

# METAL DETECTORS

# NEW! DFX™ Spectrum® E-Series

Here it is. The finest all-around metal detector. Our new DFX™ is simply unsurpassed in its ability to find treasure- older, deeper and smaller items that other detectors pass over.

*Displays shown at reduced size.  
Actual size is 2 7/8" x 1 5/8".*

DFX™ brings together the ultimate combination of sophisticated micro-processor technology, and turn-on-and-go simplicity. You're out and hunting right away, but there are dozens of adjustable features available if you choose.

**9 Turn-on-and-Go! Programs including our new, user-designed EEPROM programs you can override with your own custom programs.**

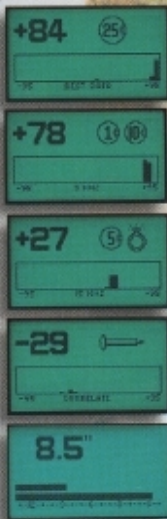

## A revolutionary, new multifrequency method.

Partnered with the target I.D. you get only from White's, now DFX™ uses dual frequency detection to "see through" minerals in the ground and detect coins, jewelry and relics other detectors are missing. Hunt in 3 kHz, 15 kHz, or use both together for unequalled hunting. This is concentrated power from the two individually processed frequencies that work best for finding treasure.

**Listen for the distinctive sound of "treasure", then see what you've detected on the screen.**

**Pull the trigger and DFX™ shows you how deep to dig.**

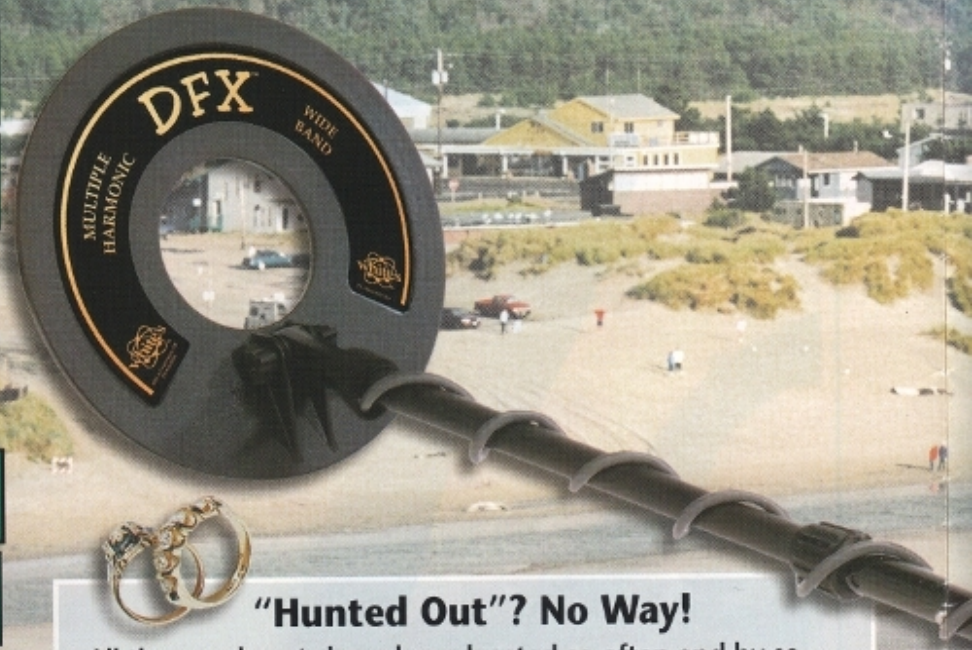

Detecting together or singly, choose Best Data and the DFX™ displays data from the most reliable frequency. Choose Correlate and questionable targets, including iron, are rejected. All happening automatically, behind the scenes, while you hunt!

There are dozens of features that come together in DFX™ to create the world's best metal detector. It's built on White's proven digital platform, now with awesome all-new features that give you more flexibility to hunt for, and find, virtually every kind of treasure!

