

TIGER SHARK

For Something More Aggressive!

The **Tiger Shark** uses microprocessor technology to create a true dual function machine. In Normal Mode, the Tiger Shark works like any other Tesoro detector. It uses the same great ground balance and discrimination features that made the Bandido series so successful. On land, the Tiger Shark can be used for coin and relic hunting and even gold prospecting. By using the four controls on the outside, you can fine tune your detector to handle whatever conditions you are working in.

Working in the wet salt areas is where the Tiger Shark outshines the land detectors. In land conditions, the most crucial adjustment is using the ground balance to tune out mineralization. In wet salt conditions, changes in the conductivity in the sand cause most of the problems. The Tiger Shark uses completely different internal settings in the SALT Mode than in the NORM Mode. There are no special controls or techniques to remember.

The Tiger Shark continues in the tradition of other great Tesoro underwater machines by having interchangeable coils available. Along with the 8" coil that comes standard with the detector, we also manufacture a 7" and a 10½" coil.

FEATURES:

Interchangeable Coils • 12 kHz Frequency • Normal & Salt Operating Modes • Expanded Discrimination • Ground Balance Control • Waterproof to 200 feet • Built-in Headphones • 8" Waterproof Coil • Lifetime Warranty

Tesoro Tiger Shark

"The Name That Means Treasure"

ARE YOU READY FOR SOMETHING MORE AGGRESSIVE?

Some detectors work great on land, some work great at the beach. But the Tiger Shark works great on both.

The main difference between land based and water units happens deep inside the detector where the signal is processed (produced). Bulky analog circuits were not able to produce the major changes that our customers asked for. So we combined surface mount technology with a new microprocessor to give the Tiger Shark the ability to very easily handle both dry land and wet salt at peak performance. With a twist of a single knob, the microprocessor changes the internal parameters of the Tiger Shark from dry land (Normal) to wet salt areas (Salt).

But simplicity was not the only thing that we were after. The Tiger Shark needed Tesoro's famous discrimination and sensitivity as well. The Tiger Shark's microprocessor runs our low noise ED 180 circuitry that has been time tested and proven. Almost every Tesoro detector for the past 5 years has run this type of circuit.

The Tiger Shark also continues the Tesoro tradition of interchangeable searchcoils on our water units. The Tiger Shark comes with a standard 8" submersible coil. We also have available 10.5" and 7" submersible coils as well. Tesoro has also just developed an adapter so that you can use your current land based coils on your Tiger Shark. While the adapter itself is not waterproof, it will lighten your overall Tiger Shark weight when working on dry land. Ask your dealer for more details.

SPECIFICATIONS

Operating Frequency	12 kHz
Searchcoil Size	8 inch diameter
Searchcoil Type	Round, open center concentric
Audio Frequency	Approx. 270 Hz
Audio Output	Stereo Piezo Headphones
Weight	Less than 4½ lbs.
Battery Requirement	(8) AA DC (alkaline)
Battery Life	10-20 hours (typical)
Optimum Temperature Range	30° F to 100° F
Operating Modes	No Motion All Metal
.....	(Fast & Slow Tune)
.....	Normal Mode
.....	Salt Mode
.....	Silent Search Motion Discriminate
Maximum Depth Rating	200 ft.

Tesoro Electronics, Inc. reserves the right to modify or improve the design without further notice.

LIFETIME WARRANTY
