

# Find Treasure with Garrett Metal Detectors

# Find Treasure with the Grand Master Hunter

**S**earch a new world of treasure discovery – unknown yesterday and unparalleled today. Perfected over a decade of design, research and testing, this instrument is years beyond any other metal detector. Computerized circuitry based on microprocessor techniques of Garrett's U.S. Patent No. 4,709,213 offers up to 50% greater depth, rock solid stability and improved discrimination. With amazing new Crossfire searchcoils and computerized, automatic ground balance the Grand Master Hunter

## Capabilities

A universal detector in the famed Garrett tradition.

- Coin Hunting
- Beach Hunting
- Cache Hunting
- Prospecting
- Relic Hunting
- Two-box Deepseeking
- Ghost Towing

emerges as the smartest, most capable metal detector available anywhere.

Despite its super sophistication, this detector is ready for action at the push of a button. Internal circuitry continually analyzes millions of mathematical computations per second to compare ground minerals and atmospheric interference with preprogrammed data, discrimination settings and target information. Garrett's unique "Sound of Money" **Belltone** and an improved meter accurately identify and classify all detected targets.

The world's first **thinking** metal detector, the Grand Master Hunter offers countless additional features you must test to appreciate, but its best trait is that **all** these capabilities are available automatically or by simple touch-pad control. Additionally, perfect balance, light weight (only four lbs.) and a unique new handle

provide ease and comfort to extend treasure hunting limits into a new world of discovery.

**The Grand Master Hunter** with 8 1/2-inch and 12 1/2-inch searchcoils, Model 11902. **\$899.95**

**The Grand Master Hunter** with 8 1/2-inch searchcoil, Model 11901. **\$799.95**

## Recommended Accessories

- 12 1/2-inch searchcoil (large, deep targets)
- 4 1/2-inch searchcoil (trashy areas)
- **Depth Multiplier** (deep caches)
- **Headphones**
- **Armrest**
- **Carry Bag**
- **Coin Hunter Kit**
- **Coil Covers**
- **Rechargeable Battery Pack**

## TREASURE HUNTING

**T**reasure hunting with a metal detector is an absolutely universal hobby appealing to men and women of all ages. And, Garrett's Grand Master Hunter is the finest detector available to pursue this hobby.

Modern detectors let the hobbyist "dial in" the exact targets desired and automatically eliminate ground minerals and unwanted "junk" from detection. Microprocessor controls and preset computer programming further simplify this task on the Grand Master Hunter.

Precise electronic pinpointing lets targets be located with accuracy to require less recovery time. Visual indicators on the Grand Master Hunter tell whether a tar-

## New Searchcoils

Garrett equips all detectors with the new Crossfire Searchcoil for maximum sensitivity and depth. See Page 15 for complete details on these stronger, lighter and more effective searchcoils.

