

This hacienda north of Monterey served as headquarters for General Pancho Villa & home to Emperor Maximilian. It yielded these silver pieces to the Master Hunter.

PASSPORT TO TREASURE GARRETT

THE 15TH CENTURY CHATEAU D'ARCONDE

Found in Great Britain with a Freedom detector, this priceless religious pendant is believed to have been worn by King Richard III in the 15th century.

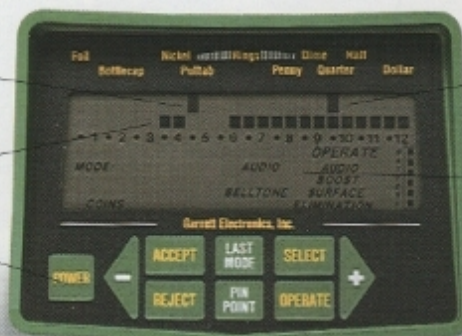

AUTOMATIC TREASURE HUNTING...the GTA Way!

Use Garrett's Full-Range Multi-Notch Discrimination System Once... You'll Never Search Any Other Way. No other system is as accurate, easy to use & understand and as DEEP DETECTING as the GTA.

You can see every detected target in each searchcoil sweep (25c and pulltab)

Your entire discriminate ACCEPT/REJECT Notch Program is always visible

ONE TOUCH TO BEGIN HUNTING

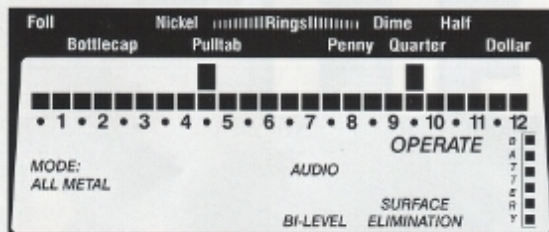

Only ACCEPT targets (the quarter) are announced audibly. But, you can dig REJECT ones you are curious about.

All your modes, functions and instructions are continuously visible.

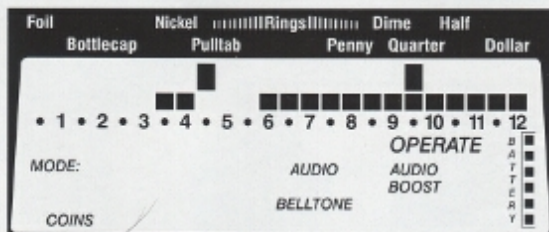

(Use GTX 1000 with COINS mode, Belltone, Audio Boost and Surface Elimination)

A GARRETT GTA EXCLUSIVE; To recover treasure everybody misses in high trash areas maneuver the searchcoil around and let the GTA notch "ZERO IN" on treasure hiding among the trash. "Wow! This system works!" exclaimed Monty Moncrief of Nassau Bay, Texas. "At last I know what my detector is really telling me."

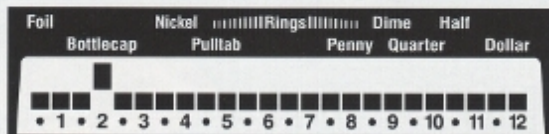

Presented here are a few of its automatic modes to help you find more treasure. Countless User-set modes are also available at the touch of the ACCEPT or REJECT touchpads:

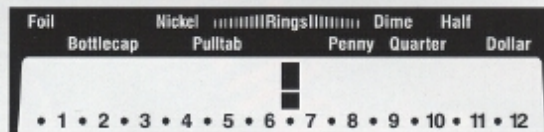

1. Zero Discrimination — All detected targets announced audibly (the quarter and pulltab). Here, target cursors indicate detected quarter and metallic trash (probably pulltab). Notice the All Metal, Bi Level Audio and Surface Elimination selections.

