

1984-

Adrian Woods located 48 gold nuggets in just one year with his White's metal detector.

This rare 8 Escudo, gold Spanish coin, was found with White's PI 1000 off the Florida coast.

White's PI 1000 is excellent for both salvage diving and surf hunting.

White's Super Series 3 Metal Detectors

A Message from the White's

Kenneth G. and Olive White

Kenneth R. White

Greetings:

We are proud to present White's Electronics' Series 3 catalog. We now have a wider range of metal detectors and accessories than ever before. These include the finest instruments available for coin hunting, prospecting, beachcombing, relic hunting and treasure hunting. They also include the finest instruments for personal search (concealed weapons), underwater salvaging, industrial (pipe and cable locating), and cache hunting. For more than 30 years, White's has dedicated itself to developing and building the most sophisticated metal detecting equipment possible. No other company has done more for treasure hunters worldwide than White's Electronics. We've listened to you and we've worked hard. Now, we take great satisfaction in saying that our product will meet your metal detecting needs. Compare our instruments for quality, performance, reliability and price. You'll find none finer.

White's primary factory is located in Sweet Home, Oregon. But we also have a factory at In-

verness, Scotland. Both facilities meet the same high standards for material and workmanship, and each has an excellent research and development department. Together, the Oregon and Scotland factories are able to provide the finest metal detectors to the entire free world. And, they give White's the opportunity to educate all treasure hunters in safe recovery techniques, the importance of obeying laws, and of the need to band together to promote the hobby to the general public.

At White's, we have always stressed two things: outstanding performance and exceptional quality. Innovations in how the detectors operate have also been made. For example, some of the Series 3 instruments feature  PRESET controls. This means that anyone can operate the most sophisticated metal detectors available... without even reading the instruction manual! As the metal detectors of tomorrow are designed, White's will lead the way to greater depth detection, more accurate means of target discrimination, and easier operation.

You can count on getting the finest detectors from White's because many of the people at White's are treasure hunters. Our commitment to quality is evident in the success that these instruments generate in the field. Over the years, millions of dollars worth of lost or buried treasure have been recovered with White's metal detectors.

Everyone at White's is proud to have you consider this line of Series 3 metal detectors. They are built to help you find all the treasure you've ever dreamed of.

We're sure you'll agree that White's Electronics makes the finest metal detectors in the world.

Thank you for your interest.

Kenneth G. White
President

Kenneth R. White
Vice President

Research and Development

In store demonstrations are an important part of the service offered by White's authorized local dealers.

Call Toll Free 1-800-547-6911 for Your Nearest White's Dealer

(7 a.m. - 4 p.m. PST, Mon. - Fri.)

(In Oregon call:

367-2138 Opr. #54)

(In Canada Call Toll Free:

1-800-361-0170 Opr. #168)

White's has a nationwide network of authorized dealers to service its customers. These dealers are trained by factory representatives and their regional distributor to help you with all your treasure hunting needs. They can demonstrate White's line of detectors and help in selecting the right one for you. They can show you how to use your choice and explain which accessories will give the best results under special conditions. You will appreciate their service after the sale, too. If you have any detector trouble, or if you want more information on the subject of metal detecting, your nearest authorized White's dealer is the place to go!

A White's metal detector is built to give you many years of use, and we are committed to providing the service necessary to keep your unit in the field detecting treasure. This service is available through a nationwide system of service centers. White's authorized service centers use factory trained technicians and sophisticated test equipment to keep repair time to a minimum. If you have a problem with your detector, you simply take it to your dealer. He will check it out and determine if it needs servicing. If it does, your dealer will send the detector to a White's service center for repair. It will then be returned to your dealer. This is the most efficient and complete system in the metal detector industry. And it's designed to keep your White's metal detector operating at peak performance, with the least amount of inconvenience to you.

White's authorized dealers are ready to help you with all your treasure hunting needs. For sales, service and TH'ing advice, see a White's dealer first.

These boats are research and recovery vessels used by the White's staff in Florida.

Ken R. White in Florida

White's Electronics maintains an engineering staff that ranks at the top of the metal detection industry. White's owns more patents than any company in this field, and we are at the forefront in developing our industry's most advanced technology. But our research and development isn't limited to the lab. White's uses an instrument under actual field conditions across the U.S. This assures the consumer that the detector is operating at peak performance before it is introduced to the market.

To facilitate its own field testing, White's has a treasure hunting operation managed by company Vice President, Ken White, Jr. The "testing grounds" are in the State of Florida, along the Gold Coast. Before the public gets to use a new White's metal detector, it gets put to the test of finding treasure in an area that has some of the best treasure hunting in the world!

