

Metal Detectors Open Up A New World Of Adventure!

Find your share of valuable lost or buried treasures. Spare time treasure hunting is FUN and PROFITABLE. Treasure is lost every day. Millions of dollars worth of valuables lie under a few inches of soil in parks, school yards, old home sites and on beaches. Wherever people have been, jewelry, coins, and metal relics are left behind.

With high performance metal detectors from Gold Mountain, more treasure hunters have become treasure finders.

And never before has "finding" been so easy and so much fun.

Give yourself a "raise" by locating buried valuables that are free for the finding.

Put A Gold Mountain Detector
To Work For You!

V.I.P.™ VLF/TR Discriminators

AUTOMATIC TUNING!
Maintain peak performance automatically, or by means of manual instant recall tuning — the choice is yours! This feature assures optimum operation regardless of changing conditions or demands!

INSTANT RECALL!
Retune or change from VLF ground cancel to TR discrimination the instant you push this switch!

ADJUSTABLE TONE CONTROL!
Now you select the audio tone that's right for you! Clearer hearing — greater comfort — more finds!

OUTSTANDING ECONOMY!
Compare with any other brand — here's a detector you can depend on at a price you can afford to pay!

VERSATILITY IN PERFORMANCE

It's important that you know some key facts about this fabulous detector. This is a ground cancelling Very Low Frequency detector (15 kHz) that also features total TR Discrimination against trash metals (including pull tabs and screw caps). This combination of circuits is what you want for maximum use in conquering any ground condition. Take the V.I.P. to heavily mineralized soils, salt water beaches, caves or other hard-to-work ground conditions. When you achieve superior depth penetration into any type of ground or perfect discrimination between trash metals and good metals, you will know why we emphasize Versatility In Performance. In addition to these settings, the V.I.P. has Automatic Tuning capability. There is no better way to maintain peak performance in spite of rapidly changing soil, temperature, height of operation, etc. than to flip the detector into automatic electronic retuning! Automatic Tuning is a treat to use when you need it. Versatility In Performance also means Instant Recall tuning. Replacing the usual push button tuner, this control performs both re-tuning and mode changing functions with split-second speed and absolute accuracy.

VALUE IN PRICE: All the Standard Features — Plus Much More!

The V.I.P. is a full featured professional quality detector priced significantly lower than any comparable competitive model. The features mentioned above are only a few of the reasons why the V.I.P. is an outstanding Value In Price. The rugged all-aluminum construction is smartly styled in Gold Mountain's traditional black and gold colors. The new, improved power supply system lets the batteries slide in and out on their own attachment.

What other detector features a selectable tone control? This "custom audio" allows you to select the audio tone you hear best. Faint signals come through more clearly when you adjust the signal tone of the detector to a frequency that stands out against background noise.

The incredible list of features packed into these detectors will make you a more successful treasure hunter. Select your Gold Mountain Detector today!

V.I.P. Deluxe VLF/TR Discriminator

The Utmost in Versatility. Deepseeking 10½" coil plus all-around performance 7" coil.

Gold Mountain Accessories

DELUXE MONO-STEREO HEADPHONES

Increase your chances of success. A quality set of headphones will increase your treasure hunting success immensely. Tune out distracting noise from surf, wind, traffic, etc. Hear the signal from deeper metal objects. Detectors emit a quieter audio increase signal for deeper objects. Headphones enable you to hear those weaker signals from older, deeper targets.

This lightweight set of 8-ohm earphones may be used with all detector models. Sturdy and sensitive, they have individual volume controls. A detector can be tuned to full power, but the earphone volume can be adjusted separately. Headphones have a stereo/mono switch and come with a 10 foot coiled cord.

