

# OneTouch™ to Treasure...

"A Dream Come True!"

**GARRETT**  
METAL DETECTORS

# Garrett, the man

Metal Detecting Trailblazer...

"Dedicated to making it easier to find treasure"

I've been a treasure hunter all my life. Since my first contact with a metal detector nearly 50 years ago I've dedicated myself to improving detectors and making it easier to find treasure. After getting my electrical engineering degree, I was deeply involved in the early stages of America's outreach into space, working on programs related to the first moon landings and probes of Mars and other planets. This knowledge of electronics stood me in good stead as I began searching for treasure with metal detectors of my own design. And, it soon became obvious that my detectors were far more versatile than instruments that I could purchase.

Two early-day (1960s) design successes, my patented dual searchcoils and Zero Drift circuitry, proved that treasure hunters wanted the most advanced and highest quality detectors they could buy. And, my quest for the best has been a primary reason for the success of Garrett Metal Detectors: BFOs, TRs, VLF/TRs, ADS models, the Master Hunter Series and now the GTA detectors...all of these resulted from my desire to build equipment that would find treasure...and lots of it!

But, equipment was only part of the story. In the 1960s treasure hunting with metal detectors was in its infancy and was truly a hit-or-miss proposition. Just a few of us understood the basics, and nobody truly knew any more. Detector performance fell far short of what was needed to develop treasure hunting into an art.

In 1968 I began to write about metal detector theory and its applications for coin hunting, prospecting, cache hunting and all the other uses I foresaw for these marvelous instruments. I began traveling extensively and working with successful treasure hunters to learn their

secrets and attempt to apply them to Garrett detectors... all the while writing books and articles to share this knowledge with you hobbyists.

Well, the rest is history...and geography. For I've tested my metal detectors all over the world...from the Australian outback to Canadian wilderness...from waters of the Caribbean to those of the Red Sea. My goal was always the same...to make treasure hunting easier. Now, this Buyer's Guide presents the results of my work. It's all here...the equipment you need...the books and videos that can help you.

Just look at the chart to your right. On a single page you can find a succinct description of every type of treasure hunting, plus recommendations for the detector characteristics required for each type of hunting and suggested Garrett detectors that fulfill these requirements. I'm confident that we have developed the world's greatest storehouse of treasure hunting knowledge.

And, I've enjoyed every minute of it. What makes me happiest, however, is that you treasure hunters can benefit from my efforts. I urge you to do so. Put it to the test. Prove to yourself that you can be successful beyond your wildest dreams.

Speaking of dreams - throughout my treasure hunting career, I have had one...the dream to develop a detector that would be ready to find treasure at the touch of a single control. My dream has finally come true with the OneTouch to Treasure detectors. Get your hands on one of them today and make your dream come true.

*Charles Garrett*

*Worldwide locations where Charles Garrett searched for treasure, tested and improved Garrett equipment and continued developing the unfolding art of treasure hunting.*

Symbols	Description	Key Detector Features	Recommended Garrett Detectors

\*Primary Recommendation

# Garrett, the company

Reliable and Innovative Industry Leader  
"World's largest manufacturer of metal detectors"

Just look at the record! From England to Australia...from Spain to the Caribbean...Garrett detectors have found marvelous treasures...for three decades. This unparalleled record of success makes Garrett the acknowledged industry pacesetter in every way. Yet, all of Garrett's progress has been made with the treasure hunting hobbyist always in mind.

Charles Garrett's worldwide exploits and the technological advances of the Company had a single goal...to enable you to find

more treasure and to find it more easily.

We've been proud of every Garrett detector, yet we've never been really satisfied because we wanted each of them to be better. And, throughout Charles Garrett's long career as a detector manufacturer, he continued to pursue a dream - to build a detector that would operate automatically at the touch of a single control.

That dream has come true with the remarkable GTA and CX lines of

instruments...OneTouch to treasure! Press one touchpad and you're instantly ready to hunt. With OneTouch computerized detecting Garrett leads treasure hunters into the computer age and the 21st Century! Treasure hunting will never be the same again...and, it's never been better than with a Garrett detector!

