# The PRO'S from white's.

## 6000/Di™ Pro

The first detector with True Automatic Ground Balance. Auto GEB with AutoTrac™. Exclusively from White's. Pro users say it's the most sensitive, deepest detecting machine they've ever used!

- Auto GEB with AutoTrac™ - Not a factory set ground adjustment. Auto GEB sets the Di™ for a specific ground condition. With just the flip of a switch, AutoTrac™ samples the ground each time you sweep the loop and electronically resets for maximum depth
- VDI - Visual Discrimination Indication lets you know what you've detected before you dig!
- Depth Reading - Indicates depth of coinsized objects to 9" and deeper
- Sensitivity Control - More usable depth. With the Pro, there's no such thing as a worked out area
- Rechargeable Battery System with Charger
- PRESET ∇ - For the easiest operation
- Four Modes for Total Flexibility
- Hipmount Conversion Kit Available
- \$649.95 Suggested Retail

## 5900/Di™

A value-packed proven combination of features. One of the best detector buys on the market for all around treasure hunting with top performance.

- VDI - Visual Discrimination Indication lets you know what you've detected before you dig!
- Depth Reading - Indicates depth of coinsized objects to 9" and deeper
- PRESET ∇ - For the easiest operation
- Trigger Switch - Switches between modes, switches between VDI and Depth Reading, and retunes
- Slow Sweep GEB/Motion Discrimination
- GEB/NORM, GEB/DISC, TR/DISC, GEB/MAX
- \$459.95 Suggested Retail

## 4900/D

Designed by Pro's for working in difficult soil conditions. An all guts detector with full depth, plus the ability to cancel extreme ground mineralization in All Metals or DISC.

- Sensitivity Control - Adjust for maximum depth soil conditions will allow
- 10-Turn Ground Balance - Easier tuning and more control in extreme ground conditions. Fine tune while ground balancing with the Double Stacked Tuner
- Null Bands - On GEB and DISC controls
- PRESET ∇ - For the easiest operation
- Self-Adjusting Threshold (S.A.T.)
- Detailed Instruction Manual
- \$299.95 Suggested Retail

## 3900/D

Just two controls for super simplicity plus GEB/Motions Discrimination. And More!

- Two Modes - GEB/NORM and GEB/DISC
- Trigger Switching
- Self-Adjusting Threshold (S.A.T.) - Maintains stable threshold over varied ground conditions
- PRESET ∇ - For the easiest operation
- Full Deep Detection Capability
- \$289.95 Suggested Retail

# The 6000/Di Professional

## The Brand New Di Pro Featuring:

**VISUAL DISCRIMINATION INDICATOR (VDI):** Know what you're detecting before digging! V.D.I. indicates the probable identity of targets: Gold, Silver, Coins, Iron, Pull Tabs, and Foil.

**AUTOTRACK:** Adjusts electronically to ground conditions. Manual ground tuning is a thing of the past!

**DEPTH READING:** Know the depth of a coinsized target before digging! Aids in pinpointing, helps recover objects safely.

**PRESET:**  Everyone can use this detector, EVEN WITHOUT READING THE INSTRUCTIONS: PRESETS the detector for use under normal conditions.

**TRIGGER SWITCH:** Electronic switching at your fingertip; changes modes, switches meter from Visual Discrimination to Depth Reading, and retunes detector.

**INCREASED DEPTH:** Sensitivity control for maximum depth. More **usable depth** than ever before!

**4 1/2 INCH METER:** Easy to read; mounted on the handle for easy viewing of important V.D.I. and Depth Reading; position creates excellent overall balance.

**RECHARGEABLE BATTERY SYSTEM:** Nickel Cadmium batteries can be recharged up to 1000 times. Charger included. Back-up battery pack for alkaline "C" cells.

**GEB/NORM:** Detects all metals while neutralizing ground mineralization.

**GEB/DISC:** Discriminates against junk while neutralizing ground mineralization.

**TR/DISC:** Discriminates against junk OR rejects ground mineralization.

**GEB/MAX:** Detects all metals while neutralizing ground mineralization. (Detects 33% deeper than GEB/NORM.)

**\$649.95**

**Suggested Retail Price**

# INTRODUCING Automatic Ground Balance

## With "AutoTrack"

With just the flip of a switch, the Di Pro adjusts automatically to the ground conditions and any changes to maintain maximum depth. As you sweep the loop AutoTrack monitors even slight changes in ground mineralization and electronically resets the detector for maximum sensitivity and depth. You get the best detector performance, no matter what the conditions.

