

GARRETT

Metal detectors that find treasure!

TREASURE DISCOVERED!

My reputation stands firmly behind every Garrett metal detector built. Garrett equipment users worldwide have discovered multiple millions of dollars worth of coins, jewelry, money caches, gold and silver and other treasure. I want YOU to be successful, and you can be, as we have a field-proven, patented detector for every application. Garrett metal detector users LEAD THE WAY!"

Charles Garrett

COIN HUNTING:

You can find five thousand lost coins each year in parks, settlers' campsites, carnival grounds and ghost towns. One Garrett user found a gold coin valued at \$300,000! Gold, silver and old, rare coins are waiting to be found by those who seek them.

CACHE HUNTING:

Gold and silver coins, jewelry and other treasure from stagecoach holdups, outlaw robberies, modern-day heists, old farmhouse "posthole" banks, hen-house caches and even "bread and butter" cookie jars are frequently found by diligent cache hunters.

BATTLEFIELD/RELIC HUNTING:

Searching battlefields for war relics and ghost towns for hidden treasure pays top rewards. Money caches and valuable historical items including projectiles, weapons, buckles, coins, jewelry and other personal articles are regularly discovered.

BEACHCOMBING/WATER HUNTING:

These are two of the best types of treasure hunting. Gold, silver and diamond rings, coins, expensive watches and other jewelry pieces are lost every day by swimmers and sunbathers. Search your local recreational areas...you'll be amazed!

ELECTRONIC PROSPECTING:

Gold nuggets worth one million dollars and silver veins one foot wide have been discovered with Garrett detectors. Nugget and vein searching, detecting rich placer, dredge pile scanning and mine dump highgrading have produced untold millions in wealth. YOU TOO can do it!

UNDERWATER RECOVERY:

It is estimated that ten times more wealth is lost underwater (in lakes, streams, rivers and in the oceans) than is in circulation today! Davy Jones gives up his vast treasures to treasure hunters who make the extra—but worthwhile—effort!

SUCCESSFUL TREASURE RECOVERY is almost guaranteed when you follow in the footsteps of those who have been successful and when you use correctly designed, field-proven metal detection equipment.

HOW TO SELECT THE BEST DETECTOR FOR YOU:

- (1) Review the various types of treasure hunting discussed on page 2.
- (2) Review the chart on page 15 and select the models that will perform the type of treasure hunting you wish to do.
- (3) Read about your selected models on the following pages.
- (4) If you want to learn more about detector capabilities and optional searchcoils and accessories, review the information presented on this page and on pages 13 and 14.
- (5) Select the detector and accessories that best fit your requirements.
- (6) Then...GOOD HUNTING! We recommend you continue study of this fascinating field by reading your selection of Ram books presented on the back cover.

CONTROLS AND FUNCTIONS

Each Garrett metal detector has one or more of the following controls, functions and features. See the chart on page 15 and the individual detector pages for more information.

MASTER CONTROL, MODE/RETUNE SWITCH:

All detectors have one or more operating modes that allow you to conduct various types of hunting. You select the desired mode simply by pressing this switch. All circuits are retuned simultaneously.

MANUAL ALL-METAL (VLF) GROUND ELIMINATION:

Use this mode when you desire ABSOLUTE MAXIMUM DETECTION DEPTH of all metals. You manually adjust a control to eliminate detection of iron earth minerals.

FULLY AUTOMATED GROUND/ELIMINATION:

Use this mode primarily when coin hunting, beachcombing and water hunting. Iron earth minerals are

automatically eliminated from detection. Undesirable targets are not detected.

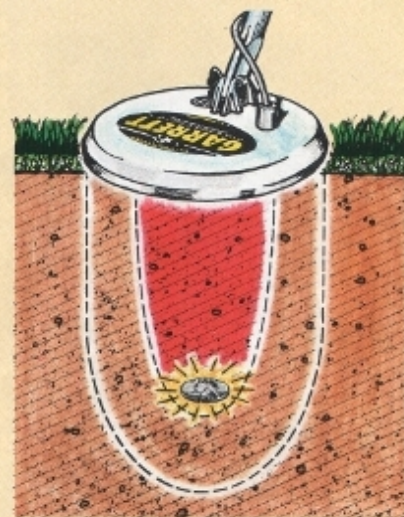

FERROUS/NON-FERROUS MULTI-RANGE DISCRIMINATION:

