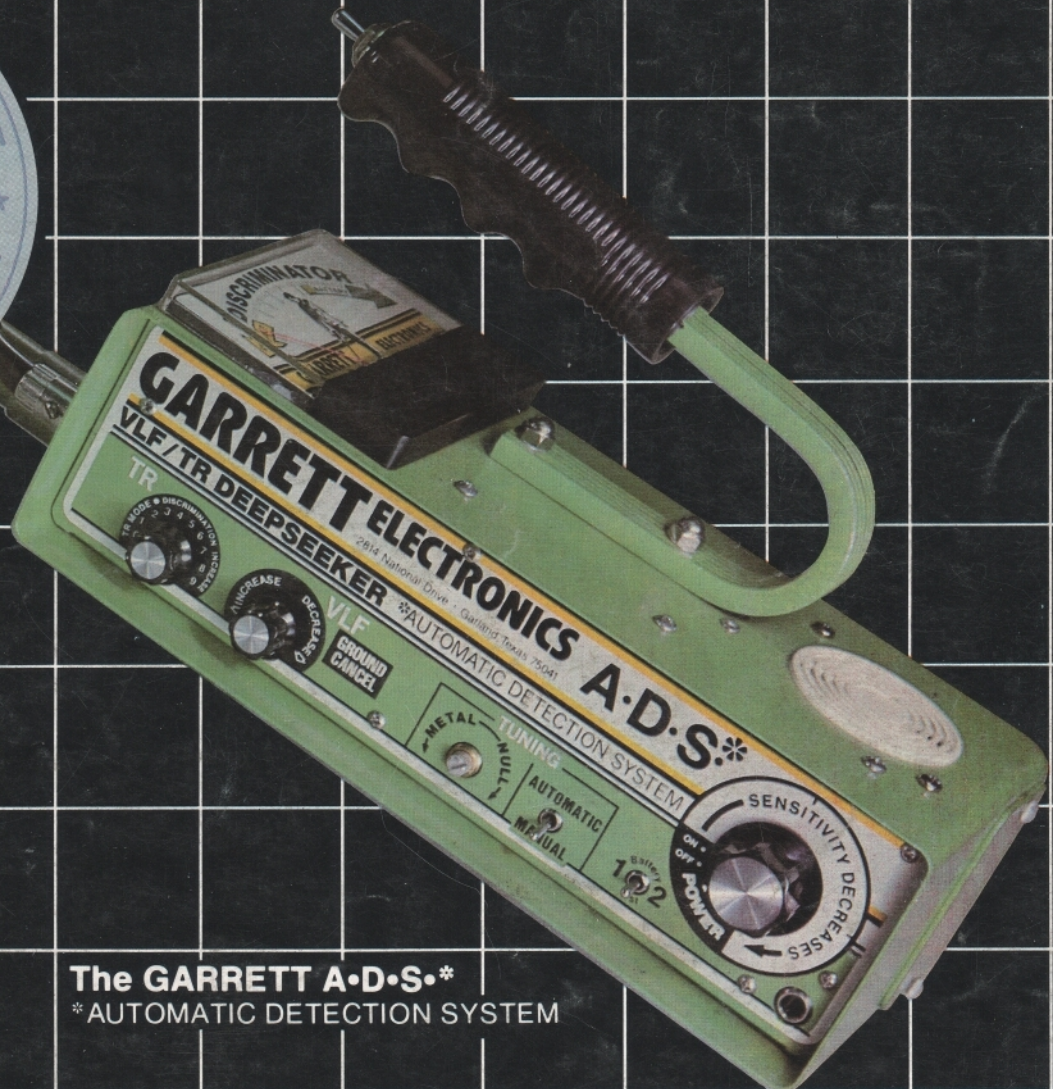

GARRETT METAL DETECTORS

USED SUCCESSFULLY THE WORLD OVER!

"Garrett's A-D-S* detectors have won international acclaim for their extreme depth detection and superb performance in every phase of Treasure Hunting and Prospecting. I know YOU will be more successful with a Garrett A-D-S-!"

Charles Garrett

The
Consumer
BUYER'S
GUIDE

The GARRETT A-D-S*
*AUTOMATIC DETECTION SYSTEM

Meet Charles Garrett...

Charles Garrett . . . Internationally Known Electronics Engineer, Treasure Hunter, Author, and Manufacturer Gives You His Personal Assurance of Quality, Performance, and Dependability in Every Garrett Product.

Charles Garrett, President of Garrett Electronics, began treasure hunting in 1947. Following a four-year Navy tour of duty, he earned his Bachelor of Science degree in Electrical Engineering. During the next few years with Texas Instruments and Teledyne-Geotech, his electronic designs included military and aerospace equipment such as radar circuits, satellite components, and seismograph circuitry used on the moon by Apollo astronauts.

Mr. Garrett's personal enjoyment of treasure hunting and the need for extensive field testing of all new Garrett detectors have led him to many different parts of the globe. The expertise acquired on these trips and through association with many of the world's professional treasure hunters is reflected in his products. The quality, versatility, and dependability of his instruments have brought worldwide acclaim from treasure hunters.

Charles is an internationally known author, having written numerous technical papers, treasure magazine articles, and such widely distributed books as *Successful Coin Hunting* and *Treasure Hunting Pays Off!* He is co-author of two other books, *Electronic Prospecting* and *The Complete VLF-TR Metal Detector Handbook*.

In 1966 Mr. and Mrs. Charles Garrett founded Garrett Electronics. They recognized that the metal detector industry needed new ideas and a new line of versatile, quality instruments. During the years that have followed, Garrett's customer service and quality of product have always been emphasized.

Roy Lagal, lifelong Treasure Hunter, Author, and World Authority on Electronic Prospecting, and Charles Garrett prospect electronically for wire gold pockets.

Charles travels extensively using and testing Garrett equipment, insuring its continued superior performance, regardless of climate or field conditions. In Greece, Charles and son, Vaughan Garrett, search a 400 B.C. site for coins and ancient relics.

"The world over," says Charles, "people are the same. The thrill of discovery makes treasure hunting one of the most enjoyable and rewarding activities in God's great outdoors!" Charles and Vaughan Garrett and Frank Mellish of London search for coins at this windmill park site in Holland. Frank, owner of Pieces of Eight, 259 Eversholt St., London, England NW1, is Garrett's United Kingdom distributor.

Peter Bridge of Australia, Charles, and Bob Wieland (Associated Press), discuss Australia's fantastic gold fields. Peter, owner of Hesperian Detectors, P. O. Box 317, Victoria Park 6100, Western Australia, Australia, is Garrett's distributor for Australia and Southeast Asia.

Charles Garrett, Bob Podhrasky, Chief Engineer, and the Garrett engineering team have become the industry's leading, advanced circuit, metal detection group.

Mr. Garrett's team of carefully selected, widely experienced personnel shares in his enthusiasm and his desire to continue to provide the very best in metal detection equipment and customer service. *This total involvement by the man and his people is your personal guarantee of quality, performance, and dependability . . . from Garrett!*

Garrett Electronics Close-Up...

We Want You To Feel A Part Of The Great Garrett Team!

We want you to feel a part of the great Garrett team. We are proud of our company and our leadership role in the industry. Our engineers will continue their exhaustive research

and development while maintaining close contact with both the professional and the hobbyist in the field. Our office, production, and customer service personnel are dedicated to

providing you with the best possible service and product quality. The Garrett team effort is your assurance of the finest in metal detector instrumentation!

1. Whenever you are in the Garland area (near Dallas), stop by for a visit. You are always welcome!

2. All kinds of "treasure found" are displayed in the museum. In our demonstration area the operating capabilities of all our detection equipment are explained to customers.

3. Bill Bosh is Garrett's Dealer Coordinator. Garrett detectors are marketed in every state in the U.S. and in several foreign countries.

4. On a continual basis, our engineering, quality, and production teams improve and update Garrett products, thereby giving our customers the latest, most advanced electronic equipment.

5. This is our final assembly area where all Garrett detectors are carefully assembled and tested. Charles Garrett personally oversees all operations.