No more knob twisting to set or maintain ground balance. White's unique dual-function AutoTrack control operates automatically, or locks in a specific condition. No other detector gives you this much simplicity yet flexibility!

(White's decided a long time ago that we would not use the term "automatic" for a factory-set detector. A factory-set detector is not automatic; it is preset. Unlike other detectors, White's new AutoTrack is not simply a factory-set ground balance. It is truly automatic, adjusting with each sweep in the GEB/DISC track mode.)

Automatic Ground Balance. An engineering breakthrough. Now you have it.

## More Sensitivity. More Depth. All-new Sensitivity Control!

The Di Pro's new sensitivity control lets you increase the sensitivity beyond the PRESET  $\nabla$  mark where soil conditions permit. This means more **usable depth**, and is offered only by White's Professional Series. Use the Di Pro to search areas "worked out" by other, less sensitive detectors. Finding what they missed will earn you the title "Professional".

Depth of detection is one of the most important features of a metal detector. With the Di Pro, you can attain more **usable depth** than ever before. No outrageous claims, no misleading air test figures. Just a detector designed to give maximum performance in the ground—where it counts.

## Exciting New Meter Design!

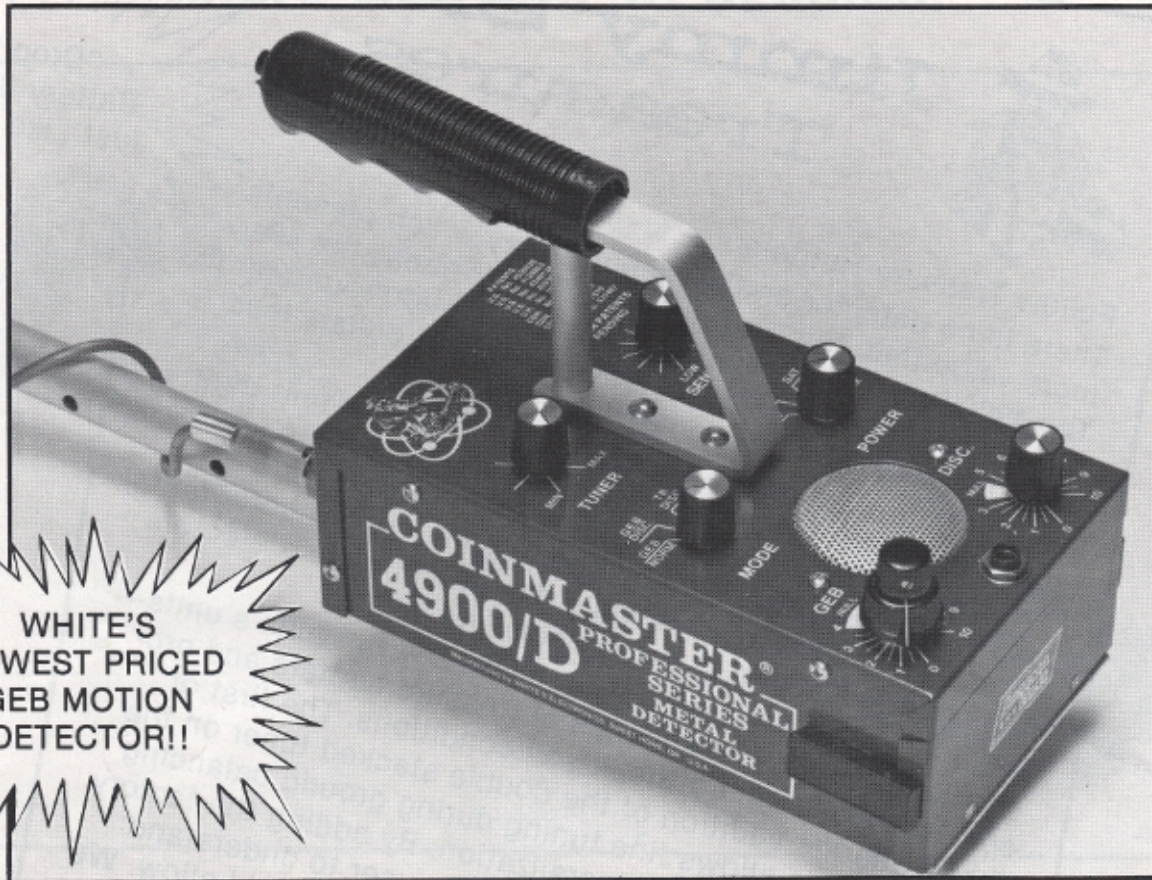

Large, easy to read coin and metal bands let you see at a glance what you've located and help you identify your target before you dig. For example, you can distinguish between a pulltab and a quarter with a glance at the meter. Then switch to Depth Reading to safely recover your target. The Reference Scale of 0-100 lets you associate various items with specific numbers. A feature the "Pro's" wouldn't be without!

# White's Introduces the New 4900/D Professional Series

WHITE'S  
LOWEST PRICED  
GEB MOTION  
DETECTOR!!

*True slow sweep GEB/Motion Discrimination, just like the top of the line! Rejects the ground while discriminating against junk.*