NEW, exclusive with Garrett! Dual intercoupled circuits gives you fully adjustable discrimination in two ranges: FERROUS AND NON-FERROUS. SYNCHRONIZED AUDIO allows you to identify targets in four distinct ranges: (1) FERROUS REJECT (nails, foil, bottlecaps and bits of iron); (2) FERROUS ACCEPT (nickels, small platinum and gold rings and other treasure); (3) NON-FERROUS REJECT (aluminum pulltabs and screwtops); (4) NON-FERROUS ACCEPT (larger rings, jewelry, gold and silver coins and other treasure).

ADVANCED TARGET CLASSIFICATION METER:

Before you dig, this visual indicator tells you if your target classifies in the iron, gold or silver range—more specifically, if it is a nickel, dime, quarter, half-dollar or dollar, or a ring. Trash is also identified. A separate meter scale tells you the depth of detected coins.

INITIAL SETTINGS (➤): You will find all Garrett detectors extremely easy to use. Just set the knobs to the INITIAL SETTING marked with the symbol (➤), turn the detector ON to your preferred audio level, and START HUNTING.

ZERO-MOTION, ELECTRONIC PINPOINTING:

This circuit is activated by pressing the MASTER CONTROL, MODE/RETUNE SWITCH. It lets you pinpoint buried objects with extreme accuracy, less digging time means more treasure.

COIN ALERT™: You'll love this "sound of money" belltone that instantly identifies detected coins. Another Garrett exclusive!

LOW CURRENT-DRAIN CIRCUITS:

Garrett detectors are designed to scan quickly through the ground, not go quickly through batteries. Efficient circuits and long-lasting Garrett SURVIVOR batteries save you many dollars in battery replacement costs.

Garrett Master Hunter 7 THE WORLDWIDE LEADER!

TOTAL CAPABILITY—SIMPLE OPERATION: Why waste your valuable time with limited capability equipment? Garrett offers you circuitry that sets industry standards—yet is simple to operate! Consider:

- The world's most complete range of interchangeable searchcoils and accessories;
- Zero-motion, electronic pinpointing that dramatically speeds recovery of valuable targets;
- A clear, simple control console for ease of operation (compare to other brands requiring up to 12-knob, complicated adjustments and knowledge of their "jargon").

A 10-year track record of success around the world proves the Master Hunter outperforms competition in all fields! If you want to be successful, go with the proven winner!

ALL PURPOSE CAPABILITY DEEPSEEKING

Coin Hunting
Ghost Towing

SOPHISTICATION AND HIGH-TECHNOLOGY REDUCED TO SIMPLE OPERATION

MASTER HUNTER 5

Search SUPER DEEP for treasure, caches, coins, relics and gold. The Master Hunter's Manual All-Metal (VLF) and Automated Ground Elimination (with Trash Elimination) modes, Coin Depth Measuring and Electronic Pinpointing outclass all competitive detectors! Quality, Dependable Performance. (See page 15 for complete specifications.)

The Master Hunter 5 complete with 7½-inch and 12-inch searchcoils and armrest, Model 11717. \$539.95.

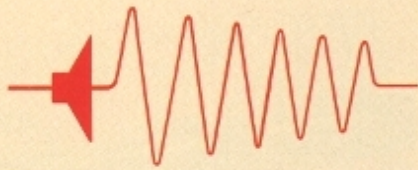

The Master Hunter 5 complete with 7½-inch Searchcoil, Model 11716. \$449.95.

THE DEPTH MULTIPLIER.

Only Garrett offers a "Two Box" deepseeking accessory for locating deeply buried treasure. Absolutely no adjustments required even over the toughest minerals. Just SWITCH ON and start your search. (See Model 16072, Pg. 13)

15 to 20 ft. Depths

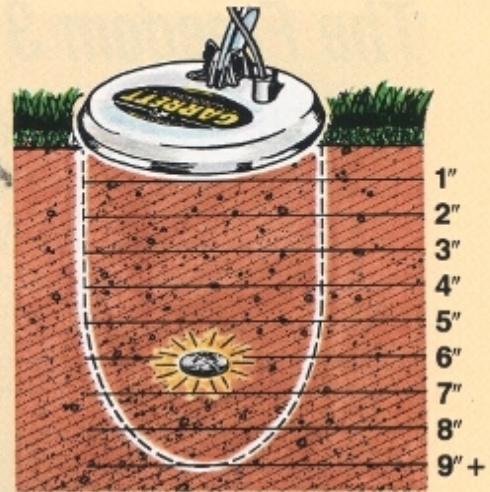

COIN ALERT™.

