

NOVA TOTIUS TERRARUM ORBIS GEOGRAPHICA AC HYDROGRAPHICA TABULA auct. Guiljelmo Blaeuw

*Celebrating 50 years of treasure hunting...*

# *The 1998 Garrett Line*

**Y**es, I've been finding treasure for fifty years and have built Garrett metal detectors for more than three decades. People I meet often ask, "Is any treasure left?" Smiling, I reply, "Oh yes, I haven't found it all yet!" Truthfully, I believe there is a thousand times more treasure waiting than has already been found.

The next question usually asked is, "Well then, how do I find my share?" Again, I love to reply, "How else, except with a Garrett!"

From beginner to professional, I've been there. I've searched for every kind of treasure with probably more time in the field than all other metal detector company CEOs/directors combined. I know how to build and use metal detectors!

I have the detector you need to be successful. Garrett equipment is a high performance line you can start with and stay with as you progress in your metal detecting experience.

Use a Garrett metal detector and find more than your share of coins and treasure!

I'll see you in the field!

*Charles Garrett*

*Advanced Metal Detectors Designed  
To Find The Treasures You Seek*

# How Do You Find More Treasure?

"My GTI's depth is as great as its sensitivity."

"I love my GTX-1000... found big things, small things, deep and shallow."

"With the Depth Multiplier attached to my CXIII, nothing is safe from my detection."

"I just passed the 1,000 coin mark with my Treasure Ace."

"I consider all Garrett customers as Garrett Family - The World's Treasure Hunting Team!"

Charles Garrett

If you use a metal detector, you're probably a committed treasure hunter always interested in learning how to find more treasure. But, even if you've never used a detector, you may have dreamed of finding treasure with one.

Here are Garrett's simple steps to more treasure for everyone...from beginner to professional.

## Treasure Ace — What a Way to Begin!

All three of Garrett's **Treasure Ace** models are very good metal detectors. Microprocessor circuits offer one-touch tuning, full range discrimination and a loud and clear speaker, plus "Treasure Eye," that makes locating and pinpointing targets a breeze.

This Treasure Ace "starter line" of metal detectors will find treasure. But, to find even more take the next step up that pays its way.

## GTAx Detectors — Step Up to More Treasure!

GTAx stands for improved microprocessor Graphic Target Analyzing, a full-range multi-notch discrimination system. No competitive detector is as accurate, easy to use, or detects as deeply as the GTAx models.

The LCD display constantly shows your Accept/Reject discrimination pattern, target ID and operating search aids.

GTAx detectors excel in finding treasure in "hunted-out" and high-trash areas. The GTA notch system will "zero in" on treasures hiding among the trash.

The top-of-the-line GTAx 1000 offers super depth, plus 20% Power Booster, Coin Alert Audio Discrimination, Audio Boost, Coin Depth Measurement, Surface Elimination and Pinpointing. Yet the "pro" treasure hunters take one more step up to...

## GTI Imaging Detectors — The Ultimate in Treasure Hunting!

These are the best! Their technology is undisputedly the most advanced of any metal

detector...anywhere. The key is imaging: *Graphic Target Imaging*...the ability to measure the size of every detected target.

No other detector can offer *Imaging*. Garrett designed it; we own the patent.

With the GTI you get all the outstanding GTA features, plus the incredible imaging capability.

GTI detectors take the guesswork out of treasure hunting. You'll know a target's ID, size and depth to help you decide whether to dig it or not. And, the GTI's pinpointing ability will amaze you.

With a GTI you'll dig *10 times (or more) coins* by avoiding trash that no type of discrimination can identify. No other detector in the world can provide such treasure hunting perfection, enjoyment and success.

## Specialized Metal Detectors — For Specific Kinds of Hunting!

For treasure hunting or electronic prospecting the super-deepseeking, all-purpose **Master Hunter CX III** gets the job done. Fully computerized, with GTA and Power Master capability. You'll find tiny gold nuggets, coins and jewelry. Find the deepest caches and relics with a 12-inch searchcoil or the famed Garrett "Bloodhound" Depth Multiplier.

**The Master Hunter CX** with its all-purpose circuitry will find all types of treasure. Find gold with its deepseeking All Metal mode or find treasure caches two to three times deeper with the Depth Multiplier.

If you love beach, surf or underwater hunting, the Pulse Induction **Sea Hunter** should be your choice. The **Scorpion Gold Stinger** will locate deep nuggets, placer deposits, veins and high-grade ore. With its discrimination you can find coins, jewelry and other treasure. With the **Gold Stinger**, you have three detectors in one.

*No matter what your metal detecting experience and your detector requirements... Garrett has the perfect detector for you!*

# Meet the incredible Garrett Graphic Target Imaging Metal Detectors

*Imaging!  
You'll immediately know what you have discovered.*

When Charles Garrett introduced Imaging to metal detecting, he did treasure hunters everywhere a big favor. Any treasure hunter worth his salt loves to hunt. What he doesn't love is digging worthless trash. Garrett found a way to eliminate this. The GTI 2000 was the first metal detector in the world with the Imaging feature. Now, with the introduction of the GTI 1500, there are two Imaging detectors.

*Imaging!  
You never have to imagine.*

Imaging is the ability of a detector to measure the size of buried and concealed metal objects and report that information to the detector user. It gives both size and the true depth of all targets. With this information, you can decide whether or not it's worth digging. The accuracy of the GTIs is second to none. Testing and customer reports prove them to have a phenomenal 95% accuracy rate. When you get a signal on a GTI, you'll know immediately what the target is, where it is, and how deep it is. So, if you don't really enjoy digging just for the sake of digging, you're in luck. Now, you can dig much less trash and much more treasure!