## NEW DFX™ FEATURES:

- Multiple Frequency Operation. Hunt in 3 kHz, 15 kHz, or both frequencies simultaneously. Best Data displays the most reliable target info, or use Correlate to reject iron and other questionable targets.
- 4 EEPROM hunting programs. Use these Pro-designed programs or erase them and create, name and store your own custom programs.
- High-definition, extended temperature display. Easier to see, with double clock speed for very fast target response.
- DSF™ Digital Signal Filtration. Change your ground filtering at will, from 2 filters to 6. Use 2 for quick response in high-trash areas or 3, 4, 5, up to 6 for superior depth in mineralized grounds.
- Sweep Speed Adjust. Use higher settings to move quickly through an area with few targets, and lower settings when you want to move more slowly through areas where you need to get in between trash.
- Hot Rock Rejection. A complete range from total acceptance to total rejection.

## "Hunted Out"? No Way!

All the good spots have been hunted so often and by so many that there can't be anything left ... right? Here's a tip from the Pro's. There are lots of older, deeper, more valuable coins, jewelry and relics in those "hunted out" areas that less sensitive detectors didn't find. That's why they use the best metal detector available. And why now they'll be back out there hunting with the DFX™!

## Top-notch Performance on Saltwater Beaches

DFX™ simultaneously transmits at 3 kHz and 15 kHz to cancel highly magnetic mineralization and conductive salts. Lightening-fast ground balance easily tracks ground changes.