Only Garrett offers the "sound of money" BELLTONE that instantly identifies detected coins. Coin hunters declare this three-way DEPTH/IDENTIFICATION COIN ALERT SYSTEM the best ever devised for those who require exacting identification of every detected target. You won't believe your eyes and ears!

TARGET CLASSIFICATION METER.

The meter's remarkable target identifying accuracy and COIN ALERT™ make the earth seem invisible. You dig only the valuable targets, leaving the junk in the ground.

COIN DEPTH MEASURING.

Just make one searchcoil sweep . . . with electronic accuracy, the depth of detected coins is measured.

Turn the power switch ON, press the Master Control switch left, and the world's most powerful circuits search to maximum depths for lost and buried treasure. Press the Master Control switch right and sophisticated circuitry instantly identifies treasure versus trash. The Target Classification Meter, Coin Alert, Coin Depth Measuring, Electronic Pinpointing and 100% Garrett quality and performance give you everything you want in a metal detector including SUCCESS!

MASTER HUNTER 7, the world's most Advanced Detection System. For the person who does everything!

The Master Hunter 7 with 7½-inch and 12-inch Searchcoils and armrest, Model 11697. \$689.95

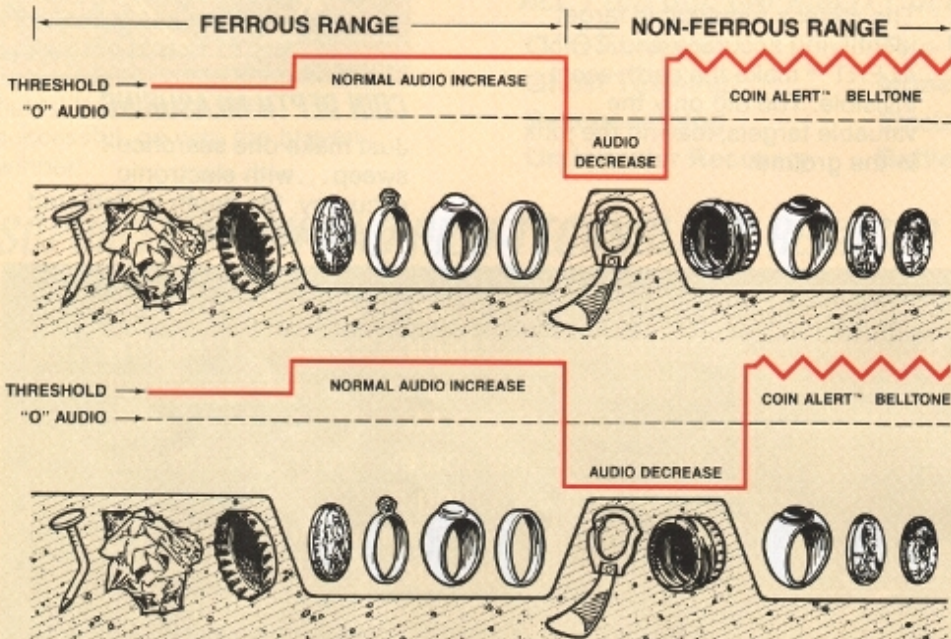

The Master Hunter 7 with 7½-inch Searchcoil, Model 11696. \$599.95

The Freedom 3 Coin Commander

FERROUS/NON-FERROUS MULTI-RANGE DISCRIMINATION – HIGH ACCEPT/REJECT TARGET RESOLUTION NEVER BEFORE POSSIBLE.

The illustrations show just two of the Freedom 3's virtually limitless Accept/Reject possibilities. Shading means "reject" area. Note the four ranges: FERROUS REJECT; FERROUS ACCEPT; NON-FERROUS REJECT; NON-FERROUS ACCEPT. Also note the synchronized discriminating audio signals that tell you in which range targets have been detected.