6. Each Garrett detector receives 300% inspection. Every part and assembly is 100% quality control inspected at least three times. Garrett detectors are built to last!

7. Detector orders come in from all over the world. Orders are speeded through our computerized system. Fast, accurate shipping to our customers and dealers, regardless of destination, is our byword.

8. Our shipping personnel make an early start each day to insure that all orders are shipped, usually, by the first day following their receipt.

9. Our customer service and repair departments speedily take care of any problems or service requirements you have.

10. We maintain a continuing "in touch" program of factory seminars, training and informing Garrett dealers of the latest in detectors and products and know-how so that they may serve you better.

11. Garrett dealers and members of Garrett/Search International combine forces to sponsor public seminars where detector users can sharpen their treasure hunting skills.

12. All over the world, treasure hunters, prospectors, the military, police, industry, archaeologists, rockhounds, surveyors, and other professional field groups use and depend upon Garrett!

THE WORLD'S MOST ADVANCED ELECTRONIC DETECTORS:

GARRETT A-D-S

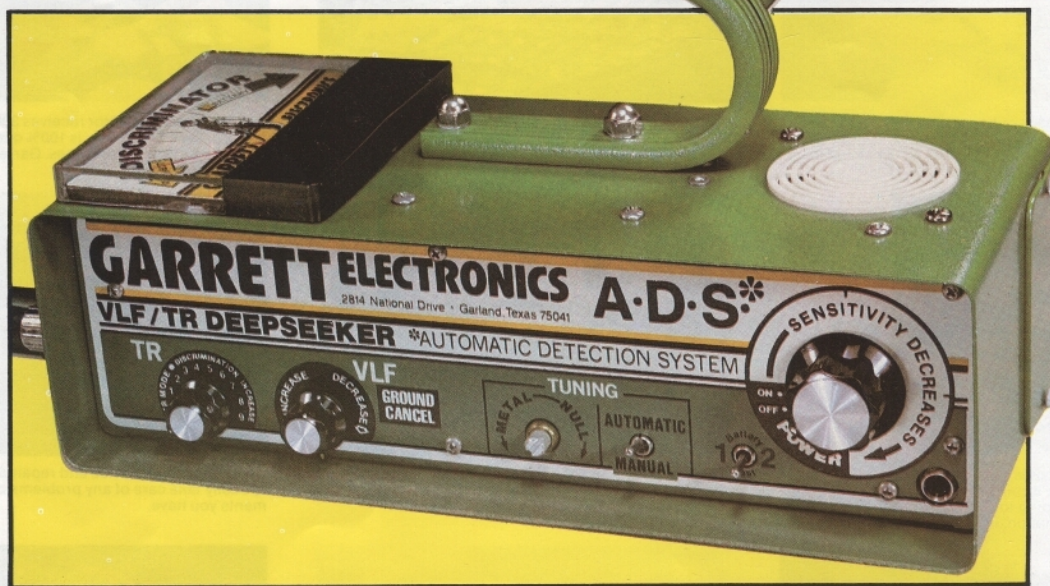

The Garrett Master Hunter A-D-S Instruments are the most advanced, universal circuit detectors in the world!

New detectors come and they go; new models are introduced and they fade away! Practically every day someone is proclaiming: "The detector to end all detectors!" . . . "Discrimination in VLF!" . . . "The greatest depth of all!" . . . "Read target depth!" . . . and on and on! **The truth is**, one detector has stood the test of time. For three years, the **Garrett Master Hunter ADS** has continued to be accepted as the most versatile, the best quality, and the most advanced electronic detection system you can buy!

A-D-S MASTER CONTROL

GARRETT'S MASTER HUNTER A-D-S "GROUNDHOG"!

GARRETT'S MASTER HUNTER A-D-S DEEPSEEKER

ADVANCED ELECTRONIC CIRCUITRY

For eighteen years Garrett engineers and world-wide field teams have continually designed and field proved the very latest, state-of-the-art detector instrumentation. Consequently, Garrett ADS equipment is *guaranteed* to be the most versatile, straightforward, advanced electronic circuitry it is possible to build.

Check the activities in which you plan to participate.

Then read the capsule summaries of what it takes to get the job done!

Check the activities in which you plan to participate:

- Treasure Hunting
- Coin Hunting
- Coin Sniping
- Money/Cache Hunting
- Battlefield/Relic Hunting
- Prospecting
- Ghost-Towning
- Two-Box Deepseeking
- Beachcombing
- Underwater/Deep Sea Recovery

Treasure Hunting

Some treasure hunters search for coins, relics, and caches; and some, for nature's gold and silver. If you want to coin hunt or to do it all, your detector choice should be one that has full capabilities. Why? Because regardless of the type hunting and field and environmental conditions, a full searchcoil range, universal detector will provide you with any tool you need to be successful.

Coin Hunting

A coin detector should be quality built, extremely stable, and rugged to withstand thousands of hours of use. A coin detector should find coins to extreme depths and be able to identify all targets quickly and easily so that junk need not be dug.

The operator should not have to use the detector in some unorthodox and fatiguing manner, such as "whipping," or working complicated controls.

Target Identification

Garrett's Master Hunter ADS will detect coins to EXTREME DEPTHS, EVEN IN THE HEAVIEST IRON GROUND MINERALS. All detected targets can be quickly and very accurately identified, even to extreme depths! It is no longer necessary for you to guess the identity or "probability" of your finds . . . dig only the valuable ones.

Coin Sniping

With Garrett's new SUPER-SNIPER 3½-inch searchcoil, Coin Sniping was invented! Countless coins, often deep and rare, are missed by coin hunters using standard size searchcoils. Garrett's new SUPER-SNIPER has such an intense and narrow electromagnetic beam that it can shoot straight down deep past junk to detect coins. Coin hunters are profitably, searching supposedly worked out areas and are reporting phenomenal success in "Coin Sniping"!

Money/Cache Hunting

Searching for Money Caches is time consuming and success can be infrequent, but those once-a-year finds make it worthwhile! To succeed, you must research and use a field proved detector that gives extreme depth with LARGE searchcoils, such as Garrett's 10½, 12, and 14-inch deepseeking searchcoils, and especially Garrett's new two-box BLOODHOUND attachment. This fantastic attachment gives all of Garrett's deepseeking Master Hunter ADS advantages; does not have the disadvantages of old style high frequency two-box detectors; PLUS, small bits and pieces of trash are not detected, thus saving Cache Hunters a great amount of time!

Battlefield/Relic Hunting

Searchers who specialize in Battlefield and Relic Hunting can enjoy the same benefits as Money/Cache Hunters who use Garrett's Deepseeking ADS equipment. Professionals the world over use Garrett equipment that HAS BEEN PROVED FOR YEARS AS THE DEEPEST SEEKING, MOST EFFICIENT DETECTORS THE RELIC HUNTER CAN USE! Don't gamble! Don't use equipment that is not field-proved to get the job done!

Prospecting

Garrett ADS equipment is designed and perfected to give near flawless performance in nugget, vein, pocket, and placer hunting. With Garrett's VLF ground canceling and calibrated TR

discrimination circuits, precise metal/mineral ore highgrading and field surveys can be readily accomplished. Successful finds have been made the world over with Garrett's Master Hunter A·D·S· equipment, from rich silver veins in Mexico to gigantic gold nuggets. And, check the BFO for black sand!

Ghost-Towning

You'll search for buried and hidden caches, coins, bottle dumps, and relics. You will encounter some of the earth's toughest ground minerals. To search with confidence and be successful, take a universal-capabilities Garrett detector along with you. There will be nothing you can't do!

Two-Box Deep Seeking

Once again, with the advent of Garrett's two-box BLOODHOUND, two-box deepseeking has become popular. Read The Money/Cache Hunting and Battlefield/Relic Hunting sections, for a glimpse of the capabilities of Garrett's fantastic new deepseeking attachment!