White's not only builds the world's finest metal detectors—they use them with great success, too!

COINMASTER® 6000/Di Series 3

The Finest Metal Detector in the World.

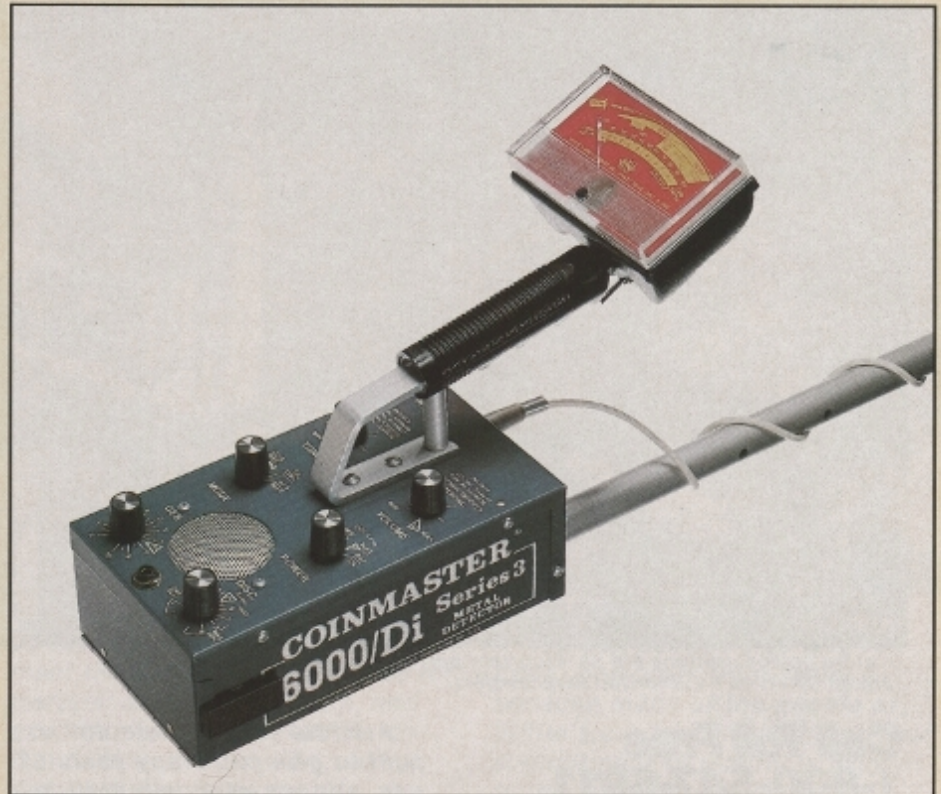

The 6000/Di has all of the latest technological developments you need for successful treasure hunting. Its Visual Discrimination Indicator (VDI) gives the probable identity of objects in the ground so you'll know what you're detecting before digging. For instance, you can distinguish between a pull tab and a quarter by looking at the needle indicator on the meter. Once you've decided a target is worth digging, the meter can be switched to indicate Depth Reading on a coinsized object. This means you minimize the chances of hitting and marring a valuable object while recovering it.

While it's helpful to identify a target and its depth before digging, these features will never replace the importance of getting maximum depth. And that's where the 6000/Di Series 3 really shines! Its depth capability is greater than any other detector on the market. You get superior depth penetration to find those older targets which may be deeply buried... those targets that can be the most valuable and desirous to find! When you combine the 6000/Di's exceptional depth detection with its ability to Visually Discriminate in all four modes, you've got a detector that can make treasure hunting very profitable.

Visual Discrimination Indicator (VDI): Meter shows the probable identity of a target in all 4 modes.

Depth Reading: Probable depth reading to 9" and deeper on coinsized objects. Detection and pinpointing possible to several feet.

Preset ∇ : When set to these positions, the detector will operate well under average conditions.

Trigger: Fingertip squeezing regains threshold, switches between modes, and switches the meter from Visual Discrimination to Depth Reading.

4 Modes of Operation:

1. GEB/NORM: Detects all metals while neutralizing the effects of ground mineralization.
2. GEB/DISC: Distinguishes between desirable and undesirable targets while neutralizing the effects of ground mineralization.
3. TR/DISC: Distinguishes between desirable and undesirable targets but does not neutralize the effects of ground mineralization, for discriminating in places where the loop can't be swept; searching in saltwater; and searching in areas with low mineralization.
4. GEB/MAX: Detects all metals while neutralizing the effects of ground mineralization.

