

# white's Catalog of Metal Detectors

**COINMASTER**  
**6000/Di Series 2**  
 METAL DETECTOR

MANUFACTURED BY WHITE'S ELECTRONICS, SWEET HOME, OR, U.S.A.

## A MESSAGE FROM KEN WHITE, SR.

The products in this catalog represent the very finest metal detectors WHITE'S ELECTRONICS has ever produced. And, for more than thirty years, we have been the world's leading manufacturer of metal detecting equipment.

Over the years, White's has maintained a superior edge in technology by working with the very best engineers, technicians and customer service personnel. We are aware of the needs of the treasure hunter, and we are tuned in to building instruments that satisfy those needs. Our policy for customer satisfaction has kept us on the forefront of new technology. White's has earned more patents in the field of metal detection than any other company. This means that White's has been **FIRST** in advancing the hobby of treasure hunting, with such improvements as more reliable loops; depth capability; discrimination against junk; canceling out the effects of mineralization; depth reading on targets; affordable Pulse Induction technology for underwater instruments; and, in refinements that add to accuracy and reliability in the performance of each of our metal detectors.

We are proud to offer a range of instruments that will fit the budget and skill level of treasure hunters everywhere. These metal detectors are the finest available in their price range, and can be used with excellent results to find coins, relics, jewelry, precious metals, and a wide variety of other metal items. Whether you treasure hunt professionally, or as a family hobby, there is a White's metal detector designed for you.

I hope you will visit one of our authorized dealers. He will be glad to give you information on each of our instruments, and, a demonstration that will simplify their operation. Whenever you have a question about your detector, need an accessory, or service, our dealers are ready to help. We are confident that you'll be satisfied with our products, and that your treasure

hunting success will be great! You can be sure that when better detectors are built, White's will build them!

Whenever you have a discovery that you're excited about, drop us a note and send a picture. We're always eager to hear about your adventures and the rewards that

come from this fantastic sport of treasure hunting.

Good Hunting Always,

*Kenneth G. White*

# WHERE TO FIND THE FINEST-METAL DETECTORS AND SERVICE

Prices Effective April 15, 1983 (Prices and technical specifications subject to change without further notice)

**WHITE'S ELECTRONICS, INC.**

1011 Pleasant Valley Rd. Sweet Home, OR 97386

For the name of an authorized White's dealer  
or to request information on our treasure hunting products, - **CALL TOLL FREE: 1-800-547-6911**

White's sells its complete line of mineral/metal detectors through a nationwide system of distributors who supply authorized dealers. We recommend that you purchase one of our instruments through a dealer so you can receive personal attention. Selecting the right

detector for your interests and price range is an important decision and one which our dealers are fully qualified to help you make. They will instruct you in the operation of your new detector, making sure you understand it completely. The dealer is also your source for

treasure hunting accessories and information. Whenever you have a question about how to improve your skills, or increase your finds, return to your dealer. He will be happy to help you in every way possible.

# white's electronics, inc.

1011 Pleasant Valley Road, Sweet Home, Oregon 97386

### SERVICE POLICY

If your detector ever needs servicing, return it to the dealer from whom it was purchased. The dealer will check the instrument thoroughly in order to determine if there is definitely a problem. (In many cases, improper operating procedures will make it seem like

there is a problem. Further instructions in using the detector can "solve" it.) If your detector does need servicing, the dealer will send it to the nearest National Warranty Service Center. These 10 centers are located regionally around the country. Their personnel are train-

ed at White's factory so their repair expertise is of the highest order. This program is one of the most comprehensive in the metal detector industry and provides efficient repairs at a minimal cost.

# OVERSEAS OPERATIONS

WHITE'S ELECTRONICS opened a manufacturing plant in Inverness, Scotland in 1981. This plant maintains the same standards of quality as the White's plant in Sweet Home, Oregon. They also have a Research and Development department that produces new metal detectors. And, a Marketing Department that oversees Europe, Asia and Africa.

## A TRADITION OF ACCOMPLISHMENTS

WHITE'S ELECTRONICS has been located in Sweet Home, Oregon, for all of its more than thirty years of operation. Using skilled technicians, and the latest in test equipment, metal detectors are carefully assembled and tested to assure the user of reliable instruments. White's has always led the metal detector industry with new products, and that tradition

continues today. A staff of engineers, specializing in math, physics and electronics, work to design the metal detectors of the future. Whenever better metal detectors are built, White's builds them! The best service programs in the industry are also developed here, along with general administrative policies. White's will also adapt its metal detection

technology to industrial needs. White's sensitive electronics can be custom fit to a wide range of applications. For more details on these product possibilities, contact White's factory. Sweet Home may be a small, quiet town, but the international headquarters of White's Electronics is large and exciting!

# COINMASTER 6000/Di SERIES 2

## NOW DISCRIMINATE AGAINST JUNK IN ALL 4 MODES AND INCLUDES 8" AND 10" INTERCHANGEABLE LOOPS

- VISUAL DISCRIMINATION INDICATOR (VDI) • DEPTH READING ON COINSIZED OBJECTS
- PUSH BUTTON MODE CHANGING, METER SWITCHING AND RETUNING

The advantage to hunting for buried treasure with White's new 6000/Di metal detector is that you find more treasure! The 6000/Di has a Visual Discrimination Indicator (VDI) that separates junk items from treasure items, and a Depth Indicator that aids in the recovery of coin sized objects. These two aids are part of the most sophisticated metal detector on the market. Serious treasure hunters, prospectors, and coinshooters will use the 6000/Di for maximum depth and sensitivity. They will appreciate the flexibility of the new battery system which features White's own drop-in pack of nickel cadmium rechargeable batteries and recharging in the instrument. Plus, an auxiliary pack of 4 alkaline "C" cells. Four modes of operation with push-button mode changing and improved resolution in the Ground Exclusion Balance (G.E.B.) and Discrimination controls make the 6000/Di a great detector to use in every treasure hunting situation. For experienced treasure hunters who are determined to find the valuables they are seeking, White's new 6000/Di is the leading metal detector manufacturer's finest instrument. You can be sure the 6000/Di will outperform every other metal detector available.