## Recommended Reading

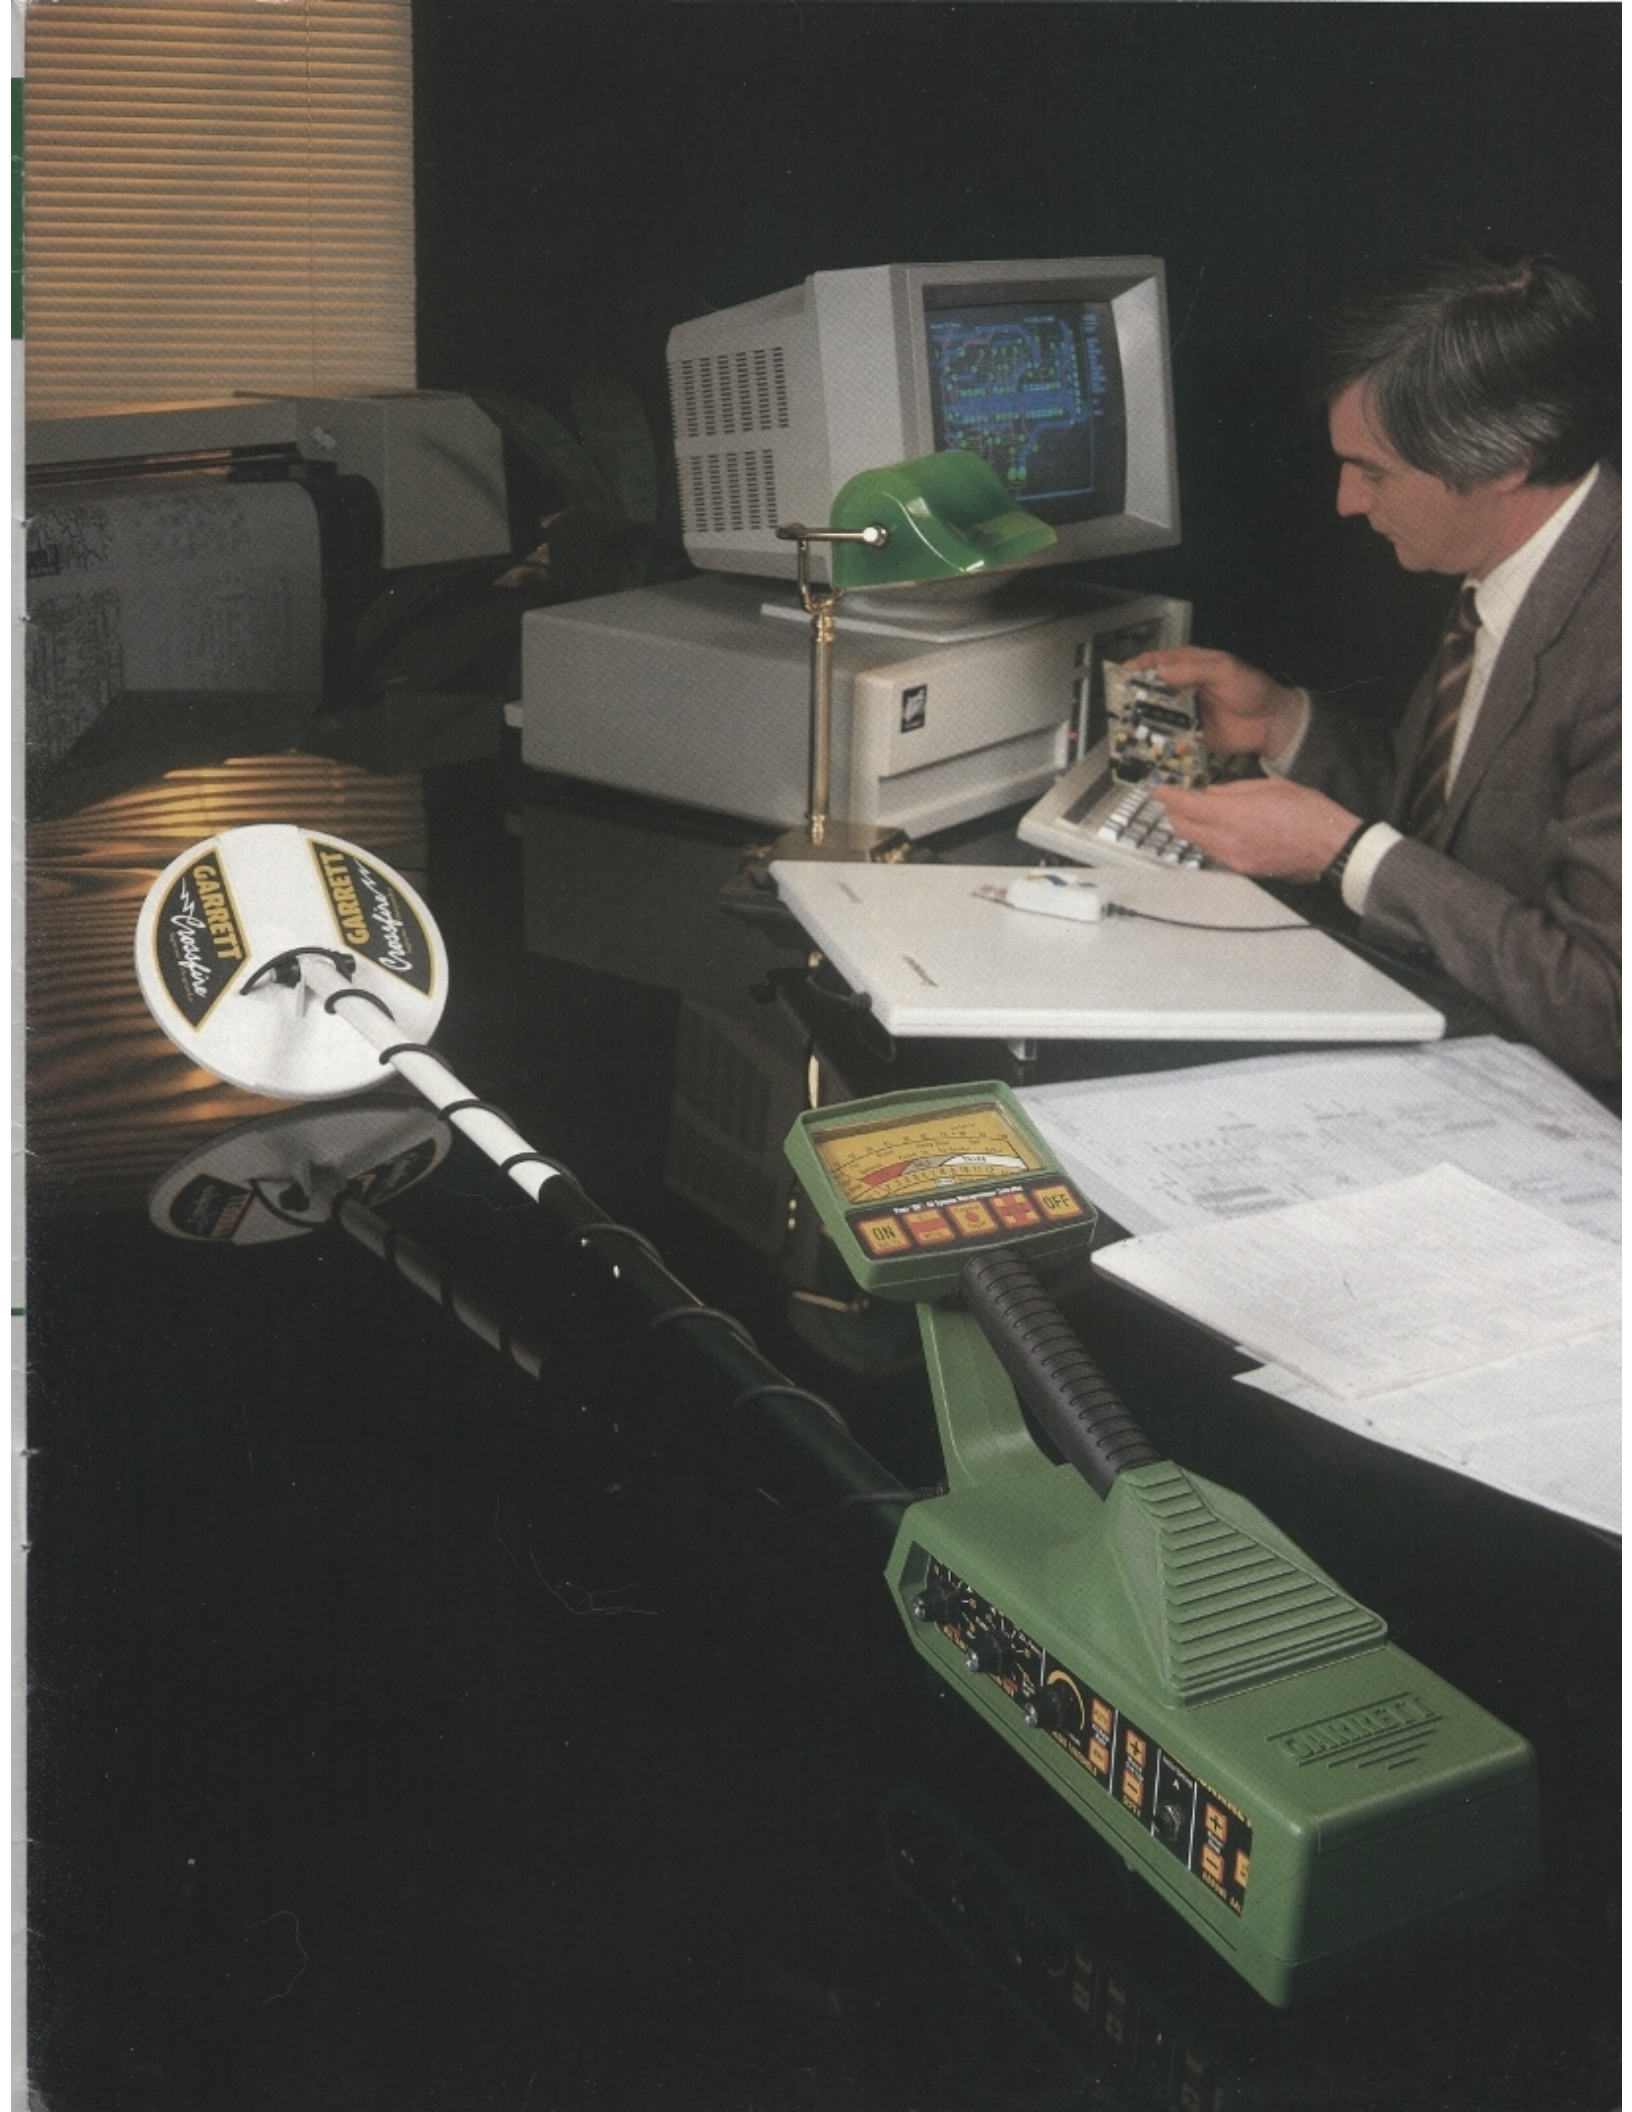

**Modern Metal Detectors** by Charles Garrett **\$9.95** from Ram Publishing See Page 15

get is in the iron, gold or silver range – more specifically, if it is a nickel, dime, quarter, half-dollar or dollar. Trash is similarly identified, and the meter also reports depth of the target below the searchcoil.

The Grand Master Hunter and other Garrett detectors permit hunting either with fully automated ground elimination, which screens out ground minerals, or with manual adjustment to permit even more precise detection depth and sensitivity.

Initial settings (▶) on Garrett detectors indicate factory recommendations for average hunting conditions. Just turn knobs to these symbols, set preferred audio level and begin hunting!

# Find Coins with the Freedom 3-CDC Series

**O**ffers the serious coin hunter added depth, freedom and discrimination. New computer-designed circuitry, responding to signals from revolutionary Crossfire searchcoils, results in greater penetration that locates coins deeper than ever before. And you'll find them with "freedom" from ground adjustment and retuning, plus multi-range discrimination that eliminates unwanted targets.

Just turn on the new Freedom 3 and search your favorite hunting grounds. You'll find coins others left behind, and you'll find them deeper than you ever imagined.

Detect all day with this lightweight instrument and its pistol-grip configuration. You'll be fresh as when you started, with little or no muscle fatigue. Moving it around is as easy as pointing your finger.

