METAL DETECTORS

Master Treasure Hunter Charles Garrett

Gold • Silver • Coins • Jewelry • Relics • Beaches • Deep Caches • Ghost Towns • Wreck Diving • Prospecting
Garrett has the right equipment to help you find any kind of treasure.

GARRETTTM
METAL DETECTORS

THE FINEST IN THE FIELD

PROVEN WORLDWIDE SINCE 1964

As treasure hunting increases in popularity with new enthusiasts of all ages, I find that they have two basic wishes: they want the finest electronic technology available and a metal detector that is easy to operate.

For decades, achieving the goal of becoming a more efficient treasure hunter has continually led me to design and manufacture more effective metal detectors. I still learn with every sweep of my searchcoil. We spend countless hours, and sometimes years, researching and engineering each new product or technology in our engineering labs before making it available. We subject our detectors to the coldest mountains and the hottest deserts as part of our field testing process. We do this because we believe in providing our customers with the very best products possible.

The features and options on Garrett detectors allow our customers to move upward through our product line. Should you first select a Garrett ACE, you can quickly begin finding treasure. You will then become eager to move up to our more advanced detectors, which help you avoid even more trash and discover more and

Charles and Eleanor Garrett
*Founders and continuing directors
of Garrett Metal Detectors*

deeper treasure. We also have specialized detectors to help you find any treasures for which you are searching.

Hobbyists beginning their careers with a Garrett detector will never have to "switch horses" and use any other brand of detector as they continually improve their skills. Come join me in the pursuit of treasure hunting excellence. See you in the field!

Charles Garrett

ENJOY THE GREAT OUTDOORS WITH A GARRETT

Take a metal detector along on your next vacation or camping trip. Clean air, good exercise and good times can all be yours while you and your family search for gold and lost treasures.

**GTI™
2500**

4 For your local Garrett dealer, or to order, call us Monday—Friday between 8 a.m. and 4:30 p.m. CST.

Here is My Best: the GTI 2500 Metal Detector.”

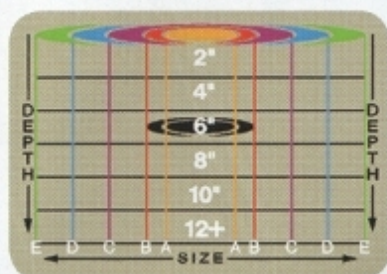

Image shows depth of 6 inches for a size B (coin) target.

SEE YOUR TARGET'S DEPTH AND SIZE

With Garrett True Depth technology, the 2500's display shows the target's depth, regardless of target size.

Garrett's True Size Imaging gives target sizes ranging from A (smaller than a coin) to E (larger than a soda can).

True Size Scale:

- A Smaller than a coin
- B Coin size
- C Pulltab and larger
- D Drink can
- E Larger than a drink can

DISCOVER TREASURE 20% DEEPER

Garrett's PowerMaster Digital Signal Processor (DSP) technology amplifies the power to your searchcoil, increasing your depth and scan width.

The GTI 2500's DSP pinpoint technology instantly performs complex mathematical functions to improve your search.

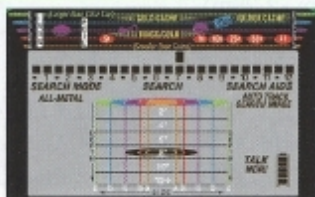

20% MORE
Depth and Scan
Width with
PowerMaster

DEEP-SEEKING ALL METAL MODE

The GTI 2500's Non-Motion Deepseeking All-Metal Mode enables you to hover over a target with continuous audio response—which is heard as a “rise and fall” sound. TreasureVision display is fully functional in the All-Metal Mode.

Imaging identifies this target as gold, size “C” (3” size) and a depth of 8 inches.

Exclusive Treasure Imaging

Exclusive Features Only From Garrett!

TREASUREVISION™ TECHNOLOGY

Garrett's patented GTI, GTA and DSP-based technologies combine into one easy-to-read LCD screen to show you modes, settings and complete target ID information.

Seeing your target and your detector's settings has never been easier!

EASY-TO-READ VISUAL TARGET ID

Eliminate doubt before digging with visual target ID cursor and accept/reject notch discrimination.