*Imaging!  
A 35-year "overnight success".*

Imaging didn't come about overnight. It came as the result of 35 years of cumulative designing, refining, testing and re-testing various detectors. It is the result of honing all the technological skills required in metal detecting. Imaging is the most technologically advanced feature available on any detector anywhere.

*A-E scales correlate with LCD target image sizes.*

*Number scale gives accurate target depth.*

*This target ID range includes a quarter*

*This "B" size image confirms that you have detected a quarter at 6"*

*Use this touchpad to scroll through the menu.*

*TOUCH ONCE to begin hunting. Hold 5 seconds to return to factory settings.*

*Select All Metal Super-Depth mode and 1-second Ground Balance.*

*Target Guide relates size & ID.*

*Lower scale segments indicate desired acceptance/rejection of all possible targets plus show target depth.*

*Color Size-Image quickly identifies all target sizes.*

*Search Aids include Search Image, Surface Elimination, Salt Elimination, Automatic Ground Tracking*

*Audio selections*

*Scale gives constant battery check.*

*ACCEPT/REJECT lets you change discrimination.*

*Press to have voice describe last target ID, size and depth.*

Labels on the device: **POWER** (Hold to Reset), **ALL METAL** (Hold for Fast Track), **TREASURE IMAGING** (Pinpoint), **DISCRIMINATE** (Last Mode), **TREASURE TALK™** (Target Recall), **MENU/SCROLL**, **ACCEPT/REJECT**, **OPERATE**

GTI 2000

*Upper scale indicates target signal strength*

*This target ID range includes cans.*

*The "D" size image confirms that you have detected a can.*

*Depth of can is 6".*

*Treasure Imaging helps isolate coins in trashy areas.*

*Press for target size and depth.*

Labels on the device: **MENU/SCROLL**, **ACCEPT/REJECT**, **OPERATE**, **POWER** (Hold to Reset), **TREASURE IMAGING** (Pinpoint), **LAST MODE**

GTI 1500

Both the GTI 2000 and GTI 1500 have the same upper scale and GTA features.

# GTI 2000

*Depth, Discrimination and Imaging:  
An unbeatable combination.*

**T**he classic Old Wive's Tale is that you must give up depth if you're looking for discrimination, or vice versa. The GTI 2000 disproves that. This is the world's most sophisticated circuitry. And does offer you both maximum depth and accurate discrimination at all levels.

The GTI 2000 is the result of Garrett's 35 years experience in manufacturing metal detectors, of refining and honing our skills in order to produce the world's most technologically advanced metal detector ever.

*Imaging: See if it's worth digging.*

**I**f you've been hunting with a metal detector that simply indicates that you've found a metal target of some type at some depth, you're in for a real treat. The GTI 2000 brings Imaging to the hunt. It not only signals that you've hit a metal target, it tells you the size of that target, the depth of that target, and what that target probably is!

Imaging is another in a long line of Garrett "firsts". And its accuracy is second to none. The GTI 2000 gives you both the size and the actual depth of the targets you locate. That way, you get to decide whether or not you want to commit to digging it out. And the Treasure Vision Screen even tells you if what you've located is a coin, a pull tab, a drink can, or something larger. But it goes further than that. If it is a coin, the GTI 2000 will tell you what kind of coin it is: a penny, a nickel, a dime, a quarter, a half dollar, or a dollar.

*Find far less trash and much more treasure.*

**T**he GTI 2000 lets you sift out the trash and concentrate on the treasure, making the hunt far more productive than with any other detector manufactured! The secret ingredient in the GTI 2000 is Garrett's exclusive Digital Signal Processing (DSP) chip. This little bit of wizardry gives the detector the extra bit of intelligence it needs to send back true image information instantly.

With the GTI 2000, you can even come out a winner on "hunted-out" pieces of ground. Go back over it with the GTI 2000 and you'll be amazed at how much more treasure you can find and how much more trash you will leave for others to find.

*The Middleham Jewel, a rare gold and sapphire reliquary pendant, believed to have once belonged to King Richard III who lived 500 years ago. It was found by a Garrett metal detector. It measures 6.6cm in height, 5.9cm in width, and 10mm in depth. Its weight is 68 grams. The Middleham Jewel is worth 2 million dollars!*

Only with a  
Garrett GTI...  
**DIG NO  
MORE  
CANS!**

Step up to the REAL pleasure of  
treasure hunting by digging  
mostly coins and jewelry!

HOW DO YOU DO IT?  
HERE'S HOW:

This target ID range includes cans.

This size "D" image confirms that  
you have detected a can at eight  
inches! Don't waste time digging it!

### 9 1/2" Super Deepseeking Scorchers® Searchcoil

Three dimensional design with Dual Receiver Coils  
providing TARGET IMAGING and TRUE DEPTH  
MEASURING regardless of target size.

## Master Deepseeker GTI 2000

- Graphic Target Imaging tells you target size, probable identity and true depth.
- Digital Signal Processing chip supplies the intelligence needed for Imaging and the most accurate discrimination.
- Treasure Vision panel tells you the entire status of your hunt at all times.
- One-Touch Operation; press the POWER touchpad and hunt.
- True depth measure means you know exactly how deep to dig.
- Voice Target ID tells you in words what and where your target lies and gives instructions.
- One second automatic ground balancing takes all the guesswork out of the hunt.
- Deepseeking all-metal mode lets you go even deeper.
- 5 Discriminate modes let you specify: Coins, Jewelry, Relics, Zero or Custom.
- Built-in hip mount and arm cuff-fitted stem adds ergonomic comfort to your hunt.
- 9 1/2" Super Deepseeking Scorchers searchcoil has stacked transmitters/receivers for greater depth and imaging.
- Convertible Stem/Hip Mount Operation  
4 lbs 10 ozs (stem mount), 3 lbs 10 ozs (hip mount)
- Instructional video gives you step-by-step guidance on using the GTI 2000.

