**VLF/DISCRIMINATOR  
Metal Detector**

**MORE FEATURES  
Still ONLY \$299<sup>00</sup>**

**LIFE TIME WARRANTY**

Now our most popular metal detector has been made even better - not just in it's ability to deliver peak performance, but with innovative circuitry and design features that produce a new standard in high technology performance.

An industry first, monolithic shielding in the search coil and control housing reduces external interferences.

Soft braid shielded cable permits the use of longer cables, with less flexstress, for quick hip mounting (no kit or tools required).

**SPECIFICATIONS**

- VLF Slow Motion Discrimination
- All Metal Mode with variable threshold
- Ultra-lightweight . . . approx. 3 lbs.
- Convertible to hipmount
- Operating frequency . . . 10 kHz
- Audio frequency . . . 625 Hz
- Audio output . . . stereo; 1½" speaker & ¼" phone jack
- Power supply . . . two 9V batteries
- Battery life . . . 15-30 hours
- 8-inch concentric (open center) search coil

HGS (High Gain Sensitivity) circuitry provides explosive power to get the deep targets!

**TURN ON AND GO SIMPLICITY**

Exclusive ED 120 discrimination permits a broader range of adjustment for relic hunting or for separating trash from goodies in coinshooting.

**EXPANDED ED-120  
DISCRIMINATION**

- IRON OBJECTS .....
- STEEL BOTTLE CAP .....
- NICKEL COIN .....
- GOLD NUGGETS .....
- PULL TABS .....
- ALUMINUM BEER CAN .....
- COINS .....

NOTE: Solid line indicates audio response, open line indicates possible audio response, no line indicates no audio response. Typical response levels shown.

DISCRIMINATION LEVEL SETTINGS.