Freedom 3's Computer-Designed Circuitry minimizes detection of troublesome pulltabs

## Capabilities

Garrett's finest coin-hunting detector, the Freedom 3 also functions excellently in other hunting situations:

- Coin Hunting
- Beach Hunting
- Relic Hunting
- Cache Hunting
- Ghost Towing

## Recommended Accessories

- Headphones
- 12 1/2-inch searchcoil (large, deep targets)
- 4 1/2-inch searchcoil (trashy areas)
- Carry Bag
- Coin Hunter Kit
- Coil Covers

with Garrett's multi-range discrimination system. It actually offers four ranges which the operator selects with only two knobs and clearly marked settings.

Dual discrimination enables pulltabs to be tuned out even though they are located within the non-ferrous target range. The Freedom 3 accepts coins and jewelry both above and below pulltab rejection. Between 75% and 100% of all rings and coins in a given area will be accepted even as pulltabs are rejected.

Targets accepted in the non-ferrous range are signaled with Garrett's unique COIN ALERT™ Belltone, the Sound of Money!

Welcome this sound of money as you find coins deeper than ever before with Garrett's newly designed CDC Series Freedom 3.

**Freedom 3-CDC Series** with 8 1/2-inch searchcoil, Model 11903. \$499.95

## COIN HUNTING

**W**hy are coins the most sought-after targets of metal detector hobbyists? Because they are "there" and because the financial rewards of discovery are **immediate!**

Lost coins in abundance can be found all over the world. Hunting them appeals to men and women of every age, and the hobby literally knows no bounds of time or place. Coins can be hunted successfully for hours a day or for only a few minutes. They can be found just as well in a nearby yard or park as in an exotic foreign locale.

Primary concern of the coin hunter is depth . . . depth that is possible with the new Freedom 3 and its larger, more powerful Crossfire searchcoils.

Specifically, where can coins be

found? Simply stated, where people have been to lose them . . . parks, playgrounds, beaches, campgrounds, stadiums, churches, service stations, picnic grounds, arenas . . . the list is endless. A coin hunter seeks locations where people gather now or once congregated, then searches the site with a detector such as the

Freedom 3 that finds deeper targets and those that were out of range for others.

Coin hunters welcome the "freedom" given by the automatic operation of Garrett's coin hunting machine, and they appreciate its target discrimination. Since the hobbyist never seems to have enough time to search for coins, the Freedom 3 doesn't "waste" any precious time on ground balancing, retuning or digging trash targets. New computer-designed circuitry takes care of this.

Financial rewards, outdoor exercise, the thrill of discovery . . . all of these make coin hunting an excellent pastime. Garrett's Freedom 3-CDC Series meets the most stringent demands of this fine hobby.

# Find Beach & Surf Treasure With the Beach Hunter AT4

**F**ind coins, jewelry and other treasure in any kind of weather on land or by the sea. Neither rain, blowing sand, nor splashing surf will limit hunting with this truly all-weather, all-terrain detector. Improved circuitry and Garrett's revolutionary Crossfire searchcoils seek out deeper targets.

## Capabilities

There's truly no limit to the locations where the Beach Hunter AT4 can be used to find coins, jewelry or other treasure:

- Coin Hunting
- Beach Hunting
- Surf Hunting
- Ghost Towing
- Cache Hunting
- All-Weather Hunting

Find all kinds of treasure without worrying about the weather!

Fully automated drift-free circuits eliminate interference from salt water or ground mineralization. Multi-range discrimination with synchronized audio ignores pulltabs, screwtops and other metal trash to find real treasure. Headphones let you listen clearly for Garrett's distinctive Coin Alert™ Belltone, even on a noisy beach.

Just turn the Beach Hunter AT4 on and don't worry about ground adjustment or retuning. Set your discrimination and begin hunting . . . anywhere. Electronic pinpointing locates targets precisely to tell you where to dig.

Pistol-grip stem makes scanning as easy as pointing your finger . . . hip-mounted for

comfort. Rugged construction lets this detector and its headphones stand up to rough use.

Increase the scope of your hunting with the new Beach Hunter AT4. Find treasure on the beach and in the surf!

**The Beach Hunter AT4** with 8 1/2-inch searchcoil, NiCad rechargeable batteries & recharger, headphones. Model 11904. **\$649.95**

## Recommended Accessories

- Carry Bag
- Coin Hunter Kit
- Waterproof Headphones
- Coil Cover
- 12-v Auto Recharger (neg. gnd.)

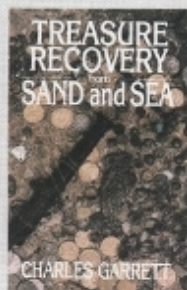

## BEACH/SURF HUNTING

**T**here's wealth to be found near the water! The world's oceans, lakes and streams offer vast storehouses of lost treasure that await a modern metal detector. Man has always lived, worked and played near water; man has also brought wealth here and lost it. Beaches at the entrance to Davy Jones locker present the most accessible areas to begin searching.

Almost any detector will work on that rare beach that is mineral-free. Most sites near salt water can be searched effectively, however, only with new automated VLF detectors such as the Beach Hunter AT4 whose circuitry ignores minerals, including salt water and iron.