Rechargeable Battery

System: Rechargeable Nickel Cadmium battery pack slides into battery compartment and doesn't need connecting wires. Batteries can be recharged up to 1,000 times and may be recharged in or out of the unit. Charger included. Back-up battery pack with 4 alkaline "C" cells are also included.

VDI Sensitivity: Power switch has Low and High position for setting the sensitivity of the meter.

VDI Reading: One sweep usually sets the VDI meter reading.

8" Concentric Loop: Waterproof and interchangeable.

Beefed-up Audio Signal Gives Quick, Loud, Tone

**Slow Sweep Speed
Increased Sensitivity
Excellent Balance
Simplified Instructions**

Price: \$599.95

Series 3 Special Features

†Visual Discrimination Indicator

Know what you're detecting, before digging! White's Visual Discrimination Indicator (VDI) is represented by four scales on the meter. These scales can help with the probable identification of targets. For example: When a nickel is detected in the ground, the needle indicates "nickel" on the meter. White's advanced system of Visual Discrimination operates in all 4 modes independently of the audio signal. And, White's VDI is the most reliable and accurate visual discriminating system available. (Note: The audio detection depth of the 6000/Di Series 3 is greater than its visual discriminating depth.)

*PRESET

Anyone can operate the world's finest metal detector - even before reading the instructions! PRESET helps everyone use this sophisticated instrument to find treasure under average conditions. But White's left the controls on the Di Series 3 so the detector can be fine-tuned for special search conditions.

**S.A.T. (Self Adjusting Threshold)

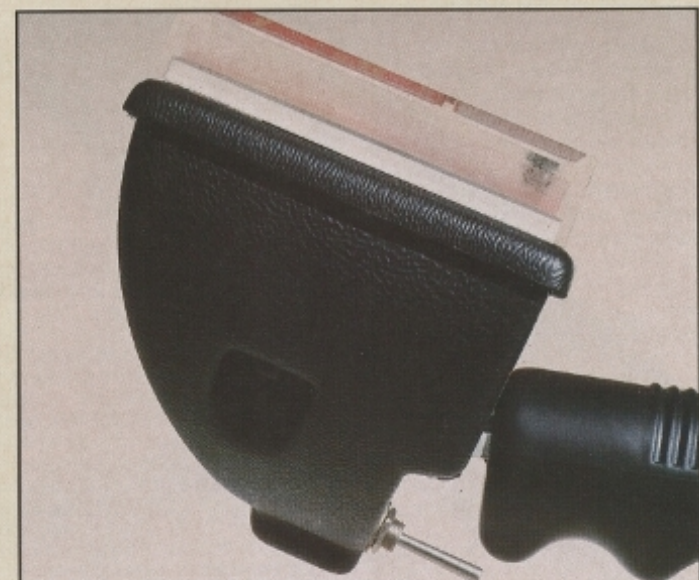

S.A.T. automatically performs a reset function to maintain an optimum threshold tone over all kinds of terrain. It's an automatic feature that makes locating treasure easier! A very useful addition to an already great line of detectors.

***Trigger/Meter

For ease of operation, the trigger is located beneath the handle. Just a squeeze of the trigger switches modes and retunes. (On the 6000/Di it also switches from VDI to Depth Reading on the meter.) Push the trigger forward and it locks into place. The large 4½" meter on the handle is easy to read and its position creates excellent overall balance.

The following chart illustrates the functions of the TRIGGER for the 6000/Di Series 3 only.

MODE SWITCH	TRIGGER NORMAL		TRIGGER SQUEEZED IN	
	OPR MODE	METER	OPR MODE	METER
GEB NORM	GEB NORM	VDI	GEB DISC	DEPTH
GEB DISC	GEB DISC	VDI	GEB NORM	DEPTH
TR DISC	TR DISC	VDI	GEB MAX	DEPTH
GEB MAX	GEB MAX	VDI	GEB DISC	DEPTH

†This feature is found on White's 6000/Di models only.

*This feature is found on White's 6000/Di, 6000/D and 5000/D Series 3 models.