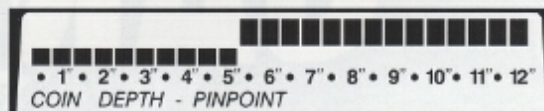

2. Coins Mode — The same two cursors appear but only the quarter is announced audibly. Yet, all detected targets are shown, and you decide whether to dig them or not. Notice the Coins Mode (Coin Alert) Belltone and Audio Boost selections.

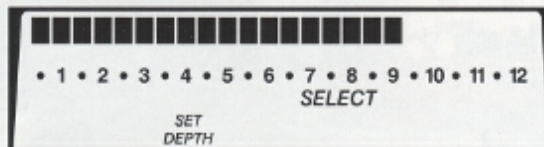

3. Rejecting Single Target — The GTA will not audibly announce bothersome trash. Yet, the detection cursor visibly tells you its there.

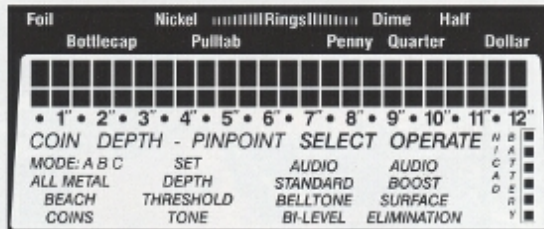

4. Seeking Single Target — To locate a lost earring, for example, clear the Lower Scale Discriminate Program. Hold the matching earring under the searchcoil and press ACCEPT. The detector will then announce audibly only its mate or an object with similar conductivity.

5. Pinpointing and Measuring Coin Depth — Press PINPOINT and scan over target. At the maximum movement, right to left, of Upper Scale Cursors, target is centered beneath searchcoil. Lower Scale cursors move to right, align with Upper Scale and measure depth (5 inches).

6. Adjusting Depth/Sensitivity, Threshold, Volume, Tone and Manual Ground Balance — To adjust any of these five modes, just press the + or - touchpads. Here, the Upper Scale indicates Depth/Sensitivity is adjusted to 75% of maximum available power.

7. Factory Reset and Full Panel Display — No other detector will show all available modes and features at a glance. Press POWER and hold. All modes and features are displayed. After 10 seconds the detector returns to factory-set modes and operation levels.

No other Metal Detection Method in the World Can Do What the GTA System does.

Unsurpassed automatic treasure hunting made possible by these special features, many of which are Garrett exclusive patented designs.

OneTouch: Just OneTouch of the microprocessor power touchpad and you immediately begin automatic treasure hunting at its best. No ground balance or other control adjustments are necessary. You may also hold this touchpad for ten seconds to restore all factory settings.

Treasure Talk™: An actual detector voice, exclusively from Garrett, that announces target detection, treasure ID information, target depth and prompts you through selection and regulation of the detector's functions.

Coin Alert Belltone™: Garrett's unique method of producing a special audio tone whenever coins (silver or other high conductivity items) are detected.

Electronic Tuning: Garrett's unique 256-step electronic fine tuning of ground balance, threshold, volume and tone.

Coin Depth/Automatic Pinpoint: Gives you instant and precise coin depth measurement and precise pinpointing of all targets.

Last Mode Switching: Lets you rapidly switch between modes to identify questionable targets and change hunting modes.

Other Special Features: Ultra slow and fast searchcoil scanning; Fast Track and Ground Track Ground Balancing; Surface Elimination; Audio Boost; 100% Surface Mount PC Board Technology; Depth Multiplier Capability; Adjustable RF Frequency; Adjustable Depth/Sensitivity; Bi-Level Audio; Hot Rock and Ore ID; and many others.

With a Garrett you can be successful in all phases of treasure hunting and prospecting.

GTAx1000™

The Choice of Coin-finders — Worldwide Famed GTA OneTouch Simplicity...New Ramrod Design and Power Master Performance

Geraldo Aranda of Zaragoza, Spain, regularly finds relics and coins from before the time of Christ. On the grounds of a 15th-century French chateau Arnold Anderson used a GTA 1000 to detect more than 100 coins from nine countries and five centuries that dated from 1610. Patrolling Central Florida beaches, Bob Christensen finds thousands of coins a year which he donates to youth recreation programs. You can also find gold coins with the GTAx 1000. Ask 73-year-old Wallace Paschke.