Beachcombing

SALT-WATER-FREE SEARCHING! Those who beachcomb for coins, rings, and jewelry know how troublesome searching in salt water and along the wet beaches can be, but, now, with Garrett's SALT-WATER-INTERFERENCE-FREE SEARCHING, a new world of enjoyable beachcombing is possible! You can search with no salt interference, while rejecting nails, most foil, and bottlecaps! All Garrett searchcoils are fully shielded and submersible!

Underwater/Deep Sea Recovery

Garrett's professional SEA HUNTER detectors are built to search for nature's gold in highly mineralized mountain streams or in the ocean depths for Spanish shipwreck pieces-of-eight! Two models of this superb underwater equipment are available: a land/shallow surfing model and a 200-foot depth model with full professional capabilities!

THE SUPERIOR METAL DETECTOR!
 The **MASTER HUNTER A·D·S·**
 VLF/TR DEEPSEEKER

The Deepest Seeking Type Detector Built!

Our most powerful VLF/TR detects all metals SUPER-DEEP through mineralized soil in the VLF mode. Combining this deepseeking capability with our A·D·S· circuitry produced a UNIVERSAL VLF/TR detector with a new concept: Total capability regardless of the type searching or field and environmental conditions! What are your treasure hunting requirements?

NO OTHER DETECTOR IS EQUIPPED LIKE THE MASTER HUNTER VLF/TR A·D·S· DEEPSEEKER!

★ **EXTREME DEPTH** ★
 5.5 KHz Operation

Spanish Operating Manual Available (See p. 18)

▼ **Garrett's 7½-inch, Specially Designed, Full Scan, Co-Planar Searchcoil**

SUPER-DEPTH in VLF & TR Modes. Most popular coin & nugget hunting searchcoil. Fast, quick pinpointing and identification! NO OTHER TYPE SEARCHCOILS CAN OUT-PERFORM GARRETT'S Specially Designed Deepseeking Searchcoils!

Universal Capabilities:

★★ VLF Deepseeking ★★

- Treasure Hunting
- Coin Hunting
- Coin Sniping
- Money/Cache Hunting
- Battlefield/Relic Hunting
- Prospecting
- Ghost-Towning
- Beachcombing
- Two-Box Deepseeking
- Underwater Recovery

Garrett's Most Popular Master Hunter A·D·S· Deepseekers:

Master Hunter A·D·S· SUPER PACKAGE

With the **Super Package** you can participate in all phases of Treasure Hunting. This professional Master Hunter ADS Detection System contains: 3½-inch Super Sniper; 7½-inch and 12-inch Co-Planar Searchcoils; 7½-inch and 12-inch Skid Plates; ADS Hipmount; Two-Pocket Shoulder Bag; Headphones; and *The Complete VLF-TR Metal Detector Handbook*.

\$499⁹⁵

Model 11121

Master Hunter A·D·S· 7½ & 14

(with 7½-inch & 14-inch searchcoils) The 14-inch searchcoil produces the **UTMOST IN EXTREME DEPTH** on caches, relics, veins, large nuggets, and buried treasure. Meets the needs of all treasure hunters, prospectors, utilities, and field crews.

\$419⁹⁵

Model 11093

Master Hunter A·D·S· 7½ & 12

(with 7½-inch & 12-inch searchcoils) Identical to model 11093 except 12-inch searchcoil is lighter and has slightly less depth. Definitely a favorite of those who search for long hours.

\$399⁹⁵

Model 11092

Master Hunter A·D·S· 7½ & 10½

(with 7½-inch & 10½-inch searchcoils) Identical to model 11093 except 10½-inch searchcoil is much lighter than 14-inch, but gives extreme depth on coins, nuggets, relics, and caches.

\$379⁹⁵

Model 11094

Master Hunter A·D·S· 7½

(with 7½ inch searchcoil) Identical to model 11093 except is equipped with only the 7½-inch searchcoil which gives super depth, speed, and quick pinpointing and identification.

\$339⁹⁵

Model 11095

Designed for **EXTREME DEPTH** in VLF ground canceling mode: excels in Treasure, Cache, and Relic Hunting; Nugget Shooting and Prospecting. Excellent Coin Hunting in TR Discrimination Mode in light to medium mineralized soil. Quick and accurate target identification.

THE FIRST AUTOMATIC DETECTION SYSTEM

Garrett Electronics is proud to claim the industry's **first fully Automatic Metal Detection System**. The most remarkable feature of this Garrett instrument is its totally automatic operation. After you initially tune and preset the discrimination level, you have true, one-hand operation. The handle-mounted spring-loaded Master Control does all the work . . . electronically! A slight pressure to the left activates the VLF ground canceling mode and the instrument

is tuned exactly to your pre-determined level. A slight pressure to the right . . . the TR Discrimination mode is activated and the detector is retuned! And, as an added plus, a panel switch gives you the option of full-time automatic tuning! You'll love the convenience, ease of operation, and perfection we have built into this Automatic Detection System instrument!

Respected the Treasure Hunting world over, Garrett's VLF Ground Canceling Circuitry, incorporated into this new A·D·S· detector, has been greatly improved. Maximum sensitivity with minimum battery drain has been achieved. The simplified control panel permits quick-to-learn, total control of this detector's superior capabilities. **When you require the Master's Touch, there is only one . . . the Garrett A·D·S·!!**

EASY TO TUNE

Anyone can easily tune a Garrett Master Hunter ADS!

Patent Pending

A·D·S· Master Control

Instant electronic mode-selection and re-tuning gives ease of operation never before achieved!

ONE HAND OPERATION!

FULLY ADJUSTABLE TR DISCRIMINATION
Gives perfect operation from total acceptance to total rejection of undesirable objects.

EASI-VIEW METER

NEW LOUD SIGNAL-ALERT SPEAKER.

SLIDE-IN BATTERY TRAY

SEARCHCOIL CONNECTOR

- Adjustable, Quick-Lock Stem
- Sling and Hip Mount Capabilities
- Protected Control Panel
- Six Eveready 9-volt batteries (15¢/hour operation) or you may use the new rechargeables!
- Weight: 4 lbs, 12 ozs. (2.15 kgs.)

GROUND CANCELING
Permits perfect operation over iron mineralized soil.

TUNING
Accurate. Reliable. Set it . . . forget it!

TUNING SELECTOR
Automatic or instant MASTER CONTROL retuning!

POWER and MAXIMUM SENSITIVITY CONTROL

Arm Rest included **FREE** with Master Hunter VLF/TR Deepseeker

A PERFORMANCE BREAKTHROUGH!

The **MASTER HUNTER**® A·D·S· VLF/TR "GROUNDHOG"

A Superior Coin Hunter with Universal Capabilities!

The "Groundhog" has long been known for its superb coin hunting achievements. With Garrett's new A·D·S· circuitry, the "Groundhog" has become a SUPERIOR, DISCRIMINATING COIN DETECTOR WITH UNIVERSAL CAPABILITIES! Whatever your requirements—the best in TR COIN HUNTING, deep searching for caches and relics, correct metal/mineral gold prospecting ability, or the ideal detector in a competition hunt—the MASTER HUNTER VLF/TR A·D·S· "GROUNDHOG" WILL DELIVER!

★ All Garrett VLF/TR's Feature Ground Canceling and Mineral-Free Operation! ★

Garrett's 7½-inch, Specially Designed, Full Scan, Co-Planar Searchcoil

SUPER-DEPTH in VLF & TR Modes. Most popular coin & nugget hunting searchcoil. Fast, quick pinpointing and identification! NO OTHER TYPE SEARCHCOILS CAN OUT-PERFORM GARRETT'S Specially Designed Deepseeking Searchcoils!

Universal Capabilities:

★★ VLF Deepseeking ★★

- Treasure Hunting
- Coin Hunting
- Coin Sniping
- Ghost-Towning
- Beachcombing
- Prospecting
- Money/Cache Hunting
- Battlefield/Relic Hunting
- Two-Box Deepseeking
- Underwater Recovery

(with 7½ inch searchcoil) Identical to model 11130 except is equipped with only the 7½-inch searchcoil which gives super depth, speed, and quick pinpointing and identification.