TARGET REJECT: GTA technology enables you to reject specific targets by creating notches—turning off LCD segment(s) on the Lower Discrimination Scale—where that target is identified.

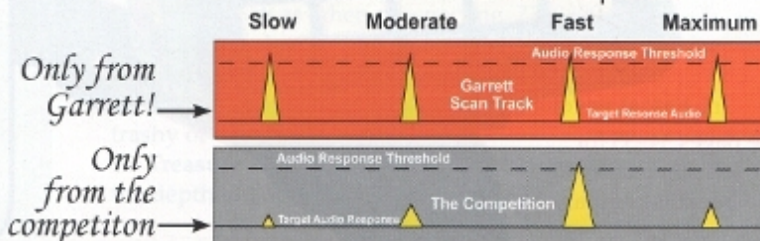

SINGLE TARGET ACCEPT: Finds specific targets such as a missing earring. Clear the Lower Discrimination scale completely, then scan the matching earring and press ACCEPT. The detector is set to find the missing earring or objects with similar conductivity.

EXCLUSIVE EXTRAS: The GTI 2500's 9.5" Imaging PROformance searchcoil combines rugged durability with true size imaging. Equipped with Garrett's exclusive TreasureTalk audio feature originally created to assist the visually impaired—the GTI 2500 announces more than 40 settings, adjustments and target signals on the GTI 2500. *We talk to you in the field!*

AUTO ADJUST YOUR SCAN SPEED

ScanTrack is Garrett's version of “cruise control.” To produce optimum treasure signals with some detectors, efficiency will suffer if scanning speed is slower or faster than optimum. With the GTI 2500, swing the searchcoil at your preferred pace and Garrett's circuitry automatically adjusts to produce maximum audio signals on every detected target.

Setting the Highest Standards in Metal Detecting

The GTI 2500 is the highest performing metal detector you can own. This inspiring, top-of-the-line machine is loaded with outstanding Garrett-exclusive features like PowerMaster, ScanTrack, TreasureTalk and TreasureVison.

It also comes standard with Garrett's exclusive Graphic Target Analyzing (GTA) technology, Graphic Target Imaging (GTI) LCD screen, plus our high-performance, true-Digital Signal Processing (DSP)! The

2500 visually identifies the true size and depth of targets such as coins, pull tabs, bottle caps, drink cans and large cache-sized treasures. And with its colorful and easy-to-read LCD graphics, you get visual identification of targets at unsurpassed depths and accuracy.

Only the GTI 2500 gives you all the information you need about every target before you dig—greatly increasing your treasure hunting efficiency and success!

“Discover more coins and more treasure with my proven GTI 1500 metal detector.”

Charles Garrett

Multiply your finds

The GTI 1500 should be part of your next coin or relic expedition. The world's foremost coin shooter, this powerful detector is loaded with the same exciting coin hunting technology found on the elite GTI 2500.

Garrett's GTI 1500 indicates the kind of target you've detected as well as its

size, depth and pinpoint location. With the 1500 you can know if your target is a coin or drink can, which saves you hours of useless digging. Use your time wisely with the 1500 and find up to 10 times more coins!

**Coins, caches, relics...
you'll find more of them
with the GTI 1500!**

Charles Garrett

Pinpoint Any Kind of Treasure With a GTP 1350

The powerful, DSP-based Graphic Target Profiling (GTP) 1350 is packed with the same exciting GTI and GTA features and technology found in Garrett’s elite detectors. The GTP 1350 detector is in a league of its own because of its ability to identify the size (Small, Medium, Large) of a target.

This new, dynamic target profiling information reveals a target’s identity and size so you dig less trash and considerably more treasure. The GTP 1350 comes standard with Garrett’s new Rhino Tough 7” x 10” **PRO**formance Elliptical searchcoil, which means you search deeper and cover more ground per sweep than with traditional coils. The GTP 1350 is the highest performing, deepest seeking and most advanced metal detector in its price range.