Stories such as these are heard daily as hobbyists over the world praise their GTA coin machines. The GTAx 1000 detector has revolutionized treasure hunting since its introduction five years ago. When its simple OneTouch operation

and Graphic Target Analyzer made other detection systems obsolete, the GTA 1000 quickly became the world's most popular detector.

Its new microprocessor-controlled Power Master circuitry enables the GTAx 1000 to hunt inches deeper than before and with added sensitivity. Now Garrett has given you a new Ramrod design to make this detector sturdier, rock-solid and even easier to handle.

And, using the GTAx 1000 is a treasure hunter's dream come true. Press one touchpad and you're ready to hunt at once. Yet this marvelous instrument has control flexibility that permits truly limitless regulation. No matter how you want to hunt, the GTAx 1000 with its six separate modes can respond to your desires.

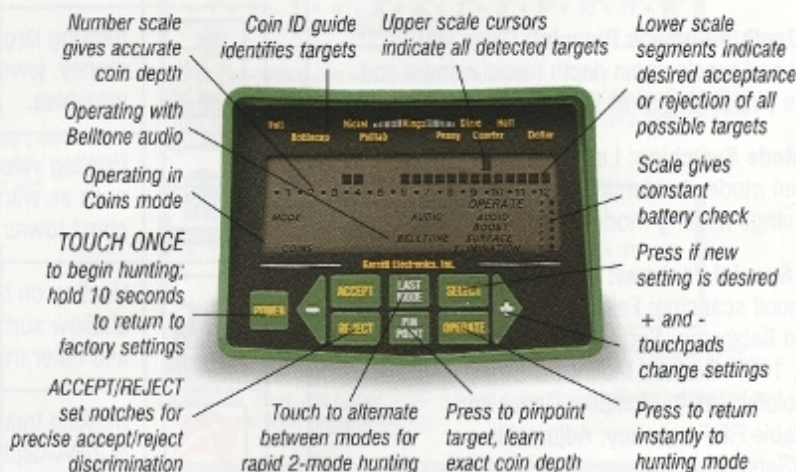

Plus, the GTAx 1000 is so easy to handle! Light weight, perfect balance and new Ramrod design permit easy all-day scanning for hobbyist of all ages.

You never wonder "what that signal means" when you're hunting with a GTA. The patented Graphic Target Analyzer lets you choose the targets you seek and shows you the ones you've found. Automatic pinpointing precisely locates your treasure. No guesswork here...only success!

Treasure hunting is a magnificent hobby. Enjoy it to the fullest with this amazing new detector. Join the thousands of delighted men and women who exclaim, "I'll never use any other kind of discriminating detector. There is nothing like a GTA with Power Master depth performance."

Visible Target ID & Discrimination, Automatic Pinpointing, Improved OneTouch Computerized Hunting and New Ramrod Design

Franco Berlingieri hunts in Belgium and never digs iron... "only coins and other items of value." Ronald A. Gustafson says his GTA 500 "paid for itself twice over in finds of coins, rings and relics." Joe Tanton was so impressed with his GTA 500 that he thanked Charles Garrett personally.