### FEATURES:

- Quartz Crystal Controlled for Stability
- 4" Easy to read Meter with Visual Discrimination Indicator, Depth Reading and Battery check
- One Turn Tuner Control
- Modes: GEB/NORM, GEB/DISC, TR/DISC, GEB/MAX
- Push Button Mode Switching, Retuning and Meter Function for Visual Discrimination and Depth Reading
- Improved Tuning on the GEB and Discriminate controls
- ON-OFF control tests the Battery Pack and selects between Minimum or Maximum sensitivity to mineralization
- New Battery system featuring White's own Drop-in Pack of nickel cadmiums that can be recharged IN the instrument (Rechargeable pack and charger included)
- Loop: 8" Concentric, water resistant and interchangeable. Detachable loop allows for interchanging White's 4", 10" and 15" Concentric Loops and gold probe for special hunting purposes.
- 10" waterproof Concentric Loop makes it easier to find larger objects at greater depths than the 8" loop. Covers more area with each sweep

**\$599.95**

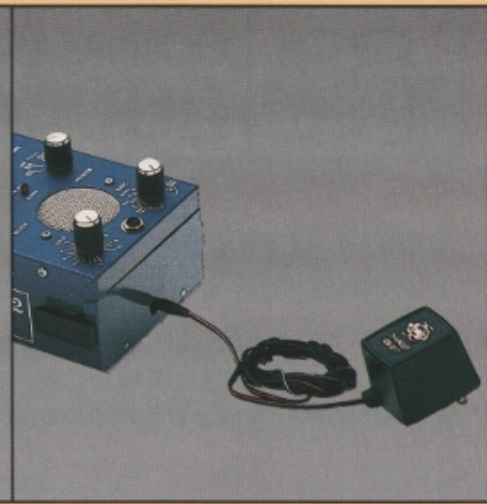

- Slow sweep speed maximizes GEB/DISC performance
- GEB (Ground Exclusion Balance) control cancels effects of ground mineralization
- DISC (Discrimination) control adjusts discrimination level to distinguish between "good" and "junk" items
- GEB/DISC Mode cancels Ground Mineralization while Discriminating against "junk"
- Low Battery Alert LED glows when batteries need recharging or replacing
- 4 Alkaline "C" Cell Batteries and Holder included
- Built-in Speaker and 1/4" Mono Headphone Jack

### SPECIFICATIONS:

- Operating Frequency: 6.59 KHz
- Weight: 5 lbs. (Batteries Included)
- Optimum Temperature Range: 33-100° F
- Optimum Humidity Range: 0-75%
- Average Depth on 25¢ coin (in G.E.B./MAX mode with 8" loop) 9-11"
- Uses: Coinhunting, Prospecting, Relic Hunting, Beachcombing

PATENTS: U.S. 4030026 U.S. 4293816  
UK 1548239 CDN 1038036  
Other Patents Pending

### FOUR FUNCTION METER

This easy to read Meter has a Visual Discrimination Indicator (VDI), and Depth Reading on coin sized objects. It shows the probable identity of targets, (including coins, gold, silver, junk and, ferrous/non-ferrous items). The Meter also has a Reference Scale numbered 0-100 for expanding the VDI readings to include additional items. And, the Meter has a Battery Test Scale. This is one of the most accurate Meters in metal detecting. (Depth detection is greater than discrimination.)

### 6000/DI 10" LOOP INFORMATION

The 6000/Di includes the 10" Concentric loop for locating larger objects at greater depths than the 8" loop. Ideal for treasure hunting, the waterproof 10" loop adds flexibility to the Di and makes it the most complete metal detector, and the best dollar value, available.

### POWERFUL AND PRACTICAL BATTERY SYSTEM

The 6000/Di has a specially designed Battery Pack that simply drops into the battery chamber. There are no wires to connect! Rechargeable nickel cadmium batteries are included with the detector, and they may be charged either inside or outside of the unit. They can be charged up to 1000 times, saving you hundreds of dollars over the life of your instrument. An alternative pack of 4 alkaline "C" batteries are also included.

### AUTOMATIC PUSH BUTTON FEATURES

The Push Button adds to the ease of operation and flexibility of the 6000/Di. When the Button is OUT, the Meter reads as a Visual Discrimination Indicator (VDI). When the Button is IN, the Meter shows Depth Reading. The Push Button also switches between Modes, and, retunes the instrument.

	PUSH BUTTON OUT		PUSH BUTTON IN	
MODE SWITCH	OPR MODE	METER	OPR MODE	METER
GEB NORM	GEB NORM	VDI	GEB DISC	DEPTH
GEB DISC	GEB DISC	VDI	GEB NORM	DEPTH
TR DISC	TR DISC	VDI	GEB MAX	DEPTH
GEB MAX	GEB MAX	VDI	GEB DISC	DEPTH

# COINMASTER 6000/DI SERIES 2 HIPMOUNT

## HIPMOUNT MODEL PROVIDES TOTAL VIEW OF THE VDI METER

- INCLUDES 8" and 10" INTERCHANGEABLE LOOPS
- THE MOST COMFORTABLE WAY TO HUNT FOR LONG PERIODS OF TIME
- SAME FEATURES AND PRICE AS THE 6000/DI HAND-HELD MODEL

White's offers the 6000/DI in a hipmount model for the treasure hunter who is looking for comfort while hunting for long periods of time. This is a factory prepared model, not a kit! For the same price as the handheld unit, you now have a choice between models. The hipmount has a highly visible meter and a featherweight probe. It may be the perfect way for you to treasure hunt — professionals prefer hipmounts to handheld, too!

**\$599.95**

### FEATURES:

- Same price as the 6000/DI handheld model AND same features
- Visual Discrimination Indicator (VDI) to aid in the identification of targets
- Depth Reading on coin sized objects to make recovery easier
- Reference Scale on the meter for expanded VDI identification
- Slower sweep speed in G.E.B./DISC maximizes results
- More than 60% of the instrument's weight is supported by nylon straps that make hunting easier
- Probe is light and maneuverable without the control box weight
- 3" Meter is effectively located on top of detector for clear view
- 8" interchangeable Concentric loop, completely waterproof up to connector
- 10" Interchangeable Concentric loop for increased depth and greater sweep coverage, completely waterproof
- Four modes of operation: G.E.B./NORM; G.E.B./DISC; TR/DISC; G.E.B./MAX
- Features ground rejection with discrimination in G.E.B./DISC
- Probe length is adjustable from 34" to 44"
- Design eliminates putting the control box on the ground while digging
- Featherweight probe makes sweeping and searching in places over your head easier
- Detachable loop allows for interchanging White's 4", 10" and 15" concentric loops and gold probe for special hunting purposes