- **Designed for the special needs of Prospectors, Beach Hunters, and Relic Hunters.**
- **Instruction Manual written by Jimmy Sierra explains HOW to use the 49'er for all types of TH'ing.**
- **Ten-Turn Ground Balance Control** allows easier tuning in highly mineralized areas.
- **Clearly marked NULL points** help determine if object is a "Hot Rock" or a metal target.
- **Sensitivity Control** can be adjusted for each area depending upon ground conditions.
- **4 Modes:** GEB/NORM, GEB/DISC, TR/DISC, GEB/MAX.
- **\$299.95**

 **white's electronics, inc.**

# Jimmy Sierra Treasures

"Drop In"  
Battery System  
Just Like the DI!

Fellow Treasure Hunters:  
There is no detector on the market today which presents more value than this Hot new unit from Whites...the 49er. The 4900/D has all of the 4 modes of operation found on the top of the line 6000/D at a price hundreds of dollars less. This detector is almost too good...

When White's asked me to help design this new unit they had me contact other professional treasure hunters across the country. Avid Beach Hunters, Relic Hunters, and of course, Prospectors. We decided to plan a unit incorporating all of the technology of White's fine line of metal detectors and trim them down to just muscle...no fat.

We then added features not found on any of White's units—specially suited for the needs of treasure hunters and prospectors working in difficult soil conditions. The first of these was the addition of the double stacked tuner on the GEB dial. This allows fine tuning during ground balancing and greater control of mineralization. By adding the factory NULL Band we made it easier for the user to understand sensitivity and depth where soil conditions would allow. We even added the SAT circuit for controlling the threshold for beach hunters.

For those who want an all guts detector...with full depth plus the ability to cancel extreme ground mineralization whether searching in the all metal or discrimination mode, the 49er is that unit. We got everything we asked for and more. As I said before...It's really too good.