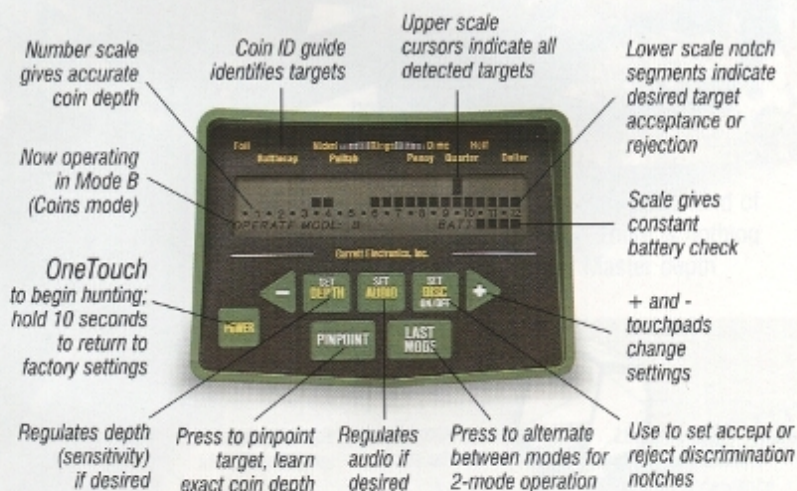

Why do so many treasure hunters praise the computerized GTAx 500 and boast of the wealth it has discovered for them? With the same microprocessor controlled GTAx circuitry as the GTAx 1000 this detector offers unexcelled deepseeking capability. And, its light weight and ease of handling have won over many additional hobbyists. The instrument's new Ramrod design makes it more stable and even easier to use.

Press one touchpad and you're ready at once to hunt for coins with discrimination already set. You may never want to touch another control. Yet, this detector offers full range adjustable discrimination to meet any treasure hunting demand.

With Garrett's patented Graphic Target Analyzer, all Garrett GTAx models give you visible discrimination and target identification. You can see

and understand everything you're looking for, as well as everything you find. Every target is shown. Automatic pinpointing makes recovery even easier. You dig only items of value and don't waste time and energy on trash.

There's no comparison between the GTAx 500 and similarly and even higher priced competitive models. This detector offers so many more features. Check it out for yourself!

Find Coins the Magical GTA Way at an Unbelievably Low Price

Maude Gerlach testifies that her GTA is a detector for all ages: "I'm 73 years young and find coins pert' near every day!" Paul Sabich is only 5, but uses coins he discovers with his GTA 350 to buy toys. Joan Berlin admits she can't program a VCR but says finding coins and jewelry with her GTA is a snap.

Garrett now introduces the remarkable new GTAx 400 that's even easier to use than the familiar GTA 350. Like all Garrett detectors the new

GTAx 400 is "human-engineered" with a single goal...to help hobbyist find treasure. Numerous performance and stabilizing features such as the new Ramrod stem, rock-solid from coil to arm rest, permit even easier searching. And, the new PosiControl ComfyGrip lets you hunt all day with minimum fatigue. "Why, it's almost like power steering," exclaimed a woman on Garrett's test team.

Of course, the new GTAx 400 offers Garrett's famed GTA visual target identification system, OneTouch

operation, rugged reliability and all the other features that have made the GTA line of detectors the world's most popular. They're as easy to operate as any detectors ever built yet feature sensitive deepseeking circuitry that has proven itself by countless treasure discoveries all over the world.

Simplicity, depth and value -- all backed by the famed Garrett name. What more could anyone want?

Accurate ID guide identifies targets

Scale gives constant battery check

Lower scale notch segments indicate desired target acceptance or rejection

Regulates depth (sensitivity) if desired

OneTouch to begin hunting; hold 10 seconds to return to factory settings

Upper scale cursors indicate all detected targets

+ and - touchpads change settings

Touch once to set discrimination segments, accept or reject

Grand Master Hunter CXIII®

COINS, CACHES, NUGGETS, RELICS...If You Want to Search Perfectly for Everything, This is the Detector for You

Jim Brewer used a CX III and a 1938 Illinois map to locate a fruit jar filled with Indian Head cents, including one from 1866, silver quarters, half dollars and a 1921 Morgan dollar. Because Bob Clark found a valuable key chain lost in a 5-acre field of 2-foot-high grass, the Commonwealth of Pennsylvania didn't have to buy new locks for an entire state forest. Gold coins? CX III's have located dozens of them; Anton Jaeger found one dated 1881. How about gold nuggets? Joe Sawyer will show you the one his CX III told him about in Arizona.