## The Garrett Team

We hope that those who haven't already done so will join The Garrett Team. It's composed of Garrett employees, distributors and dealers, but you treasure hunters are its most important members. You depend on Garrett for quality products and outstanding customer service - greater than that provided by any other manufacturer. Garrett offers telephone assistance when required; audio and video instructional and entertainment tapes; the *Searcher* publication with treasure hunting and equipment information; Ram books that instruct and entertain on every phase of treasure hunting; and active support of the nation's treasure hunting clubs.

As a member of the Garrett team, you too can take pride in the Company's reputation for excellence. It's been earned by dedicated, conscientious effort, and all of us are determined that Garrett will remain No. 1 in the World of Metal Detecting!

## Hobby and Security

Wherever metal detectors are found, Garrett leads the way! Security and law enforcement professionals the world over now rely on Garrett's Magnascanner walk-through and Super Scanner hand-held instruments just as treasure hunters have depended on Garrett for three decades. They all know that Garrett detectors reflect the latest technological advances and represent the highest degree of quality in design and production.

## Garrett Engineering Laboratory

Garrett detectors have long been the industry's pacesetters for innovations and improvements because of the efforts of our designers and engineers. Because other manufacturers have refused to match our response to your demands, Garrett detectors today are unexcelled. The Garrett Engineering Lab is dedicated to maintaining this leadership and to providing even better instruments in the future. We understand that such detectors can come only from experienced engineers utilizing the latest innovations in computer technology.

## Garrett Production

Our handsome and spacious new factory offers production capabilities matched by no other detector manufacturer. Literally millions of dollars have been spent to make this facility the world's finest for manufacturing metal detection equipment. We take advantage of such advances as surface-mounted printed circuit boards made possible by manufacturing robotics for but one reason - to help you find more treasure.

# Garrett, the equipment

Designed to meet your demands  
"Proven by 30 years of engineering and testing"

OneTouch  
to Treasure.  
It's Easy!

## ONE TOUCH

**The Name Says It All...**  
"Treasure hunting couldn't be easier"

One touch detecting is really simple... press just one touchpad on a Garrett detector to get the same computerized performance that requires continual adjustments or "programming" on competitive instruments!

Throughout Charles Garrett's three decades as a manufacturer of metal detectors, he had always had a dream - to design and produce an instrument that would provide top-notch performance at the touch of a single control. And, now that dream has come true!

He wasn't talking about a so-called "turn-on-and-go" detector. These instruments (usually inexpensive) provide only marginal discrimination and minimal ground balance. Garrett's one-touch detectors support a treasure hunter with the same superior deepseeking performance as all those that have carried the Garrett name since the 1960's.

Early-day BFO instruments demanded almost continual tuning to achieve top performance. Truly successful hunting with one of these fine detectors required a master's ear. You really had to understand detector signals to benefit from the full capabilities of the instrument.

When Garrett developed its famed ADS system of detecting, the "master's ear" became less important. Still, to get the most out of the detector a certain amount of adjusting was

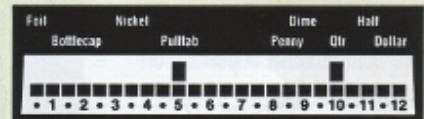

always necessary. Take ground balancing...Charles Garrett says, "You can have it! I never got so tired of anything in my life as having to ground balance a detector...over and over again! Yet, this was absolutely necessary, and particularly important where there were excessive minerals in the soil." Then, Garrett introduced its detector for the 90's - the Ultra GTA 1000, an instrument that truly revolutionized the industry. Not only did it offer one-touch detecting but its Graphic Target Analyzer presented a wealth of visual target information - information that treasure hunters had never had before. Imagine a visual indication of every target beneath your searchcoil next to a Target ID Guide that helps choose targets!

