

ANNOUNCING

WHITE'S MOST ADVANCED DETECTOR

- Exceptionally lightweight 8" loop with ultra-wide search pattern. The loop does not have to be held at a constant height from the ground in G.E.B.* OR in G.E.B.* DISCRIMINATE as is the case with most DISCRIMINATORS.
 - Sturdy, high quality gold anodized aluminum rod.
 - Large 4½" signal intensity and battery check meter.
 - Extra fine ONE TURN TUNER with the ability to select a very precise setting without the confusion of a ten turn control.
 - FOUR (4) position MODE SELECTOR switch. Allows you to select any of 4 different modes. It's like having 4 different metal detectors in one. 1. A normal G.E.B.* all metal detector. 2. A G.E.B.* DISCRIMINATOR for depth you never thought possible before in the DISCRIMINATE MODE. 3. A TR DISCRIMINATOR, for those who prefer the features of a regular TR DISCRIMINATOR. 4. A G.E.B.* MAXIMUM for those who want those objects that might be just out of range of the normal G.E.B.*.
 - Three factory calibrated discriminate levels for instant level switching and a VARIABLE position. (SEE VARIABLE DISCRIMINATE LEVEL)****
 - A single control adjusts the volume of the sound from the speaker as well as turns the detector ON and OFF.
 - Powerful high quality speaker.
 - A very simple ONE TURN control to balance the effects of mineralized soil for BOTH the G.E.B.* and DISCRIMINATE MODES.
- ****When you are in the VARIABLE DISCRIMINATE LEVEL, this control allows you to choose a different level of discrimination, such as those settings below foil where some of the very thin rings will be found.

COINMASTER 6000/D G.E.B.* DISCRIMINATOR

The PUSH BUTTON serves two (2) purposes. It can be used to reset the TUNING and by holding the button in, you can actually change to a different mode. For example: If you were searching in the G.E.B.* NORMAL mode and found an object you could just hold in the button and automatically the detector would switch to the G.E.B.* DISCRIMINATE mode for identification as a good find or bad find.

Price Complete with rechargeable batteries: **\$439.95**

*PATENTED CIRCUITRY

RECHARGEABLE BATTERY PACKS

This RECHARGEABLE BATTERY SYSTEM is standard with the COINMASTER 6000/D. Under normal use the system will last up to seven years or more. It is quite possible for this system to save you enough in the cost of batteries to pay for your entire detector. A \$47.25 VALUE. WHO ELSE HAS RECHARGEABLE BATTERIES STANDARD?

Prices and Specifications are subject to change without notice.

DISCRIMINATORS

SWITCHES INSTANTLY FROM NORMAL TO DISCRIMINATE OPERATION. REJECTS TINFOIL, BOTTLE CAPS, AND OTHER JUNK! ADJUSTS TO ANY DEGREE OF DISCRIMINATION DESIRED. NOT A BFO BUT A GENUINE WHITE'S T.R. CIRCUIT.

COINMASTER 2/DB

Available Nov. 1st.

SO MANY FEATURES FOR SUCH A LOW PRICE

Check the price and features of this instrument against all of the competition.

- Easy to read signal intensity and battery check meter
- 6" Super Wide Scan Adjustable Angle Loop
- Push-Button Tuning
- Extra Fine Oneturn Tuner
- Battery Test Button
- 1/4" Headphone Jack
- Sturdy Aluminum Case with a beautiful finish
- Adjustable Gold Anodized Rod
- Plastic Isolator for Uniform Search Pattern
- Hinged and latched Battery Door for easy access
- Only one 9-volt Transistor Battery is used
- Powerful Built-in Speaker
- High Forward Handle for Exceptional Balance
- High Quality Baked on Paint
- On/Off Volume Control Combination
- Exceptional Battery Life and is also adaptable for our optional rechargeable battery pack when desired.

U.S. Patent #4030026

PRICE: **\$149.95**

Weight: 2 lbs. 13 oz. (45 oz.)

COINMAS

EASIEST TO OPERATE TR-DISCRIMINATOR FOR \$99.95

No tuning control is necessary. All you do is push the factory set tuning level. The discriminator automatically turns control labeled with types of junk items rejected.

FEATURES

- Adjustable anodized rod
- High forward handle for balance
- 1/4" headphone jack
- L.E.D. bat. check
- Feather Touch Tuning (FTT)

U.S. Patent #4030026

PRICE: **\$99.95**

COINMAS

A Best-seller for the White's line depth of detecting junk mode c

Powered by 14 penlight batteries. U.S. Patent 4024468. Price complete: **\$209.95**

PRICE COMPLETE with NEW RECHARGEABLE BATTERY SYSTEM (9 and 12 volt): **\$257.20**

Garry Moore from the "To Tell The Truth" TV program holds a White's instrument which lead Roy Volker, a White's Distributor to the fabulous Escudo 1715 Golden Royal coin valued at \$75,000.

An Australian customer has recently found and sold about \$19,000 in gold nuggets! The largest gold nugget pictured here weighs 11 oz. "These are just the leftovers", says the customer. All these finds were made with a COINMASTER G.E.B. instrument.

Total Weight 2 lbs. 11 oz. (43 oz.)

NOW AVAILABLE FOR THE FIRST TIME . . .

A universal Hip Mount or Body Mount
For almost all White's detectors with *detachable rods*.
There are four different kits available to accommodate the
different types of *PLUGS*.