**This feature is found on White's 6000/D, 5000/D and 4000/D Series 3 models.

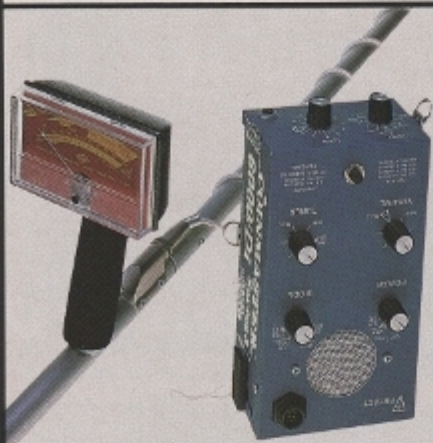

***This feature is found on White's 6000/Di, 6000/D, 5000/D, and 4000/D Series 3 models.

GREATER DEPTH T

Excellent For Coinhunting ■ Prospecting ■ Relic Hunting

**COINMASTER HIPMOUNT
6000/Di Series 3 \$679.95**

4 1/2 INCH METER MOUNTED ON THE PROBE MAKES THIS HIPMOUNT THE MOST PRACTICAL WAY TO FIND TREASURE.

The hipmount takes the weight off your probe and puts it around your waist so you can treasure hunt in comfort for hours.

EXCITING NEW DESIGN: With the same features as the Di Series 3 handheld

CONTROLS: Labeled for easy reading

AUXILIARY PUSH BUTTON: On the control box for easy re-tuning

GEB AND DISC CONTROLS: Located on top of control box for easy adjustment

METER ON THE HANDLE: Lets you see VDI and depth reading while you hunt

AVAILABLE: Summer, 1984

**COINMASTER
6000/D Series 3 \$499.95**

RECOVER TREASURE WITHOUT DAMAGE WITH ACCURATE DEPTH READING.

For years, serious treasure hunters have regarded the 6000 Series of metal detectors to be among the BEST White's made. The 6000 Series 3 is even better now! It has great depth and flexibility. And, it discriminates while balancing out mineralization.

DEPTH READING: Know the depth of coin-sized targets!

PRESET: Everyone can use this detector, EVEN WITHOUT READING THE INSTRUCTIONS

TRIGGER SWITCH: Activates Depth Reading, changes modes and retunes

S.A.T.: SELF ADJUSTING THRESHOLD automatically maintains a stable threshold

4 1/2 INCH METER: Easy to Read; creates excellent overall balance

EFFICIENT BATTERY SYSTEM: 4 "C" cell battery pack; Nickel Cadmium battery pack and charger included

FOUR MODES: GEB/NORM, GEB/DISC, TR/DISC, GEB/MAX

**COINMASTER
3000/D Series 3 \$199.95**

HIGH PERFORMING TR DISCRIMINATOR WILL FIND TREASURE WITH EASE!

For efficient treasure hunting, the 3000 Series 3 allows you to distinguish between desirable and undesirable targets OR, balance out ground mineralization. This is an excellent TR instrument with features similar to those found on White's higher-priced models.

PUSH BUTTON RETUNING: Simply press and release to regain threshold tone

1 1/2 INCH METER: Shows signal intensity

GROUND ADJUSTMENT CONTROL: Sets the detector's sensitivity to ground mineralization

POWER SUPPLY: 9 Volt battery, NICKEL CADMIUM battery and charger included

MODE: TR Discriminate

LOW BATTERY ALERT: Light glows when battery needs replacing

**COINMASTER
2000/D Series 3 \$139.95**

WHITE'S LOWEST PRICED TR DISCRIMINATOR.

The 2000 Series 3 makes treasure hunting fun and profitable! It allows you to distinguish between desirable and undesirable targets, OR, balance out ground mineralization. A super detector for getting involved in treasure hunting!

PUSH BUTTON RETUNING: Simply press and release to regain threshold tone

POWER SUPPLY: 9 Volt battery

MODE: TR Discriminate

LOW BATTERY ALERT: Light glows when battery needs replacing

HAN EVER BEFORE!

nting ■ Beach and Surfing ■ Treasure Hunting

white's **COINMASTER 5000/D Series 3** \$399.95

MANY FEATURES OF WHITE'S TOP OF THE LINE DETECTOR AT A MODERATE PRICE.

If you're a serious treasure hunter and want the depth and flexibility to find treasure wherever it is, the 5000 is for you. It discriminates while balancing out mineralization so you get maximum depth and minimum junk!