Happy Hunting,

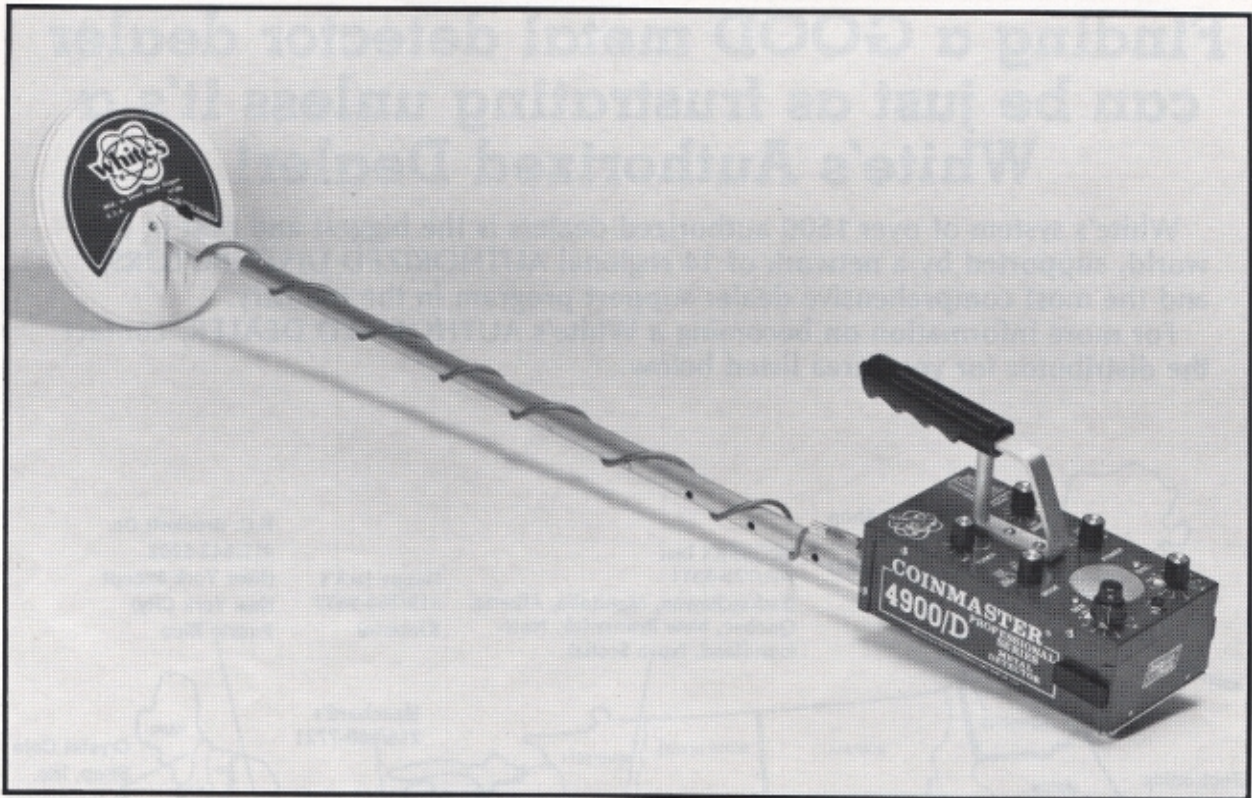

*Jimmy Sierra Normandi*

Jimmy "Sierra" Normandi

**"The 49'er is  
almost too good ... "**

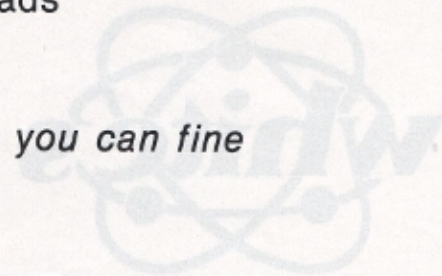

**More performance, more features,  
more value ... at \$299.95.**

### **FEATURES:**

- Four Modes: (GEB/NORM, GEB/DISC, TR/DISC, GEB/MAX)
- In depth instruction manual written by Jimmy Sierra
- Ten-Turn Ground Balance Control
- Sensitivity Control
- Clearly marked NULL points
- Self Adjusting Threshold (S.A.T.) keeps detector in tune over varying ground conditions
- High forward handle for perfect balance
- Compatible with all Series 2 & 3 accessories— 4, 8, 10, & 15 inch loops
- Push button retuning
- Battery pack with 4 "C" cells; no battery leads
- 299.95

*White's left the controls on this instrument so you can fine tune for varying conditions!!*

