

VIVA LA REVOLUCIÓN . . .

IT'S *Tejón* TIME

With Tesoro's revolutionary new detector, the Tejón, you will be able to scan clearly and deeply. Like its namesake, the badger, the Tejón will go to incredible depths to find your targets. It features a high output transmit oscillator to push the signal deeper and an increased gain for sensitivity to smaller items. We have also added a dual discrimination that is set by the user and an easy to use trigger switch that can quickly change from discriminate to the alternate discriminate to pinpoint mode without slowing you down. The Tejón is the new generation Tesoro detector that is designed to make your old sites seem like new again.

Visit your local Tesoro dealer and find out how you can join the Tejón revolution.

- Dual ED180 Discrimination Circuits
- VLF 17.5 kHz Frequency
- MAXBoost Sensitivity
- Adjustable Audio Tone Control
- 3 3/4 Turn Ground Control
- Easy To Use Trigger Switch
- Less Than 3lbs With Batteries
- Drop-In Battery Packs
- 9x8 Coil With Scuff
- Lifetime Warranty

IT'S *Tejón* TIME

WE ARE VERY PROUD TO INTRODUCE the signal deeper and an increased gain for up with the coin and relic hunter in mind. It also Tejón was over a year and a half in the design stages

THE TEJÓN. It features a high output transmit oscillator to push sensitivity to smaller items. The Tejón was designed from the ground features a new color scheme from Tesoro – blue, gray and black. The and represents a new generation of Tesoro detectors.

ONCE YOU GET PAST THE NEW COLOR SCHEME. The first thing that you will notice is the lack of a mode switch on the faceplate. We have moved it beneath the control housing so that you are able to switch modes quickly. Pinpointing and checking your targets with the Alternate Discriminate is a breeze.

THE TEJÓN'S TWO DISCRIMINATE MODES ARE FULLY USER DEFINABLE. The engineers at Tesoro have given the user the ability to set the machine for their hunting needs. Each discriminate mode uses ED180 circuitry. The regular discriminate also incorporates a full-time all metal setting. Want to hunt in all metal and check the targets for iron or discriminate out iron and perform a check for high value silver or gold targets? It's no problem for the Tejón. Simply set the Discriminate and Alternate Discriminate modes for your style of hunting and swing the coil. Then use the Trigger Switch to quickly change modes to check your targets. Push the trigger forward to activate the Alternate Discriminate or pull the trigger back to pinpoint the target. The Tejón makes it fast and easy.

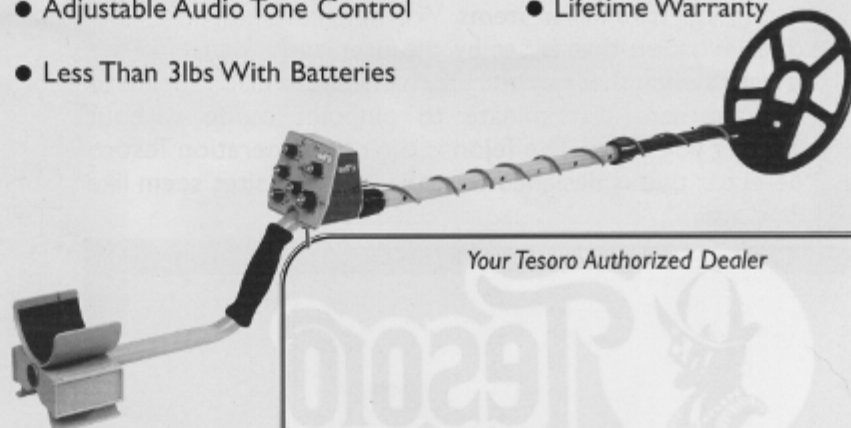

BUT THE USER DEFINABLE FEATURES DO NOT STOP THERE. The Tejón has a manually adjustable ground balance that works for both the All Metal mode and both Discriminate modes. Using a three and three quarter potentiometer, the Tejón will meet and defeat all soil conditions and is suitable for any hunting style.

THE TEJÓN ALSO HAS AN AUDIO TONE ADJUST. If you have trouble hearing certain tones or have certain tones that you are more comfortable with, the Tejón can meet your desires. Using the tone adjustment control, you can switch from a normal tone with VCO pinpoint/all metal to any one of thousands of different audio tones for the All Metal and Discriminate modes. Fine tune the tone until it is right for you and see how much easier it is to find, pinpoint and dig the targets that you are looking for.

WHILE THE TESORO TEJÓN WAS DESIGNED MOSTLY FOR COIN AND RELIC HUNTERS. Its user definable controls are simple and easy to use making it able to handle just about any type of treasure hunting that you may wish to try.

THE TEJÓN IS COVERED BY TESORO'S LIFETIME WARRANTY AND IS ONLY AVAILABLE THROUGH AN AUTHORIZED TESORO DEALER.

- Dual ED180 Discrimination Circuits
- 9x8 Coil
- 3³/₄ Turn Ground Control
- VLF 17.5 kHz Frequency
- Adjustable Audio Tone Control
- Lifetime Warranty
- Easy To Use Trigger Switch
- Less Than 3lbs With Batteries
- Drop-In Battery Packs