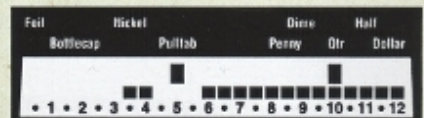

The Ultra GTA 1000 has been followed by the Ultra GTA 500, the new Ultra GTA 350 and the Grand Master Hunter CX III. With any of these automatic detectors a hobbyist merely has to press one touchpad to enjoy the benefits of microprocessor control/computerized treasure hunting. No programming, no complicated numerical codes.

Best of all, these truly automatic one-touch detectors offer the famed deepseeking circuitry that has made Garrett a byword with treasure hunters all over the world for three decades.

**Use Garrett's GTA detection system and you'll never search any other way.**

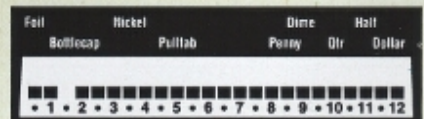

Choose ALL METAL (all Detection Segments displayed) from the preset hunting modes. All targets you detect will be announced audibly and by a detection cursor. Two cursors are shown...one indicates a pulltab; the other, a quarter. These cursors appeared and an audio signal was heard as you scanned over each target.

Now, switch to the COINS mode and scan the same ground again. The same two cursors appear, but only the quarter is announced by an audible signal. See how easy it is! The patented GTA system announces only those targets you are seeking. Yet, all targets are shown, and you decide whether to dig them or not.

**The GTA gives you a virtually unlimited number of "notch" settings that allows you to locate or ignore various targets.**

Here are two examples:

1. The area you're searching seems to contain vast numbers of one type of worthless target...bottlecaps, let's say. Just press REJECT and you won't be bothered again by signals from any of those pesky bottlecaps.

2. You're seeking a specific target...a lost earring, perhaps. Clear all detection segments, press ACCEPT, and your detector will now announce only that earring or an object with similar conductivity.

## See page 23 for a listing of Garrett detector features.

**Audio Boost** - A feature available on the CXIII and GTA 1000 that helps to find tiny or deeply buried treasures by automatically increasing the signals from such targets.

**Audio Threshold** - The continual low-level audio sound achieved when a metal detector is tuned. Sensitivity is greatest when you adjust the audio to the lowest level that you can discern.

**Automatic Pinpointing** - A feature that causes a "sharpening" of detector signals when objects are detected. An electronic aid to precise target location.

Automatic Pinpointing

**Coin Alert™ Belltone** - Garrett's unique method of producing a special audio tone whenever coins (silver or other high conductivity items) are detected.

**Coin Depth Measurement** - An accurate electronic measurement of the buried depth of coin-sized objects.

**Discrimination** - A detector's ability to ignore undesirable metallic objects and "accept" desirable ones. This is achieved by manual control manipulation or automatically by factory preset adjustments.

Discrimination

**Fast Track™** - A computerized microprocessor function. Ground balance automatically achieved within five seconds as the searchcoil is scanned over the ground. Available on all CX models.

**Ground Balance** - The ability of a metal detector to eliminate (ignore or cancel) the detection effects of iron and other minerals present in the soil.

**Ground Track™** - A computerized microprocessor function that automatically ground balances a detector's All Metal (non-motion) mode and maintains continual ground balance over differing types of mineralized soils. Available on CX III and CX II models.

**GTA Notch Discrimination** - A patented Garrett circuitry achieved by computerized microprocessor controls and a unique LCD readout. Using a GTA detector or a CX III a detector operator can be highly selective in choosing just which targets are to be sought and which are to be avoided.

**Hip Mount** - A detector configuration in which the control housing is strapped to the hip. This feature is built into Garrett's GTA detectors and is a feature of the Stinger and Sea Hunter.

**Microprocessor** - The integrated circuit "brain" of the digital computer that controls the functions of Garrett's GTA and CX detectors. Its factory programmed "memory" automatically and instantly instructs the detector to perform functions that even the most knowledgeable operator would otherwise have to attempt manually.

**Motion Discriminate Mode** - Many modern instruments operate only in this mode. Deep detection, full range discrimination and automatic ground balance are achieved but only while the searchcoil is being moved over targets.