\$339⁹⁵

Model 11100

Super-Depth coin hunting detector in VLF and TR Discriminating Modes. Excels in Cache, Relic, and Nugget Hunting. Exact, same features & capabilities as A•D•S• Deepseeker, but is Lighter and more Compact.

GARRETT'S A•D•S• AUTOMATIC DETECTION SYSTEM

Garrett Electronics is proud of the industry's most advanced capability coin hunter . . . the **Garrett Master Hunter A•D•S• "Groundhog"**! This full capability, Universal Detector is respected world-wide in coin hunting circles. The "Groundhog" A•D•S• uses Garrett's remarkable Automatic Detection System. After you initially tune and pre-set discrimination, you have instantaneous one-hand operation! Press the Master Control Switch momentarily to the left; the VLF mode is activated and tuned. Press to the right; the TR mode is activated and tuned . . . all electronically! And,

a panel switch allows you to choose between manual or automatic tuning! By combining this superior electronic system with precise pinpointing and the power to punch through difficult ground conditions, we have produced for you, **the detector** with more than enough ability to locate those old, deep, and valuable coins others leave behind! At Garrett Electronics **we use what we sell!** Share in our success with **the industry's Superior Coin Detector and acquire the Master's Touch with the GARRETT Master Hunter A•D•S• "Groundhog"**!

The Famous Coin Hunting Garrett "Groundhog"

This internationally known detector has been named the "GROUNDHOG" because of its proven track record of reaching previously unobtainable TR Discriminating depths for those old, rare coins. Its ease, speed, and depth while searching outclasses them all!

A•D•S• Master Control

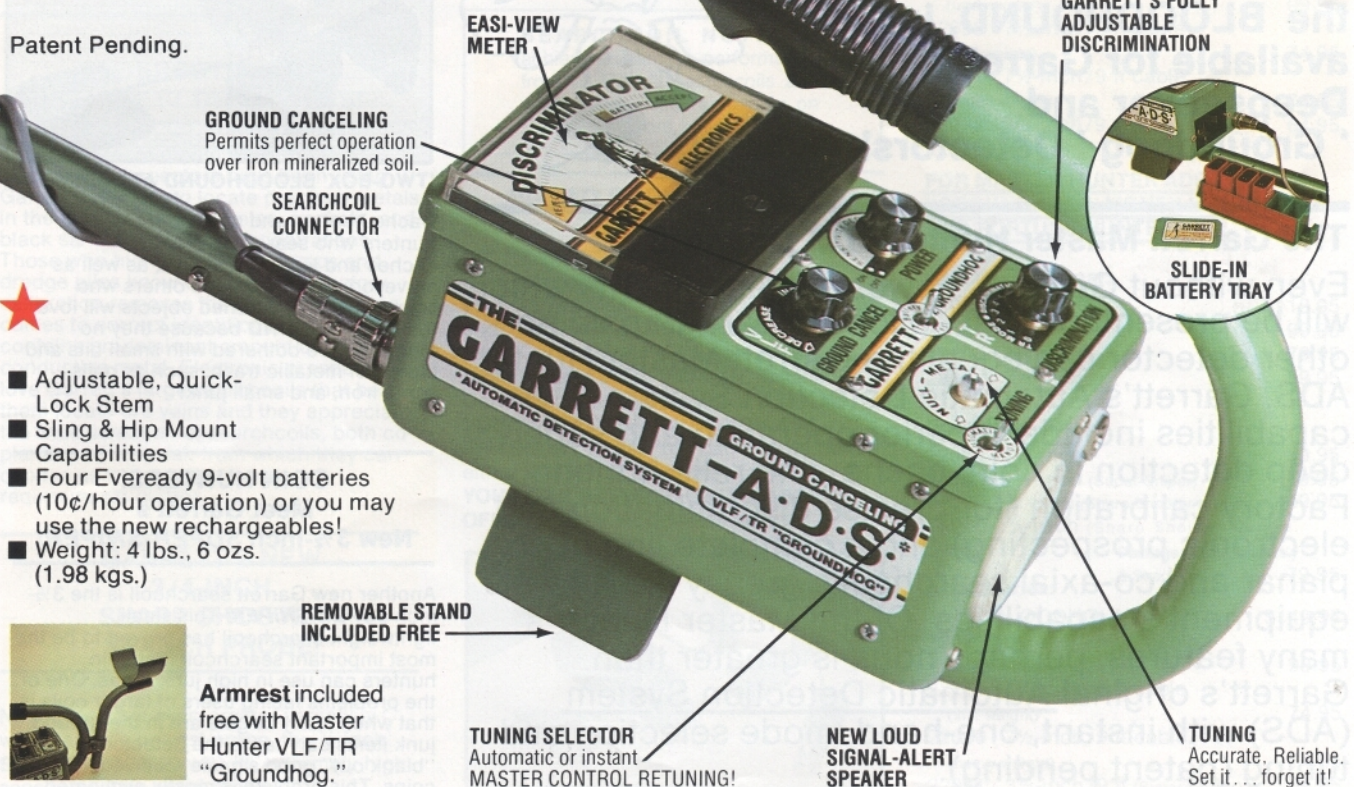

Instant electronic mode selection and retuning give ease of operation never before achieved . . .!

ONE HAND OPERATION!

Patent Pending.

EASY TO TUNE

Anyone can easily tune a Garrett Master Hunter ADS!

- Adjustable, Quick-Lock Stem
- Sling & Hip Mount Capabilities
- Four Eveready 9-volt batteries (10¢/hour operation) or you may use the new rechargeables!
- Weight: 4 lbs., 6 ozs. (1.98 kgs.)

Armrest included free with Master Hunter VLF/TR "Groundhog."

**This fantastic,
two-box attachment,
the BLOODHOUND, is now
available for Garrett's
Deepseeker and
'Groundhog' Detectors!**

The Garrett Master Hunter ADS Detector

Even without Garrett's newest advancements which will be presented in the following paragraphs, no other detector can equal the Garrett Master Hunter ADS. Garrett's Automatic Detection System capabilities include superior operation and super-deep detection in coin, cache, and relic hunting. Factory calibration (for precise discrimination and electronic prospecting) and a complete line of coplanar and co-axial searchcoils greatly expand the equipment's capabilities. Of the Master Hunter's many features, perhaps none is greater than Garrett's original Automatic Detection System (ADS) with instant, one-hand, mode selection and tuning (patent pending).

(Contact your Garrett dealer or the factory for our "Name Our Mascot" contest. Expires February 20, 1982.)

The New Garrett BLOODHOUND Attachment

Charles Garrett takes pride in announcing several new attachments and accessories which advance even further the state of the art and the versatility of Master Hunter ADS instruments. The first and most exciting of these is a device that treasure hunters will find invaluable: the **new Garrett BLOODHOUND TWO-BOX ATTACHMENT!** With the **BLOODHOUND**, all Garrett Deepseeker and "Groundhog" owners can convert their detectors to TWO-BOX operation! Until now, if you needed TWO-BOX capabilities, you had to buy a separate instrument that cost many hundreds of dollars. Now, you simply purchase Garrett's new **BLOODHOUND** and in a minute you can convert your standard configuration Garrett detector to TWO-BOX operation!

'TWO-BOX' BLOODHOUND ATTACHMENT.

Cache hunters and relic hunters who search for money caches and large projectiles, as well as surveyors, plumbers, and others who search for deeply buried objects will love the **BLOODHOUND** because they no longer will be bothered with small bits and pieces of metallic trash, such as nails, scrap iron, and small junk!

COIN HUNTERS! Meet Garrett's New 3½-Inch **SUPER-SNIPER!**

Another new Garrett searchcoil is the 3½-inch **SUPER-SNIPER!** This small, lightweight searchcoil has proved to be the most important searchcoil that coin hunters can use in high junk areas. One of the problems facing users of larger coils is that when many targets are in the ground, junk items can cause the detector to "blank out" good signals received from coins. This problem is mostly eliminated

THE 'VERSATILE' GARRETT MASTER HUNTER ADS!