SPECIALIZED GTP 1350 SEARCHCOILS

- A. 10” x 14” Power DD Elliptical - Use in areas with moderate to heavily mineralized soils. 2217200
- B. 4.5” Crossfire II - Use when searching for small, shallow targets in trashy or tight places. 2218800
- C. 9” x 12” **PRO**formance - Use to increase detection depth and scanning width for hunting a broad target range. 2220700

See Your Target **SIZE** Before You Dig

FROM THE FIELD: GARRETT OWNERS’ SUCCESS STORIES

I’ve had my GTP 1350 for about three years and I average two hours of hunting per week. The 1350 is very accurate and it gives me the great depth and pinpointing ability that I need.

I like to hunt for large coins and for silver. I’ve found over 200 silver coins with my 1350 so far. I’ve never hunted with anything but a Garrett. You stick with what works.

—Robert J., Garland, TX

Local resident Robert Jordan stopped by Garrett’s treasure museum to show the impressive collection of silver coins he had found with his GTP 1350. Among his most treasured discoveries (far left photo) are a 1898 Barber dime, silver Standing Liberties, and a 1921 Barber silver dollar.

- D. Armrest Assembly Master Hunter CX - Use for additional stability. 1601870

From outlaw caches to gold and silver hoards, Garrett's Master Hunter has been a discovery king for 30 years.

FROM THE FIELD: GARRETT OWNERS' SUCCESS STORIES

During a recent visit to an old church no longer active here in Riverside California, I decided to spend a couple of minutes, surveying the church's yard using my Master Hunter from Garrett.

To my surprise, the first alert I got, was to find this little pocket purse of coins. I guess it is not the amount of money, but the fun I got out of it. I enjoy Garrett's metal detectors very much.

—Miguel M., Riverside, CA

- 2 yr. warranty, limited parts/labor
- Submersion depth: To 200 feet (65m); Underwater headphones required (pg. 23)
- Control housing weight: 31 oz.

SETTINGS:

- Discrimination
- Threshold
- Frequency adjust
- Automatic Ground Track has three settings: **Slow**: Use over slowly changing ground mineralization. **Lock**: Locks ground track setting; use for most ground conditions and offers maximum depth. **Fast**: Use over extreme or quickly changing ground mineralization.
- Volume Control on Land Headphone

MODES:

- Non-Motion All Metal with Adjustable PI discrimination

Underwater or underground, the Infinium LS "All Terrain" Metal Detector Delivers!

THE CHOICE OF PROFESSIONALS

For underwater and heavily mineralized ground environments, our Infinium LS is second to none. It's the world's most powerful pulse induction machine, transmitting 96 frequencies for operation in extremely mineralized environments. The Infinium's Discrimination Dial for All-Metal hunting can eliminate unwanted targets and assist in audible target identification.

FROM THE FIELD

This is a very sophisticated gold detector. Although simple to operate, I am often amazed at the depth achieved by this detector. No heavy batteries and harness or power leads to put on and connect make this detector a pleasure to use when prospecting new areas.

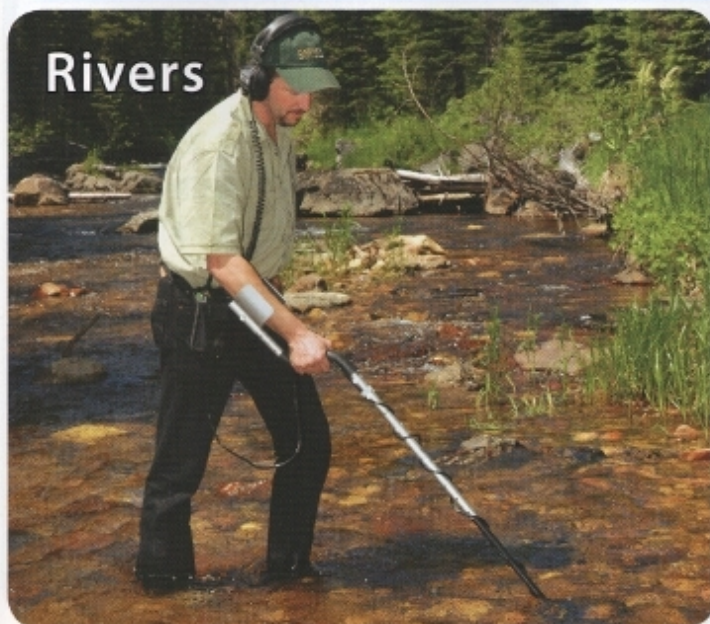

—Frank, Queensland, Australia

Frank found this 92-gram gold nugget with his Infinium LS.