**Non-Motion All Metal Mode** - The original, deepseeking, ground balance mode invented nearly two decades ago. In this true All Metal mode of Garrett's CX and Scorpion Gold Stinger detectors target detection occurs while the searchcoil is hovering motionlessly or scanning over the ground. Many treasure hunters prefer this mode for gold or deep caches or when "digging all targets."

**Surface Elimination** - Sometimes called "blanking," this feature of the CXIII and GTA 1000 permits an operator to hunt in areas with numerous shallow trash targets by eliminating the top one to four inches (operator chooses depth) from detection.

Surface Elimination

**TR Discrimination** - A non-motion mode of metal detector operation available in the Scorpion Gold Stinger and Garrett's CX detectors. Used almost exclusively in the search for gold, particularly in classifying "hot rocks" and ore samples. Hot rock detection can prove confusing when searching for gold with the wrong type of metal detector.

**TreasureTalk™** - An actual detector voice that announces target detection, gives treasure ID information, specifies target depth and prompts you through selection and regulation of the detector's functions.

# Ultra GTA 1000™

One Touch at its Finest...  
 "The detector that revolutionized treasure hunting"

**I**t's so easy to use!"  
 "It shows you everything you find!"  
 "Does everything but dig the coin or ring for me!"  
 Treasure hunters all over the world are boasting of how the Ultra GTA 1000 has helped them find coins, jewelry and other treasures like never before. Yes, with its microprocessor controls and Garrett's patented Graphic Target Analyzer this detector does it all... goes inches deeper and provides a target readout equaled only by other Garrett OneTouch instruments.

And, it's so easy to handle! The GTA 1000 offers perfect balance for easy all-day scanning. Pick one up for yourself and compare it with the competition. Yes, hobbyists now have a detector that makes treasure hunting so easy and so much fun. Press one touchpad and find treasure!

Yet, the GTA 1000 offers professional treasure hunters a detector that can be regulated to their precise demands and needs like no other. Three factory-set and three user-set hunting modes offer limitless discrimination capabilities. Just check the Features list for everything else the GTA will provide!

The U.S. Patent Office has recognized the unique nature of Garrett's target analyzer notch system with Patents #5,138,262 and #5,148,161. Treasure hunters have approved it in a more tangible way by making this the world's most popular detector.

Join delighted hobbyists the world over who say...

**"There's nothing like an Ultra GTA!"**

## Features

- ◆ Garrett Exclusive OneTouch™ Detecting Fully Automatic
- ◆ Microprocessor controlled
- ◆ Graphic Target Analyzer™ display
- ◆ Full range notch discrimination
- ◆ OneTouch™ reset to factory settings
- ◆ 6 modes...3 factory-set, 3 user-set
- ◆ 3 audio ID choices
- ◆ Adjustable audio & depth/sensitivity
- ◆ Coin depth measurement indication
- ◆ Automatic pinpointing
- ◆ Audio boost
- ◆ Surface elimination
- ◆ Built-in hip mount capability
- ◆ 3 lbs 4 ozs (stem mount)
- ◆ 2 lbs 10 ozs (hip mount)
- ◆ Eight AA batteries

Number scale gives accurate coin depth

Operating with Belltone audio

Operating in Coins mode

Press to begin hunting; hold 10 seconds to return to factory settings

Coin ID guide identifies targets

Detection cursors on upper scale indicate all targets

24 segments on Lower Scale permit precise discrimination

Scale gives constant battery check

Press to change settings if desired

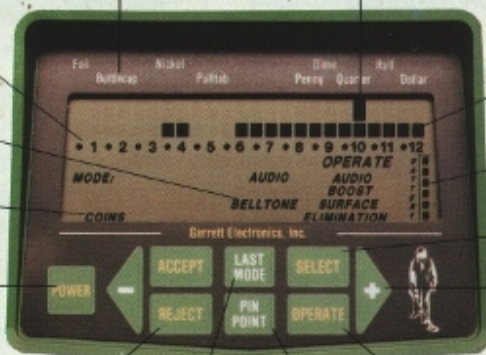

+ and - touchpads change settings

Use ACCEPT/REJECT to modify discrimination of each notch

Press to alternate between modes for 2-mode operation

Press to pinpoint target, learn exact coin depth

Press to return instantly to hunting mode

Visible Discrimination, Target ID, Automatic Pinpointing...  
"Who could ask for anything more?"