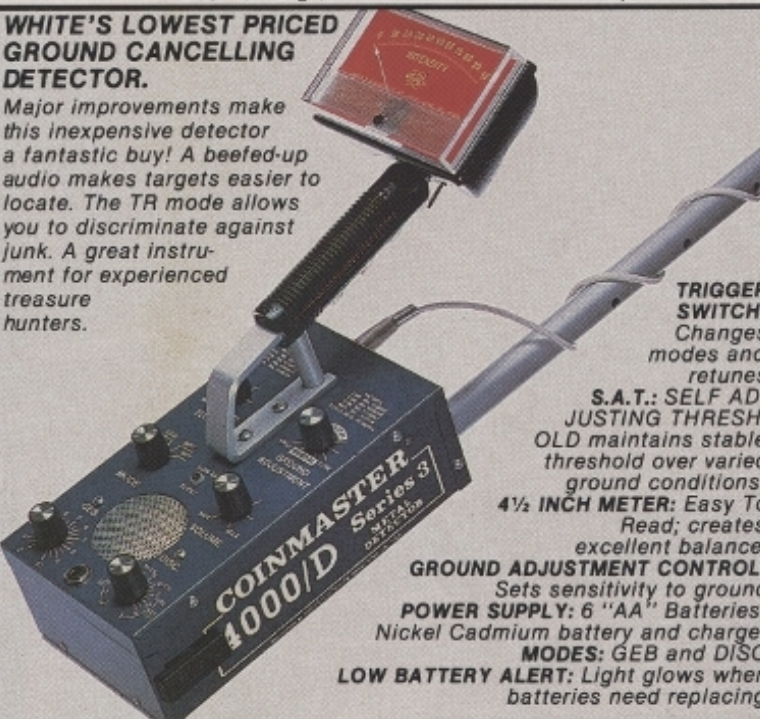

PRESET: Everyone can use this detector, **EVEN WITHOUT READING THE INSTRUCTIONS.**
TRIGGER SWITCH: Changes modes and retunes
S.A.T.: SELF ADJUSTING THRESHOLD maintains stable threshold over varied ground conditions.
4 1/2 INCH METER: Easy To Read; creates excellent balance
EFFICIENT BATTERY SYSTEM: 4 "C" cell pack; Nickel Cadmium battery and charger
FOUR MODES: GEB/NORM, GEB/DISC, TR/DISC, GEB/MAX

white's **COINMASTER 4000/D Series 3** \$289.95

WHITE'S LOWEST PRICED GROUND CANCELLING DETECTOR.

Major improvements make this inexpensive detector a fantastic buy! A beefed-up audio makes targets easier to locate. The TR mode allows you to discriminate against junk. A great instrument for experienced treasure hunters.

TRIGGER SWITCH: Changes modes and retunes
S.A.T.: SELF ADJUSTING THRESHOLD maintains stable threshold over varied ground conditions.
4 1/2 INCH METER: Easy To Read; creates excellent balance.
GROUND ADJUSTMENT CONTROL: Sets sensitivity to ground
POWER SUPPLY: 6 "AA" Batteries, Nickel Cadmium battery and charger
MODES: GEB and DISC
LOW BATTERY ALERT: Light glows when batteries need replacing

white's **COINMASTER 1000 Series 3** \$99.95

WHITE'S EASIEST TO OPERATE DETECTOR. ONE CONTROL FINDS IT ALL!

This is a great detector for someone just getting interested in treasure hunting. It locates all metals while automatically cancelling out ground mineralization. It's also perfect for use in treasure hunts, or as a back-up unit wherever you go!

ONE TURN TUNER: Sets threshold tone and volume; that's all there is to finding ALL METALS
AUTOMATIC GROUND CANCELLATION: Factory set for your convenience
POWER SUPPLY: 9 Volt Battery
MODE: TR
LOW BATTERY ALERT: Light glows when battery needs replacing
VERY LIGHT WEIGHT: Everyone can use it!

white's **TREASUREMASTER® PI 1000** \$499.95

A PULSE INDUCTION UNIT THAT CAN'T BE BEAT FOR SURF HUNTING OR SALVAGING DOWN TO 200 FEET!

The PI 1000 outperforms other underwater metal detectors . . . even those costing twice the price! The PI balances out salt and mineralization to detect even small objects at remarkable depths.

3 DETECTION SIGNALS: Mechanical vibrator to (1) hear and (2) feel, plus an LED to (3) see.
SINGLE CONTROL: Checks batteries, tunes and detects
POWER SYSTEM: 6 "AA" Alkaline batteries
ACCESSORIES: Extension rod, ballast weight, and headphone adaptor included
PULSE INDUCTION: Detects all metals

Accessories

1. Treasure Hunting Apparel

Show your spirit and treasure hunt comfortably in T-Shirts, Jackets and Caps from White's Electronics. The T-Shirts are soft and colorful. You have a choice between a lightweight Windbreaker, or a warm Quilted Jacket. The Baseball Cap has a foam front and nylon mesh back. There are sizes to fit everyone, and a White's logo to show that you treasure hunt with the finest equipment. (Specify sizes: Adult or Child)