Model 1120070

**\$ 1099.95**

### Accessorize your GTI 2000 to fit your hunting mode.

The GTI 2000 is one of the most all purpose metal detectors you'll ever find. But, above and beyond its built in flexibility, you can accessorize it with these non-imaging searchcoils to customize its hunting abilities.

- Use the 5" x 10" elliptical searchcoil for super deep gold hunting.
- Use the 4 1/2" searchcoil for increasing your finds in trashy areas.
- Use the 12 1/2" coil for deep caches while maintaining the capability to detect coins.

### Search Deeper and with more discrimination than ever before.

The GTI 2000 also features an all new 9 1/2" Scorchers™ Searchcoil. Its three dimensional design and Dual Receiver Coils work together to provide a new depth to your treasure hunting.

With its totally new capabilities at your disposal, you can go back over ground that you hunted last week and find new targets that you couldn't detect and correctly identify with any other metal detector.

### Use the time you save to count your treasure or find more treasure!

The GTI 2000 is the world's most technologically advanced microprocessor-controlled metal detector on the market today. It allows you—for the first time—to know the relative size and true depth of every target. And its revolutionary new coil design lets you hunt deeper with stronger signals than ever before. That means that you can find the maximum treasure in the minimum time. It's a serious metal detector for the serious treasure hunter.

Battery compartment can be  
hip mounted to reduce weight.

*"Take only the coins and leave smaller and larger junk items in the ground!"* Charles Garrett

Charles Garrett has been an avid coinshooter for nearly five decades. And he knows the majority of people who buy metal detectors use them for that purpose: to look for coins. So, when Garrett engineers perfected target imaging, he knew he could then build a virtually perfect coin hunting detector. So he did...for you...The GTI 1500!

*Coinshooters: Here's what Imaging does for you!*

Your main desire is to find coins, lots of coins! You'd just like to fill your pouch with coins, rings and jewelry as fast as you can. But, how many times have you wasted precious hunting time by digging aluminum cans and other trash items that you thought were coins? Sometimes cans are buried a foot deep in hardened clay and what a difficult, unproductive effort it is to dig them!

You'll never have to dig another can when you use a GTI. You can truly find ten times more coins and other treasures. Read all about it on the following page!

*Adds fun to serious coinshooting.*

Coinshooting with the GTI 1500 will be much more productive and fun. You won't waste time digging for "junk" targets. You dig only for those that you know are going to be worthwhile. The GTI 1500 keeps you informed at all times — both audibly and visually — of the targets you're detecting, whether or not they're coins, how deep they're located and their SIZE!

So, if you're serious about coinshooting, get the metal detector specifically designed for coinshooting: The GTI 1500.

This ten-dollar gold piece, one of many that have been found by treasure hunters, was minted just after the turn of the century. It was one of the coins designed during America's "Golden Age of Coinage." These ten-dollar gold pieces were referred to as "Eagles"; the twenty-dollar gold pieces were "Double Eagles". Now, with the GTI 1500 you stand a much better chance of finding these golden treasures.

*Problem! How do you find all the coins in any area and leave drink cans, pulltaps, aluminum screw tops, chewing gum foil, cigarette wrappers and hundreds of other worthless objects for other detectors to find?*

**T**his problem is clearly solved with the GTI 1500. When you get a reading of a penny, a nickel, a quarter, a half dollar or a dollar on a GTI 1500, you also get the confirmation of the size; verifying that it is coin-sized. It also gives you the true depth of that target. No matter what the size.

And this information comes to you at the touch of a touchpad because of the dedicated Digital Signal Processing (DSP) chip of the GTI 1500. The Power Master Circuitry of the GTI 1500—along with its new 9 1/2" Scorchers™ Dual Coil Receiver—means that you'll get deeper readings than ever before. That way, you can retrieve more coins from "hunted" ground and trashy areas.

In a nutshell, the GTI 1500 gives you instant feedback of each target you detect, telling you probable identity, size and how deep it's located. The digging is up to you. So how do you become a dedicated professional Coin Finder? It's easy! Just press the GTI 1500 POWER touchpad!

*9 1/2" Super Deepseeking Scorchers Searchcoil*  
Three dimensional design with Dual Receiver Coils providing TARGET IMAGING and TRUE DEPTH MEASURING regardless of target size.

## *The World's Most Advanced Coinhunter: Garrett's Imaging GTI 1500*

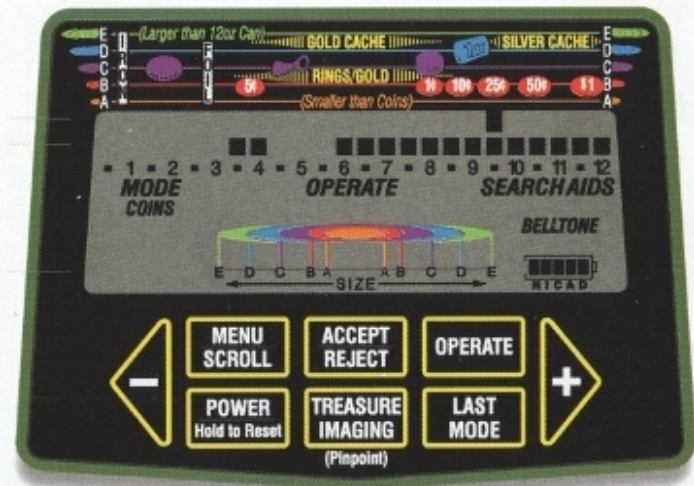

- Graphic Target Imaging
- Treasure Vision™ pinpoint with size, depth and probable ID
- DSP (Digital Signal Processing) gives instant readings.
- One-Touch Operation
- Low powered backlit LCD
- Built-in hip mount and padded armrest for ergonomic comfort.
- Pistol grip handle for easy maneuvering.
- 9 1/2" Super Deepseeking Scorchers searchcoil with stacked transmitter/receivers for greater depth and imaging.
- Convertible Stem/Hip Mount Operation
  - 4 lbs 2 ozs (stem mount)
  - 3 lbs 2 ozs (hip mount)

Display

Graphic Imaging:

The GTI 1500 panel display is shown above. On the Image Scales, "B" targets are coin-sized. "A" size targets are smaller and "C", "D" and "E" size targets are progressively larger.