Other superior features of the Infinium LS:

- Ultra-low battery drain with AA batteries make the Infinium much lighter than competitive detector models. *Alkaline and rechargeable batteries included.*
- Automatic GroundTrack with adjustable tracking speed for hunting in non-uniform soils.
- Audio Threshold Adjustment helps ensure clear interpretation of all target signals, especially for enhanced detection depth of gold nuggets.
- Ideal for nugget, coin, cache and relic hunting anywhere in the world, as deep as 200 feet ocean depth (requires optional, submersible headphones).

SPECIALIZED INFINIUM SEARCHCOILS

- A. 10" x 14" Mono - Lightweight coil with large coverage and excellent depth in light to heavily mineralized soils. 2216900
- B. 8" Mono - Lightweight with excellent depth on smaller targets in light to heavily mineralized soils. 2217000
- C. 5" x 10" DD - Provides improved ground rejection and depth on small targets in heavily mineralized soils. 2216700
- D. 3" x 7" DD - Provides enhanced detection of very small targets in extremely mineralized soils. 2216600

Sea Hunter™ Mark II

*Ideal for oceans, beaches,
lakes and all waterways!*

\$749.95

PN 1151970

The Master of Underwater Treasure Hunting

Price includes the 8" PROformance submersible mono searchcoil, belt pouch, submersible headphones and instructional DVD.

The Sea Hunter can be used in the hip mount configuration for surf and beach hunting (left) or in the shorter Scuba Mate configuration for underwater hunting (as seen above).

PI: PULSE INDUCTION

Underwater Detection Perfection for over 30 years!

With our unique Discrete Trash Elimination technology, the Sea Hunter Mark II can eliminate most pulltabs and foil without significantly degrading the sensitivity of rings and coins in Discrete Elimination mode. A favorite detector for treasure hunters around the world because of its ability to ignore salt water, the Sea Hunter's electronic housing can be mounted on the hip or above, below or under the cuff in either short or long configuration.

DID YOU KNOW?

Famed treasure hunter Mel Fisher's team found silver and gold from the 1600s Spanish treasure galleon *Nuestra Señora de Atocha* off the Florida Keys in 1985 using a Garrett Sea Hunter!

SEA HUNTER FEATURES

- All Metal Deepseeking Mode
- Audio Threshold, Adjustable
- Discrimination: Full Range (PI)
- Headphone Jack - submersible
- Hip Mount Control Box with Pouch
- Microprocessor Controlled
- Salt Elimination Mode (PI)
- Sensitivity / Depth Adjustment
- Surface Mount PC Board Technology

MODES:

- Non-Motion All Metal
- Standard PI Discrimination
- Discrete PI Discrimination

SPECIFICATIONS:

- Length: 28" to 52" (.71m - 1.32m)
- Weight: 5.7 lbs. (2.6 kgs.)
- Batteries: 8AA
- Multiple Frequency Technology
- Operating Depth to 200 feet
- Independently sealed battery compartment
- Choice of four housing mount configurations
- 1 year warranty, limited parts/labor

SETTINGS:

- Elimination / Discrimination
- Audio Threshold

UNDERSEAS TREASURES CAN BE FOUND!

(Left) Ancient shipwrecks with tremendous hordes of treasure are still being discovered. The world's oceans hold countless treasure hordes and offer the potential to find such coins as these golden Spanish 2-escudos. The Garrett Sea Hunter metal detector has been a trusted tool of divers for more than 20 years.

(Left) Various shipwreck items of the many treasures found by Nelson Jacas with Garrett detectors include an 1800s cup from the coast of India, a 17th century bronze icon from a ship, a 16th century lead cross, silverware and a brass spike from the 17th century ship *Mermaid*.