NOTE: All metal objects (targets) have a certain electrical detection characteristic called "conductivity". Trash metal targets have low conductivity and are therefore "placed" on the left in the above illustrations. Silver coins have the highest conductivity and are "placed" on the right. Other targets fall in between.

Freedom 2™

MAJOR PERFORMANCE FEATURES

- Automated Ground Elimination
- Twin, Full-Range Adjustable Trash Elimination
- Pistol-Grip Configuration
- Zero-Motion Electronic Pinpointing
- Silent or Audio Threshold
- Detection Depth Control
- Recessed Control Housing

- Single, Full-Range Adjustable Trash Elimination
- Pistol-Grip Configuration
- Silent or Audio Threshold
- Detection Depth Control
- Recessed Control Housing

Freedom Ace
Model 11791
\$269.95

NEW! The Freedom 3™

In keeping with Garrett's advanced leadership, an AUDIO discrimination system, vastly superior to simple "Good/No-Good" and narrow rejection "window" circuits was engineered. The result is Garrett's new FERROUS/NON-FERROUS MULTI-RANGE DISCRIMINATION SYSTEM™. Dual, easy to set, expanded range controls simplify operation and eliminate guesswork. The FERROUS RANGE is adjustable from zero through bottlecap rejection while the NON-FERROUS RANGE takes over at pulltab rejection and is adjustable through aluminum screwtops. Accuracy in eliminating both ferrous and non-ferrous worthless targets and in accepting the many kinds of gold and silver rings, jewelry and silver and gold coins is dramatically improved.

The FERROUS and NON-FERROUS ranges both have Accept and Reject ranges as illustrated. Synchronized audio signals instantly tell you in which range targets have been detected: (1) FERROUS REJECT—Audio Threshold Maintained; (2) FERROUS ACCEPT—Normal Audio Increase; (3) NON-FERROUS REJECT—Normal Audio Decrease; (4) NON-FERROUS ACCEPT—COIN ALERT™ Belltone! As you adjust the controls for your desired levels of Accept/Rejection, the four audio responses automatically "track" to insure correct target identification.

The Freedom 3 is truly a "Freedom" machine. There's no ground adjustment, no retuning, no guessing. Just switch the Freedom 3 ON, set the two discrimination controls to your desired positions on the clearly marked panel, and start hunting! You'll instantly know in which range targets have been detected. The unique Belltone alerts you to coins and other treasures. Press the Master Control switch to electronic pinpoint and dig deeply for the greatest treasure recovery of your life!

Freedom 3 with 7½-inch searchcoil. Model 11811.
\$499.95.

See page 3 for additional information on this Multi-Range system and see Page 15 for complete Specifications.

NEW! *The BeachHunter AT3* SEARCH TO THE WATER'S EDGE... AND STEP RIGHT

SWIMMERS AND SUNBATHERS LOSE TONS OF TREASURE... and, you can find MORE than your share! With this remarkable advanced technology detector you'll ignore Ferrous and Non-Ferrous-Range trash while you dig only Accept-Range targets such as coins, rings and other jewelry and treasure.

The BeachHunter AT3. The detector that ignores the weatherman.

The BeachHunter AT3 is a true weather-proof, rain, water, sand and even mud-proof detector that lets you find treasure like you've never found before. Fully automated, drift-free circuits scan deeply eliminating interference from fresh and salt water and iron mineralization. Ferrous/Non-Ferrous Multi-Range Discriminating circuits with synchronized audio ignore metal trash including pulltabs and screwtops. Rings, jewelry, nickels and gold and silver coins are accepted. And, here's a bonus. All "accept" targets in the Non-Ferrous range produce a loud, clear COIN ALERT™ belltone you'll soon come to recognize as Garrett's unique, unmistakable "sound of money".

No matter what the weather or terrain... take your BeachHunter AT3 anywhere, anytime. It's DEEP DETECTION, advanced circuitry, rugged, waterproof construction and its simple TURN ON operation make this detector the outdoorsman's dream machine. When the others can't you can... easily!

The all-weather, all-terrain construction and the same electronic performance as the Freedom 3, make the BeachHunter AT3 a detector like no other in the world. Use your BeachHunter AT3 anywhere... anytime!