### SPECIFICATIONS:

- Operating Frequency: 6.59 KHz
- Weight: Case 4 lbs. 8 oz.  
Probe 34 oz. (Batteries Included)
- Optimum Temperature Range: 33-100° F
- Optimum Humidity Range: 0-75%
- Average Depth on 25¢ coin (in G.E.B./MAX mode) 9-11"
- Uses: Coinhunting, Prospecting, Relic Hunting, Beachcombing

PATENTS: U.S. 4030026 U.S. 4293816  
UK 1548239 CDN 1038036  
Other Patents Pending

# COINMASTER 6000/D SERIES 2

## YEARS OF OUTSTANDING TREASURE FINDS PROVE THIS DETECTOR'S PERFORMANCE

- DEPTH READING ON COIN SIZED OBJECTS
- PUSH BUTTON MODE CHANGING AND RETUNING
- SLOW SWEEP SPEED FOR MAXIMUM G.E.B. DISCRIMINATION

This instrument is designed for the experienced treasure hunter. It is one of the most sensitive and deepest detecting instruments on the market today. Combined with your highly developed skill, it will locate treasure very effectively. The Depth Reading feature on the 6000/D Series 2, shows the depth on a coin and saves you time in recovering it. If you're ready for one of the finest detectors that money can buy, the 6000/D Series 2 will satisfy your expectations.

**\$499.95**

### FEATURES:

- Quartz crystal controlled
- Improvements in the G.E.B./DISC mode means that a slow sweep rate provides optimum discriminating characteristics
- Depth Reading on coin sized objects shows depth from 1" - 6"
- Push-Button Mode Changing in G.E.B./NORM, G.E.B./DISC, TR/DISC and G.E.B./MAX
- One Turn Tuner control with push-button retuning on the handle
- Four Position Mode switch: G.E.B./NORM, G.E.B./DISC, TR/DISC, G.E.B./MAX
- Ground Balance control cancels mineralization in G.E.B. modes
- Variable Discrimination control distinguishes between "good" and "junk" targets in the G.E.B./DISC and TR/DISC modes
- Variable Discrimination control also rejects the ground and cancels out effects of salt water in TR/DISC mode
- G.E.B./MAX mode gets at least 33% greater depth than the G.E.B./NORM mode; excellent for relic hunting and detecting deeply buried objects
- ON/OFF switch also checks the 6 and 8 cell battery packs
- 4" easy to read meter for depth reading, signal intensity and battery condition
- 8" Concentric loop, completely waterproof, with true-center sensitivity for accurate pin-

pointing; improved stability and minimized "backreading"

- Detachable loop allows for interchanging White's 4", 10" and 15" Concentric Loops and gold probe for special hunting purposes
- Powerful built-in Speaker and Mono Headphone Jack
- 6 cell and 8 cell AA Penlight battery packs included
- 6 cell and 8 cell rechargeable nickel cadmium battery packs and battery charger included

### SPECIFICATIONS:

- Operating frequency: 6.59 Khz
- Weight: 6 lbs. 2 oz. (Batteries Included)
- Optimum Temperature Range: 33 - 100° F
- Optimum Humidity Range: 0% - 75%
- Average depth on 25¢ coin (in G.E.B./MAX mode): 8"-11"
- Uses: Coinhunting, Prospecting, Relic Hunting, Beach-combing

PATENTS: U.S. 4030026 U.S. 4128803  
U.S. 4293816 CDB 1038036 UK 1548239  
Other Patents Pending

# COINMASTER 6000/D SERIES 2 HIPMOUNT

## THIS HIPMOUNT IS PERFECT FOR COMFORT AND PERFORMANCE

- PROVIDES CLEAR VIEW OF THE METER
- THE EASIEST WAY TO GET INTO HARD TO REACH PLACES
- SAME FEATURES AND PRICE AS THE 6000/D HANDHELD MODEL

### \*LOOP IS NOW INTERCHANGEABLE

Handheld or hipmount, White's 6000/D Series 2 is the same outstanding metal detector. In a hipmount version it is super easy to maneuver the featherweight probe for long periods of time, even over rough terrain. With all of the same features as the handheld model, and at no extra cost, the hipmount from White's is comfortable and effective.

**\$499.95**

## FEATURES:

- Same price and features as the 6000/D Series 2 handheld model
- Slower sweep speed in G.E.B./DISC mode
- More than 60% of the instrument's weight is supported by nylon straps to make extended hunting easier
- 3" Meter is conveniently located on top of control box for easy reading
- Probe is light and maneuverable without the control box weight
- 8" interchangeable Concentric loop, completely waterproof up to the connector
- Perfect for searching in situations above your head or hard to reach places
- Probe length is adjustable from 34" to 44". Push button in the probe handle
- Makes sweeping easier
- Eliminates setting the control box on the ground while digging
- Detachable loop allows interchanging with White's 4", 10" and 15" Concentric loops and gold probe for special hunting purposes

## SPECIFICATIONS:

- Operating frequency: 6.59 KHz
- Weight: Case 4 lbs. 4 oz.  
Probe 34 oz. (Batteries Included)
- Optimum Temperature Range: 33 - 100° F
- Optimum Humidity Range: 0 - 75%
- Average depth on 25¢ coin (in the G.E.B./MAX mode): 8" - 11"
- Uses: Coinhunting, Prospecting, Relic Hunting, Beachcombing

PATENTS: U.S. 4030026 U.S. 4128803  
U.S. 4293816 CDN 1038036 UK 1548239  
Other Patents Pending

# COINMASTER 5000/D SERIES 2

**THE 5000/D WAS USED TO FIND THE \$250,000 "GOLDEN BEAUTY" GOLD NUGGET FOUND IN AUSTRALIA. A WOMAN FOUND THIS NUGGET THE FIRST TIME SHE USED THE INSTRUMENT!**

- FOUR MODES OF OPERATION
- DISCRIMINATION WITH GROUND REJECTION
- PUSH BUTTON MODE CHANGING AND RETUNING

White's 5000/D Series 2 combines a discriminating TR mode with three ground cancelling G.E.B. modes. G.E.B./NORM and G.E.B./MAX are for all-metal hunting. G.E.B./DISC combines ground rejection efficiency with flexibility of discrimination. The 5000/D is designed for the more serious treasure hunter who wants to fine tune the instrument for maximum depth and sensitivity.