## *Find Ten Times More Coins!*

**C**oin hunting sites usually contain ten to twenty-five times more junk items and drink cans as coins. So, ignore all those odd size targets and you'll find ten times as many coins or more!

No other brand detector in the world offers this coin hunting feature. If your detected target is coin-sized the Display Image will tell you so! Never again dig a can or other junk target that's not coin-sized.

Battery compartment can be hip mounted to reduce weight.

**GARRETT**

# GTAx Series

*"The GTA is our original graphic target analyzing system we designed eight years ago. But, even now, no competitive system is as accurate, as deep detecting, or as user-friendly."*

*Charles Garrett*

Our GTAx line has been a favorite ever since we came out with it. The reasons are simple: it is easy to use, gives you clear signals, has the Graphic Target Analyzer for quick ID of targets, continuous visual full-range target Accept/Reject settings, and makes it easy to pinpoint targets and read depth.

The GTAx line is as modern as tomorrow and it earned its considerable reputation the old-fashioned way: by performing.

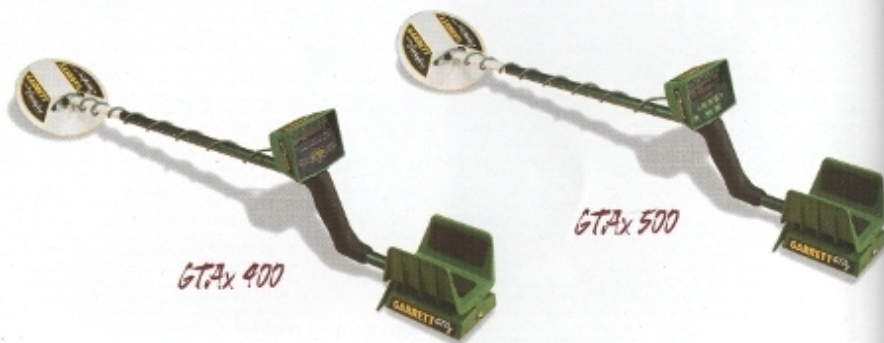

*This ancient crucifix was discovered on a treasure hunt in Southern California. It is believed to date back to the late 1500s or early 1600s. Speculation has it that it once belonged to one of the Spanish Conquistadors, military adventurers who founded Spain's empire in America.*

## Program your hunts.

You can set the GTAx to your desired exact hunting mode. In the Coin Mode, for instance, the detector will signal only when targets in the coin range are detected. If you're looking for one specific item—say, an earring—simply clear the entire lower row of Accept cursors. Pass the matching earring under the searchcoil and press the ACCEPT touchpad. The detector will now only signal when the earring's mate has been detected.

By the same token, you can reject certain objects if you no longer want to detect them. If you keep detecting pull-tabs, for instance, just set the GTAx to reject pull-tabs and these pesky targets will no longer interrupt your treasure hunting. With the GTAx, you can select one of the preset modes or program your hunt. Selecting your goals increases the pleasure of the time you spend in the field.

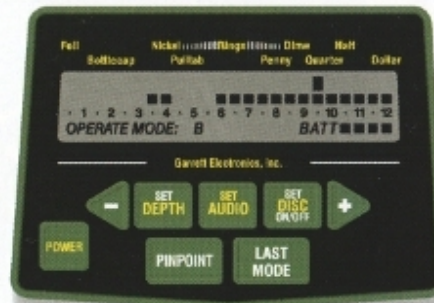

## Single-Mode GTX 400

- One-touch operation
- Microprocessor controlled
- Sensitive deepseeking capability
- 17-notch GTA LCD display
- With 8 1/2" Crossfire searchcoil

Battery compartment can be hip mounted to reduce weight.

# Treasure Ace Series

*"Garrett is the world's only metal detector company to combine the wizardry of computerized microprocessor circuitry with the reality of everyday economics."* Charles Garrett

Coin Shooter

Ghost Towner

Cache Hunter

Beach Hunter

Each one of these detectors utilizes the microprocessor technology usually found in only much higher priced models. The Treasure Aces offer full range discrimination to give you the option of searching for all metal objects, or tuning out the trash and just going for the treasure. That way, you can save precious hunting time by just concentrating on coins, jewelry and other specific valuable treasures.

The clear signals on the LCD readouts provide instant target ID. And the built-in microprocessor assures years of reliable, deep, accurate searching. All these detectors are lightweight (under 3 pounds) and extremely easy to use.

Don't settle for a "toy" detector while looking for a bargain. Get a good value instead. These detectors are made by the same people who bring you the world famous GTA and the GTI series of detectors.

## Treasure Ace 300: Visual Target ID.

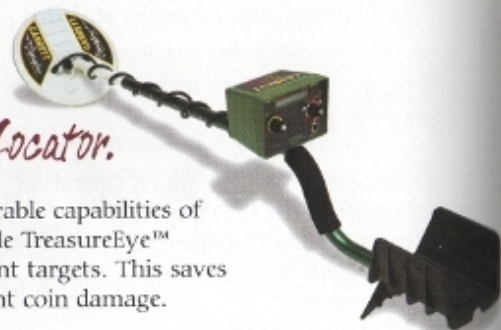

The Treasure Ace 300 has the exclusive TreasureEye™ feature, but takes it a step further. It also gives you Visual GTA Target ID. Its large LED panel has twin 10-segment notch rows. The upper row tells you the discrimination you have set and visually announces all the detected targets with ID cursors. In the lower scale, the TreasureEye™ precisely pinpoints the target, giving its relative signal strength, while the loudspeaker emits sharp, synchronized and audio detection and pinpointing signals. A depth control permits regulation of sensitivity so you can achieve maximum depth under all search conditions.

