X-TERRA

All TERRAIN x All TARGETS

Metal detecting with X-Terra VFLEX Technology.

X-Terra 70

The X-TERRA 70, flagship of the Minelab X-Terra Series.

The X-Terra 70 offers the ultimate in flexibility for coin, relic, treasure hunting and gold prospecting.

X-Terra 70 standard features include Automatic ground balancing, continuous ground tracking, iron masking, iron discrimination (for gold prospecting), target ID, pinpointing, depth indication and a dedicated beach mode plus many other features found only on more expensive detectors. Couple this with the flexibility of 3 different coil frequencies and you have the ultimate detector. One detector for all types of hunting.

You can now hunt that old Arizona mining ghost town for coins, relics and gold nuggets with just one machine.

SERIOUS DETECTING™

Discover the power of Multi-Frequency coil options

Equally powerful on the Beach, in the Gold Fields or in the Park

At Minelab, we don't believe in half measures! The X-Terra series incorporates the best performance over the widest variety of ground conditions.

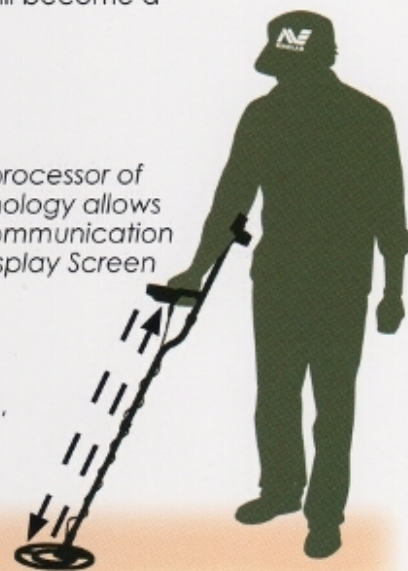

Minelab produces the world's best gold and treasure detectors and leads the field in the greatest challenge of all: Humanitarian demining, where missing a target is NOT an option!

With the X-Terra series, we have combined our passion and expertise for solving the toughest metal detecting challenges.

X-Terra's unique dual microprocessor control using VFLEX digital technology gives you coil versatility for increased target sensitivity. With their array of useful features, the X-Terra series will become a valued part of your treasure hunting tool kit for many years to come.

- True multi-purpose VFLEX Digital Technology,
- Will punch deep on the beach, in the gold fields or the park,
- Access the power of multi-frequency coil options (X-Terra 50 and 70),
- Buy your last detector first,
- More target ID options:
 - Multi-Tone audio,
 - Large numerical ID display,
 - Graphic target ID,
- Accurate junk discrimination,
- Fine tune sensitivity adjust,
- Largest, easy to read and understand LCD display in its class,
- True professional features, no gimmicks:
 - Fixed, Manual, Auto and Track Ground Balance option (model specific),
 - Threshold tone (X-Terra 70),
 - Save custom settings.

The Dual Microprocessor of our VFLEX Technology allows "True Digital" communication between the Display Screen and the coil.

From a satisfied Detectorist.

"I just wanted to let Minelab know the X-Terra 50 works "Great". I have been using it for eight months and I'm very pleased with its features and performance. It is all it is advertised to be and much more. I have used the X-Terra 50 in yards, on the beaches and in local parks and each time out I have come away with coins, relics, and jewelry of some kind. Metal Detecting is a "Great" hobby. It's nice to be able to get out and enjoy nature and meet people who like the same hobby. The thing about metal detecting is you never know what you will find. Thanks for your time and for making "great" metal detectors."

Mike Moon

X-Terra 50

The X-TERRA 50 is packed with more advanced functions and options to give you that extra edge:

- Ultra light weight, balanced design (only 2.9 lbs),
- High precision 7.5kHz VFLEX technology waterproof concentric coil standard,
- Optional coils in 7.5kHz and 18.75kHz concentric, elliptical and DD configurations,
- Digital numeric target ID,
- Large, easy to read LCD,
- Target depth indicator,
- Fast recovery Pin-Point with variable tone and graphic indicator,
- Powered by four AA batteries.

X-Terra 30

The X-TERRA 30 gives you all the essential metal detecting functions making it a solid, no-nonsense performer:

- Ultra light weight, balanced design (only 2.9 lbs),
- High precision 7.5kHz VFLEX technology waterproof concentric coil standard,
- Optional coils in 7.5kHz concentric and DD configurations,
- Accurate multi-segment notching (12 segments),
- 3-tone Target ID/digital numeric target ID,
- Powered by four AA batteries.

X-TERRA model comparison chart:

Features:	X-Terra 30	X-Terra 50	X-Terra 70
Graphic Target ID	12 segments	18 segments	28 segments
Discrimination: Accept / Reject multi-segment Notching	12 segments	18 segments	28 segments
Numerical Target ID	-4 to +44	-9 to +45	-8 to +48
Electronic pinpoint		High accuracy Audio and Visual pinpoint	
Sensitivity, depth adjustment	1 - 10	1 - 20	1 - 30
Low battery audio alarm	Yes	Yes	Yes
Treasure depth indicator	Yes	Yes	Yes
Headphone jack	Yes	Yes	Yes
Interchangeable search coils	Yes	Yes	Yes
7.5kHz standard			
Largest LCD in its class: easy to read		Positive Reflective Technology	
Dual Microprocessor Controlled		Exclusive High Precision VFLEX Technology	
Easy to learn push button interface	Yes	Yes	Yes
Speaker with volume control	0 - 10	0 - 20	0 - 30
Audio tone target ID	3 tones	4 tones	1-4 & multi-tone
Ground Balance adjustment	Fixed	Manual	Manual; Auto; Track
Detection modes	1 (Coin & Treasure)	1 (Coin and Treasure)	2 (Coin & Treasure - Gold Prospecting)
Threshold tone	-	-	Yes
Iron Mask Discrimination	-	-	Yes
Noise cancel adjustment	-	3 (-1,0,1)	5 (-2,-1, 0, 1, 2, auto)
Discrimination modes	1 + all metal	2 + all metal	3 + all metal & Iron mask
Custom discrimination patterns	1	2	3
Programmable		Save user settings on turn off	
Ultra light weight		2.9 Lbs (1.3kg) including batteries	
Low battery consumption		Up to 25 hrs on 4 x AA batteries	
Adjustable padded armrest		4 positions adjustable with stand & arm strap	

Extensive range of accessory coils:

9 inch Waterproof Concentric coils available in 3kHz, 7.5kHz and 18.75kHz.

10" waterproof 7.5kHz DD coil or 18.75kHz DD coil

5" x 10" 18.75kHz elliptical DD coil

6" - 7.5kHz Concentric coil
6" - 18.75kHz DD coil

Accessories:

Carry Bag

Koss Headphones (100 Ohm)

Environmental Cover