## FEATURES:

- Improvements in the G.E.B./DISC mode mean that a slow sweep rate provides optimum discriminating characteristics
- Four Position Mode Switch: G.E.B./NORM, G.E.B./DISC, TR/DISC, G.E.B./MAX
- Push-Button mode changing in G.E.B./NORM, G.E.B./DISC, TR/DISC and G.E.B./MAX modes
- Ground Balance control cancels mineralization in three G.E.B. modes
- Variable Discrimination control distinguishes between "good" and "junk" targets in the G.E.B./DISC mode and the TR/DISC mode
- Variable Discriminate control also rejects the ground and cancels out effects of saltwater in TR/DISC mode
- ON/OFF switch also checks 6 cell and 8 cell Battery Packs
- Volume Control lets you set audio tone level
- 3" signal intensity Meter for easy viewing and battery level check
- 8" Concentric loop, completely waterproof, with true-center sensitivity for accurate pinpointing; improved stability and minimized "backreading"
- Detachable loop allows interchanging with 4", 10", and 15" Concentric loops and gold probe for special hunting purposes

- Clear sounding built-in Speaker and mono Headphone Jack
- 6 cell and 8 cell AA Penlight Battery Packs included
- 6 cell and 8 cell rechargeable nickel cadmium Battery Packs and Battery charger included
- G.E.B./MAX mode is about 27% more sensitive than G.E.B./NORM

## SPECIFICATIONS:

- Operating frequency: 6.59 KHz
- Weight: 5 lbs. 13 oz. (Batteries Included)
- Optimum temperature: range: 33 - 100°F
- Optimum humidity range: 0 - 75%
- Average depth on 25c (in the G.E.B./MAX); 8" - 9½"
- Uses: Coinhunting, Prospecting, Relic Hunting, Beachcombing

Patents: U.S. 4293816 U.S. 4249128  
U.S. 4030026 U.S. 4128803  
CDN 1038036 UK 1548239

# COINMASTER 4000/D SERIES 2

## THE FINEST MEDIUM PRICED DETECTOR AVAILABLE

- IMPROVED AUDIO RESPONSE FOR MORE ACCURATE DETECTION
- GROUND CANCELLING MODE INCREASES DEPTH CAPABILITY
- TR DISCRIMINATE MODE ALLOWS YOU TO IGNORE "JUNK"

The 4000/D Series 2 is White's lowest priced G.E.B. detector. It has a full range discrimination control for use in the DISC mode. This instrument is a major step up for treasure hunters tired of the problems caused by mineralized soil to detectors with TR only modes. Many novice treasure hunters will find this instrument super easy to operate because in the G.E.B. mode it is not affected by mineralized ground. The 4000/D Series 2 is also great for the experienced user who wants a versatile machine with great sensitivity and depth.

**\$269.95**

### FEATURES:

- One Turn Tuner control with Push-Button in the handle for quick and easy retuning
- Mode switch to select between the G.E.B. or DISC modes
- G.E.B. mode detects all metals while cancelling out mineralized ground
- G.E.B. (Ground Exclusion Balance) control cancels out mineralized soil
- DISC mode is a TR function and is used with the variable discriminator to distinguish between "good" and "junk" targets
- Variable Discriminate control distinguishes between "good" and "junk" targets, rejects the ground or cancels out effects of saltwater in DISC mode
- 3" signal intensity Meter for easy viewing
- 8" Concentric loop, completely waterproof, with true-center sensitivity for accurate pinpointing; improved stability and minimized "backreading"
- Detachable loop allows for interchanging with White's 4", 10" and 15" Concentric loops and gold probe for special hunting purposes
- 6 cell AA Penlight Battery Pack
- Rechargeable 6 cell nickel cadmium Battery Pack and Battery Charger included

- Low Battery Alert light glows when the 6 cell Battery Pack needs replacing
- Sensitivity control adjusts the detector's sensitivity to all targets and the ground conditions
- Clear sounding built-in Speaker and mono Headphone Jack

### SPECIFICATIONS:

- Operating frequency: 6.59 KHz
- Weight: 4 lbs. 13 oz. (Batteries Included)
- Optimum temperature range: 33 - 100° F
- Optimum humidity range: 0 - 75%
- Average depth on 25¢ (in the G.E.B. mode): 7"
- Uses: Coinhunting, Prospecting, Relic Hunting, Beachcombing.

PATENTS: U.S. 4293816 U.S. 4030026  
UK 1548239 CDN 1038036  
Other Patents Pending