Amazing...incredible...awesome...  
These are but a few of the compliments being paid Garrett's Ultra GTA 500 detector by treasure hunters who continue to marvel at its deepseeking, yet fully automatic, performance.

You can understand at a glance just what targets you're looking for... no numerical codes with this discrimination.

And, no programs to load...

no knobs to adjust. Just press a touchpad and start hunting!

Discrimination segments clearly and precisely illustrate the treasures you've chosen to seek, yet the GTA lets you see all targets it finds. Recover just the ones you want with precise GTA pinpointing to tell you where and how deeply to dig. Yes, dig only the ones you want. Some treasure hunters report that they're so successful with the

new GTA detectors that they "just leave the pennies for others to find!"

Why don't you leave confusion behind and let a Ultra GTA 500 put fun back in treasure hunting. Hunt all day with this light and easy-to-handle detector. Join those who already know that treasure hunting can't get any easier or better than this!

The Ultimate in OneTouch Detecting...  
"At an unbelievable price"

Coin Shooter

Beach Hunter

Ghost Towner

Competitor

The ultimate in true automatic OneTouch operation; press and you're ready to hunt!

It's the greatest breakthrough in metal detector history - in simplicity of operation as well as performance and value. This is the instrument that newcomers to the

hobby have long been seeking, and old-timers will love it too. No longer will price keep anyone from simple, computerized detecting.

With its microprocessor controls the Ultra GTA 350 can hunt as accurately as any other detector - and, deeper than most! Yet, its Graphic Target Analyzer and automatic OneTouch operation make it as simple and easy to operate as any detector ever built.

Simplicity, depth and value! What more could anyone ask for?

How about ease of handling... the GTA 350 weighs just over three pounds and its convenient pistol grip makes hunting as easy as pointing your finger. You can scan for hours with this new detector without tiring... and, you'll want to hunt with the Garrett GTA 350. This detector with fully automatic controls makes the miracles of space age technology available at an unbelievably low price.

# Grand Master Hunter® CXIII

Garrett's Finest and Deepest-seeking... "With Graphic Target Analyzer™, TreasureTalk™ and True All Metal Mode"

Garrett's fabled Master Hunter tradition lives on! Professionals who demand depth, precise target ID and dependable performance call it "the deepest seeking detector known to man." Yes, the new Grand Master Hunter CXIII has it all... including TreasureTalk, Garrett's latest innovation that makes OneTouch treasure hunting even easier and more exciting.

Every target is visible on Garrett's exclusive Graphic Target Analyzer. What you see - and hear - is what you get...no numerical codes or target patterns to memorize.

And, when you push a single touchpad, you're instantly ready to hunt...no time lost in loading programs or setting controls. Yet, TreasureTalk helps if you choose to adjust the CXIII to your preferred hunting requirements. When you find an acceptable target TreasureTalk will locate it for you on the Target ID-Guide, and will tell you how deep to dig when you press the PINPOINT pad.

and sensitivity available only with a high quality, professional detector. Plus, the CXIII gives you GTA, TreasureTalk and all the other Garrett features.

Pros know that the deepest targets will be found by those detectors that can offer a non-motion All Metal mode. They understand how microprocessor controls enable them to hunt even deeper. Since Garrett's CX detectors are the only ones with a true All Metal mode, it's no wonder they're the choice of the professionals.

## Features

# Grand Master Hunter® CXII

Proven OneTouch™ Dependability...  
"Pros in the field rely on it"

No detector has ever proven its abilities more thoroughly than Garrett's Grand Master Hunter CXII. Countless thousands of hours in the field and truly awesome discoveries have earned it the respect and admiration of treasure hunters everywhere.

