

"The Name That Means Treasure!"

DEEP SEARCH VLF/TR/CPR (PATENT PENDING) METAL DETECTORS

WITH LIFETIME WARRANTY

The **TESORO** metal detectors in this catalog were designed to provide YOU with many happy hours of enjoyment in the most rewarding hobby I know of . . . **Treasure Hunting**.

These detectors use the latest State-of-the-Art techniques to provide superior **DEEP SEARCH** performance to all treasure hunters, whether beginner or professional. At **TESORO** we all take great pride in our products, and this is evidenced in our quality, reliability and performance. See for yourself the difference pride can make.

I feel that the detectors and accessories in this catalog are the finest that can be built, and offer you the capability of handling any treasure hunting situation. I know that one of our **TESORO** models is just right for you.

Jack Gifford

DISCRIMINATE AT VLF DEPTH WITH CPR

The **CORTES** offers mineral-free discrimination by using Controlled Phase Response (patent pending). CPR Discrimination is based on motion, but achieves its maximum depth at much slower sweep speeds than earlier motion detectors.

The **CORTES** also features **NORMAL** (All Metal VLF) and **TR Discriminate** modes. These three operating modes, plus **TESORO's** Push-Button Mode Change/Tuning System, allow the serious treasure hunter to obtain maximum performance in any foreseeable situation.

- DISCRIMINATION AT VLF DEPTH
- PUSH-BUTTON MODE CHANGE/TUNING
- THREE OPERATING MODES FOR ANY TH'ING SITUATION
Normal (All Metal), CPR Discriminate, TR Discriminate
- SINGLE TURN CALIBRATED GROUND ADJUST
- RUGGED, YET LIGHTWEIGHT (4½ LBS.)
- SENSITIVITY CONTROL ON TR DISCRIMINATE
- SINGLE BATTERY PACK OPERATION
- COMPATIBLE WITH ALL TESORO SEARCH COILS (8½" STANDARD)

\$449

CORTES

BEST ALL-PURPOSE VLF/TR DISCRIMINATOR AVAILABLE

It's 8½" coplanar search coil and super stable electronic circuitry work together to provide all the power you can use, without the erratic response common to other high powered detectors. This exceptional combination also allows higher sensitivity settings when discriminating in mineralized ground.

The **AZTEC** is the only VLF/TR discriminator to offer Push Button Mode Change between discriminate and normal modes. Push the handle mounted Tuning switch momentarily to re-tune whenever necessary. Hold it in to change to the other mode for checking or pinpointing a target. Release it and you are back in your selected primary operating mode.

- PUSH BUTTON MODE CHANGE. THE EASIEST "ONE-HANDED" TUNING SYSTEM
- 8½" SUPER SENSITIVE COPLANAR SEARCH COIL
- SINGLE TURN CALIBRATED GROUND ADJUST AND DISCRIMINATE LEVEL CONTROLS
- LARGE METER AND BATTERY TEST
- COMPATIBLE WITH ALL TESORO SEARCH COILS

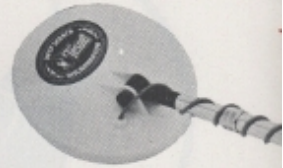

\$369

AZTEC

DEEP S

\$329

TRUE ONE HAND OPERATION WITH TR VLF/TR DISCRIMINATING DETECT

The **DEEP SEARCH VII** is the detector for the serious treasure hunter. It features a wide range of coils, selectable slow auto tuning, and the superior push button tuning system, all equipped to handle any treasure hunting situation.

- FEATURES:**
- Mode select switch and return
 - Selectable slow automatic tuning or manual
 - Coplanar, 8½" Wide Scan or Coplanar
 - Rugged meter with battery test
 - Superior VLF performance
 - Single turn calibrated ground adjust

THE ULTIMATE PUSH BU

From the 7" coplanar coil, to the super stable electronic circuitry, the **DEEP SEARCH VII** was designed for the coin shooter. This has to be the most powerful detector ever designed for use. Light weight (4 lbs.) and doesn't need to be re-tuned.

- FEATURES:**
- Push button tuning
 - Very stable electronic circuitry
 - Maximum depth
 - Ultra stable discriminate level
 - Single turn calibrated ground adjust
 - Most sophisticated discriminator
 - Sensitivity control for maximum depth

\$269

TAILORED DEEP SEARCH PERFORMANCE AT A MODEST COST . . .