Since the Beach Hunter AT4 is totally weatherproof, no additional protection is needed in

See Page 15

rain, blowing sand or splashing surf. When using a conventional detector on the beach, you must protect its control housing against all of these and even sand that will surely seep in when the detector is set down on the beach.

An effective beach hunting method is to begin searching a couple of hours before maximum low tide and follow the water out. When you find a trough with treasure, follow it into the water. Following a waterproof Crossfire searchcoil with the Beach Hunter AT4 on your hip, you never have to worry about splashing surf.

Because headphones are a **MUST** on the beach, the Beach Hunter AT4 comes equipped with them. Headphones enable a hobbyist to hear detector signals more clearly anywhere. Wind, surf and people noises usually prevalent on the beach make them an absolute necessity here.

Beach and surf present treasure hunting's newest frontier. There's no better detector to search it properly than Garrett's Beach Hunter AT4.

# Find Precious Metal with the A3B-United States Gold Hunter

**I**t's finally here for American prospectors . . . the metal detector that won fame in Australia and has been used by professionals throughout the world!

Proved in the gold fields of Canada, Mexico and South Africa as well as "Down Under," the famed Garrett Groundhog circuit has been newly engineered and is now available in a metal detector especially designed for prospecting in the U.S.A. In Australia it was famed as Garrett's A2B. Now, the next generation of that same detector has been completed. The model made for the U.S.A. is called **Garrett A3B-United States Gold Hunter**.

Developed specifically for seeking gold and other precious metals, the A3B Gold Hunter is equipped with Garrett's famous 15kHz Groundhog circuit and full VLF/TR discrimination for cali-

## Capabilities

The A3B Gold Hunter is specifically designed to seek out precious metals, but its Groundhog circuitry equips it well for other types of treasure hunting:

- **Electronic Prospecting**
- **Coin Hunting**
- **Beach Hunting**
- **Cache Hunting**
- **Relic Hunting**
- **Ghost Towing**

## Recommended Accessories

- **12 1/2-inch searchcoil** (large, deep targets)
- **10-inch elliptical searchcoil**
- **4 1/2-inch searchcoil** (hard-to-reach places)
- **Carry Bag**
- **Coin Hunter Kit**
- **Coil Covers**
- **Gold Panning Kit**

brated ore sampling. The veteran electronic prospector who demands precise ground balance will welcome the 10-turn ground adjustment of the A3B.

Garrett's gold-seeking circuitry and new Crossfire searchcoils minimize unnecessary digging by identifying "hot rocks" as worthless. Featuring a convertible design for comfortable hip-mount operation, the Gold Hunter is equipped with headphones for maximum sensitivity. A Groundhog found a million-dollar nugget for an amateur prospector in Australia. Let Garrett's new A3B-United States help make your dreams come true.

**The A3B-United States Gold Hunter** with 8 1/2-inch searchcoil, hip-mount conversion kit, lightweight headphones, Model 11905. \$499.95

## GOLD HUNTING

**T**here is no mystery to prospecting for gold. But, excitement is guaranteed . . . and there is always the prospect of profits beyond belief.

The familiar "old prospector," riding his burro into a Hollywood sunset, was equipped with only a crumpled metal pie plate. Today's "weekend prospector" chooses a

modern metal detector such as the A3B-United States and Garrett's Gravity Trap gold pans with patented 90-degree ruffles for capturing ALL the gold they find.

Gold has been found in almost every one of the 50 states and in most foreign countries. True, gold nuggets are found in the United States mostly in the deserts and mountains of Western states. But, metal detectors can discover silver and other valuable metals elsewhere, and panners look for such gemstones as garnets and sapphires over wide areas of the nation.

So, be limited only by your dreams when setting out with the A3B-United States Gold Hunter or the Gravity Trap™ Gold Panning Kit. But, be ready for adventure and pleasure! There's no

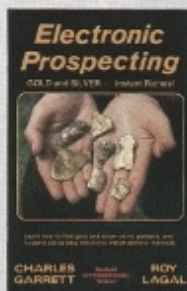

better way to spend a weekend afternoon or family vacation than enjoying the great outdoors in beautiful gold country.

## Gravity Trap Gold Panning Kit

- **Professional 14-inch Gravity Trap Pan, Model 16500.** \$7.95
- **Piggy Back 10 1/2-inch Gravity Trap Pan, Model 16501.** \$6.95
- **Combination Classifier, Model 16502.** \$6.95
- **Gold Guzzler Suction Bottle, Model 16503.** \$2.95
- **Prospecting Booklet, Model 15419.** \$1.00
- **The Complete Kit, Model 16513.** \$24.95

All items can be purchased separately.

# Start Out Finding Treasure With Freedom 1-CDC Series

**B**egin your treasure hunting career the right way with this money-saving package of equipment from Garrett. Includes all that is needed to get started: Freedom 1-CDC Series detector, high quality headphones, Coin Hunter kit that includes pouch, probe and digging tool, and the classic metal detecting text, Charles Garrett's **Successful Coin Hunting**. Everything necessary for hunting in parks, on the beach or in wilderness ghost towns.