For years, no other detector has matched the versatility, quality, and dependability of the Garrett Master Hunter ADS. And now, even greater advancements have been made in the capability of this universal detector!

with the **SUPER-SNIPE!** The coil's narrow, highly intense beam shoots straight down into the ground to go right past junk items to detect deep coins that users of wider searchcoils have missed. All owners of Garrett's discriminating Deepseeker and "Groundhog" detectors can go back and work heavy trash areas, areas adjacent to sidewalks, playground equipment, parking meters, and thousands of other "worked out" places and recover valuable coins that are waiting to be found!

Locates & Pinpoints Precisely down through bottlecaps, pulltabs, & other junk!

ELECTRONIC PROSPECTORS USE GARRETT DETECTORS!

For years, recreational miners and electronic prospectors have been using Garrett detectors to locate precious metals in the form of nuggets, veins, pockets, and black sand and placer concentrations. Those who highgrade mine dumps and dredge piles know that Garrett's factory calibration removes the guesswork when it comes to correct identification of ore that contains predominant amount of conductive metal. Electronic prospectors love Garrett's large searchcoils that help them locate ore veins and they appreciate the wide selection of searchcoils, both co-planar and co-axial, from which they can choose as their nugget hunting requirements dictate.

GARRETT'S NEW 3/4-INCH SHARP SHOOTER SEARCH PROBE!

Now, they have even greater versatility with Garrett's newest probe, the 3/4-inch **SHARP SHOOTER** with its extremely high sensitivity. This small probe

gives them just the tool they need to probe into cracks and crevices to detect black sand and placer concentrations.

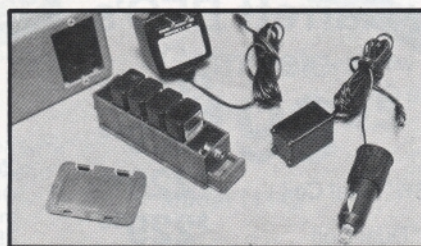

The **SHARP SHOOTER** will detect a pinhead-sized nugget to a distance greater than one inch and larger nuggets several inches away! That's not all! When used with Garrett's ADS equipment, the **SHARP SHOOTER** has **COMPLETE GROUND CANCELING AND DISCRIMINATING CAPABILITY!** It is obvious that this probe will become a valuable tool for those who search for Nature's conductive minerals!

SEARCHCOIL NOTE! To achieve maximum performance from all Garrett searchcoils and accessories, use them only on Garrett detectors.

NI-CAD RECHARGEABLES AVAILABLE!

Now you can purchase rechargeables for your Garrett Master Hunter Deepseeker and "Groundhog" ADS detectors and other Garrett models. Garrett's rechargeable 9-volt batteries, installed in Garrett's unique battery trays, **STAY IN YOUR DETECTOR WHEN YOU ARE CHARGING THEM!** You can charge from either a 110-volt, 60-cycle supply **OR YOUR CAR BATTERY! ONLY GARRETT OFFERS AUTO RECHARGING!**

Zero Drift Stability

Only an occasional retuning is all that is ever necessary with Garrett's ZERO DRIFT STABILITY!

The **MONEY HUNTER** P.B. VLF/TR "GROUNDHOG"

Patterned After the Famous Master Hunter "Groundhog"

The "Groundhog's" VLF/TR circuit with Push Button Tuning and Fully Adjustable Discrimination combines VLF Ground Canceling and TR Mode performance.

Has depth, speed, and ease of operation to spare. Designed to excel above all competitive push button VLF/TR's!

Garrett's
7 1/2-inch Co-Planar
Full Scan Searchcoil

These Features and Capabilities
Set the Money Hunter Apart from
All Competitive Instruments:

FEATURES: Adjustable, Quick-Lock stem. Sling & Hip Mount capabilities. Speaker. Meter. Earphone jack. Four 9-volt batteries.

CAPABILITIES: Coin Hunting, General Treasure Hunting, Ghost-Towning, Cache Hunting, Relic Hunting, Nugget Shooting.

Complete

The **FORTUNE HUNTER** P.B. VLF/TR "GROUNDHOG"

High Quality — Low Cost — Twin Circuit Discriminating Coin Detector

This performing VLF/TR is for those who desire an inexpensive, HIGH QUALITY detector with VLF circuitry to tune out the effects of mineralized ground

and TR discriminating circuitry to reject most metallic trash while detecting deeply buried coins. The

Fortune Hunter is a real performer.

Garrett's
7 1/2-inch Co-Planar
Full Scan Searchcoil

No competitive discriminating,
ground canceling detector can
compare in quality and low cost.

FEATURES: Adjustable, Quick-Lock stem. Sling & Hip Mount capabilities. Speaker. Earphone jack. Four 9-volt batteries.

CAPABILITIES: Coin Hunting, General Treasure Hunting, Ghost-Towning, Cache Hunting, Relic Hunting, Nugget Shooting.

Same as Money Hunter less Meter and Battery Check.

AMERICAN TR & VLF/TR

Detectors

Designed for the Coin and Competition Hunter. The American's Lightweight and Simplified Controls Will Be Appreciated by the Entire Family!

Garrett's new, lightweight, super-fast, compact design has all the features found on even the highest priced TR's and VLF/TR's! We have retained the semi-silent tone, quickness of response, and ease of operation for which TR's are famous. Garrett's push button tuning gives you instant retuning... just push a button! The discriminating switch lets you instantly select the amount of junk rejection you want. Take a long look at the American. The looks, the design, the performance, and everything that went into this detector is unmistakably Garrett... QUALITY THROUGHOUT!!!

7½-inch Deep Scan
Co-Planar Searchcoil

★ 15 kHz
Operation

New Improved
Response Time!

Greatly excels in competition
treasure hunting!

The AMERICAN VLF/TR S3

Due to popular demand, we have designed the highest quality/low cost VLF/TR available for today's treasure hunter. Every feature and control has been installed on the American VLF/TR S3, yet extreme simplicity of operation is retained. You can reach super VLF Ground Canceling depths even in highly mineralized ground, and with the flip of a switch instantly identify the target! You'll love its push button tuning, sensitivity meter, fast light-weight operation, and its SUPERB QUALITY!

The AMERICAN TR S1

America's Highest Quality
Low-Cost TR Discriminator!

You can expect high performance from the American TR S1! Its Sensitivity Meter, Single Knob Tuning, Hi/Lo Sensitivity Selector, 3-Position Discriminator Switch (All Metal — Bottlecaps — Pulltabs) and Battery Check Switch give you complete control over this superb detector!

Complete with 7½-inch Co-Planar Searchcoil and Batteries

GARRETT ELECTRONICS

INTRODUCES...the
WORLD'S SMALLEST,
MOST COMPACT
PROFESSIONAL
METAL DETECTOR
the

GARRETT POCKET SCANNER!

For years, treasure hunters and prospectors have waited for this totally automatic wide range metal/mineral detection instrument.

A Revolutionary, Totally Automatic, Self-Contained Metal Detector

The Garrett Pocket Scanner has revolutionized the detection of metals and minerals where ultra-small size and compactness are required. This quality, rugged professional detector offers not only superb detection of metals but also it is **TOTALLY AUTOMATIC IN OPERATION**. To operate the detector, simply press the Power Switch and begin searching! That's all there is to it. And, want to check the battery? That's automatic, too! Just listen to the audio tone and it will automatically tell you when you have 10% battery power left!

Perfect Companion

The Garrett Pocket Scanner is the perfect detector companion to keep in your shirt or hip pocket, lady's purse, Garrett's belt pouch, or in your auto glove compartment as you travel. It is always ready for those instant searches for caches, guns and relics in old deserted houses, for shallow coins and relics in out-of-the-way places and for detecting valuable ore specimens at old mines and prospectors' diggings.