Proudly we celebrate the 20th anniversary of the Garrett Master Hunter, the forerunner of the Grand Master CX III. In 1976 we began perfecting this professional, universal metal detector with its goal of locating all types of treasure anywhere in the world, achieving depth and efficiency regardless of operating conditions.

The Master Hunter has truly lived up to its name. From the beginning, Company President Charles Garrett monitored the 20-year development through thousands of hours of personal field and laboratory testing, directing

its engineering improvements as he demanded achievement of all desired performance specifications.

Heart of the newest Grand Master Hunter CX III is its dual Power Master microprocessor Deepseeking (All Metal) and Discriminate circuitry systems. Superior performance gives unmatched depth on coins, caches, gold, relics and all other treasures even in the worst mineralized soil. When the Depth Multiplier is attached, it can detect caches and large treasures two to three times deeper than with conventional searchcoils.

There is no equal to the superior Graphic Target Analyzer™ (GTA) coin discriminating mode. Its highly acclaimed and patented multiple-notch Accept/Reject circuit is considered the best coin hunting method in the world. Garrett's exclusive GTA circuit visibly identifies all detected targets and audibly alerts you to every target you wish to dig. The result is coin hunting perfection you can achieve no other way.

The proven results of this 20-year dedicated effort is an automatic detector you can operate with ease and confidence. Just press one touchpad and you can achieve near perfection with absolutely no manual adjustments, computer programming or memorizing bothersome number codes. The new OneTouch Grand Master Hunter CX III with its Power Master depth-boosting circuitry lets you concentrate on deep search treasure hunting. Enjoy the rewards of maximum success!

Bloodhound Depth Multiplier Capability

Grand Master Hunter CXII®

Computerized, Microprocessor OneTouch Detection
That's Dependable, Reliable and Leads You to Treasure

Sean Morton makes his living on a Mediterranean island by selling treasures he finds with this detector. Jim Eggleston located two Liberty \$20 gold pieces, one dated 1853-0, and Mary Overton used a CX II to discover a gold coin dated 1895.

Few detectors can match the excellence of the Grand Master Hunter CX II in detecting deep coins, caches, relics and gold.

Press one control and you're ready to hunt in Garrett's exclusive dual-range discrimination mode. Touch another control and you're in a Deepseeking All Metal mode for maximum depth. The CX II offers two more Garrett exclusives, Fast Track and Ground Track automatic ground balance.

Of course, the CX II offers manual ground balance for the old pros who want it as well as desired regulation

of all other functions. Let the Depth Multiplier "Bloodhound" multiply depth two to three times for caches. The miracle of computerized technology...the simplicity of OneTouch operation...the ease of automatic ground balancing...the CX II can do it all.

OneTouch and you're ready to hunt. Hold ten seconds to return to factory settings.

Meter gives target ID, signal strength, depth and battery condition

Master Hunter CX[®]

If You Demand Deepseeking Excellence, High Tech Capabilities and OneTouch Performance, the Master Hunter CX is For You

Jorge Sepulveda Gonzalez uses a Bloodhound with his CX to locate deep centuries-old relics in Mexico. Rosanne Sabich found three gold coins with three different Garrett detectors, but her first one, a Mexican 2-peso piece was discovered with a Master Hunter CX. In New Hampshire Tom Brown detected and recovered a priceless 1652 Massachusetts Bay Colony coin.

Use the miracle of computerized OneTouch detecting to find caches and any kind of deep treasure with the Master Hunter CX. When the CX is teamed with the Depth Multiplier Bloodhound, cache detection depth capabilities are doubled or tripled, or with any Crossfire coil and the CX becomes a truly universal detector to hunt anywhere and find any target — coins, jewelry, relics, gold nuggets and veins.

Garrett's patented Fast Track feature allows the CX to ground balance itself when in Deepseeking All Metal Mode. In the Discriminate mode ferrous/non-ferrous discrimination lets you zero in on wanted targets.