## Treasure Ace 200: With TreasureEye™ Target Locator.

The Treasure Ace 200 has all the considerable capabilities of the 100. And more. It also has the incredible TreasureEye™ Target Locator to help you precisely pinpoint targets. This saves you valuable digging time and helps prevent coin damage.

## Treasure Ace 100: The Low Cost High Performer.

Don't let the low cost of the Treasure Ace 100 put you off. It has all the microprocessor tuning capabilities that have made Garrett detectors famous. Just turn it on, and you're ready to find treasure! It's the low-cost wonder.

## Treasure Ace 100

- Advanced microprocessor technology
- Full-range discrimination
- Battery condition alert
- Headphone jack
- Loudspeaker for clear target response
- Surface-mount PC board
- Two 9v batteries included
- Two-year warranty
- 8 1/2" Crossfire searchcoil
- Lightweight: 2 lbs 10 ozs

Model 1131070

\$179.95

## Treasure Ace 200

- Advanced microprocessor technology
- Features TreasureEye™ target locator which speeds pinpointing, saves digging time, helps prevent coin damage
- Full-range discrimination
- Adjustable detection depth and sensitivity
- Battery condition alert
- Headphone jack
- Loudspeaker for clear target response
- Surface-mount PC board
- Two 9v batteries included
- Two-year warranty
- 8 1/2" Crossfire searchcoil
- Optional searchcoils available
- Lightweight: 2 lbs 10 ozs

Model 1132070

\$239.95

*"These particular detectors have always been favorites of mine. They're just so easy to use, for so many different kinds of treasures. And you can truly feel the dependability in them."*

*Charles Garrett*

Charles Garrett began perfecting this line of professional computerized metal detectors in 1987. His goal was to develop a family of detectors that could locate all types of treasure, achieving extraordinary depth and efficiency regardless of operating conditions and mineralization.

Garrett engineers continually upgraded this line, electronically and mechanically, always using the very latest high-tech designs and components.

Millions of hours of successful field use and a string of awesome discoveries have etched a permanent place for this family of detectors: The Master Hunter CX and the Grand Master Hunter CXIII.

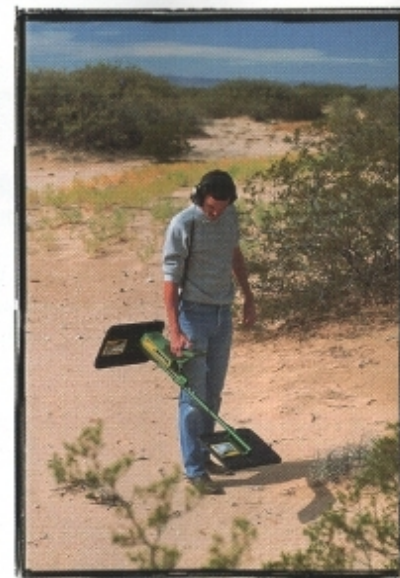

Treasure caches and battlefield relics are specialties of the CX family. But they've also been very successful in discovering vast wealth in gold nuggets, placer and veins, and coins.

## *Best depth ever.*

The Grand Master Hunter CXIII has a dual Power Master microprocessor with Deepseeking (All Metal) and Discriminate circuitry systems. Add the Depth Multiplier accessory to this and you can detect caches and large treasures two to three times deeper than with conventional searchcoils and you won't dig objects smaller than soft drink cans, saving you time for more treasure hunting.

The One-Touch Grand Master Hunter CXIII, with its Power Master depth-boosting circuitry and its unparalleled Graphic Target Analyzer discriminating capabilities lets you concentrate on deep-search treasure hunting.

The CXIII has Multiple Frequency Choices so that you can gain the maximum depth under all search conditions.

*With the optional Depth Multiplier attached, CX models ignore small, bothersome trash while locating caches two to three times deeper than normal.*

### Master Hunter CX

- Microprocessor ONE TOUCH operation
- Deepseeking All Metal Mode
- Dual-Knob Ferrous/Non-ferrous Disc
- Fast Track 5-Second Ground Balance
- Precise Visual Metered Target ID
- Coin Depth Measure & Auto Pinpoint
- 3 lbs 14 oz

# Sea Hunter XL 500

*"When you design a metal detector that's supposed to be effective at 200 feet underwater, and the boss is going to test it himself...it had better work!"*  
 Bob Podhrnsky, VP Engineering  
 Garrett Metal Detectors

Charles Garrett searches 17th century Galleon with Sea Hunter and ScubaMate accessory off west coast of Colombia, South America.

The Lure of the Deep will always call brave men and women to search the world's seas for lost treasures. And, as long as this yearning persists, so will the Sea Hunter.

The Pulse Induction Sea Hunter is totally at home underwater. It completely ignores salt water and the iron mineralization that is present in salt-water environments. Its rugged construction can withstand the rigors of the deep, assuring you of countless hours of dependable underwater service.

It comes with a hip-mount and long stem to let you scan the beaches comfortably. For underwater searches, use the ScubaMate—shorter stem—which makes it easy to maneuver in underwater situations. Its coil and its headphones are tested to 200 feet in depth.

*Proven best for beach/surf searching.*

The Sea Hunter has been around for 15 years. It's been enhanced and refined over the years, but it's essentially the same reliable metal detector that has been sea tested by Charles Garrett in most of the world's oceans.