602-1093	01 - 04 SMALL-XLARGE ADULT T-SHIRT	\$ 5.95
602-1093	08 - 09 SMALL-LARGE CHILD T-SHIRT	5.95
602-1088	SMALL WINDBREAKER	17.95
602-1089	MEDIUM WINDBREAKER	17.95
602-1090	LARGE WINDBREAKER	17.95
602-1091	X-LARGE WINDBREAKER	17.95
602-1079	SMALL QUILTED JACKET	29.95
602-1080	MEDIUM QUILTED JACKET	29.95
602-1081	LARGE QUILTED JACKET	29.95
602-1082	X-LARGE QUILTED JACKET	29.95
601-1111	BASEBALL CAP	4.95

2. Headphones

Add privacy to your search and allow you to distinguish between responses more easily. They also reduce battery drain. The Deluxe Headphones (shown) can be switched between mono and stereo and have left/right volume controls. The Standard Headphones (not shown) are mono only, with volume controls.

401-0008	DELUXE HEADPHONES	\$23.95
401-0116	STANDARD HEADPHONES	12.95

2 a. Deeper Beeper

Also shown is the Deeper Beeper Generation 2. This small FCC approved transmitter attaches to all White's detectors and broadcasts the threshold tone to cordless FM radio headphones, (not included). The Deeper Beeper frees you from entangling cords and amplifies the detector's tone so you can hear weaker signals more easily.

601-1081	DEEPER BEEPER GENERATION 2	39.95
----------	----------------------------	-------

3. White's Belt Buckle and Logo Patches

White's official belt Buckle and Cloth Patches. Treat yourself to this high quality solid brass Buckle. It fits most wide belts. (Belt not included). These colorful Patches add distinction to any shirt or jacket, and they're machine washable.

601-0022	BELT BUCKLE	\$ 9.95
624-0048	WHITE'S PIRATE PATCH	2.00
624-0049	WHITE'S LOGO PATCH	2.00

4. Digging Knife and Gold Pan

This heavy duty Digging Knife has a 7½" long, 1¼" wide stainless steel blade. Its rubber handle gives a sure grip. The blade is marked off in inches, and has a serrated edge. It's suitable for surf hunting and diving because it's completely waterproof and comes with a rubber sheath that can be tied to your lower leg. The Gold Pan has a 15 inch diameter and is made of sturdy blue plastic so black sand and traces of gold can be easily seen. It has riffled edges for trapping the gold and sand.

601-0046	DIGGING KNIFE	\$24.95
601-0151	GOLD PAN	5.95

5. Water Rod Assembly Kits

When you're ready to recover treasure from the surf and shallow water, convert your detector for water hunting. This probe is totally submersible with 8" loop and 10' cable included. The 6000/Di Series 3 Hipmount kit features a rod without meter.

602-5003-1	MODELS W/5 PIN PLUGS	\$99.95
603-5003-2	DI SERIES 3 HIM ONLY (9 PIN)	99.95

6. White's Carrying Cases

White's offers a variety! The Universal Vinyl Bag accommodates all of White's instruments, including Series 3. Hipmounts require additional snap-in pouch. For handheld Series 2 models, we offer the Blue Shock Proof Carrying Case. It's made of high density plastic and will protect your detector in the roughest conditions. The Black Hard Carrying Case will fit all Series 3 instruments, including the hipmounts. It's durable enough to protect your detector when the going gets tough.

601-0047	UNIVERSAL HANDHELD VINYL BAG	\$19.95
601-0048	UNIVERSAL HIPMOUNT VINYL POUCH	8.95
801-1078	BLUE SHOCK PROOF CARRYING CASE	29.95
801-1048	BLACK HARD CARRYING CASE Series 3	29.95

7. New Compact Hipmount Conversion Kit

Convert handheld models into hipmounts! This conversion kit utilizes the lower rod assembly of your handheld unit, and it fits in the Black Hard Carrying Case. Kits are available for your model of White's detector. Check with your dealer for the proper fit.

802-5002	COMPACT HIPMOUNT CONVERSION KIT	\$39.95
----------	---------------------------------------	---------

8. Treasure Hunting Field Guides

These books are written by professional treasure hunters to help increase your TH'ing success. Jimmy Sierra's *INTRO TO G.E.B. COINMASTERS* is the finest book on the market for getting the most out of your G.E.B. detector. Bob Trevillian and Frank Carter now have two books on the subject of water hunting: *DIAMONDS IN THE SURF*, and *DIAMONDS IN THE SURF/THE SECOND ADVENTURE*. These two share the secrets to water hunting success that has earned them a fine reputation nationwide. *FOUND* is a collection of articles written by Patrick Smid to instruct and inspire treasure hunters. Whether you're a beginner or a professional TH'er, you'll understand more about the hobby and yourself after reading this enjoyable book.