(Above, right) Jacas displays some of the many coins, pieces of jewelry and centuries-old artifacts he has recovered. Photo courtesy of Pete Milnes.

Scorpion®

Gold Stinger

\$549.95
PN 1194370

Price includes the 5" x 10" Crossfire DD submersible elliptical searchcoil, 10" gold pan and instructional DVD.

The Scorpion easily locates gold, silver, coins, relics and all other metallic treasures.

The Scorpion Gold Stinger is the cure for today's common Gold Fever! Its world renowned 15kHz Groundhog circuitry has the power to penetrate heavily mineralized soils to locate nuggets, placer, float and ore veins. Use it when prospecting to sample ore and check "hot rocks" with ease and dependability. Choose between Non-Motion All-Metal operation, Motion Discriminate for coin searching or true TR Discrimination to accurately identify or grade conductive ore with the flip of a switch. *The Scorpion discovers more gold and ignores more junk metal than other detectors in its class.*

NOTE: The Scorpion Gold Stinger's control housing is detachable for use in the belt mount configuration (belt not included).

SCORPION FEATURES

- All Metal Deepseeking Mode
- Audio Threshold, Adjustable
- Discrimination: Full Range
- Headphone Jack
- Sensitivity / Depth Adjustment
- Speaker
- Surface Mount PC Board Technology

MODES

- Non-Motion All Metal: hovers over targets
- Calibrated TR Discrimination and ore grading
- Standard Motion Discrimination

SPECIFICATIONS

- Length: 42" to 51" (1.06m - 1.29m)
- Weight: 3.3 lbs. (1.5 kgs.)
- Frequency Detection - 15 kHz
- 3 - 9V batteries
- 2 year warranty, limited parts/labor

SETTINGS

- Discrimination
- Audio Threshold, 10-Turn
- Depth
- Ground Balance, 10-Turn

World Famous Proven/Patented Gravity Trap® Gold Pans

Gold Pans

Roy Lagal, professional gold prospector

DON'T LOSE IT!

Garrett's patented 90° riffled design prevents gold from sloshing out of the pan.

Garrett's world famous Gravity Trap™ Gold Panning series has led the industry for 30 years. In fact, they are the world's only patented gold pans with a 90° riffled design that ensures safe, sure, rapid gold recovery in wet or dry conditions. All Garrett pans are lightweight, green for enhanced gold nugget visibility, and virtually indestructible for years of gold panning fun and success! Tested and proven worldwide by Charles Garrett (*right picture*), Roy Lagal (*left picture*) and tens of thousands of prospectors, Garrett's gold pans are a must for every recreational and electronic prospector. Charles Garrett strongly recommends the *Gold Panning is Easy/Weekend Prospecting* videos, available in DVD and VHS formats.

FROM THE FIELD: GARRETT OWNER'S SUCCESS STORY

I have had more fun than you can imagine panning gold with the Garrett Gravity Trap Gold Pan. Who would have thought there would be gold in Alabama?

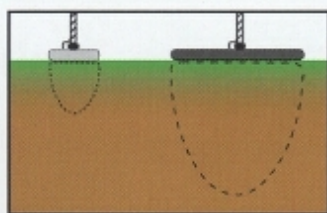

—Ray M., Hunstville, AL

Standard Garrett Detector Searchcoils

The transmit coil (TX) creates a magnetic field while the receive coil (RX) senses distortion in this field and signals the control housing.

Generally, the larger the searchcoil, the larger the magnetic field. With a larger searchfield, however, the field pattern becomes less concentrated and can begin to miss very small objects. Larger coils detect deeper than small coils.

STANDARD GARRETT SEARCHCOILS

Searchcoil:	Product:	Price:	Standard on:

----------------------	---------	----------

HOW SEARCHCOILS WORK

Searchcoils generally consist of two internal sets of coiled wires, a Transmit Coil (TX) and a Receive Coil (RX). When the detector is turned on, the TX coil generates a magnetic field in the surrounding space. When the searchcoil passes over a metallic object, it creates a distortion in the magnetic field. The RX coil will sense this distortion and send a signal to the control housing. A searchcoil's detection pattern is determined by the combination of the TX's generated field pattern and the RX's sensing field pattern.