COINMASTER

# 4000/D SERIES 2 HIPMOUNT

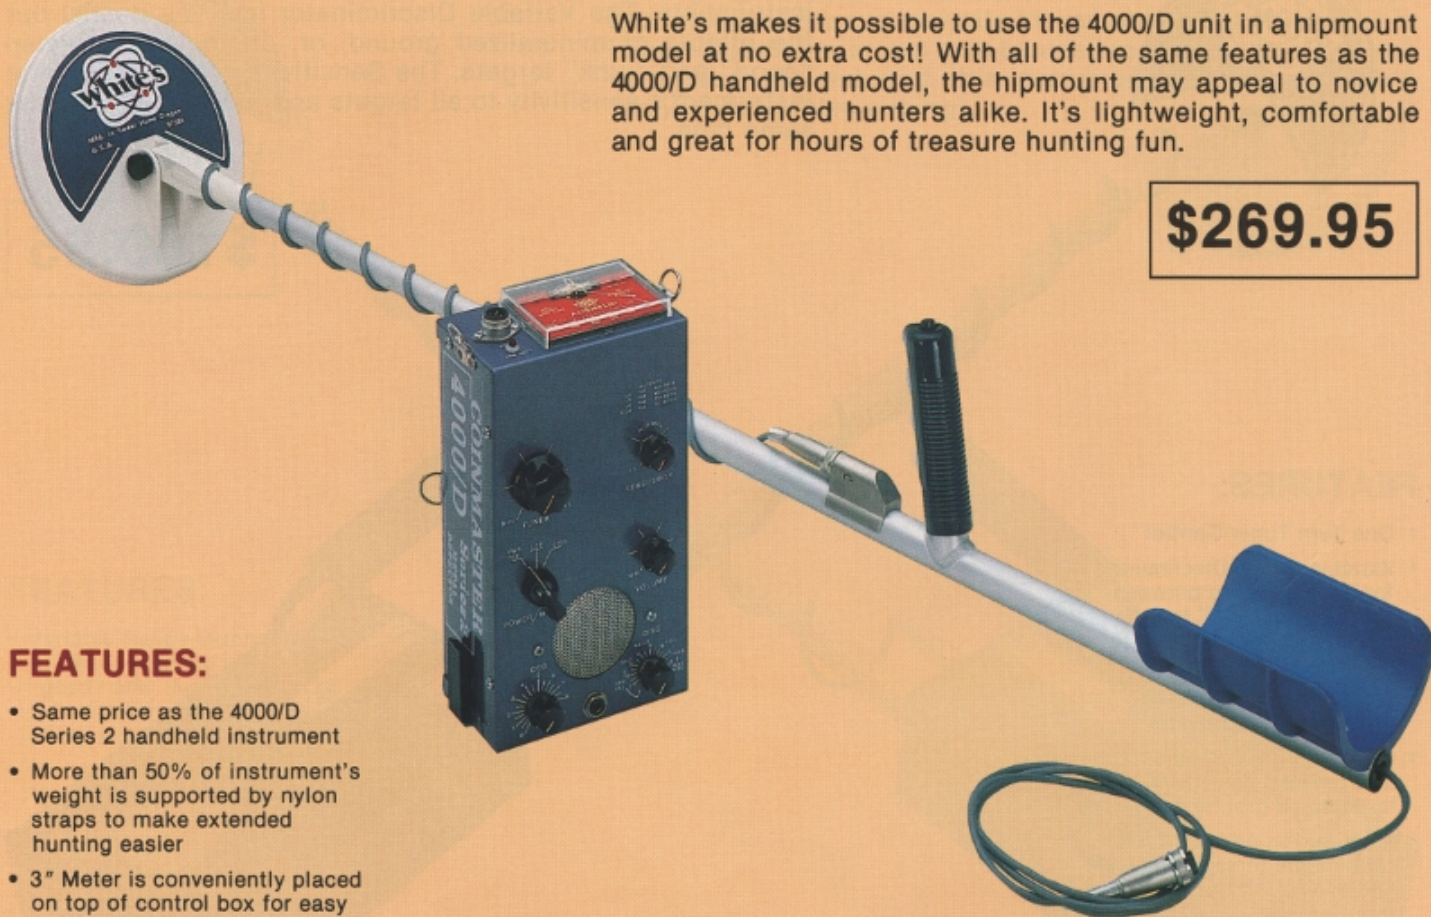

## INCREASE YOUR TREASURE HUNTING SUCCESS WITH THIS COMFORTABLE HIPMOUNT

- A CONVENIENT WAY TO HUNT FOR EVERYONE IN THE FAMILY
- THE METER IS EASY TO READ AND THE PROBE IS INCREDIBLY LIGHT
- SAME PRICE AND FEATURES AS THE 4000/D HANDHELD

\*LOOP IS NOW INTERCHANGEABLE

White's makes it possible to use the 4000/D unit in a hipmount model at no extra cost! With all of the same features as the 4000/D handheld model, the hipmount may appeal to novice and experienced hunters alike. It's lightweight, comfortable and great for hours of treasure hunting fun.

**\$269.95**

### FEATURES:

- Same price as the 4000/D Series 2 handheld instrument
- More than 50% of instrument's weight is supported by nylon straps to make extended hunting easier
- 3" Meter is conveniently placed on top of control box for easy reading
- Probe is light and maneuverable without the control box weight
- Perfect for searching in situations above your head or in hard to reach places
- Probe length is adjustable from 34" to 44". Push button in the probe handle
- 8" interchangeable Concentric loop, completely waterproof up to connector
- Detachable loop allows for interchanging White's 4", 10" and 15" Concentric loops and gold probe for special hunting purposes
- Eliminates setting control box on the ground while digging

### SPECIFICATIONS:

- Operating frequency: 6.59 Khz
- Weight: Case 3 lbs. 3 oz.  
Probe 34 oz. (Batteries Included)
- Optimum temperature range: 33 - 100°F
- Optimum humidity range: 0 - 75%
- Average depth on 25¢ (In the G.E.B. mode): 7"
- Uses: Coinhunting, Prospecting, Relic Hunting, Beachcombing.

PATENTS: U.S. 4293816 U.S. 4030026  
UK 1548239 CDN 1038036  
Other Patents Pending

# COINMASTER 2/DB SERIES 2

## SUPER SENSITIVE TR DISCRIMINATOR

- SENSITIVITY CONTROL MINIMIZES MINERALIZATION PROBLEMS
- 1 1/2" METER SHOWS SIGNAL INTENSITY FOR LOCATING TARGETS
- PUSH BUTTON RETUNING

The 2/DB Series 2 is an excellent choice for the person who is looking for an exceptional TR instrument. This inexpensive model has many of the features of White's more sophisticated instruments. The Variable Discriminator lets you cancel out the effects of mineralized ground, or, distinguish between "good" and "junk" targets. The Sensitivity control varies the instrument's sensitivity to all targets and to the ground at the same time.

**\$169.95**

## FEATURES:

- One Turn Tuner Control
- Variable Range Discriminator for distinguishing between "good" and "junk" targets or for cancelling out the effects of mineralized ground
- Discriminator can reject the effects of saltwater
- Sensitivity control adjusts the instrument's sensitivity to all targets and ground conditions
- Push-Button on the handle retunes the threshold quickly and easily
- Volume control allows user to set desired level of audio tone
- 8" Concentric loop, completely waterproof, with true-center sensitivity for accurate pinpointing
- 1 1/2" Meter shows the strength of the signal
- Low Battery Alert light glows when the 9 volt Battery needs replacing
- Clear sounding built-in Speaker
- Headphone Jack for mono headphones
- Detachable loop allows for interchanging White's 4", 10" and 15" Concentric loops and gold probe for special hunting purposes

## SPECIFICATIONS:

- Operating frequency: 6.59 KHz
- Weight: 3 lbs. 6 oz. (Batteries Included)
- Optimum temperature range: 33 - 100° F
- Optimum humidity range: 0 - 75%
- Average depth on 25¢ (with discriminator set to Ground Reject): 6"
- Uses: Coinhunting, Prospecting, Relic Hunting, Beach-combing

PATENTS: U.S. 4293816, U.S. 4030026  
UK 1548239 CDN 1038036  
Other Patents Pending

# COINMASTER 1/DB SERIES 2

## WHITE'S LOWEST PRICED TR DISCRIMINATOR

- PUSH BUTTON RETUNING
- EXPANDED RANGE VARIABLE DISCRIMINATION
- WHITE'S EASIEST TO USE DISCRIMINATING DETECTOR

Distinguish between "good" and "junk" targets with the 1/DB Series 2 Variable Discrimination detector. This allows the developing treasure hunter to be more confident about targets and increases the success rate for valuable finds. The Variable Range Discriminator can also be used to cancel the effects of mineralized ground, and, this instrument will find all metals "so you don't miss a thing".