Touchpad keyboard gives instantaneous control. Light weight, perfect balance and handling ease let you to hunt all day with the CX.

If you demand deepseeking excellence, basic CX high tech capabilities and OneTouch performance, the Master Hunter CX is the detector for you.

Scorpion Gold Stinger

Punches Through Tough Mineralization to Find Gold Yet Offers Precise Discrimination for Coin-hunting

In Georgia Bill Boye used a Garrett to find a gold-bearing quartz bonanza weighing 17 1/2 pounds. It was this circuit that started the detector gold rush in 1979 in Australia and discovered the famous million-dollar Hand of Faith nugget.

Garrett's famed Groundhog (15 kHz) circuit is renowned over the world for its power in driving through ground minerals to pinpoint the tiniest gold nuggets.

Yet, the Stinger offers 3-mode versatility unmatched by other gold-hunting detectors. When you're not locating gold nuggets, use your Scorpion Gold Stinger to locate coins, jewelry or any other kind of treasure.

With Garrett's highly maneuverable 3x7-inch elliptical searchcoil you can find the tiniest nuggets and flakes or you can locate nuggets, veins, float and wet and dry placer to extreme depths with the 5x10-inch elliptical coil. You can sample ore or test "Hot Rocks" with ease.

Remember: The higher the operating frequency the deeper you may detect pinhead size nuggets. THE LOWER THE FREQUENCY THE DEEPER YOU CAN DETECT LARGE NUGGETS.

Three Detectors in One

Whether you search gold fields, in ghost towns or on the beach...whether you seek gold nuggets, ore veins, coins or jewelry, the Scorpion Gold Stinger has the proven mode for seeking out treasure.

Detection Features

- ▼ Deepseeking Groundhog™ (15kHz) circuit
- ▼ 3-Modes for all purpose hunting:
 - Deepseeking All Metal: gold hunting
 - Discriminate: general treasure hunting
 - Calibrated TR Disc.: Ore sampling/hot rock rejection
- ▼ 10-turn control for precise ground balance
- ▼ Auto/Manual audio threshold selector
- ▼ Instant pushbutton retuning
- ▼ Submersible Searchcoils
- ▼ Versatility to hunt anywhere; find anything
- ▼ Instructional and Field Search Video
- ▼ Convertible Stem/Hip Mount Operation
 - 3 lbs 6 oz (stem mount)
 - 2 lbs 11 oz (hip mount)
- ▼ Three 9v batteries

- Calibrated discrimination for ore sampling, testing hot rocks and general treasure hunting
- Automatic or manual audio threshold
- 10-turn audio control for maximum sensitivity
- Choose maximum depth and sensitivity under all conditions
- 10-turn control for precise ground balance
- Instant retuning Push button
- 3-mode operation:
 - Deepseeking All Metal - gold hunting
 - Discriminate - general treasure hunting
 - TR Discriminate - Ore sampling

With Patented 90-Degree Riffles
Help Recover All The Gold*

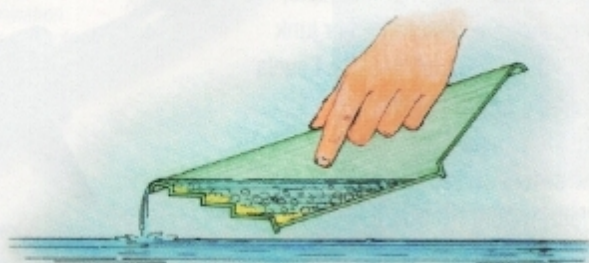

“You can't throw gold from a Garrett pan!" That's what Johnny (Rattlesnake) McCoy will tell you. And, he's been using Gravity Trap pans for 20 years to take home gold that other pans would discard. Worldwide acclaim such as this (and its imitations) is proof of their efficiency. Garrett pans are made of rugged, lifetime high-impact plastic with a forest green color that shows gold better than any other. The patented (U.S. #4,162,969) 90-degree riffles make panning so easy that even a tenderfoot vacationer can recover gold and other precious metals and gemstones. Don't loose gold! If you are serious about successful gold recovery, use a Garrett Gravity Trap pan...accept no substitutes.