It has become the choice for professional divers such as Bob Marx and Mel Fisher. And the choice of a lot of beachcomber treasure hunters.

The Sea Hunter gives you three depth settings to choose from: Super-Deep, Normal, or Shallow for trashy areas. Whether in 30 fathoms of sea water, or waist deep in the surf, the Sea Hunter provides all the strength and accuracy to make it the most successful of all beach/underwater detectors.

The Sea Hunter: It's been Garrett tested and time proven millions of hours.

The Sea Hunter comes with a long stem for days of tireless beach and surf hunting.

## Sea Hunter

- Pulse induction circuitry submersible to 200 feet
- Treasure Tone™ audio overrides surf and SCUBA sounds to pinpoint targets quicker
- SCUBA Mate for diving (optional)
- Long stem for surf/beach hunting
- Hip-mount configuration for comfort
- Submersible stereo earphones
- 10-turn audio threshold adjust
- Full-range trash elimination
- Meter for target and battery strength
- 12 v auto recharger (optional)
- NiCad rechargeable batteries with 110v recharger
- 6 lbs total operating weight
- Handy carrybag
- Comes with 8" searchcoil
- Instructional video

Model 1112972 **\$1199.95**

This is the 17th Century Spanish icon found by Charles Garrett on a search in the Caribbean.

*Garrett has the coil to fit the job.  
Special hunts require special coils, Garrett has them.*

**G**arrett manufactures a complete line of alternate searchcoils that are interchangeable with most of its metal detectors. These specially engineered searchcoils allow the user to search deeper, or to specify his search more. Whatever the situation calls for, Garrett has the searchcoil to answer that call.

### *For the CX and the GTAx Series (except GTAx 400)*

- 4 1/2", Super Sniper, Model 2217600 \$89.95
- 8 1/2", Model 2217700 \$99.95
- 12 1/2", Model 2217800 \$139.95

### *For the GTAx 400, Treasure Ace 200 & 300*

- 4 1/2", Super Sniper, Model 2218800 \$89.95
- 8 1/2", Model 2217500 \$99.95
- 12 1/2", Model 2218400 \$139.95

### *For the Gold Stinger Model*

- 5" x 10", Model 2219400 \$139.95
- 3" x 7", Model 2219300 \$119.95

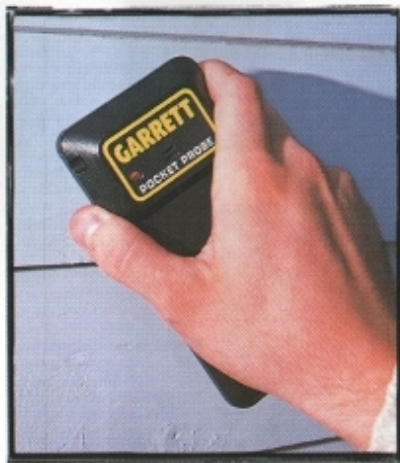

### *Scorcher Searchcoils*

For the GTI 2000 & 1500 models (non-imaging)

- 5" x 10", Model 2219800 \$149.95
- 4 1/2", Model 2219700 \$99.95
- 12 1/2", Model 2219600 \$149.95

### *Searchcoil Covers*

- 4 1/2", Model 1604200 \$4.95
- 8 1/2", Model 1602200 \$6.95
- 3" x 7", Model 1601400 \$10.95
- 5" x 10", Model 1602500 \$14.95
- 9 1/2", Scorcher, Model 1601900 \$9.95

### *The Pocket Probe Detector*

- Handy size; can fit into pocket or glove compartment of car
- Used to search walls, flooring and chimneys for lost coins, jewelry, money caches
- Weighs 8 oz.; measures: 3 1/4" x 6 1/4" x 1"
- Features automatic tuning
- Optional earplug and leather belt holster

Model 1177000

**\$119.95**

Audio Earplug,  
Model 1600100  
\$3.95

Leather Belt Holster,  
Model 1601100  
\$34.95

### *Depth Multiplier*

For use with Grand Master Hunter CXIII and Master Hunter CX.

- Instantly OPERATION-READY
- No tuning or ground balancing necessary
- Finds money caches two to three times deeper
- Ignores small targets

Model 1607300

**\$299.95**

"By using the optional Depth Multiplier, you can locate caches two to three times deeper, and it ignores small bothersome trash. No tuning or ground balancing is necessary."  
Charles Garrett

# Scorpion Gold Stinger

*"Wherever there is detectable gold to be found, you can find it with the Scorpion Gold Stinger."*

*Charles Garrett*

One million dollar nugget found with a Garrett metal detector.

Charles Garrett nugget and ore hunting near Higgins, Idaho.

*Stronger circuit means deeper detecting capabilities.*

The Stinger offers a 3-mode versatility unmatched by any other gold-hunting detectors. And its Groundhog (15kHz) circuit is world renown for its power in penetrating ground minerals to detect gold. The Groundhog punches through heavily mineralized soil to locate nuggets, float and ore veins.

The Stinger's 3"x7" elliptical searchcoil can detect the tiniest gold nuggets and flakes. Or, you can use the 5"x10" elliptical coil to locate nuggets, veins, float and wet and dry placer at extreme depths. It also lets you sample ore and check "hot rocks" with ease and dependability.

Just a flip of a switch lets you change from non-motion All Metal operation to motion Discriminate searching for precise coin hunting. Flip the switch again and you activate the true TR discrimination mode for accurate identification of conductive ore. You won't be fooled by iron rocks, fools gold, non-conductive specimens and low grade silver ore.

All controls clearly marked and easy to adjust with preset points.

