

Sidewinder μMAX

❖ Just say "micromax." ❖

The new MicroMAX Sidewinder metal detector is an ultra-light weight and compact detector that packs the power and performance of a full size, heavier detector. By simplifying features and complicated adjustments that cause a loss of performance when used improperly, Tesoro has created an easy to operate detector that's perfect for hobby, sport and travel.

The MicroMAX Sidewinder is a TR/VLF Discriminator type detector. It is designed primarily for coin hunting, competition hunting and all-purpose detecting. Because of its sensitivity to all metals, it can be used to find a variety of relics and artifacts, gold and jewelry—all kinds of buried metallic objects.

At the heart of the MicroMAX Sidewinder is a special Thickfilm Hybrid circuit board—developed from Surface Mount Technology—that incorporates Tesoro's proven High Gain Sensitivity Circuitry with *new power enhancements*. This circuitry provides greater depth and more sensitivity, especially to smaller, less conductive targets such as fine gold jewelry and half dimes.

The design of the circuitry also overcomes the loss of depth (up to 35%) when operating in Discriminate mode—a problem typical of many VLF Discriminator type detectors. The new MAXBoost feature also allows the operator to add inches to search depth.

The μMAX Sidewinder has features that make its power easy to use. Just two control knobs, one toggle switch and one push-button provide full VLF capabilities in two operating modes.

The Discriminate Mode is Silent Search, meaning the searchcoil must be moving to detect a target. With the QuickCheck Push-Button Pinpointing it's simple to identify the exact spot where the target is located while the searchcoil is held stationary.

The All Metal Mode is no-motion, meaning the searchcoil will detect a target located directly under it, even if the searchcoil is not moving. The All Metal Mode features Auto Tuning with a manual Retune override switch to give you simple but versatile All Metal search and pinpoint operation.

The MicroMAX Sidewinder also features preset ground rejection circuitry to allow "turn-on-and-go" mineral-free operation in virtually any ground mineralization conditions.

The entire detector is so light there is no need to body mount the control housing or to use cumbersome arm straps for stability. This *exclusive* design feature adds to the MicroMAX Sidewinder's ease of use and makes treasure hunting more enjoyable.

The MicroMAX Sidewinder comes with an interchangeable 8' round, open center, concentric searchcoil for greater depth, more accurate pinpointing and best all-around use. A variety of optional searchcoils add to the versatility of this outstanding detector.

SPECIFICATIONS

Operating Frequency	12 kHz
Searchcoil Size	8 inch diameter
Searchcoil Type	Round, open center concentric
Searchcoil Cable Length	Approx. 3 foot
Audio Frequency	Approx. 760 Hz
Audio Output. ...	1½ inch speaker and headphone jack
Headphone Compatibility	¼ inch stereo plug
Weight	2.2 pounds (may vary slightly)
Battery Requirement	One 9 volt DC (alkaline)
Battery Life	10-20 hours (typical)
Optimum Temperature Range	30° F to 100° F
Optimum Humidity Range	0 to 75% R.H.
Operating Modes	No-motion All Metal
.....	Silent Search Discriminate
Tuning Mode	Auto Tune

Tesoro Electronics, Inc. reserves the right to modify or improve the design without further notice.

The Best Choice for
Competition Hunting

In 1995 the original Tesoro Sidewinder became the detector of choice by experienced detectorists around the U.S. for competition hunts. Now it's time to take a look at the *new* MicroMAX Sidewinder.

Look at the size. It is amazingly small! All of the circuitry, controls, speaker and even the battery are located in a control housing that can fit in the palm of your hand.

Pick it up. Forget about detectors that "feel" light. The MicroMAX Sidewinder is light! *Ultra light!* At just over two pounds, the entire unit weighs in about the same as other detector's poles alone.

Put it on your arm and swing it. The feel is unbelievably comfortable! It rests naturally in your hand. Most of what little weight is there is in the searchcoil, giving you a feel of precise control without any muscle tensing weight that leads to arm and shoulder fatigue.

Experience the power and simplicity. Light weight and good feel are important. But, more important is good performance and ease of use. And the MicroMAX Sidewinder *has them all.* The increased power of MicroMAX circuitry delivers the sensitivity and depth you want. Turn-on-and-go design with simple controls at your fingertips make operating this detector a breeze.

Breath easy at the price. The MicroMAX Sidewinder is small in size but big in performance. And *big in value.* With a suggested retail price of only \$399, you won't spend a fortune so you find can one.

◆ **Light Weight.** ◆ **Powerful.** ◆ **Easy to Use.** ◆ **Lifetime Warranty.**

So, what do you say? *Just say "micromax."*