Accessories

On this page you may find the various loops, batteries, and battery chargers that White's Electronics carries for their instruments. However, not all of our accessories are listed here. Please see your nearest authorized dealer for any other accessories you may need for your instruments.

Interchangeable Loops:

White's offers interchangeable loops for all its Series 3 and Series 2 metal detectors with 5 pin plugs. (This excludes the CM TR Series 2, 1000 Series 3, and PI 1000 models.) These are the patented Concentric loops with the following features:

The 8" loop comes standard with all Series 3 detectors (except the 1000 and PI 1000). It is designed for general treasure hunting situations and is especially useful for coin hunting.

The 4" loop is designed to detect small objects with greater accuracy than the 8" loop, and at shallower depths. It is ideal for prospecting and for coin hunting in areas with a heavy amount of junk.

The 10" loop is also designed for general treasure hunting. It gets greater depth than the 8" loop but still has a remarkable

capability of detecting objects the size of a coin.

The 15" loop is designed to detect large objects at greater than normal depths. It is an excellent loop for relic or cache hunting.

By selecting the best loop for your treasure hunting needs, you may effectively increase the accuracy of your search or increase the depth detection of your detector.

Specialty Detecting Equipment

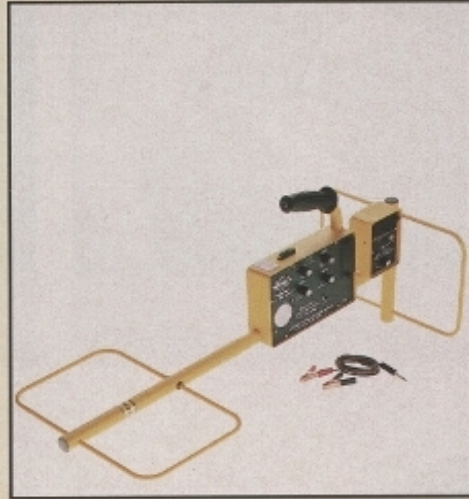

Security Metal Detectors

White's makes three metal detectors for use in situations where individuals need to be searched for security reasons.

- 1 Push Button turns unit ON/OFF: Automatic tuning.
- Green LED glows when unit is ready to operate; Distinctive "chirping" sound loudly indicates the presence of metal.
- Sophisticated circuitry is unaffected by environmental metal, broadcast transmissions or electrical fixtures in surrounding area.
- High impact plastic is shock resistant.
- Water and dust resistant.
- 10 hours continuous use with 9 volt Alkaline battery.
- Easy to use; Very Reliable.
- Accessories available.

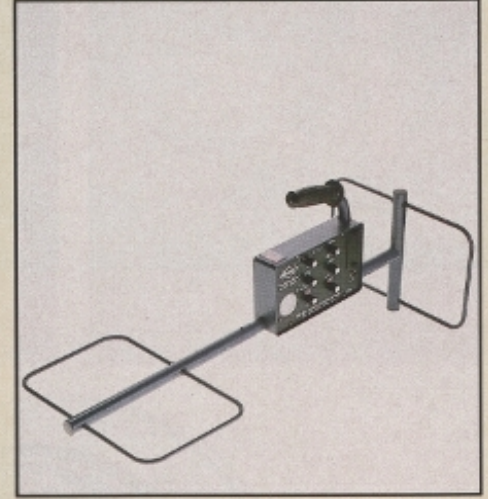

1. **SMD 14: Designed for facility use: \$119.95**
2. **SMD 18: Designed for street use: \$129.95**
3. **SEARCHMASTER:Pocket Security Detector: \$99.95**

Pipe & Cable Locator

White's PCL 400 is designed to locate and trace pipes and cables in the ground at depths from several inches to several feet.

- 2 boxes full of detection electronics.
- Ground Reject control balances out ground mineralization for use in wide range of ground conditions.
- Transmit coil can be separated from unit to induce signal into a pipe or cable for accurate tracing.
- Push Button allows for retuning to preset calibrations.
- Top mounted meter shows signal intensity, checks battery strength.
- Bubble level for use in Trace Mode to make accurate depth measurements.
- Two 9 Volt battery packs each contain 6 "AA" batteries for 20-40 hours of continuous use.
- Solid aluminum frame makes for rugged field use; snap-together frame makes for easy storage.
- Price: \$649.95

Cache Locator

Use the Treasuremaster 600 when looking for larger than coinsized metal objects at depths greater than two feet!