***TWO MODELS AVAILABLE!**

PERSONAL CHECKMATE: For Treasure Hunters, Prospectors, etc. Colors: Marsh Green & Grey. **Model 11120.**

WEAPONS DETECTOR: For Security and Law Enforcement, etc. Colors: Black & Grey. **Model 11127.**

The
Garrett

Sea Hunter

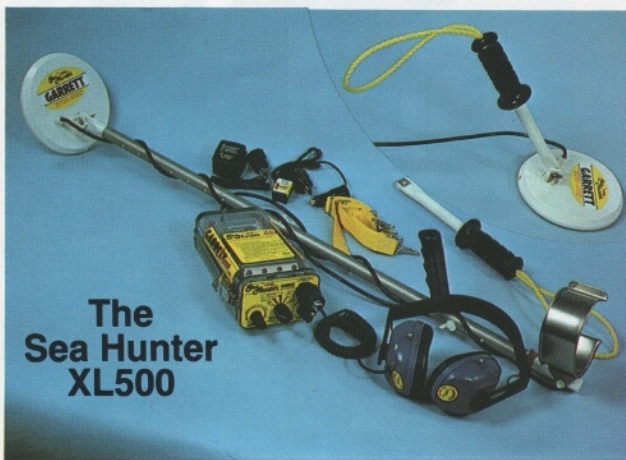

The World's **ONLY** professional metal detectors designed for both land and underwater! Garrett's specially designed VLF/TR Sea Hunter instruments can search for Nature's Gold in highly iron mineralized areas or for Spanish Treasure in the sea depths. *No other type metal detectors can perform these remarkable feats!*

The Sea Hunter XS500 is designed for Underwater/Deep Sea Operation. The short stem permits the diver to check and dig "targets" with his free hand without having to swim closer to the point of detection.

GARRETT SEA HUNTER XS500 AND XL500 FEATURES

- Garrett Professional Quality Master Hunter VLF/TR Circuitry
- Three Modes:
 - Iron Ground Canceling
 - Salt Water Operation
 - Trash Rejection
- Manual/Automatic Tuning
- Detection/Battery Test Meter
- Headphones with Garrett's Unique "Melo-Tone" Sound
- Signal Detect and Battery Charge LED's
- Super VLF/TR Depth Detection:
 - Coins: to 18-inches-plus
 - Max Detection: 6-feet-plus
- Power: Three 9-volt Rechargeable Ni-cad Batteries with 110V and 12V Recharger
- Tested & Certified to 200-foot Depth
- 2-Year Warranty (See page 21.)

The Sea Hunter XL500 is designed for LAND, BEACH, and/or UNDERWATER RECOVERY. The long adjustable length stem permits "normal" stance when operator searches on land or in shallow water. The Short Stem is provided for optional underwater use.

Three professionals make up the Garrett Team that designed, perfected, and field proved the Sea Hunter: Bob Podhrasky (left), Garrett's Chief Engineer; Monty Moncrief (right) of NASA, Houston, Texas; and Charles Garrett, President, Garrett Electronics

This quality CARRYING BAG is supplied free with each Garrett Underwater Sea Hunter.

The "PROFESSIONAL"
"GRAVITY TRAP"® GOLD PAN KIT!
 GARRETT THE WORLD'S BEST & MOST COMPACT

Gold, one of our most precious metals, has been mentioned throughout recorded history, even in the Bible. It has been recovered with every type "pan" imaginable and with every conceivable "tool" from hub caps to blankets.

A CORRECTLY DESIGNED PAN

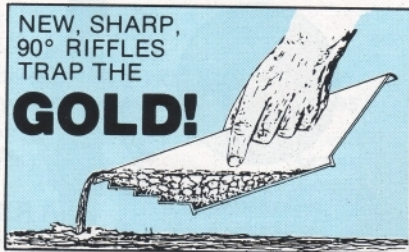

A combination of proved panning principles, developed over many years, and a utilization of gravitational forces that cause efficient separation of heavy and light materials, has been employed in the design and production of a professional model, high impact ABS plastic pan: the Garrett "Gravity Trap" Gold Pan. Years ago it quickly became the world's most popular gold pan. The United States government awarded it U. S. Patent No. 4,162,969!

GOLD PAN COLOR

In response to the sudden increase in gold prices, there has been an influx of pan manufacturers who produce pans in colors (such as blue, black, orange, red, white, even burgundy) which present little direct contrast to the natural yellow of gold. A light green, on sunny days, "loses" the fine yellow particles; on cloudy days, dark green, like black, "loses" the fine yellow particles. Garrett determined that a certain shade of forest green provided the best contrast to yellow gold and they chose that color for the "Gravity Trap" gold pan.

1 GARRETT'S STANDARD 14-INCH PROSPECTOR PAN Model 16500

Manufactured of high quality ABS plastic, the sharp 90-degree riffles provide a positive trap for heavy gold. This patented riffle design enables the experienced panner to work two or three times as much gravel and provides the beginner with complete confidence that he or she will immediately begin saving gold.

2 GARRETT'S 10½-INCH PIGGY BACK PAN Model 16501

The sharp 90-degree riffles provide a positive trap for heavy gold. The carefully selected, EXTRA HEAVY textured surface provides a sure trap for super-fine gold when used as a finishing pan. Long, sloping sidewalls permit the panner to separate fine gold from black sand. The Piggy Back model is large enough to be used as a standard, all-purpose pan, yet small enough to be used as a finishing pan.

3 GARRETT'S COMBINATION CLASSIFIER Model 16502

The funnel-shape design expedites gold panning speed by classifying and permitting discarding of worthless gravel. Correct design permits use of ALL TYPES of gold pans, 10½-inch and larger. SQUARE HOLES retain dime size and larger material. Saves larger gravel when garnet hunting and classifies smaller size gravel when sapphire digging.

ACCEPT NO SUBSTITUTES!

Envious of our world-wide success, many manufacturers have attempted to copy the "Gravity Trap" features. To avoid patent infringement, these copies do not have the correct 90° riffles but 80° or less, which obviously cannot reproduce Garrett's fine gold retention effectiveness. DON'T LOSE GOLD! USE ONLY GARRETT'S PATENTED, FIELD PROVED "GRAVITY TRAP" PANS!

APPROVED AND RECOMMENDED BY THE GOLD PROSPECTORS ASSOCIATION OF AMERICA

Roy Lagal, Lewiston, Idaho, professional prospector and author, displays the world-famous "Gravity Trap" gold panning equipment which he designed, perfected, and patented. This complete prospector's kit is manufactured by Garrett Electronics and sold the world over by Garrett dealers and distributors.

GARRETT'S GOLD PANNING KIT Model 16505

Garrett's panning kit was assembled for the professional and the amateur. The kit consists of the 14-inch ABS plastic "Gravity Trap" Prospector Pan, the 10½-inch ABS plastic "Gravity Trap" Piggy Back Finishing Pan, the combination Classifier, and a copy of GOLD PANNING IS EASY by Roy Lagal. All pieces snuggle together, making this the only compact gold panning kit available anywhere.

On these two pages you will find many useful and popular accessories, attachments, and goods for yourself and for use on or with your Garrett metal detector.

Garrett's 3-Way Universal Hip Mount!

HANDLE MOUNTED

SLING MOUNTED

Only Garrett offers convenient handle-mounted A-D-S-

HIP MOUNTED Mode/Tuning Control.

Garrett is first to offer the ability to convert any Garrett detector (except American and International) into three popular configurations. *FIRST*, quickly convert your Garrett into a very efficient, light-weight hip mount detector. *SECOND*, the sling may be attached to the control housing, converting your Garrett into a portable, minimum-weight, sling mount configuration. And, *THIRD*, for the best balance when using larger coils or for extremely fast and wide-sweep coverage, you can attach the control housing to the end of the hip mount handle. Thus, you can see, with Garrett's Universal Hip Mount you have at your command the greatest maneuverability, speed, and operational possibilities imaginable and

without the extra cost of purchasing both a standard and a hip-mount detector. (When ordering separately, please give detector name and model number on which the Hip Mount will be used.) **VERSATILITY IS YOURS FROM GARRETT!!!**

"Groundhog" cannot adapt to Handle Mount.