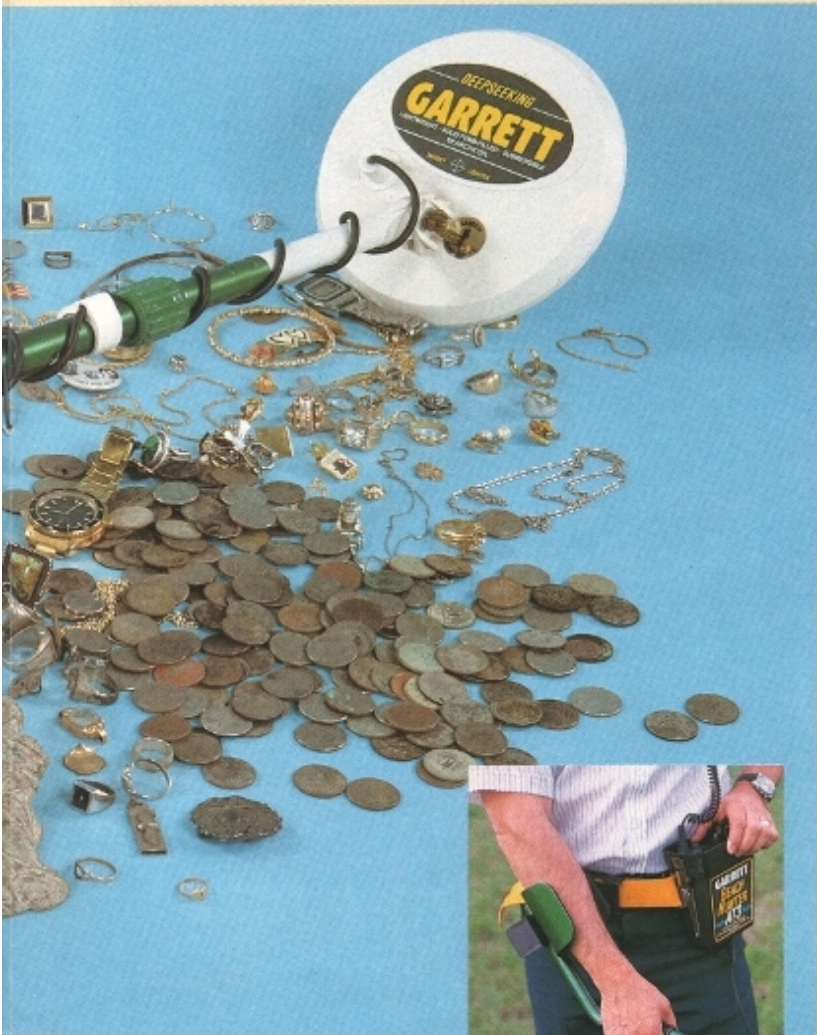

The BeachHunter AT3

Model 11820

\$599.95.

Read the Freedom 3 circuit description for further information and see page 15 for complete BeachHunter AT3 Specifications.

IN. DISCOVER TREASURES LAND HUNTERS NEVER FIND.

Convertible design permits stem-mount or body-mount operation.

MAJOR PERFORMANCE FEATURES:

- Fully Automated Ground/Elimination.
- Ferrous/Non-Ferrous Multi-Range Discrimination with Synchronized Audio.
- Coin Alert™ Belltone.
- Zero-Motion Electronic Pinpointing.
- Silent or Audio Threshold.
- Detection-Depth Adjust.
- Water/Dustproof Housing and Searchcoil.
- Pistol-Grip Configuration.
- Convertible, Stem/Body Mount.
- Rugged Construction.
- Protected Controls.
- Waterproof Headphones.
- Detector and Headphones Waterproof to six feet.

THE GARRETT PROFESSIONAL GOLD HUNTER

The internationally-proven, Gold Hunters can do it all! They found the ONE MILLION DOLLAR, HAND OF FAITH, and other nuggets as small as .05 grams! Proven professionally in the gold districts of Australia, Canada, New Zealand, Mexico and the United States.