## Capabilities

Ideally suited for finding coins, this Freedom 1-CDC Series kit can be used for almost all types of hunting on land:

- **Coin Hunting**
- **Beach Hunting**
- **Relic Hunting**
- **Cache Hunting**
- **Ghost Towing**

This fully equipped treasure hunting kit is perfect for finding coins, rings and jewelry of all types and is also suitable for relic and cache hunting. Deeper-seeking Freedom detectors have won world-wide acclaim as coin hunters and for their ease of operation. New computer-designed circuitry and Crossfire searchcoils let the Freedoms hunt even deeper!

A hobbyist new to treasure hunting will especially welcome the "freedom" implied by the name of this detector. It requires no ground adjustment, no retuning and no guessing. Just turn on the instrument and forget about interference from ground minerals. Trash elimination is available with a single control whose settings are clearly marked for nails, bottlecaps and pulltabs.

Electronic pinpointing locates targets precisely in the center of the 8 1/2-inch Crossfire search-

coil. Use the probe to locate your treasure; identify it by digging with the sturdy sharpshooter and store the find in a reliable pouch as you continue searching.

The Garrett Freedom 1 and its accessory package offer the ideal way to begin hunting treasure right! What a great gift this kit would make for any beginner!

**The Freedom 1-CDC Series** with 8 1/2-inch searchcoil, headphones, Coin Hunter Kit and **Successful Coin Hunting**, Model 11906 \$349.95.

## Recommended Accessories

- **12 1/2-inch searchcoil** (large, deep targets)
- **4 1/2-inch searchcoil** (trashy areas)
- **Lightweight Headphones**
- **Carry Bag**
- **Coil Covers**

## TIPS TO START

**T**he best advice for anyone using a metal detector for the first time or using a new metal detector is to read the Owner's Manual accompanying the instrument; read it again and then study it! Now, assemble the detector as shown in the Manual and set the knobs to **Initial Settings** that are specified or marked on the controls.

Hold the detector with the searchcoil about three feet off the ground. Turn the detector on, lower the searchcoil to a height of about two inches above the ground and begin scanning. Keep the searchcoil level and always scan slowly and methodically; scan from side to side and in a straight line in front of you.

When the sound increases, a target is buried in the ground

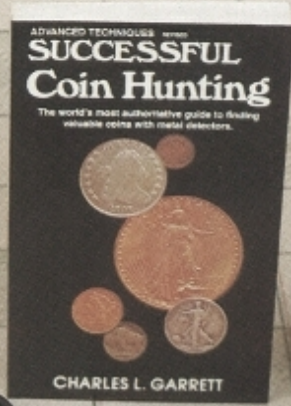

below the searchcoil. Place the searchcoil on the ground, squeeze the pinpoint trigger and slide the searchcoil around. When sound is loudest, your target is under the center of the searchcoil. Learn to use your probe to locate the exact spot where coins are buried. This will help you retrieve them with minimum damage to grass and the target. **Always fill in holes** after you dig any target.

There's no better way to get started in treasure hunting than this money-saving Freedom 1-CDC Series package from Garrett. And, treasure hunting is an ideal hobby that offers financial rewards as well as the healthy benefits of exercise and outdoor activity.

Always remember that it was a Garrett Freedom detector that

found the famed Middleham Jewel in England. This religious pendant worn by King Richard III in the 15th century sold for two million dollars. Nothing can compare with the thrill of this or any other discovery. The joy and excitement enrich both the spirit and the pocketbook!

Hunting for treasure with a metal detector is an ideal hobby for young people, full of energy and curiosity, with a desire for adventure and excitement. The hobby is perhaps even more suitable for mature men and women whose health permits (or requires) outdoor exercise. There's no better way to get started in treasure hunting than this money-saving Freedom 1-CDC Series package from Garrett.

# Find Treasure with the Master Hunter 5 Automated Detection System

## Capabilities

A truly universal detector that fulfills the Master Hunter Legend:

- Coin Hunting
- Beach Hunting
- Cache Hunting
- Prospecting
- Relic Hunting
- Two-Box Deepseeking
- Ghost Towing

**S**earch deeper for caches, coins, relics, gold and other precious metals. New deeper-seeking Crossfire searchcoils make this reliable old favorite better than ever! Designed to offer every basic

operating mode no matter what treasure is sought.

Switch on the Automatic Ground Balance mode and begin hunting immediately without interference from ground minerals. Use Discrimination Control to eliminate trash. Garrett's target identification meter tells whether your target is in the iron, gold or silver range. Electronic Pinpointing and Coin Depth Measuring offer added assistance.

For deep caches, relics and precious metals switch to the VLF Ground Cancel all-metal mode. Garrett's famed Bloodhound depth multiplier accessory searches even deeper.

With proven dependability the Master Hunter 5 outperforms all

## Recommended Accessories

- Headphones
- 12 1/2-inch searchcoil large, deep targets)
- 4 1/2-inch searchcoil (trashy areas)
- Depth Multiplier (deep caches, battlefield relics)
- Rechargeable Battery Pack
- Armrest
- Coil Covers
- Carry Bag
- Coin Hunter Kit

competitive detectors in its price range.

**Master Hunter 5** with 8 1/2-inch searchcoil, Model 11907. **\$449.95**

## CACHE & RELIC HUNTING

**T**his exciting phase of metal detecting lets you relive the excitement of the past and experience the drama of yesterday . . . with profit! History is all around us, and caches and relics can be found everywhere. It just requires a little research and patience.

