- Rugged TESORO construction, yet light weight (less than 4 lbs.).
- Sleek new recessed control panel puts controls out of the way, yet readily accessible.

Say Goodbye to the golf club sweep speeds required by most of today's so called "slow motion" detectors. Say Hello to INCA, the VLF Discriminator with maximum depth at sweep speeds so slow you simply must experience it. You can also say Goodbye to Threshold hum in Discriminate. The new **SILENT SEARCH** Discriminate mode allows you to operate in discriminate with no threshold sound and no loss of depth.

The standard VLF All Metal mode utilizes a single turn calibrated Ground Adjust control and single turn Tuning control to provide effortless and accurate pin-pointing without motion. The Coin Depth Meter is easily visible during use, and is also an excellent pin-pointing aid. Push button mode change provides the easiest "one handed" system to operate.

The rugged aluminum housing places the controls on a sloping recessed panel, where they are readily visible and accessible. The comfortable Arm Rest Handle is padded and adjustable in length. The light weight and perfect balance, coupled with the ultra slow sweep speed, allow effortless hours of use.

The fully shielded concentric search coil offers improved discrimination and pin-pointing. Optional coils of 4", 7", and 11" sizes allow tailoring the INCA to suit any TH'ing situation from nugget shooting to relic hunting.

See your local dealer today to experience an INCA. You'll be glad you did.