Exclusive Garrett technology!

9" x 12" ACE
PROformance

Find deeper targets with this larger elliptical coil for the popular ACE detectors.

12.5" PROformance Imaging

Gather additional target information on true depth and size with this imaging coil.

5" x 10" DD

3" x 7" DD

10" x 14"
PROformance
Power DD

Double-D (DD) configuration searchcoils significantly reduce the effect of highly mineralized grounds commonly encountered while prospecting and relic hunting.

GUARANTEED!

Garrett's PROformance searchcoils offer you:

- Rugged, epoxy-filled construction
- Weather and waterproof design
- Near-neutral buoyancy in water
- Excellent visibility of ground when searching/pinpointing
- Quick, easy cleaning
- 2-year limited parts/labor warranty

Garrett's searchcoils are not just tough...they're **Rhino Tough™!**

Optional Specialized Searchcoils

Master Hunter TreasureHound
Depth Multiplier (1611700)

This 2-box coil configuration finds larger targets (quart-sized and larger) at the greatest possible depth and ignores small trash items.

Quick, precise
pinpointing of
all detected
targets!

GTI 2500 TreasureHound EagleEye™
with Pinpoint (1611800)

This 2-box coil configuration has all of the features of the TreasureHound Depth Multiplier and with EagleEye front coil, which provides accurate pinpointing and small object detection. Switch from depth multiplier searching to conventional single searchcoil pinpoint mode with the touch of a button. It's another Garrett exclusive that eliminates the need to pinpoint small, shallow targets with a separate metal detector.

Find larger targets and quickly
pinpoint at more than two times the normal
depth with Garrett TreasureHound™
Depth Multiplier 2-box coils!

Search out valuable targets in trashy areas and hard-to-reach spots with a 4.5" Garrett Super Sniper™ searchcoil!

Extend the capabilities of your Garrett metal detector with one of our smaller, specialty searchcoils designed to search in very tight areas or grounds that are littered with metal objects. Garrett's popular 4.5" SuperSniper searchcoils are marketed under the ACE Sniper, Crossfire, Scorcher and SuperSniper brandnames. Each can help maximize treasure-finding potential by allowing you to more thoroughly cover areas that are too "junky" for large searchcoils. SuperSniper coils offer improved target identification and are also ideal for finding very small size gold nuggets.

4.5" ACE SuperSniper
(2221800)

4.5" Scorcher
(2219700)

4.5" Crossfire II
(2218800)

See what you've been missing with a
Garrett SuperSniper searchcoil!

"My friend and I decided to return to an old house we had hunted before. The owner was going to bulldoze it and allowed us to hunt his yard. I used the Super Sniper coil on my ACE 250 and started finding clumps of wheat back pennies. I kept checking the hole and they kept popping out. When I got to about five inches, I found three neat rows of coins. When I got home and counted the coins in my pouch, I had 432 in one day!" Jim T., Dallas, TX ▶

SECRETS REVEALED

Treasure Hunting advice is at your fingertips with these handy field guides from master hunter Charles Garrett!

A DIVISION OF GARRETT METAL DETECTORS

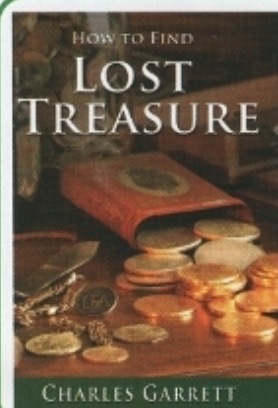

Since writing *Successful Coin Hunting* in 1974, Charles Garrett has maintained his determination to share his treasure hunting expertise with all who are interested. His straight-forward books give sensible advice for both new and veteran treasure hunters. He not only emphasizes effective search practices but notes that adventure and a spirit of discovery are the most important traits of successful treasure hobbyists. Watch for new additions to Garrett's growing line of field guides.

powerful technologies
exclusively from Garrett.

PROFILING

GTP 1350

GARRETT GUIDE:

KEY TO EXCLUSIVE TECHNOLOGY

GTA™

GTA visually identifies a target's conductivity or ID and also shows the discrimination pattern.