New 15" Supersluice Gold Pan

Gravity Trap Gold Panning Kit

Built using Roy Lagal's patented 90-degree riffle design.

Freedom Ace Plus™

Beginners and Old Timers Love this Proven Detector
It Finds Treasure so Easily

"My wife borrowed my Ace and she won't give it back," moans Jack Eltridge. **Manual J. Reposa calls his "a great piece of equipment."** **Jean Ward used hers to find a hoard of 1st-century Roman coins in Nottingham, England.** **Betty Reynolds says that the Ace "taught me about metal detecting."**

Year after year after year the Freedom Ace continues to find so much lost wealth that it seems to have a built-in treasure compass that leads to treasure. Thousands, the world over, have used it to find their first coin and many refuse to give it up. They may now hunt with a more advanced model, but they're still in love with the Ace.

The Ace has become a byword for treasure hunting satisfaction. Simply turn it on and start searching. The Ace

automatically ignores most trash and finds deep treasure, well beyond more expensive competitive instruments. Garrett's know-how and thirty-plus years of treasure hunting experience guarantee the Ace to be the front runner of economical, quality-built, field-dependable, treasure-finding metal detectors.

You'll be amazed at its light weight and ease of use and the depth at which it will recover coins, jewelry and other treasures. You'll soon agree that "there's just something about a Garrett Ace."

Detection Features

- ▼ Deep-search circuitry
- ▼ Full range adjustable discrimination...ignores foil, nails, bottlecaps, pulltabs and other junk
- ▼ 3 Initial Preset Discrimination Levels
- ▼ Automatic ground balance
- ▼ Adjustable depth/sensitivity
- ▼ Slow or fast sweep rate
- ▼ Surface-mount PC board
- ▼ Instruction video cassette
- ▼ Automatic battery check
- ▼ Loudspeaker & headphone jack
- ▼ Lightweight: 3 lbs 4 ozs
- ▼ Three long-lasting 9v batteries

Full Range Trash Elimination Control with 3 Initial Preset Levels

Power/Depth/Sensitivity
Just turn to Preset Point
and start searching

with 8 1/2-inch Crossfire searchcoil and video. Model 1198100
\$239.95

Pocket Probe™

"Just one little found treasure pays for the Pocket Probe," says Charles Garrett who conceived of and designed this detector 15 years ago. **"Too many times I missed spur-of-the-moment treasure searches in ghost towns and at abandoned treasure sites because I didn't have a small detector with me."**

This handy yet powerful instrument will go anywhere to search walls, chimneys, flooring, and similar spots for lost coins, jewelry and money caches. Keep a Pocket Probe with you or in your vehicle. Be Prepared.

Features

- ▼ Audio/light indicator
- ▼ Automatic tuning/audio threshold
- ▼ Unbreakable ABS case
- ▼ Optional earplug for silent operation
- ▼ 8 oz., 3 1/4 x 6 1/4 x 1"
- ▼ One 9-volt battery

Sea HunterTM

For Beach Hunters, Surfers and Deep Ocean Divers
Who Use Only the Best

"I wouldn't consider using any other detector," says veteran diver Bob Marx. Mel Fisher relied on Sea Hunters to help find the multi-million-dollar treasure galleon La Señora de la Atocha. Eleanor Hube, an active and successful surfer travels to the far islands of the Caribbean, trusting explicitly in her Sea Hunter XL500.

Ten years of worldwide performance and the Sea Hunter is still unsurpassed as the professional's underwater detector. Millions of hours of superior performance and millions of dollars in found treasure have

established the Sea Hunter's unbeatable reputation.

When divers are searching hundreds of feet beneath the waves, they can take nothing for granted. That's why the Sea Hunter is the choice of professional divers worldwide. Veteran beach and surf hunters rely on its unfailing performance.