## Scorpion Gold Stinger

- Deepseeking Groundhog (15 kHz) circuit
- Three modes for all-purpose hunting:
  - Deepseeking All Metal: gold hunting
  - Discriminate: general treasure and coin hunting
  - Calibrated TR Disc: for ore sampling/hot rock rejection and conductivity measurements
- 10-turn control for precise ground balance
- Auto/Manual audio threshold selector
- Instant pushbutton retuning
- Submersible searchcoils
- Versatility to hunt anywhere, find anything
- Convertible stem/hip mount
  - 3 lbs 6 oz (stem mount), 2 lbs 11 oz (hip mount)
- Comes with three 9v batteries and an instructional video

With 5"x10" 2D elliptical Gold Stinger Crossfire searchcoil and 10" gold pan for quick nugget locating.

Model 1194370

**\$549.95**

With 5"x10" and 3"x7" elliptical Gold Stinger Crossfire searchcoils, 10" gold pan and instructional video

Model 1194371

**\$629.95**

*You can double your gold recovery with Garrett patented Gravity Trap gold-saving riffled design.*

If you choose to go after your gold in the tried and true manner of the pioneers, we can supply you with the modern means to do just that.

Garrett has the world's only patented gold pan. It's the Garrett Gravity Trap Gold Pan. And, using this gold pan, you can be assured of fast wet or dry recovery.

Garrett also has the world's first gold pan that will securely trap one ounce (and larger) nuggets. It has extremely deep 1/2" riffles for rapid recovery of either wet or dry material. And, the larger size of the pan (15" in diameter, with wide bottom) allows you to work more material at once, saving you valuable prospecting time.

We also offer our standard 14-inch Gold Pan and our compact **10-inch Backpacker Gold Pan**.

All Garrett gold pans are lightweight and virtually indestructible and will do a better, faster gold saving job with the patented 90-degree riffles.

We also have items that are used with gold pans in helping speed up your recovery. There's our **14" combination Sifter/Classifier** that is for sifting coins, jewelry and relics. It fits into a 5-gallon bucket, and can be used in either wet or dry classification sifting out debris. Its 7/16" exit hole won't lose a U.S. dime.

You can use the **Gold Guzzler** bottle to suck the fine granules of gold out of the water at the bottom of your pan.

The **Garrett Backpacker Kit** consists of a waterproof backpack made of rugged vinyl, with extra zip pouch pockets to hold maps, books, etc., a pair of tweezers, two gold vials, an ore bag and a poncho.

Our **Complete Gold Kit** consists of the 10" and the 14" gold pans, Classifier, Gold Guzzler, and our *Find an Ounce a Day* book.

*Snow White, a rare and beautiful example of gold found with a Garrett metal detector, weighs in at 80 troy ounces. She measures an impressive 7 21/32" (194.5mm) high, 4 9/16" (115.9mm) wide, 2 11/16" (68.3mm) thick, and 11 7/16" (290.5mm) in girth.*

*It was discovered with a metal detector in Kalgoorie, Western Australia's Golden Mile, the richest square mile of gold-bearing land in the world.*

**Backpacker Kit**  
Backpack carries complete Gold Pan Kit. Includes tweezers, two gold vials, ore bag and poncho.

# Accessories

## Padded Two Zipper Carry Bag\*

Specially designed with extra thick padding to carry any Garrett detector. Ample width allows you to put the detectors in completely assembled. Zippered pocket is handy for storing digging tools, and broad reinforced nylon straps provide for comfortable carrying. 1608500 \$69.95

## CX-Series Supreme Bag

Soft, leather-like bag designed to carry the CX series of detectors, but suitable for just about any gear. Two end zipper pockets for stowing digging tools, compasses, maps, or whatever. Reinforced nylon straps make for comfortable carrying. 1617300 \$99.95

## All Purpose Detector Carry Bag\*

Soft leather-like carrying case designed to carry any detector we make. Zippered pockets for your fully assembled detectors. It has both hand-grip and shoulder straps made of reinforced nylon. Extra zippered pocket for headphones and tools. 1608700 \$29.95

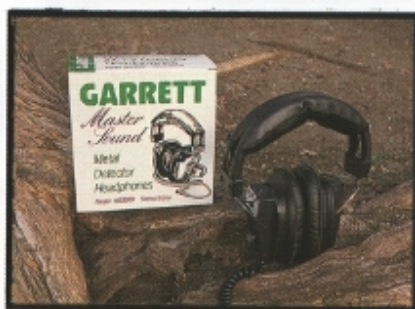

## Deluxe All-Purpose Convenience Bag\*

Six pockets, four with zippers. Convenient top zipper opening. Carry handle and quick-remove adjustable shoulder strap. Perfect for your detector, headphones, coils and accessories or for travel. Size 14(l) x 8(w) x 11(h). Forest Green. Rugged canvas. (Bottles not included) 1611500 \$19.95

## Arm Rest, CX Models

Improves balance and control when 12 1/2-inch Searchcoil is used. 1601800 \$29.95

## Stereo Headphones\*

Garrett Master Sound stereo headphones mask outside noise interference to let you hear signals from elusive fringe targets; individual volume controls on each earpiece, 1603000 \$29.95

## Garrett-Name Wear Caps

Embroidered Cap  
Black 1662200 \$10.00  
Imprinted Cap  
Two-tone 1662800 \$6.00

## Environmental CoverUp, (Rain Proof)

Probe, 1605800 \$8.95

## Sandscope

Plastic Sandscope, 1600971 \$14.95  
Metal Sandscope, 1600970 \$39.95

# Detector Comparison Chart

## ABBREVIATION DESCRIPTIONS:

**24-256** = Fine Tuning Steps: Electronic Threshold, Volume, Tone, Ground Balance (GTI 2000, GTI 1500 & CXIII)

**BCH** = Beach Mode

**DSP** = GTI 2000 and GTI 1500 have a microprocessor controller plus a dedicated Digital Signal Processor (DSP) for advanced target analysis.