See for yourself all that this great detector offers. It has the depth and sensitivity available only with computerized, microprocessor controls, plus the convenience

of Fast Track and Ground Track instant and continuous ground balancing. Most important of all...it's a OneTouch detector. Press a single touchpad and you're instantly ready to hunt for coins, jewelry and similar targets.

Yet the CXII can provide the extreme depth available only with a true non-motion All Metal mode. The flexibility of its controls gives this detector versatility to find every kind of treasure.

## Features

- ◆ Garrett Exclusive OneTouch™ Detecting Fully Automatic Microprocessor controlled OneTouch™ reset to factory settings
- ◆ Non-motion All Metal mode for maximum depth
- ◆ Motion Disc Mode with dual-range discrimination
- ◆ Fast Track™ 5-second ground balance
- ◆ Ground Track™ continuous ground balance
- ◆ Adjustable audio threshold & depth/sensitivity
- ◆ Depth Multiplier™ capability
- ◆ Full range visual target ID
- ◆ Coin depth measurement indication
- ◆ Automatic Pinpointing
- ◆ 3 audio choices
- ◆ 4 frequency choices
- ◆ 3 lbs 14 ozs
- ◆ Six c-cell batteries

# Master Hunter® CX

The Fast Track™ to Deeper Treasures...  
"With microprocessor OneTouch™ detecting"

Looking for deep, big & rich targets? The Master Hunter CX is the detector for you. It's called "The Cache Hunter's Delight," and there's no mystery why.

Team up the microprocessor controlled and computerized power of the CX with Garrett's famed Depth Multiplier "Bloodhound" and it hunts deeper than any other detector.

But it's also a Garrett OneTouch detector. Press a single touchpad, and you're instantly

ready to hunt for coins, jewelry and similar treasures. The CX offers automatic pinpointing, accurate target ID, full range discrimination and numerous other features of Garrett's more expensive models.

If you want simplicity, accuracy and high tech performance...if you want to find deep caches, you can place your trust in the Master Hunter CX.

Target ID meter also gives coin depth and battery condition

Just press and start hunting

Help regulate depth (sensitivity) and audio

Maximum depth in true non-motion All Metal mode; activates Fast Track automatic ground balancing

Locates targets precisely; gives coin depth

Discriminate mode activates Multi-range discrimination

Ferrous/non-ferrous Multi-range discrimination available only from Garrett

# Freedom Ace Plus™

What a Great Little Detector...  
"Loved by beginners and old-timers alike"

The Ace has long been accepted as the industry's finest "starter" detector... quality, deepseeking and economy are the words most often associated with it.

And, it's still years ahead of all competition its price range.

Yet, why can so many successful and experienced treasure hunters still be found using this splendid little detector...treasure hunters who long ago "moved up" to one of Garrett's more sophisticated GTA or CX models?

They appreciate the deepseeking sensitivity and computer-designed circuitry from the famed Garrett Engineering Labs. They have proved to themselves that the Ace will find treasure...lots of it and deep!

Most important of all, they have fallen in love with this marvelous hunting machine. "There's just something about the Ace," they will tell you.

Find out for yourself what they mean! Discover dependable Garrett quality at an economical price. You'll be amazed at how simple it is to use, and how deeply it will find coins, jewelry and other treasures.

You'll soon find yourself agreeing that... "there's just something about an Ace!"

## Features

- ◆ Full range discrimination... ignores foil, nails, bottlecaps and pulltabs
- ◆ Automatic ground balance
- ◆ Adjustable depth & sensitivity
- ◆ Surface-mount PC board
- ◆ Automatic battery check
- ◆ Loudspeaker & headphone jack
- ◆ 3 lbs 4 ozs
- ◆ Three 9v batteries

## Recommended Accessories

# XL500 Sea Hunter™

The Choice of Professionals...  
"Depend on it...successful divers do!"