GOLD HUNTER VLF/TR

This newest Gold Hunter, the latest in a series that had its beginning in the 1970s, features our famous 15kHz Groundhog circuit, full VLF/TR discrimination (calibration) capabilities, super sensitivity, 10-turn ground AND audio (tune), tone adjustment, and surplus power to DEEPLY punch through tough minerals. The Gold Hunter identifies metal-versus-mineral and eliminates unnecessary digging by identifying "hot rocks" as worthless. STRAIGHT VLFs AND NON-CALIBRATED UNITS CANNOT DO THESE THINGS!

The Gold Hunter with 7½-inch and 10½-inch searchcoils and armrest. Model 11802. \$529.95

The Gold Hunter with 7½-inch searchcoil. Model 11801. \$449.95.

FIND MORE GOLD

Old-time prospectors say the patented 90 degree, Gravity Trap™ riffles are so good, it's hard to throw the gold from the pan! The Kit contains everything you need to recover gold and silver.

The Gravity Trap™ Gold Panning Kit includes:

1. The Professional, 14-inch, wet or dry Gravity Trap™ Pan. Model 16500. \$7.95
 2. The Piggy Back, 10½-inch, wet or dry Gravity Trap™ Finishing Pan. Model 16501. \$6.95
 3. Combination Classifier. Model 16502. \$6.95
 4. Gold Guzzler Suction Bottle. Model 16503. \$2.95
 5. Prospecting Booklet. Model 15419. \$2.00
- All items may be purchased separately, if desired.
THE COMPLETE KIT, MODEL 16513...\$24.95

AMERICAN AM-2

High quality and performance
unmatched in this economy price range!

Recommended Trash Elimination setting.
Shading means "reject" area.

With this high quality detector you will immediately begin finding lost treasure and quickly become successful. Just set the knobs to the Initial Settings (▶), turn the detector ON to your preferred audio level and start hunting. The American AM-2 ignores mineralized ground, salt water and metal trash while it zeros in on deeply buried coins, rings and other buried wealth.

The American AM2
Model 11761
\$189.95

MAJOR PERFORMANCE FEATURES

- Manual All-Metal (VLF) Ground Elimination
- Adjustable TR Discrimination (Non-Ground Elimination)
- Master Control, Mode/Retune Switch
- Signal Strength/Battery Check Meter
- Audio Loudspeaker and Headphone Jack
- Selectable Detection Depth

See Page 15 for complete specifications.

MASTER HUNTER DS PACKAGE

The Master Hunter DS gives you the DEEPEST POSSIBLE DETECTION OF TREASURE, CACHES AND RELICS in all types of earth minerals. When the Depth Multiplier attachment is used, no adjustments are needed, ever. Simply switch ON and start searching. It ignores small metal trash. This is the only two-box detector in the world that does not require complicated and/or ever-changing adjustments. Expected depth on large objects is fifteen to twenty feet.

The twelve-inch searchcoil is in itself a deepseeker, for example, an iron pot is detectable to six feet plus.

The MASTER HUNTER DS complete with Depth Multiplier, 12-inch searchcoil, armrest and headphones, Model 11753. \$599.95.

THE LITTLE TREASURE HUNTER

THE WORLD'S SMALLEST, MOST COMPACT,
PROFESSIONAL METAL DETECTOR!

KEEP IT WITH YOU.

- Scan ceilings, walls, floors.
- Scan ground for coins, treasure, lost articles.
- Scan dug holes to pinpoint coins and treasure.
- Calibrated for ore sampling and prospecting.
- Search small, difficult and hidden places.

QUALITY BUILT/EXTREMELY RUGGED.
USE IT ANY WHERE, ANY TIME, ANY PLACE.

A Professional Treasure Hunter's instrument for locating coins, relics, concealed money caches and treasure. Calibrated for prospecting. NOT A TOY! Automatic operation, battery check, light/speaker/earplug, belt/carry case. Powered 80 hours by 9-volt battery (supplied). Compact: 6.5 x 3.25 x 1.25 inches. Weight: 10 ounces.

Model 11771
\$169.95

PULSE POWER

When professional divers, water hunters, and beachcombers search for treasure, THEY USE THEIR GARRETT SEA HUNTER XL500 PULSE! They know the Garrett Pulse Induction Circuitry performs regardless of what they ask of it. Whether it's land, lake, beach, surf, or ocean treasure you're after, you can depend upon the world's most capable land/underwater detector. The Sea Hunter XL500 Pulse is proven by the professionals!