- Ground Reject control balances out ground mineralization for the best detection of ferrous and non-ferrous metals.
- Push Button control retunes to preset calibrations.
- Electronic Nulling allows the operator to detect non-metal items (such as cavities or depressions in the earth).
- Top mounted meter shows signal intensity and checks battery strength.
- Sensitivity control allows operator to adjust depth of detection.
- Solid aluminum frame for rugged field use and snap-together construction for ease of storage.
- Single 9 volt pack contains 6 "AA" batteries for 20-40 hours of continuous use.
- Price: \$599.95

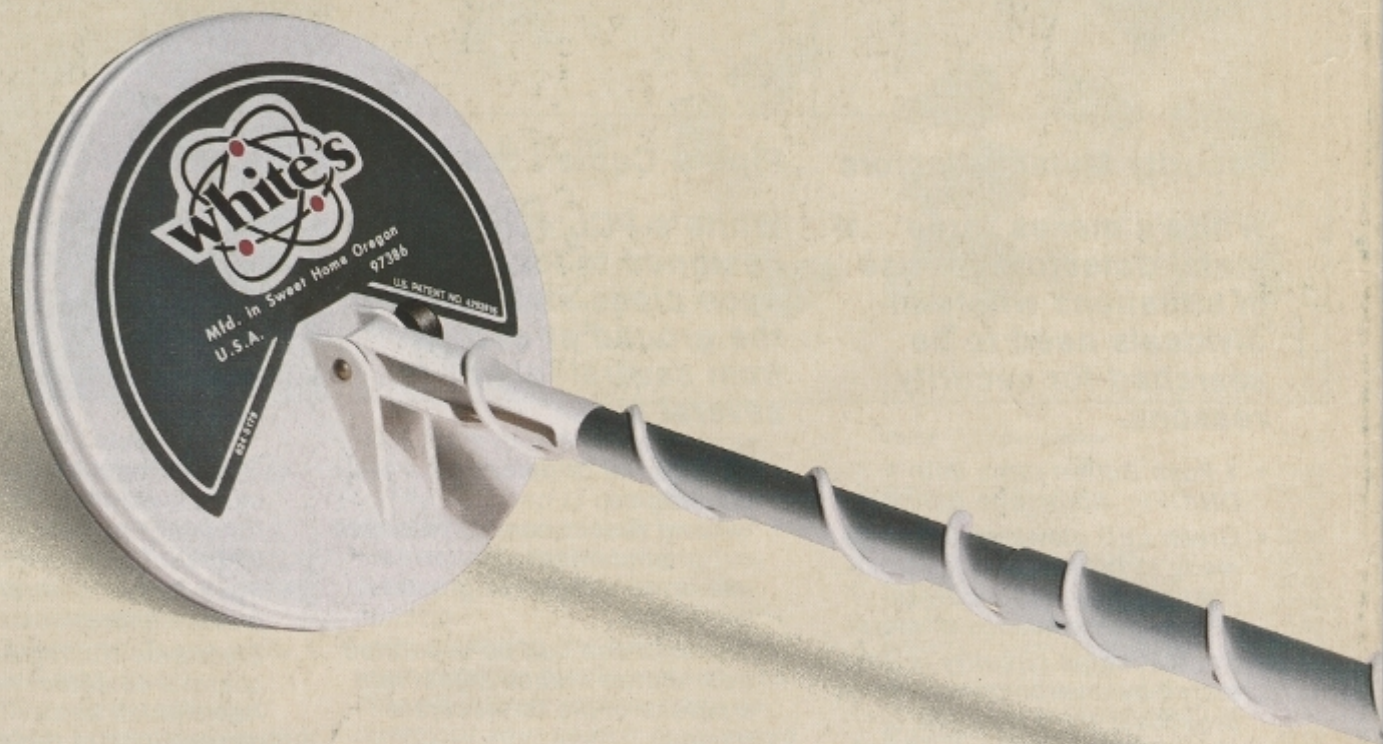

Leo Bohling uses a PI 1000 and has brightened many a vacation by locating and returning lost valuables in Hawaii.

A handful of silver coins, one dating back to 1776, rewarded Mike Bowers and Jerry Culver for a day's search.

Treasure hunting on the site of a toll gate in Oregon, Diana Dugger located historical relics along with old coins.