**F** = Factory preset threshold-level audio

**LCD** = Liquid Crystal Display

**M** = Metered

**P** = Pulse induction

**S** = Set to initial points (>). Then, discrimination search mode operation is automatic.

**SA** = Sharp Audio-Signal Pinpointing

**Spc** = Special Submersible

**Ste** = Stereo Headphone Jack, All others (X) Mono

**X** = Standard equipment on detector as indicated

**A** = Automatic

## Patent Recognition

Proof of Garrett's excellence is the recognition given them by the following United States patents: 4,709,213; 4,488,115; 4,700,139; 4,398,104; 4,423,377; 4,303,879; 4,334,191; 3,662,255; 4,162,969; 4,334,192; 5,148,151; 5,138,262; 5,721,489; Design 274,704 and 297,221; Design 333,990; G.B. Design 2,011,852; Australia Design 111,674 and other patents pending.

## Warranty Protection

Garrett stands behind every product it builds, and offers dependable warranty protection to each buyer. All Garrett land detectors and searchcoils are protected by a two-year limited parts and labor warranty. Sea Hunter is protected by one-year limited parts and labor warranty.

## Free Treasure Hunting News

For information on treasure hunting and equipment developments read Garrett's publication, *The Searcher*. To add your name to the mailing lists, write Customer Service, 1881 West State Street, Garland, TX 75042.

## Factory Tours

Treasure hunters are cordially invited to examine OneTouch detectors and visit the Garrett factory and museum in the Dallas suburb of Garland, Texas. Factory tours are available for clubs and similar groups who make advance arrangements.

Note: Prices, designs and features subject to change without notice. All Garrett instruments are manufactured in the United States of America using only environmentally conscious methods of manufacturing. Call 1-800-234-6151 for information on Garrett Super Scanners, Magnascanners and other security and law enforcement products.

Up to 95% accuracy on target ID, size and depth. Operator errors, mineralization and nearby targets may effect accuracy of readings.

CAUTION: Deepseeking detectors can detect concealed pipes, wiring and other potentially dangerous material. When these are located, the proper authorities should be notified.

# Adventure & How-to-Find Treasure Books

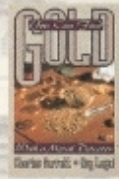

## Treasure Hunting for Fun and Profit

Charles Garrett recounts numerous incidents in which coins, jewelry, money caches, gold nuggets, and countless other items of value have been found and tells how easy it is to still find them today with a modern metal detector. 204 pages. Garrett. 1508300 \$9.95

## Gold of the Americas

A history of gold and how the precious metal helped shape the history of the Americas; filled with colorful vignettes and stories of bravery and greed. 168 pages, 26 with color illustrations. J. Marx. 1500300 \$12.95

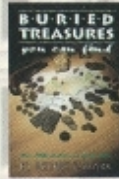

## Find Gold with a Metal Detector

Complete information on using detectors to find gold nuggets, veins and ore; illustrated panning instructions. 140 pages, 20 with color illustrations. Garrett/Lagal. 1545500 \$9.95

## Ghost Town Treasures

The lore of ghost towning with illustrations explaining how to locate them and find the hidden treasure they contain. 156 pages, 20 with color illustrations. Garrett. 1508200 \$9.95

## Buried Treasures You Can Find

State-by-state listing of thousands of sites where treasure is believed to exist; guide for using modern detectors. 365 pages, 48 with color illustrations. Marx. 1500000 \$14.95

## Gold Panning is Easy

Totally new field guide shows the beginner exactly how to find and pan gold and how to locate it with a metal detector. 134 pages, 20 with color illustrations. Galag. 1505470 \$9.95

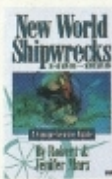

## Let's Talk Treasure Hunting

Practical guidebook telling how to find every kind of treasure & how to use a metal detector for even greater success. 235 pages, 26 with color illustrations. Garrett. 1508100 \$9.95

## The New Modern Metal Detectors

Revised handbook for field & home study to increase understanding of any detector, includes computerized models. 446 pages, 50 with color illustrations. Garrett. 1501700 \$14.95

## New World Shipwrecks 1692-1825

Historical details about more than 4,000 wrecks with specific instructions on recovering treasure from them. 434 pages, 48 with color illustrations. Marx. 1505800 \$16.95

## Real Gold in Those Golden Years

Prescription for happier, more satisfying life for older men and women through effective practice of metal detecting hobby. 140 pages, 20 with color illustrations. Garrett. 1500400 \$9.95

## The New Successful Coin Hunting

The world's most authoritative guide to finding valuable coins, includes information on computerized detectors. 259 pages, 34 with color illustrations. Garrett. 1501500 \$9.95

## Sunken Treasure: How to Find It

Famed underwater salvor Bob Marx shares a lifetime's experience in locating and recovering treasure from beneath the sea. 402 pages, 48 with color illustrations. Marx. 1507500 \$14.95

## Treasure Recovery from Sand & Sea

Precise instructions for locating the "blanket of wealth" beneath beach sands, the surf and the world's waters. 466 pages, 50 with color illustrations. Garrett. 1505700 \$14.95

## Find An Ounce of Gold a Day

Pocket guide (included with Gold Panning Kit) gives basic instructions on using Gravity Trap pans to recover gold. 48 pages. Galag. 1543800 \$3.00

## An Introduction to Metal Detectors

Pocket-size book carefully explains in layman's terms how metal detectors operate and how to find treasure with them. 80 pages. Garrett. 1545100 \$1.00

## Security Planning Manuals

Each \$4.95

Produced by Garrett's Security Division. Effective Security Screening, Effective Ground Searching, '96 Atlanta Olympics Security Screening