Tailor your **DEEP SEARCH IV** to best suit your needs. With the 7" coplanar coil, the IV becomes a superior coin shooter. Add the 8½" wide scan coil, and you have a detector that is hard to match at any price.

- FEATURES:**
- Push button tuning
 - Choice of coils
 - 8½" Wide Scan for relics or competition
 - Sensitivity control for maximum discriminating depth
 - Adjustable Discriminate Level

TON VLF/TR COIN SHOOTER

le electronic circuitry, the DEEP SEARCH VI is the easiest VLF/TR coin shooter to use. It can be hurried.

slow automatic tuning for super stability and level control doesn't affect tuning • Single tuned electronic design of any TR detector • Maximum discriminating depth in mineralized soil.

IV

RMANCE

your hunting preference. With the 7" coplanar search coil, with excellent depth and discriminating power, you have a relic hunter or competition detector.

Choice of coils: 7" Coplanar for coin shooting or 7" Coaxial for relic hunting • Push Button Battery Test • Sensitivity Control • Single turn Calibrated Ground Adjust

THE AFFORDABLE AMIGO — BEST IN ITS PRICE CLASS

The AMIGO is small in price, but big in performance. It offers Ground-Reject VLF and variable TR Discriminate levels, selected by one single turn control, a feature found on some units selling at twice its price. Push-Button Tuning, sensitivity control, and large meter with battery test are included.

The AMIGO is an excellent entry level detector for the beginning TH'er, as well as a great backup unit for the pro. It is powered by a pack of 6 penlight batteries (9V), but will operate just fine on a single 9V transistor battery.

- RUGGED CONSTRUCTION, YET LIGHTWEIGHT (3¾ LBS.).
- PUSH-BUTTON TUNING
- SINGLE TURN CALIBRATED MODE CONTROL
- SENSITIVITY CONTROL FOR MAXIMUM PERFORMANCE IN DISCRIMINATE.
- INTERCHANGEABLE SEARCH COILS, 7" COPLANAR STANDARD.

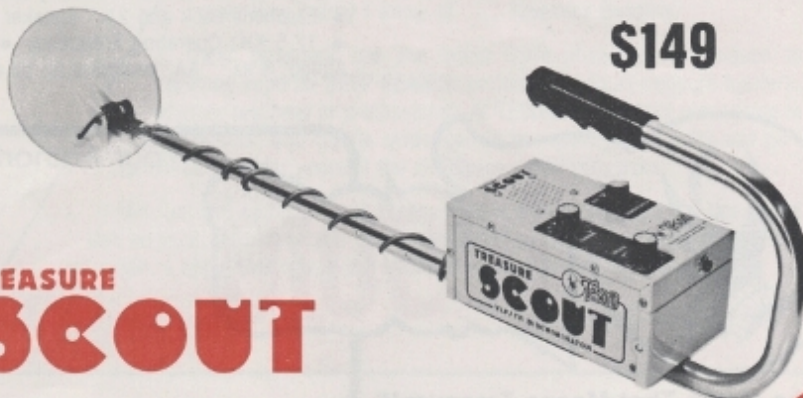

\$199

AMIGO

THE TREASURE SCOUT — OUTSTANDING VALUE

The TREASURE SCOUT offers true VLF/TR performance at a price anyone can handle. The TREASURE SCOUT Mode Control covers the range from Ground Reject All Metal Mode up through Pull Tab Discrimination. Push Button Tuning is included, and a two position Sensitivity Control allows for best performance when discriminating in heavily mineralized soil.

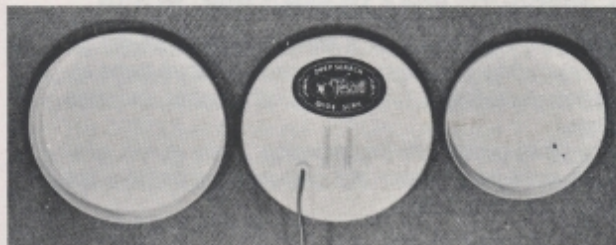

- 7" FULLY SHIELDED COPLANAR SEARCH COIL.
- SENSITIVITY CONTROL FOR MAXIMUM PERFORMANCE IN DISCRIMINATE.
- LIGHT WEIGHT (LESS THAN 3½ LBS.).
- SINGLE TURN CALIBRATED MODE CONTROL.
- TRUE VLF/TR PERFORMANCE.
- POWERED BY SINGLE 9V TRANSISTOR BATTERY.