APPLICATION/SELECTION DATA GARRETT SEARCHCOILS/ PROBES

BLOODHOUND: Gives MAXIMUM DEPTH on mass objects (a cube with sides of 9 inches [22 cm.]) and larger size targets. Does not detect nails and other small metal objects, thus preventing much needless digging of worthless metal trash. USES: Treasure Hunting, Money/Cache Hunting, Battlefield/Relic Hunting, Prospecting.

14-12-INCH SEARCHCOILS: Gives EXTREME DEPTH on all targets coin size and larger. Will detect nails and other small metal trash in VLF mode. Extra weight of 14-inch (and perhaps 12-inch) searchcoil may require hip mount. USES: Treasure Hunting, Money/Cache Hunting, Battlefield/Relic Hunting, Prospecting. 12-inch may be used for extreme depth on coins.

10 1/2-INCH SEARCHCOIL: Gives super-deep detection of all metal objects from matchhead size and larger. Ideal maximum depth/moderate weight searchcoil for coins, relics, nuggets, and larger objects. Good pinpointing. USES: Treasure Hunting, Coin Hunting, Money/Cache Hunting, Battlefield/Relic Hunting, Prospecting, Ghost-towning, Beachcombing.

8-7 1/2-INCH SEARCHCOILS: These are the most popular, super-depth/lightweight searchcoils for detecting all size targets matchhead size and larger. Preferred for deep detection of coins, nuggets, and larger/moderate-depth objects. Excellent pinpointing. Co-axial searchcoils give superior operation in troublesome high voltage and power line interference situations. USES: Treasure Hunting, Prospecting, Ghost-towning, Beachcombing.

3 1/2-INCH SEARCHCOIL: (*Super-Sniper*) Extremely intense/narrow electromagnetic beam searchcoil for excellent depth on matchhead size and larger objects. Highly maneuverable and lightweight. Extremely sharp pinpointing. USES: Coin Hunting, Coin Sniping, Prospecting, Ghost-towning, Beachcombing.

3/4-INCH SEARCHPROBE: (*Sharp Shooter*) This special-applications searchprobe is designed to detect pinhead and larger size nuggets, placer, and all metal. For probing in cracks, fissures, and other small areas. Can be used in both VLF Ground Canceling and TR Discrimination modes. USES: Prospecting; small nuggets, ore testing. Exploratory readings: core drilling mineralized areas.

A SALUTE from GARRETT Electronics to... The Factory Authorized GARRETT DEALER

At Garrett Electronics we work hard through special training programs and selection procedures to insure that our world-wide family of dealers is the best in the business. Your local factory authorized representative has, in most cases, countless hours of metal detecting and treasure hunting experience to provide you with expert help as you begin and continue the great outdoor hobby of treasure hunting. Many dealers are factory trained. This year we will hold ten or more seminars throughout the U.S. for our dealers to attend to sharpen their metal detector, treasure hunting, and electronic prospecting skills in order to serve you, the GARRETT CUSTOMER, better. Before buying, look for this sign displayed at your local dealer's place of business.

FREE TREASURE HUNTING, PROSPECTING, & METAL DETECTOR INFORMATION

We publish and distribute FREE* many informative and valuable booklets and pamphlets on practically every phase of this, our exciting and rewarding hobby and sport. The information contains a wealth of material that you should know about. Much of it is printed nowhere else. Go by your local Garrett dealer for your free copies or contact the factory and we will see that you get the information. (*Some dealers may charge a slight fee to cover costs.)

CLUBS ATTENTION! TREASURE MOVIES: FREE LOAN!

The cameras are rolling as Charles Garrett, second from left, and John Quade discuss a gold nugget during the filming of a movie about gold and treasure hunting. This and other films are available from Garrett Electronics for viewing by treasure clubs and other interested groups. To obtain a free loan of these 16mm color/sound movies, write Garrett Electronics, 2814 National Drive, Garland, Texas 75041. Films which you may borrow are: GOLD AND TREASURE ADVENTURES; TREASURES OF MEXICO; THE SILENT PAST. These shows are also available on one-half-inch VIDEO TAPE for use with your home entertainment equipment. (VHS format only.) Several other films are now in production.

TWO (2) YEAR WARRANTY

Garrett Electronics, Inc. ("Garrett") warrants that each metal/mineral detector manufactured by it will be free from defects in materials and workmanship for a period of two (2) years. (Warranty is transferable during this period if detector is resold.)

Should any failure occur within the two (2) year warranty period, Garrett will, at its option, repair or replace the defective detector without charge, except any transportation charges for the return of the detector to the Garrett factory. This warranty does not cover any detector that has been abused, tampered with, or repaired by an unauthorized party or sold by an unauthorized Garrett dealer. This warranty does not cover water damage done to any components mounted inside the Sea Hunter Control Housing if Garrett Certification Seal is removed. Further, no batteries sold or supplied by Garrett are covered by this warranty.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. Garrett assures you of the finest electronic equipment and service.

LIFETIME GOLD PAN WARRANTY

Garrett Electronics guarantees these high quality pans against rust, deterioration, acids, normal wear, and defective workmanship. Guarantee does not cover misuse or deliberate breakage with large rocks and hammering. Distributors and retail outlets accept no responsibility for replacement. Send damaged pans direct to factory with \$2.00 to cover handling and shipping of each pan and classifier to be replaced.

SPECIAL NOTICE! FREE MEMBERSHIP! JOIN GARRETT'S *SEARCH INTERNATIONAL* TODAY!

Garrett's **SEARCH INTERNATIONAL** (GSI) is an organization devoted to helping YOU become a better Treasure Hunter, Electronic Prospector, and Metal Detector Operator. **GSI** sponsors low cost Public Seminars and encourages all members to attend and learn from professionals who share their knowledge. Membership in **GSI** is **FREE!** Simply send your name and address and you will receive *free* information about **SEARCH** seminars and other activities and Garrett metal detection equipment and its correct usage, plus 10 percent discount on all Ram Books ordered through **GSI**. As a member, you may choose to subscribe to two periodicals, the Garrett **SEARCHER** magazine and the **MINI-SEARCHER** newspaper. One year's subscription is \$3 (overseas countries \$6). Both publications contain a wealth of valuable information which will help you improve your detecting skills and treasure hunting success. To receive your **FREE** membership in **GSI**, simply send your name and address to **SEARCH INTERNATIONAL**, 2814 National Drive, Garland, Texas 75041, U.S.A. If you want to receive the **SEARCHER** magazine and the **MINI-SEARCHER** newspaper, include \$3.00 (\$6.00 overseas) for one year's subscription, as described above.

THE FOUR SUCCESSFUL TREASURE HUNTERS PICTURED BELOW HAVE FOUND THEIR OWN HIDDEN WEALTH! IN THE GARRETT **SEARCHER** PERIODICAL AND **MINI-SEARCHER** NEWSPAPER YOU WILL READ ABOUT PEOPLE LIKE THESE AND WILL LEARN THEIR TREASURE HUNTING METHODS AND SECRETS!

Meet George Mroczkowski, professional treasure hunter, instructor, and author. Here George is working with a team of volunteers and a Garrett Deepseeker detector to recover irreplaceable medals and other artifacts from the ruins of the National Aerospace Museum in San Diego, CA, after the recent fire that totally destroyed the building. George has trained many new treasure hunters in the classes he teaches at his treasure shop and museum located at 2493 San Diego Avenue, San Diego, CA. Stop by and see him. George's advice to you: "Combine the best equipment with practice and expertise in operating it — success has to follow!"

Bob and Jane Sealand of Sealand's Metal Detectors 422 Sells Lane, Greensburg, Pennsylvania 15601, are avid treasure hunters who enjoy participating in every phase of treasure hunting. Searching ghost towns and Civil War battlefields occupies much of their time, but their favorite treasure hunting activity is searching swimming areas for coins and jewelry. The photo of the Sealands shows some of their recent battlefield finds while the inset photo shows a few of the many rings they have found. Bob and Jane are active in their local club and they've recently co-sponsored a Garrett/Search International public seminar.

