Musketeer

The Musketeer Advantage is the best performing detector in its class. Superior depth, fast target response and great sensitivity enable you to find targets well beyond the reach of similar detectors. The power of this machine will amaze even the most seasoned detectorist.

The DD (widescan) search coil gives great ground coverage and allows the Advantage to work in mineralized soil conditions with ease.

Advantage

The Musketeer Advantage is a great, versatile detector that will suit everyone in the family. Set to operate in a very low 5kHz frequency, the Musketeer is a real performer with depth that other detectors in this price range can only envy. A great machine for relic hunting due to its sensitivity to large, deep targets. In addition, its discriminator works wonders at eliminating trash when you are coin and treasure hunting.