GTI™

GTI measures and displays a target's true size and depth.

GTP™

GTP visually indicates the target's size (small, medium or large).

One-Touch™

Treasure Hunting

With the touch of a button,
your detector is:

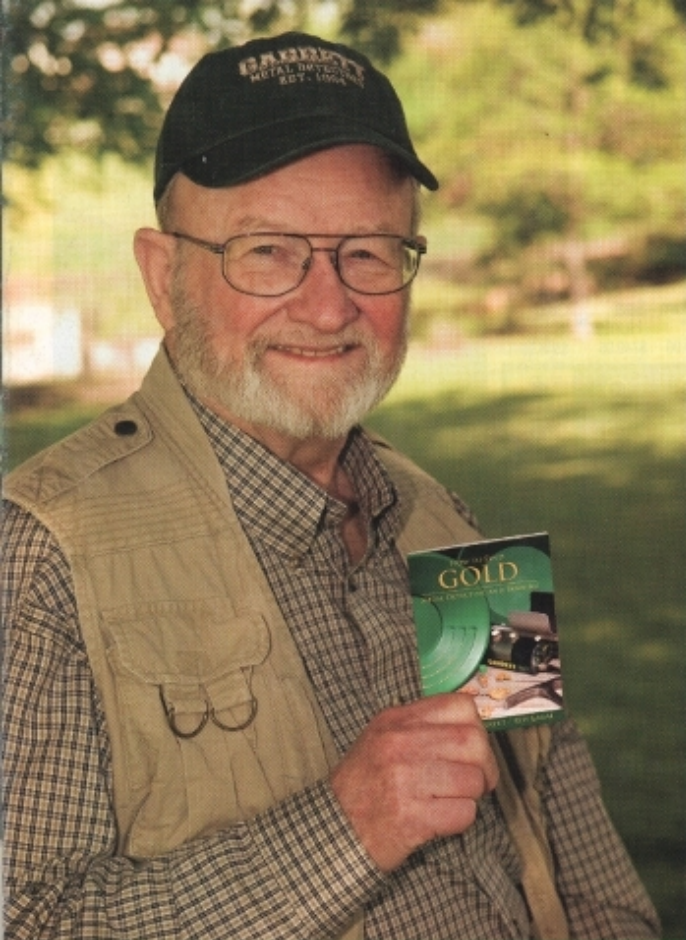

- Powered on
- Automatically reset to factory (or your) settings
- Automatically adjusted for ground minerals
- Ready to search!

ONLY GARRETT SHOWS YOU TARGET SIZE!

Garrett products meet the new ROHS (Reduction of Hazardous Substances) requirements. Tested to FCC, CE and CSA standards, Garrett quality system registered under ISO 9001:2000 standards.

NEW Garrett Field Guide!

How to Find Gold
Metal Detecting and Panning
 by Charles Garrett / Roy Lagal

FREE With Any Gold Pan Kit

- Pocket-sized book
- Ideal for use in the field
- 72 pages, illustrated
- Includes glossary of terms
- Retail value of \$3.95
- PN 1509400 See page 32 for more details.

Treasure Tips From a Master Hunter

Following on the heels of his popular field guide *How to Find Lost Treasure* comes the next in Charles Garrett's new series of how-to field guides. In *How to Find Gold*, Garrett and co-author Roy Lagal—the inventor of Garrett's Gravity Trap® Gold Pans—give advice on searching for gold with metal detectors and gold pans. Their *How to Find Gold* book offers useful tips and basic knowledge on nugget hunting and illustrates effective wet and dry panning techniques with a series of photos.

GARRETT: SAFETY. SECURITY. PEACE OF MIND.™

In addition to providing the finest metal detectors to treasure hunters for decades, Garrett Metal Detectors has the proven knowledge, experience and reliable products to meet any security needs.

From the Olympic Games to U.S. and international airports, Garrett is the global leader of walk-through, hand-held and ground search metal detection products. The Garrett Academy of Metal Detection has also trained thousands of security, law enforcement and crime scene investigation professionals.

Security Metal Detectors for Nearly Three Decades

- Ground-Search
- Crime Scene
- Walk-Throughs
- Hand-Held