**\$129.95**

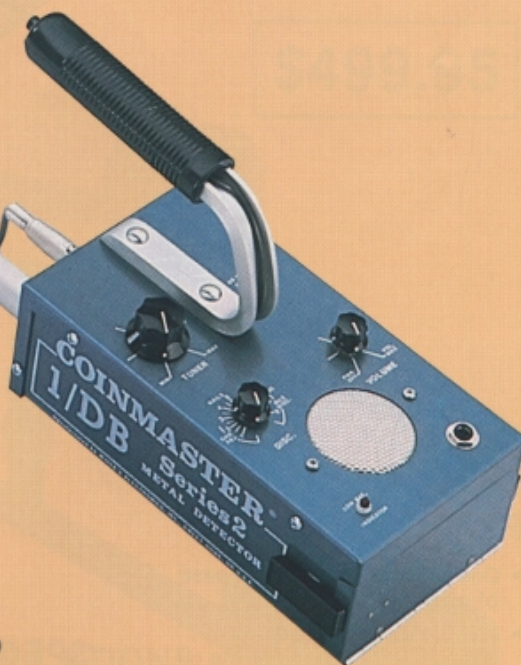

### FEATURES:

- Variable Range Discriminator for distinguishing between "good" and "junk" targets or for cancelling out the effects of mineralized ground
- Discriminator can also be used to reject ground mineralization and the effects of saltwater
- One Turn Tuner control for setting threshold
- Push-Button on the handle retunes the threshold quickly and easily
- Volume control allows user to set desired level of audio tone
- 8" Concentric loop, completely waterproof, with true-center sensitivity for accurate pinpointing
- Detachable loop allows for interchanging of White's 4", 10" and 15" Concentric loops and gold probe for special hunting purposes
- Low Battery Alert light glows when single 9 volt Battery needs replacing
- Clear sounding built-in Speaker
- Headphone Jack for mono headphones

### SPECIFICATIONS:

- Operating frequency: 6.59 Khz
- Weight: 3 lbs. 4½ oz. (Batteries Included)
- Optimum temperature range: 33 - 100° F
- Optimum humidity range: 0 - 75%
- Average depth on 25¢ (with discriminator set to Ground Reject): 6"
- Uses: Coinhunting, Prospecting, Relic Hunting, Beach-combing

PATENTS: U.S. 4293816 U.S. 4030026  
UK 1548239 CDN 1038036

# COINMASTER TR A.G.C. SERIES 2

## USE JUST ONE CONTROL TO FIND IT ALL!

- EASIEST OPERATING DETECTOR EVER MADE
- AUTOMATIC GROUND CANCELLATION SET AT WHITE'S FACTORY
- LOCATES ALL METALS

White's COINMASTER TR with A.G.C. (Automatic Ground Cancellation) is for a novice treasure hunter. It is also great to have on hand as a back-up detector. And, it's an excellent detector for children to learn treasure hunting. This detector will help you find all metals with minimized response to the ground. The COINMASTER TR is the easiest metal detector to use in the field, and, one of the most reasonably priced on the market.

**\$79.95**

## FEATURES:

- One Control for complete ease of operation
- A.G.C. (Automatic Ground Cancellation) minimizes the effects of ground mineralization
- 6" Waterproof Loop, (non-interchangeable)
- Clear sounding built-in Speaker
- Low Battery Alert light glows when 9 volt battery needs replacing
- 9 volt Battery included
- ¼" Headphone Jack for use with mono headphones
- White's lowest priced detector
- Ultra-lightweight

## SPECIFICATIONS:

- Operating frequency: 12.5 KHz
- Weight: 3 lbs. (Batteries Included)
- Optimum temperature range: 33 - 100° F
- Optimum Humidity Range: 0 - 75%
- Average depth on U.S. 25¢: 6"
- Uses: Coinshooting, Prospecting, Relic Hunting, Beachcombing

PATENTS: U.S.4128803

# TREASUREMASTER PI 1000 SERIES 2

DIAMOND RING VALUED  
AT \$10,000 FOUND  
2/26/83 WITH WHITE'S  
PI 1000

**SUPERIOR PULSE INDUCTION PERFORMANCE AND IMPROVED FEATURES MAKE THIS A REMARKABLE UNDERWATER INSTRUMENT.**

- INCREASED DEPTH DETECTION
- NYLON LOWER ROD SECTION FOR DURABLE STRENGTH
- HEADSET ADAPTOR FOR MECHANICAL VIBRATOR
- ADD-ON BALLAST WEIGHT CHANGES BUOYANCY FROM POSITIVE TO NEGATIVE
- 13" ROD EXTENSION FOR LAND HUNTING

SOPHISTICATED ENOUGH FOR PROFESSIONALS, YET SIMPLE ENOUGH FOR HOBBYISTS! There's an underwater world of buried treasure that has been virtually untapped by most treasure hunters. With the proper metal detector, you could be recovering a large quantity of coins, jewelry and artifacts. White's has made the instrument you have been waiting for: the TREASUREMASTER PI 1000. Engineered specifically for searching underwater, Pulse Induction technology makes White's PI 1000 the most usable underwater metal detector available. And the price makes it one of the greatest values available in treasure hunting. Compare this instrument to others costing twice the price!