Outlaw strongbox recovered in Illinois! After picking up a robbery lead in a very old newspaper, Rene LeNeve of Bloomington, Illinois, continued his research of the story until his efforts paid off! Here is the strongbox that Rene found. It contained the two pistols and an undisclosed (sorry!) amount of "hidden wealth." Rene has had a ring made with thirteen diamonds taken from lost rings found while coin hunting. Rene specializes in hunting abandoned house sites. The VLF/TR A•D•S• detectors provide the power he needs to locate those long forgotten and carefully hidden caches. Rene's advice: "Don't give up just because someone has looked a site over before you get there. Most treasures are recovered from supposedly 'worked out' sites."

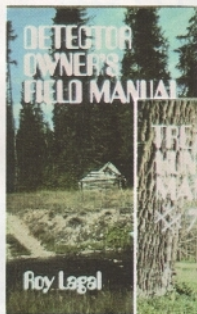

Coin hunter finds \$12,000 Continental Dollar! Estimates of up to \$12,000 have been placed on the 1776 pewter Continental dollar found recently by Richard Smart with his Garrett detector. Richard has been an active and successful "hidden wealth" hunter for many years. During the past five years he has chosen and used Garrett detectors exclusively. He has amassed a large quantity of coins and jewelry while coin hunting, and he found a large money cache at an old homestead site. Richard will tell you that the correct choice of detectors and searchcoils can mean the difference between success and failure.

How to use your detector to find hidden wealth... Knowledge is the key to success

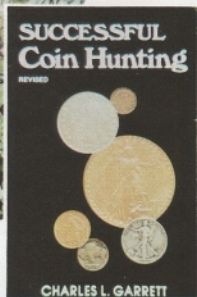

"INCREASE YOUR CHANCES OF SUCCESS ONE-THOUSAND-FOLD WITH THE CORRECT KNOWLEDGE OF WHERE AND HOW TO SEARCH. THESE BOOKS WILL SHOW YOU HOW!"

- 1 **DETECTOR OWNER'S FIELD MANUAL.** ROY LAGAL. This complete field manual fully explains BFO, TR, VLF/TR, PRG, PI, and other detector types and shows you exactly how to select and use each type in all treasure hunting situations. The MANUAL contains complete sections on all phases of coin, cache, and relic hunting; prospecting; nugget hunting; gold dredging; rockhounding; and includes true stories of money actually found. Reading this book could mean the difference between success and failure. If you could choose only ONE BOOK, this should be it! Many illustrations. 236 solid pages! No. 15041. \$6.95.
- 2 **TREASURE HUNTER'S MANUAL #7.** When you finish KARL VON MUELLER's book (you'll stay up all night reading it!), you will have NO DOUBT that lost treasure does exist. Karl tells you how to find it! Complete information on research, reasoning, law, taxes, tools, secrecy, and the what, who, when, why, where, and how of treasure hunting. Probably the best known TH-ing book. Many photos. 334 informative pages. No. 15036. \$7.95
- 3 **SUCCESSFUL COIN HUNTING.** CHARLES GARRETT. This book contains practically ALL the information that is known about coin hunting. Since more than 90 percent of all detector owners hunt for coins and related objects, SUCCESSFUL COIN HUNTING must be in your library. The author personally guarantees you'll find good, necessary information on EVERY PAGE! Don't waste time... read SUCCESSFUL COIN HUNTING. Start right and BE SUCCESSFUL! Over 100 photographs. 248 pages. No. 15015. \$6.95
- 4 **HOW TO TEST "Before Buying" DETECTOR FIELD GUIDE.** ROY LAGAL. If you are confused by words like "sensitivity," "mineralization," "Faraday shields," "tuning range," and hundreds of others, this technical guide will straighten you out. You will understand detector lingo and you will be able TO TEST ANY TYPE DETECTOR FOR YOURSELF before buying. No longer will you have to take the dealer's or manufacturer's word for it. Learn how NOT to be misled. Buy right the first time! Illustrated. 64 pages. No. 15032. \$3.95.
- 5 **TREASURE HUNTER'S MANUAL #6.** KARL VON MUELLER. Thousands of ideas, tips, state-by-state treasure leads, photos, and other valuable information to start all TH'ers on the road to successful treasure hunting. Completely different from THM #7. Illustrated. 318 pages. No. 15022. \$7.95

- 6 **THE JOURNALS OF EL DORADO.** BEING A DESCRIPTIVE BIBLIOGRAPHY ON TREASURE AND SUBJECTS PERTAINING THERETO. A WAYBILL TO DISCOVERY AND ADVENTURE. CONATSER, VON MUELLER. An invaluable reference work to save thousands of hours of research time. Countless sources of leads to unfound treasure, mineral wealth, relics, and artifacts all over the U.S. and in foreign countries. By far the world's greatest collection of treasure lead sources for treasure hunters, prospectors, and collectors. 380 pages. No. 15055. \$9.95.
- 7 **TREASURE HUNTING PAYS OFF!** CHARLES GARRETT. You will come away from this book with a capsule summary of the entire field of treasure hunting. It explains and illustrates what this fascinating and rewarding hobby is all about. You will learn where and how to find valuable relics and forgotten treasures of yesterday. You will discover that treasure hunting does PAY OFF and HOW IT CAN PAY OFF FOR YOU! Many photographs. 92 pages. No. 15044. \$3.95
- 8 **GOLD PANNING IS EASY.** ROY LAGAL. Where to find gold and how to pan it. All confusion surrounding old, established methods is removed. A NEW LOOK guaranteed to produce results with the "Gravity Trap" gold pan or any other pan. Special "how to" instructions on metal detecting, prospecting, rock hounding, and gold dredging. This book is a must for the beginner or professional! Fully illustrated. 96 pages. No. 15054. \$3.95.
- 9 **ELECTRONIC PROSPECTING.** CHARLES GARRETT, BOB GRANT, ROY LAGAL. A tremendous upswing in electronic prospecting for gold and other precious metals has recently occurred. Due to high gold prices and the unlimited capabilities of the new VLF/TR metal detectors, the increased activity in prospecting has led to many fantastic discoveries. Gold is there to be found. If you have the desire and want to be successful, then this book, written by top authorities, will give you the field/detector guidance you need. It will show you how to select (and use) from the many brands of VLF/TR's on the market those that are correctly calibrated to produce accurate metal vs. mineral identification which is so vitally necessary in the prospecting field. Illustrated. 96 pages. No. 15046. \$3.95.

- 10 **THE COMPLETE VLF-TR METAL DETECTOR HANDBOOK (ALL ABOUT GROUND CANCELING METAL DETECTORS).** ROY LAGAL, CHARLES GARRETT. The unparalleled capabilities of the new VLF/TR ground canceling metal detectors have proved these instruments to be popular. From History, Theory, and Development to Coin, Cache, and Relic Hunting to Prospecting... the widely recognized authors explain in detail the capabilities of the VLF/TR detectors and how they are used. Everything one needs to know about these instruments and how to use them is contained in these pages. Learn the new ground canceling detectors for the greatest possible success. Illustrated. 200 pages. No. 15045. \$7.95.
- 11 **PROFESSIONAL TREASURE HUNTER.** GEORGE MROCKOWSKI as told to Chara Bishop. It is well proved that research is 90 percent of the success of any treasure hunting endeavor. As you read this book, you will be amazed at how many treasure leads one man can come up with. You will learn how, through proper treasure hunting techniques. George was able to find treasure sites, obtain permission to search, select and use the proper equipment, and then, in many instances, recover treasure. Profusely illustrated. 154 pages. No. 15024. \$6.95.
- 12 **THE COMPLETE BOOK OF COMPETITION TREASURE HUNTING.** ERNIE "CAROLINA" CURLEE. As the title says, this book gives the details you need to know to sponsor or compete in an organized treasure hunt, practical information from the author who has sponsored and competed in many hunts himself. Separate sections on "HOW TO SPONSOR" and "HOW TO WIN," with a complete chapter on "Understanding Your Detector." Every metal detector owner/treasure hunter can benefit from Ernie's down-to-earth, plainly written information and instructions. Many illustrations. 88 pages. No. 15013. \$5.95