\$149

TREASURE SCOUT

ACCESSORIES

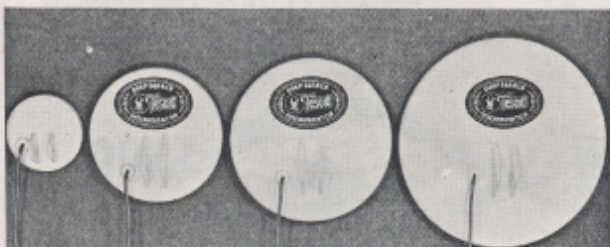

8½" WIDE SCAN COIL \$59⁰⁰

Popular 2-D configuration, preferred by Relic Hunters and Competition Hunters. Works on any TESORO Detector.

SCUFF PLATES \$3⁹⁵

Protect your Search Coil. Available for 7" and 8½" coils.

DISCRIMINATING SEARCH COILS

Popular Coplanar configuration for best depth, stability, and discrimination ability. Compatible with all TESORO Detectors.

4" - \$49 7" - \$49 8½" - \$59 11" - \$69

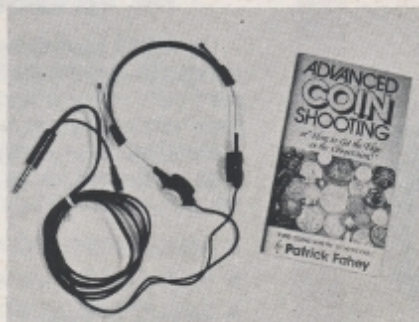

BODY MOUNT KIT \$49⁰⁰

Includes pole with adjustable length, deep cup arm rest, extension cable for coil, cable clips, and belt bracket for detector control housing (not shown).

COIL EXTENSION CABLE (5 feet long) \$6⁹⁵

Cable breakage due to flexing on body mount kits is not covered by warranty.

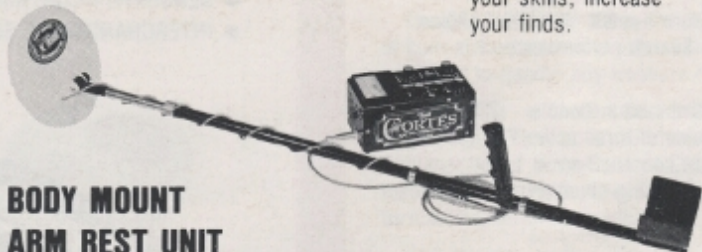

LIGHTWEIGHT HEADSET \$19⁹⁵

This super light headset is designed for hours of comfort.

ADVANCED COIN SHOOTING ... \$4⁹⁵

A 'must' book for any serious coin shooter. Tells how to improve your skills, increase your finds.

BODY MOUNT ARM REST UNIT

The body mount style is preferred by many relic hunters and competition hunters. A belt bracket on the back of the control housing provides for easy mounting. The deep cup arm rest is adjustable with respect to the hand grip, and the overall shaft length is adjustable. A five foot extension cable with clips is provided for the search coil.

Either configuration is available for any TESORO model (except Scout) on special order

\$25 PLUS PRICE OF BASIC UNIT

HANDLE MOUNTED ARM REST UNIT

This handy configuration offers most of the benefits of a body mount detector, but without the dangling cables and the need to "strap yourself on" to your control housing. Its deep cut arm rest and adjustable length allow maximum comfort for tireless hours of use.

ALL TESORO DETECTORS FEATURE:

- Battery Test Switch • Heavy Gauge Aluminum Construction • Lifetime Warranty
- Earphone Jack and 2¼" speaker • Interchangeable Search Coils (except Scout)
- 12.5 KHz Operating Frequency • Single Battery Pack Operation (6 ea. 'AA' penlights for Amigo, 8 ea. 'AA' penlights for all others) • Light Weight (3¼ lbs. to 4½ lbs.)