1. "Series One" detectors. These are the non-discriminate type detectors with the big black plug, such as the 66TR, CM4TR, 63TR, CM1TR, CM3TR, etc. Part #801-5089-6.
2. "Series Two Twist Lock" detectors. These are the discriminator type detectors with a plug that locks with *less than one turn*, such as the sixty-six discriminator and CM 4 discriminator. Part #801-5089-7.
3. "Series Two Screw Lock" detectors. Same as number 2 above except that the plug locks with *several turns*. Part #801-5089-8.
4. "G.E.B. Series" detectors. These include all of the CM 5's, 5000/D and 6000/D. Part #801-5089-9.

Shipping weight is less than two pounds. The Kit sells for **\$29.95**

STER 4/D

For years, this is the most popular Discriminator unit in the TR circuitry gives you accuracy and outstanding discrimination. Discriminate mode tunes out those discouraging items such as foil, bottlecaps and nails. Automatic compensation for slight ground variations. Also incorporates White's famous mineral/metals control for yet more versatility! On the metal setting the instrument detects all conductive metal items such as coins, rings, guns, natural gold, silver, copper, and nuggets. Switch to the mineral position to find magnetic veins and ore deposits. This unit is more sensitive and lighter weight than any other in its class.

Includes built-in speaker, signal intensity battery check meter, jack for optional headphones, 8" waterproof search loop.
Total weight 4 lbs. 9 oz.

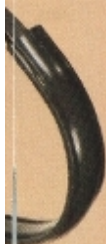

HEADPHONES

In many areas HEADPHONES are almost a must! Noisy areas such as the beach, near heavy traffic, etc. may cause you to miss those faint signals that mean deep finds. Fits most WHITE'S DETECTORS.

Standard Headphones **\$10.95**

Deluxe Headphones **\$14.95**

Specify Large (1/4") or Small (1/8") plug

COINMASTER 5000/D

The 5000/D is our best selling and most popular metal detector. It incorporates all of the features listed below.

- New low profile case
- 8" waterproof lightweight 4B loop with greater stability
- Forward mount handle for perfect balance
- 3" jeweled bearing meter
- 12 volt single battery pack with rechargeable batteries. Operates for pennies per day which will save hundreds of dollars in batteries
- New higher frequency — increased sensitivity to non-ferrous metals — easier to hear signal tone changes as objects are detected
- Adjustable sensitivity control for various soils
- Adjustable discriminator
- New heavy-duty push-button.
- Lower current drain for increased economy of operation
- P.C. boards are coated for greater protection against humidity and temperature variations in this highly sensitive circuit.

The 5000/D is like having three instruments in one: 1) A G.E.B that is not affected by the ground for treasure hunting; 2) A conventional TR for prospecting; and 3) A TR Discriminator that will reject ferrous metals, and other junk items.

Total weight 4 lbs. 8 oz.

Price complete **\$269.95**

PS

A selection of different loop sizes available for most WHITE'S detectors to make your detector more versatile. 4" probes for very small objects like gold nuggets, and 15" loops for very large objects that may be out of the range of your 8" loop. Contact your nearest DEALER for more details.

CARRYING CASES

A "MUST" for owners who like to keep their possessions "LIKE NEW!" These beautiful and durable Royalite cases will protect your detector from everyday bumps and scratches. Perfect for storage, too!

Low Profile COINMASTERS **\$29.95**

High Profile (CM4/D, 5/DB) **\$29.95**

Hip Mounts **\$39.95**

LOW PRICED QUALITY

TREASUREMASTER AMPHIBIAN

For the skin and scuba diver. The lightweight, newly designed unit is to be used in lakes, rivers, and sea-water. Case size — 4" long by 2" wide. New improved waterproof headphones with built-in 2½" PM speaker. Headphone cable length — 33". Weight 34 oz.

Price Complete: **\$199.95**

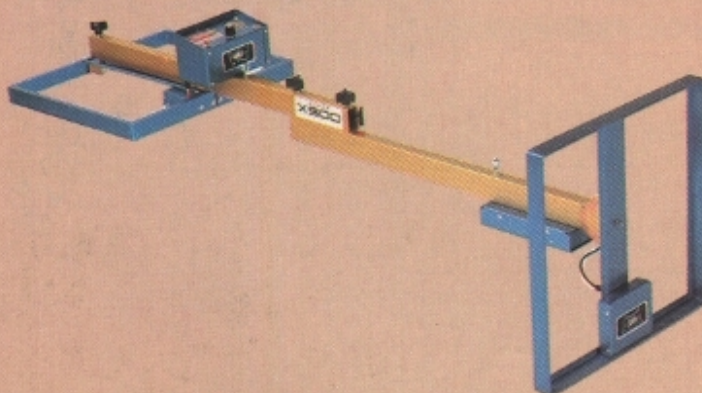

X-500 EE

This industrial unit is designed especially for locating and tracing underground water, gas and sewer lines and buried cable. Locates survey stakes, manholes, well casings, covered mine shafts, etc. May find detectable sub-surface water in some cases. Includes signal intensity meter with battery check switch, built-in speaker, jack for optional headphones. Powered by six "C" cells.

Total Weight 8 lbs. 4 oz.

Price Complete: **\$269.95**

SURF MASTER

The SURF MASTER is built on the same design as the TREASUREMASTER AMPHIBIAN but it is primarily designed for the surf buffs who like to work the offshore areas.

Complete Price:
\$199.95

COINGETTER

- Vacuum-formed case
 - TR circuit
 - Weighs 31 ounces, including loop and battery
 - Recessed speaker
 - 6-inch loop
 - Battery and instruction book included
 - Single control
 - Headphone
 - Low price
 - Uses one battery
 - Completely assembled
- \$59.95**

All White's TR Discriminators, G.E.B. and V.L.F. Instruments are covered by U.S. Patents #4030026 and #4024468 and/or other Pats. Pending as so marked.
