

BANDIDO µMAX

❖ Just say "micromax." ❖

The new MicroMAX Bandido metal detector is an ultra-light weight detector that packs the power and performance of the best full size detectors without the hefty size or the hefty price tag. State-of-the-art Thickfilm Hybrid Technology and superior design make the MicroMAX Bandido an amazingly versatile and powerful, yet easy to operate detector that's perfect for all types of metal detecting and great for travel.

The MicroMAX Bandido is a *true* all-purpose detector. It was designed for top performance in the widest range of metal detecting uses possible. It is powerful enough to relic and cache hunt with; it is plenty fast enough for competition hunting; it is sensitive to small gold particles—an important feature when gold nugget hunting; and it's great for coin hunting.

At the heart of the MicroMAX Bandido circuitry is a special Thickfilm Hybrid circuit board—developed from Surface Mount Technology—that incorporates Tesoro's proven High Gain Sensitivity Circuitry with *new power enhancements*. This circuitry provides greater depth and more sensitivity, especially to smaller, less conductive targets such as fine gold jewelry and half dimes.

Yet, even with all of its amazing power and versatility, the µMAX Bandido is still easy to use. It uses just three control knobs and two toggle switches to provide full TR/VLF Discriminator capabilities. All of the controls are at your fingertips making adjustments very convenient.

The MicroMAX Bandido features two operating modes. The Discriminate Mode is Silent Search, meaning the searchcoil must be moving to detect a target. The All Metal Mode is no-motion, so the searchcoil will detect a target located directly under it, even when the searchcoil is not moving.

The detector also features two All Metal tuning modes. Auto Tune is fast and retunes the detector in seconds after encountering a target—great for pinpointing. Normal Tune gives the operator total control of retuning at the touch of a switch.

Through simple and fast operator adjusted "ground balancing," the ground rejection circuitry will allow operation in even the most difficult ground mineralization conditions.

Tesoro has successfully engineered the powerful MicroMAX circuitry and controls into an amazingly small space. The result is a detector that is so light there is no need to body mount the control housing or to use cumbersome arm straps for stability. This *exclusive* design feature adds to the MicroMAX Bandido's ease of use and makes those longer searches more enjoyable.

The MicroMAX Bandido comes standard with an interchangeable 8" round, open center, concentric searchcoil for greater depth, more accurate pinpointing and best all-around use. A variety of optional searchcoils add to the versatility of this detector.

SPECIFICATIONS

Operating Frequency	12 kHz
Searchcoil Size	8 inch diameter
Searchcoil Type	Round, open center concentric
Searchcoil Cable Length	Approx. 3 foot
Audio Frequency	Approx. 760 Hz
Audio Output. ...	1½ inch speaker and headphone jack
Headphone Compatibility	¼ inch stereo plug
Weight	2.2 pounds (may vary slightly)
Battery Requirement	One 9 volt DC (alkaline)
Battery Life	10-20 hours (typical)
Optimum Temperature Range	30° F to 100° F
Optimum Humidity Range	0 to 75% R.H.
Operating Modes	No-Motion All Metal
.....	Silent Search Discriminate
Tuning Modes	Normal Tune (manual)
.....	Auto Tune (fast)

MICROMAX

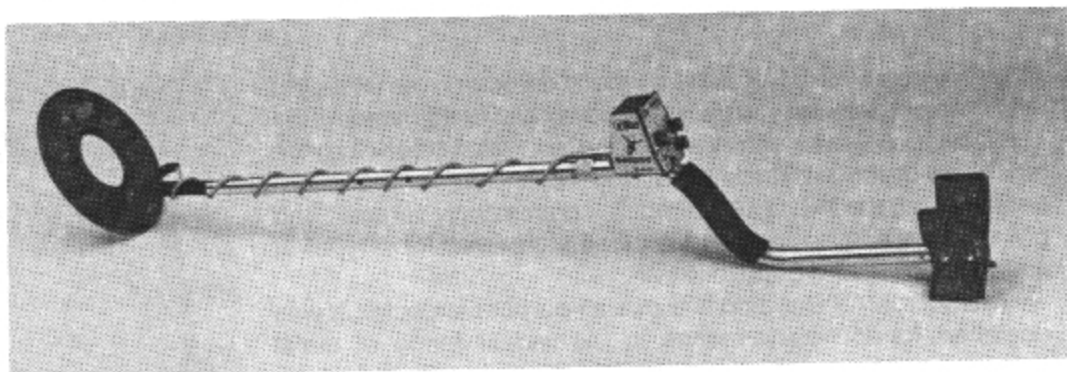

Just say "micromax."

BANDIDO

Micro in size. Performance to the MAX!

Relic Hunting
Coinsbooting
*Gold Nugget
Prospecting*
Cacbe Hunting
Competition

A metal detector that does all of these things and does them well would have to be bulky and heavy, complicated to use, and expensive. Right? If that's what you think take a close look at new MicroMAX Bandido metal detector from Tesoro Electronics, INC.

Look at the size. It is amazingly small! All of the circuitry, controls, speaker and even the battery are located in a control housing that can fit in the palm of your hand.

Pick it up. Forget about detectors that "feel" light. This detector is really light! *Ultra light!* At just over two pounds, the entire unit weighs in about the same as other detector's poles alone.

Put it on your arm and swing it. The feel is unbelievably comfortable! It rests naturally in your hand. Most of what little weight is there is in the searchcoil, giving you a feel of precise control without any muscle tensing weight that leads to arm and shoulder fatigue.

Be amazed at the power and versatility. Light weight and good feel aren't worth much without good performance—and performance is what the MicroMAX Bandido delivers. The increased power of MicroMAX circuitry delivers the sensitivity you want. Two operating modes, two tuning modes, and operator controlled ground balancing deliver the versatility you need for all types of detecting.

Don't wait for "sticker shock". The MicroMAX Bandido is *top-of-the-line*, it just isn't priced that way. This detector gives you much more than the suggested retail price of only \$439 might suggest.

◆ **Light Weight.** ◆ **Powerful.** ◆ **Versatile.** ◆ **Lifetime Warranty.**

So, what do you say? *Just say "micromax."*