Thirty fathoms deep or in waist-deep surf the Sea Hunter's pulse induction circuitry ignores salt water

and iron mineralization. No other circuitry can function effectively under such conditions which are often found in lakes far from the ocean. Adjustable discrimination rejects foil, bottlecaps, pulltabs and some iron pieces.

Targets are announced by Garrett's exclusive "TreasureTone," developed especially to override surf and SCUBA noise. For diving ease Garrett offers the optional arm-mount Scubamate which eliminates the dangling searchcoil cable, letting you swim and search with ease.

When you're considering an underwater detector, ask yourself why so many professionals choose the Sea Hunter. It's because they will settle for no less than the very best.

Treasure Tone audio with 10-turn control provides maximum sensitivity

3 depth ranges... super-deep, normal or shallow for trashy areas

Calibrated discrimination rejects unwanted targets

Headphone connector also accommodates NiCad recharger

ScubaMate: Perfect accessory for underwater diving. Compact operation, eliminating dangling searchcoil cable.

Detection Features

- ▼ Proven reliability
- ▼ Pulse induction circuitry
- ▼ Submersible to 200 feet
- ▼ Full range trash elimination
- ▼ 10-turn audio threshold adjust
- ▼ TreasureTone™ audio
- ▼ Meter for target strength and battery check
- ▼ Scuba Mate™ for diving (optional)
- ▼ Long stem for surf/beach hunting
- ▼ Short stem for SCUBA and snorkeling
- ▼ Submersible headphones
- ▼ 6 lbs total operating weight
- ▼ NiCad rechargeable batteries w/110v recharger
- ▼ 12v Auto Recharger (optional)

Recommended Accessories & Guides

- ▼ 12v Auto Recharger, 1607900 \$34.95
- ▼ Scubamate for underwater diving, 1608400 \$89.95
- ▼ Treasure Recovery from Sand & Sea, 1505700 \$14.95
- ▼ Sunken Treasure: Where and How to Find It, 1507500 \$14.95

Shown with the optional ScubaMate. Short 12-inch stem is not shown.

Garrett Quality

The Ideal That Led to OneTouch Detectors and Automatic Treasure Hunting

Since we founded Garrett Electronics more than 30 years ago, quality equipment and reliable service have been absolute musts.

Although our products have always offered state-of-the-art technology, great skill was once required in using them. Through books, articles and lectures we shared our expertise to teach these skills.

Furthermore, we pledged never to sell a detector model unless Charles had tested it personally. Such testing has taken him all over the world. Truly, nobody knows treasure like Charles Garrett. Every Garrett detector must fulfill this expert's requirements.

And, he continues to demand not only maximum depth and sensitivity but simplicity and ease of operation. Thus, hobbyists with Garrett instruments no longer are forced to "go metal detecting."

They go treasure hunting! Complicated control adjustments and worries about environmental conditions and soil mineralization are forgotten. With a OneTouch Garrett detector you learn what Automatic Treasure Hunting is all about.

Our name is on every Garrett detector, incentive enough in itself for us to continually upgrade product quality and customer service. You know that we stand behind every product and support you in your desire to be successful. Our Company will be there when you need us.

Good luck in all your treasure hunting activities. Learn to use your equipment; be patient and persistent. Success will be yours.

Your friends,

Charles and Eleanor Garrett

Patent Recognition

Proof of Garrett's excellence is the recognition given them by the following United States patents: 4,709,213; 4,488,115; 4,700,139; 4,398,104; 4,423,377; 4,303,879; 4,334,191; 3,662,255; 4,162,969; 4,334,192; 5,148,151; 5,148,151; 5,138,262; Design 274,704 and 297,221; G.B. Design 2,011,852; Australia Design 111,674

Warranty Protection

Garrett stands behind every product it builds, and offers dependable warranty protection to each buyer. All Garrett land detectors and searchcoils are protected by a two-year limited parts and labor warranty. Sea Hunter is protected by one-year limited parts and labor warranty.