The cache you uncover with a Master Hunter 5 can be the loot

from a decades-old crime. It can be the "butter-and-egg" coins buried by a thrifty settler. Or, you can strike it rich and find the long-lost savings of someone who "didn't trust banks."

Stories abound about all sorts of hidden wealth, and forgotten Civil War battlefields are still yielding valuable relics at shallow depths as well as far below the

surface. Searching scenes of long-ago violence and adventure is historical adventure at its highest.

You may find your relics in the midst of a city, or you may combine relic hunting with ghost towing and electronic prospecting in wild gold country. Wherever you look, the Master Hunter 5 will enhance your thrill of discovery!

# Find Treasure with the Sea Hunter XL500

**T**he world's most honored underwater metal detector, the Sea Hunter has already found millions of dollars worth of sunken treasure. Professional divers and salvors rely on Garrett's Pulse Induction circuitry to ignore salt water and iron mineralization while leading them to underwater wealth.

Whether 200 feet deep in the ocean or in a shallow lake or stream – even up on the beach – the Sea Hunter has proven its dependability in all environmental situations.

Adjustable trash eliminator rejects foil, bottlecaps, pulltabs

## Recommended Accessories

- Model 22140 13-inch Searchcoil \$99.95
- Model 22138 3 1/2-inch Searchcoil \$79.95
- Model 16084 Scubamate Attachment \$79.95
- Model 16079 12-v Auto Recharger (neg. gnd.) \$29.95

and other trash. Find the treasure you seek!

The Sea Hunter responds to acceptable targets with Garrett's Mello-Tone audio especially developed for use with scuba gear beneath the ocean. Comes equipped with submersible headphones and rechargeable batteries. Also included is an attractive carrying bag.

**Sea Hunter XL500** with 8-inch searchcoil, long and short stems, NiCad batteries with 110-volt recharger, carrying bag, Model 11129. \$799.95

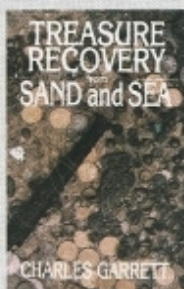

## WATER HUNTING

**V**ast treasures await the diver with a Sea Hunter XL500! Newspapers, radio/television and magazines regularly report the discovery of sunken ships with cargos worth millions. Precious metals can withstand centuries of underwater exposure and emerge as bright as fresh minted. Treasures galore await a scuba diver using a high quality metal detector such as the Garrett Sea Hunter.

Diving has been a source of wealth ever since man first sent valuable cargos to sea and suf-

fered their losses through storms and other mishaps.

## Recommended Reading

**Treasure Recovery from Sand and Sea**  
by Charles Garrett  
\$12.95 from Ram Publishing  
See Page 15

Metal detectors are vital to discovering underwater wealth since it is almost always hidden either under sand or in coral. Only the mellow buzz of the Sea Hunter can alert a diver that the placid and tranquil scene beneath him contains wealth from a ship that sank years or centuries ago.

Diving to enjoy the pleasures of underwater discovery is one of sport's greatest pastimes. With the Garrett Sea Hunter the diver can enjoy the same underwater pleasures as well as the thrill – and the profits – of discovery!

## Freedom Ace-CDC

**L**ight and easy to handle . . . easier to use! Find treasure with Garrett's most economical detector. Just turn it on, set dials to Initial (▶) points and listen for treasure. Pistol-grip configuration offers ease of handling and comfort. No muscle fatigue even after hours of searching. Scan as easily as pointing your finger.

Ground minerals are automatically eliminated, and turning a single knob can discriminate iron, bottlecaps and pulltabs from detection. On/off control regulates sensitivity and audio threshold. **Freedom Ace-CDC Series, Model 11908. \$219.95**

## Little Treasure Hunter

**W**orld's smallest, most compact professional metal detector! Always keep it with you to search difficult or hidden places. Scan ceilings, walls and floors for relics, caches or hidden treasure.

Calibrated for ore sampling and prospecting. Measures 6 1/2 x 3 1/4 by 1 1/4 inches. Weighs only 10 ounces.

<b>Little Treasure Hunter, Model 11770.</b>	<b>\$99.95</b>
<b>Ear Plug, Model 16001</b>	<b>\$ 3.95</b>
<b>Belt Carry Case, Model 16011</b>	<b>\$24.95</b>

# Find Treasure With Crossfire Searchcoils

**G**arrett's Crossfire is the hottest name in searchcoils. Transmitter/receiver winding arrays "float" in a new **tri-point** suspension that isolates them from shock and encapsulation stress. The resulting stability permits winding the antennas for peak performance.

Fully submersible Crossfire searchcoils feature total shielding and lightweight, thin-line construction. With super detection depth, 100% scan width and rock solid stability you can scan 25% to 50% deeper, even in the toughest mineralized ground, to detect gold and silver treasures unreachable even yesterday.