MAJOR PERFORMANCE FEATURES

- PROFESSIONAL PULSE INDUCTION.
- MAXIMUM PERFORMANCE in fresh or salt water.
- Ignores salt water & iron mineralization.
- Adjustable Trash Elimination.
- Selectable Detection-Depth Control.
- Submersible 200-foot depth.
- 200-foot submersible headphones.
- Meter & Audio Indicators.
- Ni-Cads with 110-volt recharger.
- Long stem for land searching.
- Flexible, zippered bag.
- Optional searchcoils & accessories.

One if by land!

When searching on land, on the beach, or in the surf, use the long-stem configuration as shown above.

Two if by sea!

The Garrett Sea Hunters XL500 and XL200 are certified submersible to 200-foot depths. For underwater applications, we recommend the use of the SCUBAMATE attachment.

OPTIONAL ACCESSORIES

1. 22140 13-inch Searchcoil* \$ 99.95
2. 22138 3½-inch Searchcoil* \$ 79.95
3. 16084 SCUBAMATE Attachment \$ 79.95
4. 16079 12-v Auto Recharger (neg. gnd.) .. \$ 29.95

NOTE: (*) Searchcoils available only for Sea Hunter XL500 Pulse.

Sea Hunter XL500 Pulse

The Sea Hunter XL500 is shown with the optional SCUBAMATE accessory.

**Sea Hunter XL500 Pulse with 8-inch searchcoil
Model 11129 \$799.95**

Sea Hunter XL200 Pulse

The Sea Hunter XL200 is highly recommended for lake, beach and surf hunting. With the exception of the Selectable Detection-Depth Control, searchcoil connector and submersible headphones, the Sea Hunter XL200 is performance-identical to the XL500.

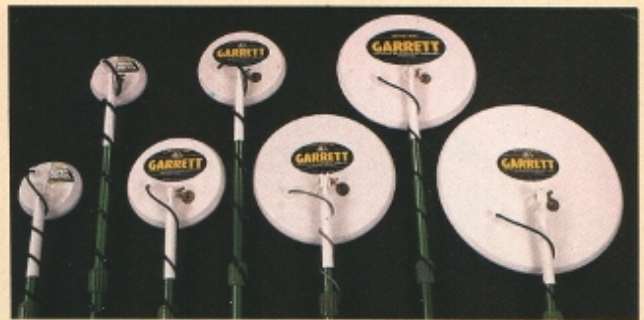

**Sea Hunter XL200 Pulse with long (land) stem,
and headphones and 8-inch searchcoil. Model
11130. \$599.95**

FIND MORE TREASURE! Use the proper size and type searchcoils.

DEPTH MULTIPLIER (BLOODHOUND). Gives EXTREME MAXIMUM DEPTH on mass objects. (See Page 4.) For Master Hunter 7 & 5. Control Housing not included. (Depth Multiplier is standard on Master Hunter DS, Model 11753). **Model 16072, \$199.95.**

UNIVERSAL HIP MOUNT KIT. Search for hours. Detector housing mounts on belt (supplied). Handle has thumb-activated Master Control, Mode/Retune switch. Uses detector lower stem. All parts supplied; some assembly required. **Model 16036, Master Hunter 7 & 5, 5-pin connector. \$69.95**
Model 16014, Gold Hunter, 4-pin connector. \$69.95

GARRETT METAL DETECTOR WARRANTY

All Garrett land type detectors and optional searchcoils are protected by a 2-year limited parts and labor warranty.

Sea Hunters are protected by a 1-year limited parts and labor warranty.

To protect you and validate your warranty, the warranty MUST BE SIGNED BY THE AUTHORIZED GARRETT DEALER FROM WHOM YOU PURCHASED YOUR DETECTOR. Warranties are transferable (to subsequent owners) during life of warranty. Gold pans carry a limited lifetime warranty. During first ninety (90) days Garrett will pay return shipping on repaired detectors. Following 90 days owner will pay \$10 handling/shipping fee. Write factory or see your dealer for a copy of the complete warranty. Foreign warranties may vary, please check with factory for details.
