TEKNETICS all new MARK I provides the operator with the most outstanding features now available.

THE DEEPEST DEPTH... Almost twice as deep as our "A" models.

The MARK I will DISCRIMINATE DEEPER than any other detector we know of.

2 to 4 INCHES DEEPER IN (DISCRIMINATE MODE) which is a first in the industry.

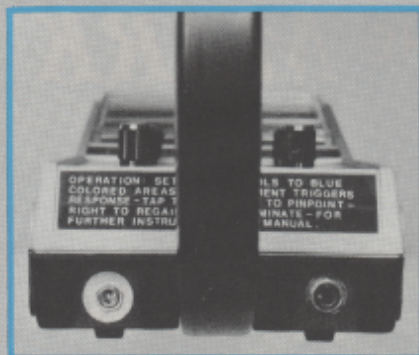

SLOWEST MOTION... Most manufacturers claim they have slow motion, but you still have to use a sweep motion over the target area to pinpoint. With the MARK I, the operator can effectively pinpoint a target in an area as small as 2" x 2" inches in the DISCRIMINATE MODE.

Plus, it has a true VLF pinpointing mode so you can stop over the target.

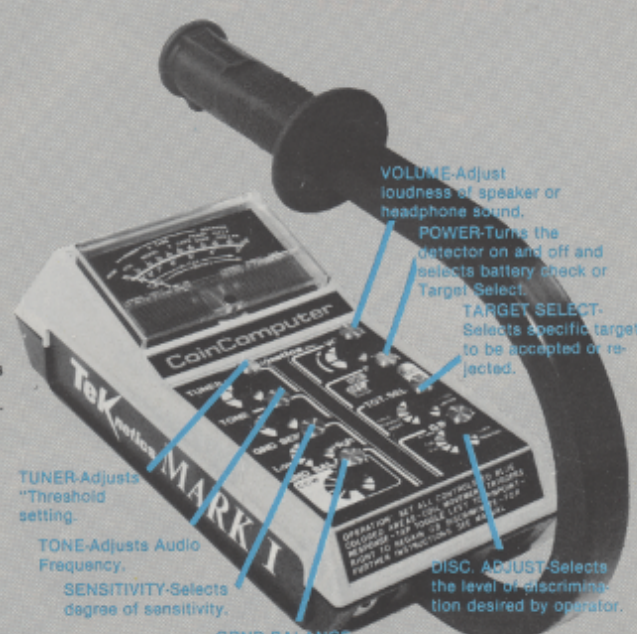

TARGET SELECTION... Now PROGRAM the MARK I to signal on any target you want to find. Locate ALL COINS (INCLUDING NICKELS) WHILE DISCRIMINATING OUT PULL-TABS, FOIL, SCREW CAPS AND NAILS. YOU GET MAXIMUM DISCRIMINATION WITH NO LOSS OF SENSITIVITY.

FEATURES

- ULTRA SLOW SWEEP
- DOUBLE DIGIT DEPTH
- QUICK SET CONTROLS
- AUDIO T.I.
- WITH TARGET SELECT
- VISUAL T.I.
- DEPTH READING
- NEW SLIM LINE LOOK
- AUTOMATIC BATTERY ALERT SYSTEM
- LIMITED LIFETIME WARRANTY

1. Back panel displays the Simplified Operating procedures for Quick Set Controls and Hand Toggle Operation.
2. On Board Charging with Charger System included as standard equipment.
3. Headphone Jack System.

- TUNER**-Adjusts "Threshold" setting.
- TONE**-Adjusts Audio Frequency.
- SENSITIVITY**-Selects degree of sensitivity.
- GRND BALANCE**-Adjusts the detector to "balance" out or neutralize ground mineralization.
- VOLUME**-Adjust loudness of speaker or headphone sound.
- POWER**-Turns the detector on and off and selects battery check or Target Select.
- TARGET SELECT**-Selects specific targets to be accepted or rejected.
- DISC. ADJUST**-Selects the level of discrimination desired by operator.

SPECIFICATIONS

Operating Frequency: 6592 Hz Crystal Controlled

Audio Frequency: Variable

Weight: 4lbs. 12 oz.

Optimum Temperature Range: 33 - 100 F

Optimum Humidity Range: 0% - 75%

Power Requirements: 9v & 12v DC (Nominal)

Battery Life Expectancy: 15 to 20 hrs. continual use (per charge) for Ni-Cads

Depth Capability: US. (1) cent piece at 10" to 11"

Your actual depth may vary somewhat as a result of ground conditions, length of time object has been buried, and your skill.

Loop Diameter: 7 1/4 inches

Loop Weight: 8 3/4 oz.

Loop Type: Bi-planar concentric

Accessory Connections: Stereo headphone jack

Special Features: Audio Visual Target Identification, meter readout of depth, and the all new exclusive Programmable Target Selection, available only from Teknetics.

Modes of Operation: G.B. ALL METALS MODE and ULTRA SLOW MOTION G.B. DISCRIMINATION.

ONE HAND TOGGLE OPERATION CONTROLS (5) FEATURES

1. G.B. All Metal Mode.
2. Automatic Retuning.
3. Controlled Lock-On Depth or non Lock-On Depth.
4. Target Select Programming.
5. G.B. Disc. Mode Operation.

FIELD APPLICATIONS

COIN HUNTING: The MARK I may be used to locate; coins in parks, playgrounds, beaches or any area where crowds have gathered.

RELIC HUNTING: Areas involved in past wars such as the Civil War and Indian campaigns. Articles of history would include old mining towns where settlers once homesteaded.

PROSPECTING: Searching washes and gullies or old mine tailing from mines has often revealed nuggets of gold.

BEACHCOMBING: The MARK I loop is waterproof so you may detect in shallow waters. As an extra precaution, you should also cover your detector with a waterproof cover to keep it from getting wet. Beach areas are ideal for coins and jewelry.

RING HUNTING: With the unique and exclusive combination of the Target Identification and Target Select features, ring hunting can be more fun and productive than ever before.

After you've become familiar with the MARK I you should be able to distinguish between thin rings, wedding bands, class rings, and large rings.

COMPETITION HUNTS: Now, becoming a professional at competition hunts will be rewarding. The MARK I will hunt those coins for you. Just program it to select the coins or tokens with the Target Select Feature.

"dedicated to quality and performance"