## Crossfire Searchcoils

Model 22176 4 1/2-inch	\$ 69.95
Model 22177 8 1/2-inch	\$ 99.95
Model 22178 12 1/2-inch	\$129.95

## Crossfire Searchcoil Covers

Model 16042 4 1/2	\$4.95
Model 16022 8 1/2-inch	\$6.95
Model 16062 12 1/2-inch	\$9.95

## Depth Multiplier

**O**nly Garrett offers the Depth Multiplier Bloodhound for finding deeper treasure. Easy to use to find those deeply buried caches or large objects. This "Two Box" accessory requires absolutely no adjustments even over the toughest minerals. Just turn the detector on and start your search.

For use with the Grand Master Hunter or the Master Hunter 5. Control housing not included.

**Depth Multiplier, Model 16073. \$199.95**

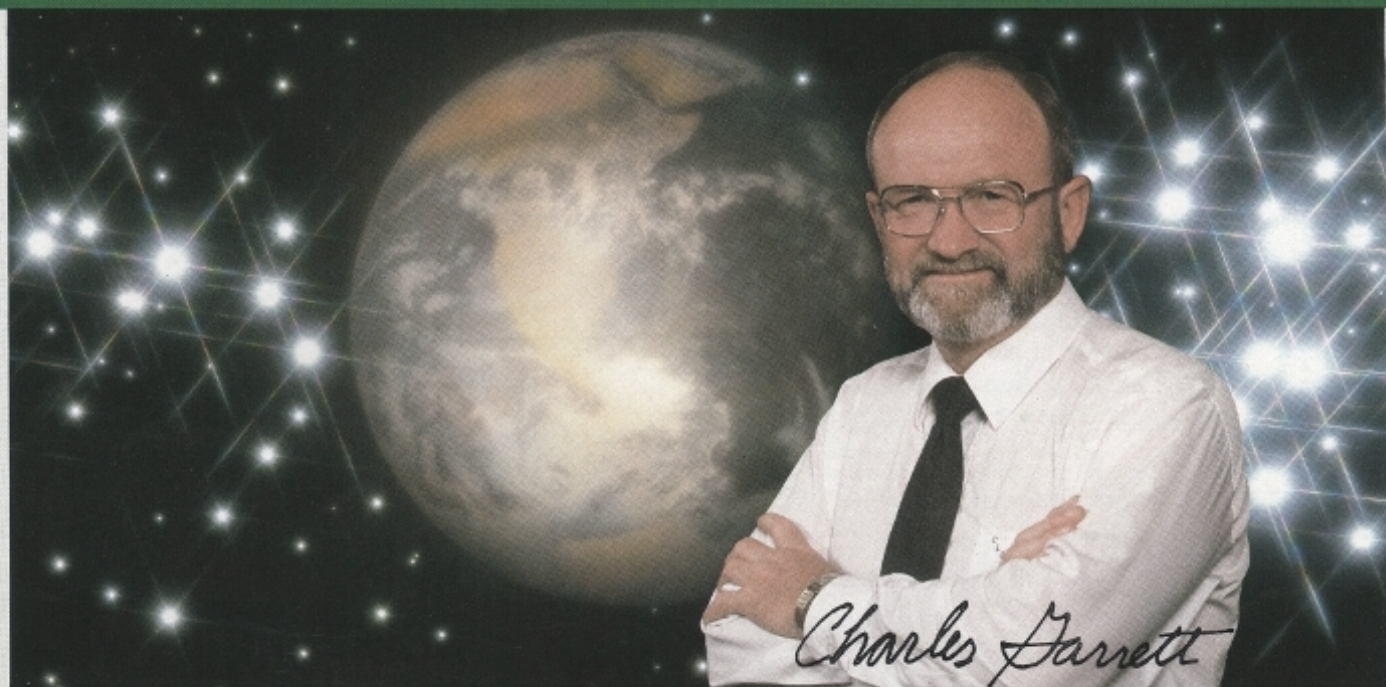

## Videos & Ram Books

**W**ith books from Ram Publishing Company and videos from Garrett you can answer questions about **any** aspect of treasure hunting. Filled with "how to" tips and exciting stories of success and adventure, the books are written by treasure hunters for treasure hunters.

Entertaining as well as educational, the Garrett videos guide you along a trail of discovery and enhance the fun of finding treasure. For a complete list of books and videos see your Garrett dealer or write Ram Publishing Company, P. O. Box 38649, Dallas, TX 75238.

# The World of Garrett

**W**e guarantee that you will be satisfied with a Garrett metal detector.

Product performance and customer satisfaction is the number one goal of every Garrett employee. Each of us is determined to provide **total satisfaction** to all customers. You may not receive satisfaction from other manufacturers, but you can depend on it from Garrett.

That's **my** guarantee. My name is on every detector, and my reputation stands for quality equipment and satisfactory service. I search for treasure and field test

our detectors often, and I won't tolerate inadequate equipment. Nor, do I expect you to tolerate inadequate equipment . . . or poor service.

## PATENT PROTECTION

Garrett's high-tech instruments are protected by one or more of the following United States Patents and other Patents Pending: 4,398,104; 4,423,377; 4,303,879; 4,334,191; 3,662,255; 4,162,969; 4,334,192; Design 274,704.

I wish I could meet each one of you individually, but, of course, that's not possible. Nevertheless, I promise that we at Garrett will be at your service whenever you need us.