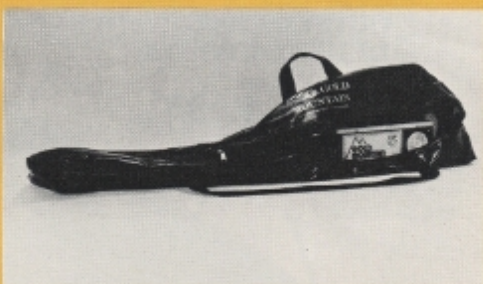

\$19.95

GOLD MOUNTAIN CARRYING BAG

Protect your detector. This durable vinyl bag protects your detector from bumps, scrapes, rain, dust and grime. All Gold Mountain detectors fit securely in this foam cushioned, fiber lined bag. Carry your completely assembled detector over your shoulder, in hand or across your back. Every treasure finder should own one for traveling convenience and for maximum detector protection.

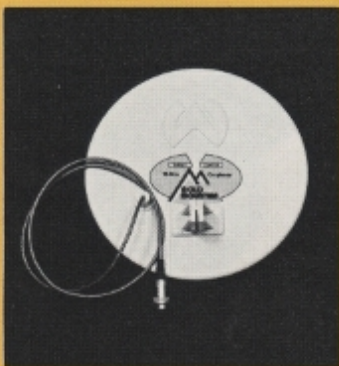

\$21.95

GOLD MOUNTAIN COIN APRON

Wear this vinyl apron while you hunt and carry your treasure around in style. Protects your clothing from wet and muddy objects. Two pockets to transport your "keepers" and to carry the trash you find to the nearest receptacle. Attractive, black with gold lettering.

\$3.50

10 1/2 INCH VLF/TR COIL

Achieve unbelievable depths! This deepseeking coil comes as standard equipment with the Boss VLF/TR Deluxe or V.I.P. VLF/TR Deluxe. May be ordered for optional use with the Boss VLF/TR or V.I.P. VLF/TR. This coil is designed for those who want maximum depth with their VLF/TR detector. Deepseeking to search out those hidden caches, posthole banks, buried tins and jars full of coins. Great for ghost town hunting, relic and antique hunting and beach combing. Shielded and submersible.

\$69.95

REMEMBER: ALL GOLD MOUNTAIN DETECTORS ARE COVERED BY A TWO YEAR WARRANTY.

HOW TO ORDER YOUR DETECTOR

Whenever possible, it is best to purchase your detector from your local Gold Mountain dealer. He is knowledgeable about the hobby of treasure hunting and the use of metal detectors. He will demonstrate the various models for you. He is eager to help you enjoy the fascinating hobby of treasure hunting.

If it is not possible to contact a local Gold Mountain dealer, do not hesitate to contact the factory direct. Call or write the factory for information and answers to your questions.

If you find it necessary to order directly from the Gold Mountain fac-

tory, follow these procedures:

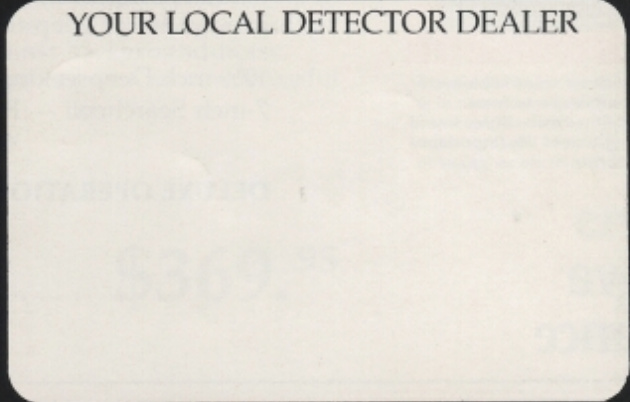

Send your order specifying the detector model name and the accessories you desire. Include payment (money order or certified check for prompt shipment) for the total price of the order. (Texas residents must add 5% sales tax.)

Include \$4.00 for each detector to cover handling, shipping and insurance. If C.O.D. is preferred please be sure to so indicate. You may also charge your order to your Visa card or Master Card. Orders with charge cards must show your account number, expiration date and your signature.