Wherever underwater treasures are being discovered – Caribbean, Mediterranean or South China Sea – you'll find Garrett's XL500 Sea Hunter. Proven Garrett quality makes it the world's most popular underwater detector, the choice of professionals. Whether they're 30 fathoms deep or on the beach... they demand a quality instrument. Thousands of hours of superior performance and millions of dollars in

treasure have established an enviable reputation for the Sea Hunter. Its pulse induction circuitry ignores salt water and iron mineralization. Adjustable discrimination rejects foil, bottlecaps, pulltabs, ballast stones and some iron pieces.

When an acceptable target is found, the Sea Hunter announces it with Garrett's mellow TreasureTone™ audio, developed especially for use with scuba gear.

The Sea Hunter excels equally as a beach hunting detector. Circuitry designed to zero in on targets 200 feet under the sea locates deep land treasures with ease.

Ask yourself: if there were a better underwater detector, wouldn't the professionals be using it?

## Features

- ◆ Proven reliability
- ◆ Pulse induction circuitry
- ◆ Submersible to 200 feet
- ◆ Full range discrimination
- ◆ TreasureTone™ audio
- ◆ Meter for target ID and battery check
- ◆ Scuba Mate™ for diving
- ◆ Long stem for beach & surf hunting
- ◆ Weighted searchcoil
- ◆ Submersible headphones
- ◆ 6 lbs
- ◆ NiCad rechargeable batteries w/110v recharger

## Recommended Accessories

- ◆ 13-inch Searchcoil, 2214000. \$129.95
- ◆ 12v Auto Recharger, 1607900. \$34.95
- ◆ Sandscoop, 1600970. \$39.95

Treasure Tone audio with 10-turn control provides maximum sensitivity

Headphone connector also accommodates NiCad recharger

3 depth ranges... super-deep, normal or shallow for trashy areas

Calibrated discrimination rejects unwanted targets

# Scorpion Gold Stinger™

The Versatile Gold Finder...  
"Detects coins and jewelry with equal ease"

## 3 Detectors in one including Coin hunting Discrimination

Calibrated discrimination for one sample ID, testing hot rocks and for coin hunting

Choose maximum depth and sensitivity under all conditions

10-turn audio offers maximum sensitivity

10-turn control permits precise manual ground balance

3-mode operation

- ◆ All Metal - prospecting
- ◆ Motion Discriminate - most other treasure hunting
- ◆ TR Discriminate - ore-testing & non-mineral areas

Instant retuning

## Features

- ◆ Deepseeking Groundhog™ (15kHz) circuit
- ◆ 3 modes... All Metal, Motion Disc, TR Disc
- ◆ Versatility to hunt anywhere, anything
- ◆ 10-turn manual audio control
- ◆ 10-turn manual ground balance control
- ◆ Auto/manual audio threshold selector
- ◆ Convertible... stem or hip mount
- ◆ 3 lbs 6 ozs (stem mount)
- ◆ 2 lbs 11 ozs (hip mount)
- ◆ Three 9v batteries

Wherever there is detectable gold to be found, you can find it with the Scorpion Gold Stinger. Garrett's famed 15 kHz Groundhog circuit will punch through heavily mineralized soil to locate nuggets, float and ore veins better than any other detector. Thousands of successful electronic prospectors will testify to that.

What may be just as important to you is the Stinger's ability to find coins and jewelry with equal ease. Yes, the Scorpion Gold Stinger with its three detection modes offers versatility unmatched by any other gold hunting detector.

When you get tired of digging nuggets with its All Metal mode, switch to Motion Discriminate mode, set your discrimination control to eliminate unwanted targets and find coins, relics or other treasures. A third TR Discriminate mode is an absolute must for pre-testing and can also be used for scanning in mineral-free areas.

Since you'll be spending long hours in the rugged gold fields, the Stinger's light weight and ease of handling are especially welcome. The detector is even designed for hip-mount operation for absolute minimum weight.

But, most important of all, you can depend on the Gold Stinger to find gold!