# Ever try to find a needle in a haystack?

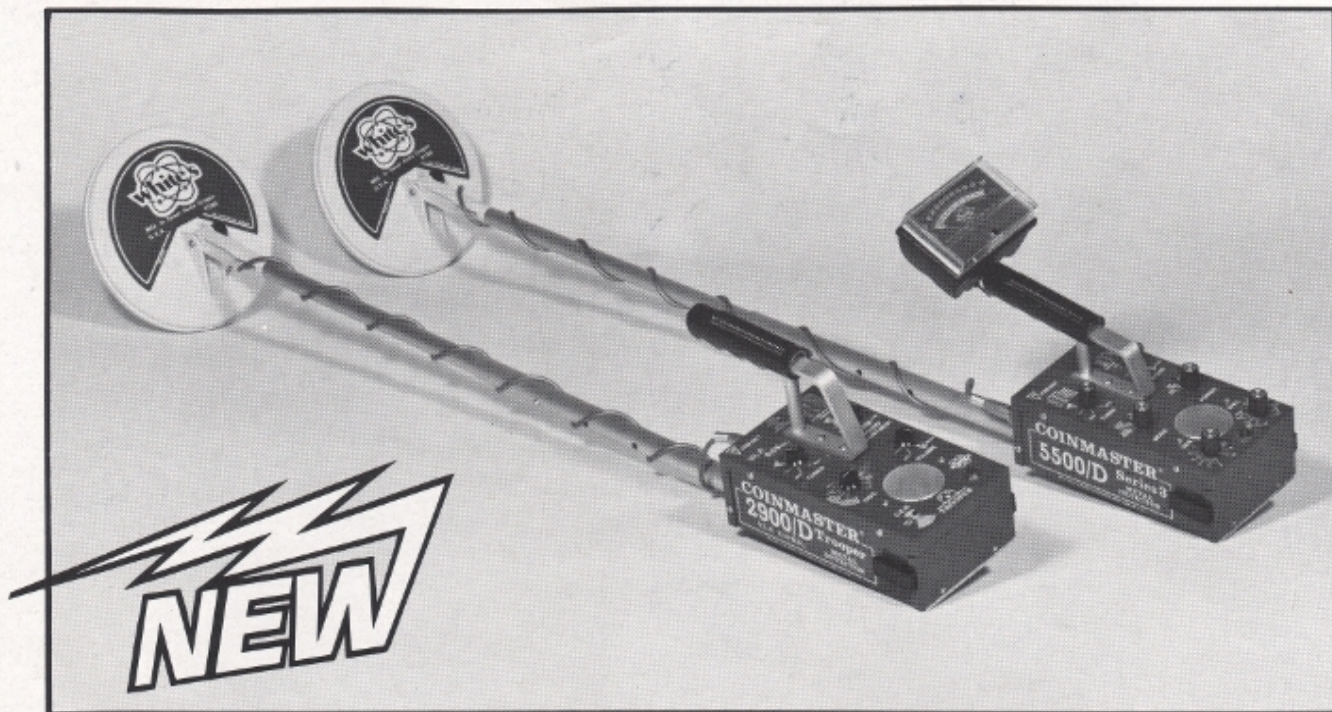

## Finding a GOOD metal detector dealer can be just as frustrating unless it's a White's Authorized Dealer!

White's system of over 1500 authorized dealers is the biggest and best in the world, supported by a network of 14 regional AUTHORIZED DISTRIBUTORS, and the most comprehensive dealer support program in the industry.

For more information on becoming a White's AUTHORIZED DEALER, contact the distributor for your area listed below.

## 2900/D

*Distinguish between trash and good targets OR balance out ground mineralization. Great for beginners.*

- PRESET  $\nabla$  controls
- Push-button retuning
- TR/DISC mode
- Ground adjustment control
- Low battery alert light
- Power Supply: 9 volt battery (standard) or rechargeable Nicad system (optional)
- High forward handle for excellent balance
- Interchangeable waterproof loops
- \$179.95

For a FREE Catalog and your Nearest Authorized White's Dealer, CALL TOLL FREE: 1-800-547-6911 Inside Oregon: 503-367-2138

## 5500/D

*Depth Reading plus slow sweep GEB Motion Discrimination at an affordable price.*

- Depth Reading
- PRESET  $\nabla$
- 4 modes-GEB/NORM, GEB/DISC, GEB/MAX, TR/DISC
- S.A.T.-Self Adjusting Threshold maintains stable threshold over varying ground conditions
- Trigger Switching activates Depth Reading, changes modes, and retunes
- Improved depth capability
- Power Supply: 4 alkaline "C" cell pack (standard) or rechargeable Nicad system (optional)
- Interchangeable waterproof loops
- Excellent balance
- Large meter shows Depth Reading and signal intensity
- \$399.95