## FEATURES:

- Performance capability down to a submerged depth of 200 feet
- Single Control: Turns unit ON, checks 6 "AA" batteries, automatically ground balances and tunes instrument
- Unaffected by saltwater and mineralization
- Circuit stability does not drift with changes in depth or temperature!
- Three detection signals: Mechanical vibrator that can be heard and felt and a LED that glows for Visual Indication (visible even in murky waters)
- Detects all metals
- 11" wide search coil with open design allows water to freely pass through
- Adjustable rod from 21" - 31"
- 6 "AA" Alkaline batteries included (nickel cadmium batteries and charger are optional accessories)
- Excellent results in both saltwater and fresh water
- Includes add-on weights to alter buoyancy from positive to negative
- Includes 13" extension rod to adapt unit for land searching
- Includes adaptor so that mechanical vibrator can be worn on the head

## SPECIFICATIONS:

- Operating frequency: 21 KHz
- Weight: 4 lbs. 6 oz.
- Optimum Temperature Range: 32 - 130° F
- Waterproof: Down to 200 feet
- Average depth on U.S. 1\*: 7"
- Audio Transducer: Waterproof Vibrator
- Uses: Especially suited for working in and around saltwater

# ACCESSORIES TO SUPPLEMENT YOUR DETECTOR

## 1. INTERCHANGEABLE CONCENTRIC LOOPS

Water resistant loops add flexibility to White's Series 2 metal detectors, (except the COINMASTER TR). The 4 INCH LOOP is designed for prospecting; detects smaller items at shallower depths. The 8 and 10 INCH LOOPS are general treasure hunting loops; ideal for coinshooting and relic hunting. The 15 INCH LOOP adds maximum depth capability and sensitivity on larger objects; ideal for locating deep treasures and industrial uses.

- 801-3118: 4" LOOP Series 2
- 801-3114-2: 8" LOOP Series 2
- 801-3178: 10" LOOP Series 2
- 801-3117: 15" LOOP Series 2

LOOPS FOR WHITE'S DETECTORS MADE PRIOR TO THE SERIES 2 MODELS

- 801-3111: 15" LOOP (CM 6000/D, 6 D/B & 6 D/B HM)

- 801-3108: 15" LOOP (CM 5000/D)

## 2. HEADPHONES

Headphones add detecting privacy and the ability to distinguish between responses more easily. STANDARD HEADPHONES are mono, only. DELUXE HEADPHONES can be switched between mono and stereo, with L/R volume controls

- 401-0008: DELUXE .....\$23.95
- 401-0116: STANDARD .....\$9.95

## 3. TREASURE HUNTING FIELD GUIDES

Written by successful, professional, treasure hunters. CONSUMER'S GUIDE comes from White's. It has general TH'ing info, technical glossary, and a history about detecting and metal detectors. COINMASTERS JIMMY SIERRA'S INTRO TO G.E.B. COINMASTERS is the finest book on the market for getting the most out of your G.E.B. detector. DIAMONDS IN THE SURF is an excellent guide to water hunting with metal detectors. Written by two of the leading authorities on the subject.

- 621-0219: WHITE'S CONSUMER GUIDE
- 621-0218: JIMMY SIERRA'S FIELD GUIDE
- 600-0184: DIAMONDS IN THE SURF

## 4. TREASURE HUNTING APPAREL

White's BASEBALL CAP with logo. Adjustable headband fits adults and adolescents. White's high quality WINDBREAKER or QUILTED JACKET. Colorful White's TH'er T-SHIRT. (Specify sizes - Adults & Childrens.)

- 801-1111: BASEBALL CAP
- 602-1088: SMALL WINDBREAKER
- 602-1089: MEDIUM WINDBREAKER
- 602-1090: LARGE WINDBREAKER
- 602-1091: X-LARGE WINDBREAKER
- 602-1079: SMALL QUILTED JACKET
- 602-1080: MEDIUM QUILTED JACKET
- 602-1081: LARGE QUILTED JACKET
- 602-1082: X-LARGE QUILTED JACKET
- 602-1093-01 thru 04: SMALL-XLARGE ADULTS T-SHIRTS
- 602-1093-08 & 09: 8 & 12 CHILDS T-SHIRTS

## 5. SAND SCOOP FOR WATER HUNTING

Yellow, molded plastic scoop with built-in handle. The holes are 1/2" wide to let sand and mud filter through, leaving behind valuables.

- 801-0045
- 6. TREASURE HUNTER'S APRON
- Trash and treasure pockets. Made of machine washable canvas for long use. (Not pictured).
- 801-0024

## 7. DIGGING KNIVES

STEEL COMBAT styled knife with 7 1/8" long, 1 1/4" wide, blade. Comes with leather sheath. SKINDIVER styled knife with 7 1/2" long, 1 1/4" wide stainless steel blade. Has serrated cutting edges, rubber sure-grip handle and rubber sheath with ties for securing it to your lower leg.

- 801-0044: COMBAT KNIFE
- 801-0046: SKINDIVER'S KNIFE

## 8. VINYL DETECTOR BAG

A specially designed vinyl bag to hold detector and accessories, emblazoned with White's logo. Fits all White's detectors. Specify handheld or hipmount.

