

The name that means Treasure

The New Royal *Sabre*

Meet the most exciting **Sabre** yet, the new **Royal Sabre** from Tesoro. Notch Discriminate allows detection of rings and nickels while rejecting tabs. Notch Tone ID even tells you whether the target is above or below the notch setting.

Surface Blanking that's variable up to 4", to ignore those new coins at the surface. Easy pinpointing with open center coil and no motion Pinpoint mode. Below pole mounting for superior balance, convertible to body mount in seconds.

Pamper yourself with a **Royal Sabre**.
You deserve the best.

All the Detectors You'll Ever Need . . .

The **SILVER SABRE** is three pounds of high performance that's not only easy to use, but sheer fun as well. Its Silent Search circuitry eliminates "threshold" hum with no loss of depth.

Advanced technology provides full VLF performance with only three controls. The arm rest configuration puts them at your fingertip. No complex ground adjust or tuning procedures required. Just turn it on and search.

Optional search coils from 4" to 11" allow the Silver Sabre to excel at any type of hunting.

- Variable Discriminate Level
- Silent Search VLF Discrimination Plus All Metal
- Automatic Ground Adjust
- Automatic Battery Test
- Powered By 6 'AA' Penlight Batteries

GOLDEN

Sabre

Now, find nickels and small gold rings while rejecting most pull tabs by using Notch Reject discrimination. Or use Notch Accept to detect only a particular band of targets. Variable Notch Level, of course, plus standard discriminate and all metal modes.

Use as a 3½-pound pole mounted unit, or convert it in seconds to a body mount. No tools needed, nothing extra to buy. Automatic battery test and ground rejection assure maximum performance. Eight inch open center coil for easy pin-pointing.

- Find Nickels and Rings While Rejecting Tabs
- Body Mount or Pole Mount
- Automatic Ground Reject
- Notch Filter Discrimination

\$399

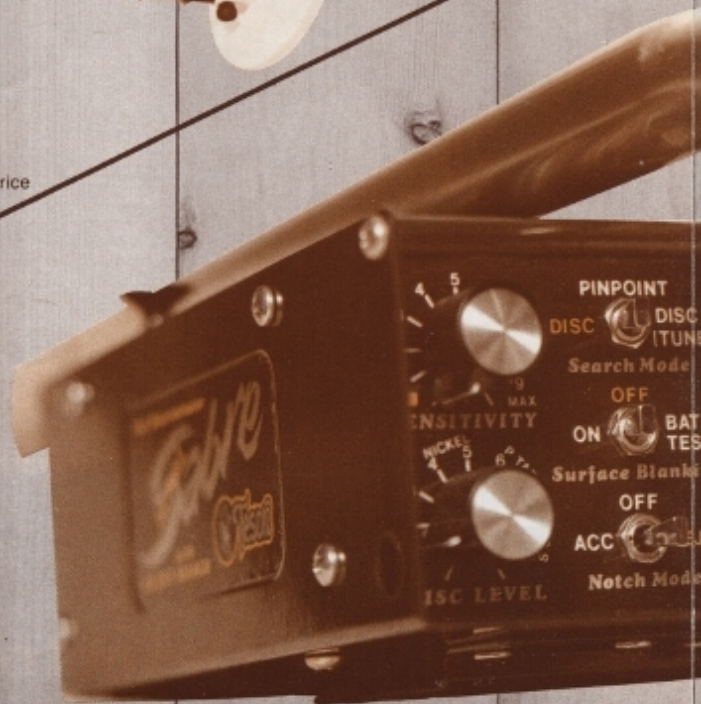

CUTLASS

The **CUTLASS** puts motion based Silent Search technology in a lightweight VLF Discriminator at a price anyone can afford. True mineral free operation in All Metal or Discriminate mode. Automatic ground rejection circuit assures maximum performance in virtually any kind of soil.

The Arm Rest configuration is light, easy to use, and provides a built in detector stand. A great detector for the first time TH'er, as well as an excellent back up unit for the experienced pro.

- Variable Discriminate Level
- All Metal and Discriminate Modes
- Silent Search Operation
- Automatic Ground Reject
- Powered by 6 AA Batteries
- Battery Test

Tesoro

The **MAYAN** is probably the most versatile VLF/TR detector available. An excellent coin shooter, it has also earned a reputation as a nugget hunter without equal, regardless of price. The arm rest configuration is lightweight and adjustable. The coin depth meter is protected yet easy to see for pinpointing. The one step ground adjust greatly simplifies the initial setup. Push button mode change, selectable automatic tuning, and power to spare give the Mayan the ability to handle any kind of hunting.

- Coin Depth Meter
- One Step Ground Adjust
- Push Button Mode Change
- Manual or Automatic Tuning
- 7" Concentric Search Coil. 4", 8½", and 11" Optional

MAYAN
VLF/TR DISCRIMINATOR

INCA
VLF DISCRIMINATOR

The **INCA's** silent Search circuitry provides VLF discrimination at sweep speeds so slow you simply must experience it, with no threshold hum and no loss of depth. Just a hint of motion yields extraordinary depth.

The VLF all metal mode utilizes a calibrated single turn ground adjust control for effortless and accurate pinpointing without motion. The coin depth meter is easily visible, and is an excellent pinpointing aid. The power and versatility of the Inca are unmatched by any detector near its price.

- Silent Search VLF Discriminate Mode
- Motionless VLF All Metal Mode
- Coin Depth Meter
- Automatic Battery Test
- Push Button Mode Change