- 801-1050: HANDHELD
- 801-1079: HIPMOUNT

## 9. SHOCK PROOF CARRYING CASE

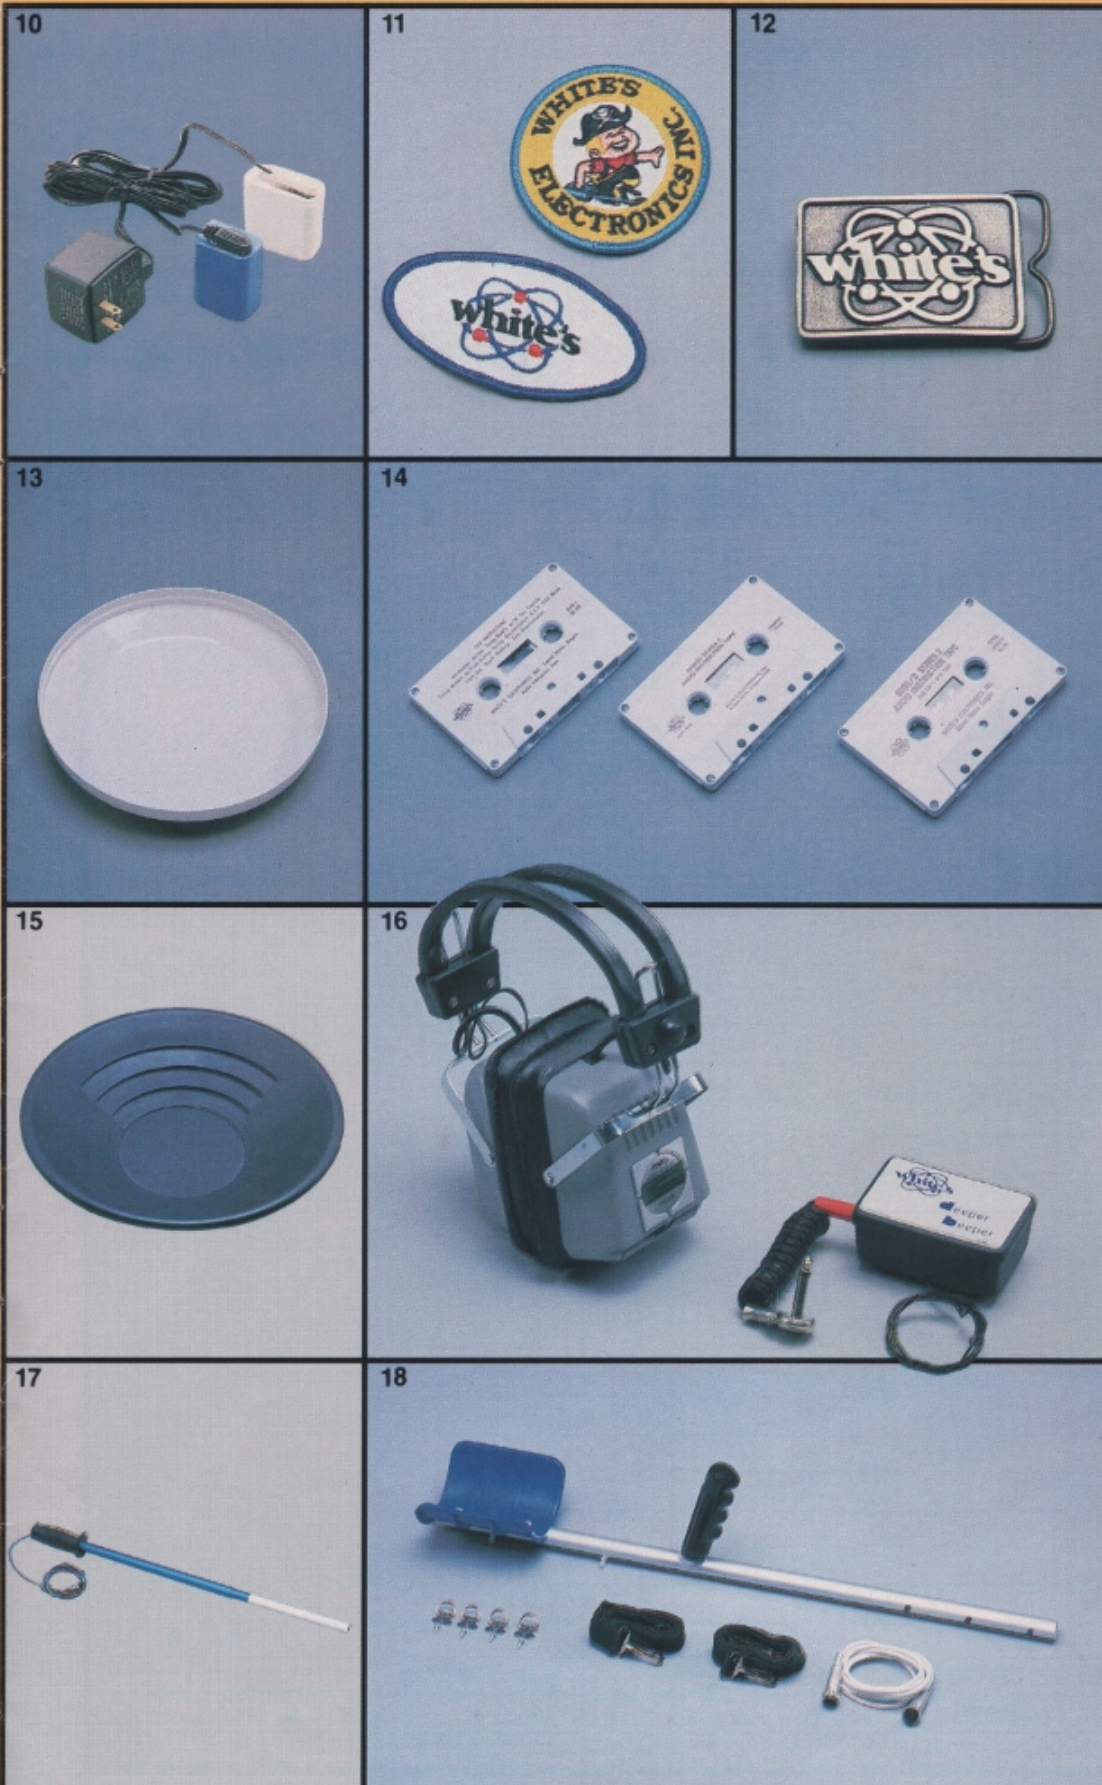

Made of high-density plastic, this rugged case protects your detector in even the toughest conditions. Designed especially for White's. For handheld models only.

- 801-1078

DETECTORS AND ACCESSORIES ARE AVAILABLE FROM AN AUTHORIZED DISTRIBUTOR, DEALER OR SERVICE CENTER, ONLY. WHITE'S DOES NOT SELL DIRECTLY FROM ITS FACTORY. TO PLACE AN ORDER, PLEASE CALL OR VISIT YOUR NEAREST WHITE'S DISTRIBUTOR OR DEALER. # COINHUNTING: FOR FUN AND PROFIT

Many treasure hunters specialize in coin hunting because it can be done successfully anywhere — even in your own backyard! Most coins are found within the top 4" of dirt and the ground does not badly affect their condition (although pennies do

get corroded). This makes coin hunting a great way to begin, or add to, a coin collection. Silver coins may need polishing, but gold coins will be as bright as the day they were lost. It is still possible to recover coins minted before 1964, and these coins are

particularly valuable because of their 90% silver content. Many treasure hunters save the silver coins and spend the "clad" coins on their hobby. In this way, metal detectors pay for themselves!

# RE-DISCOVER THE PAST

U.S. BELT BUCKLE

Wherever people lived, fought, gathered or traveled, there are remains left behind. Old stage stops, campsites along the Oregon trail, battle grounds from the Civil War, ghost towns and homesteads — these

places can provide you with relics from our ancestors. Research will help you decide where to look, and when you find something, research will help you to learn about what you've recovered! Relic hunting

is a wonderful way to discover more about history, and metal detectors help make that history come alive.