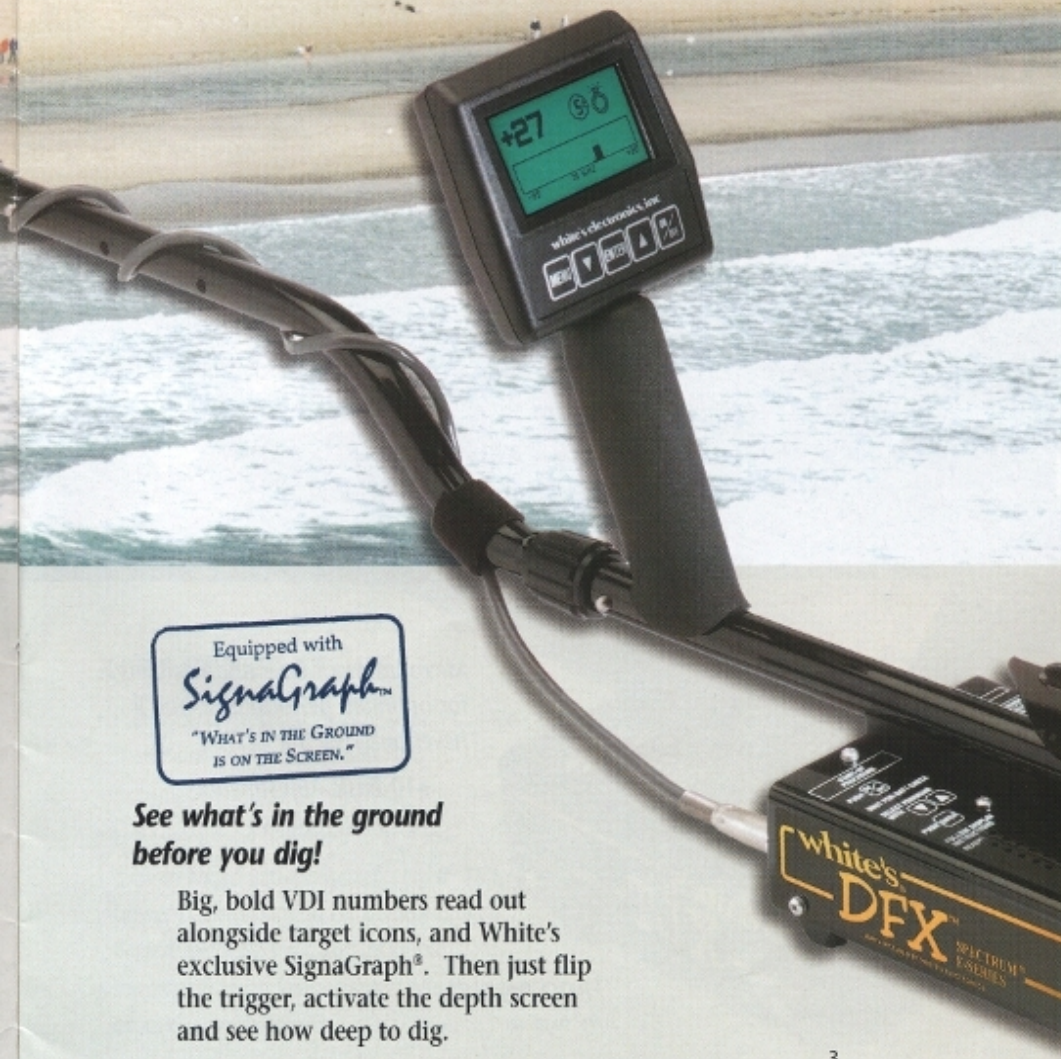

*I've been swinging a metal detector since I was 9 years old. The new DFX™ is the easiest to use, highest performance detector I've ever used. One of my first DFX™ finds was this 1864 Trade Token worth over one hundred dollars.*

*Randy Smith  
Oklahoma*

## DFX™ ALSO FEATURES:

- 9 Turn-on-and-Go! Programs - ready to hunt right out of the box. Completely automatic, professionally engineered for high performance.
- 10 Basic Adjustments and 34 Pro Options. Adjust virtually every aspect of your hunting. Popular adjustments include Tone I.D., Sweep Speed, Silent Search, Fade Rate, Recovery Speed, Block Edit, AutoTrac® Speed ... and more.
- Complete visual display information. Target icons, VDI numbers and White's exclusive SignaGraph® bar graph target signature. 3 independent and precise ways to define a target. Flip the trigger and activate the depth screen. Display size is 2 7/8" x 1 5/8".
- Automatic Ground Balance with AutoTrac®. Tracks and adjusts to changing grounds as you hunt.
- Powerful, waterproof 9 1/2" search coil for maximum depth and versatility.
- Slide-in Nicad Battery System . Up to 15 hrs. of power-packed hunting on a single charge. Backup penlight pack also included.

Equipped with  
**SignaGraph™**  
"WHAT'S IN THE GROUND  
IS ON THE SCREEN."

**See what's in the ground  
before you dig!**

Big, bold VDI numbers read out alongside target icons, and White's exclusive SignaGraph®. Then just flip the trigger, activate the depth screen and see how deep to dig.

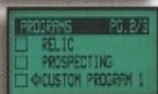

**\$1,099.95**

# XLT® Spectrum® E-Series

High tech treasure hunting is as easy as turning on the XLT® and selecting a Preset program. This is high-performance simplicity and versatility at its best. With 5 expertly-designed programs to choose from, you've got virtually every kind of hunting covered. With a little experience, it's easy to enhance a Preset program for your particular hunting with one of 10 Basic Adjustments like Tone Adjust and Mixed Mode Audio. If you decide to build that "ultimate" custom program there are 29 Pro Options like Tone I.D. and Recovery Speed. All here. All easy to use. If and when you choose.

**5 Turn-on-and-Go! Programs. Plus 4 more you create, name, and store to use over and over.**

Displays shown at reduced size. Actual size is 2 7/8" x 1 5/8".

**See what's in the ground- before you dig!**

Sweep and watch the XLT® display without missing a beat. Big, bold VDI numbers read out alongside target icons, and White's exclusive SignaGraph®. SignaGraph®'s bar graph gives you a graphic look at what's in the ground. It's one more key piece of information about whether to dig your target.

Pinpointing is more precise and easier than ever. With a flip of the trigger, activate the depth screen and watch the bars to zero in on your target.

Microprocessor ease and flexibility for optimum performance. You'll never outgrow the XLT®.

- 10 Basic Adjustments
- 29 Pro Options

\$899.95  
mfrs. sugg. ret.

**PAY FOR YOUR METAL DETECTOR  
WITH JUST ONE COIN!**

*I have a job that requires me to travel about 25% of the time. I used to dread those long weeks on the road until I discovered metal detecting. In a small town in Arkansas, I had driven by an old building that was being remodeled and along the street they had dug out a path for a new sidewalk. After covering a 25 ft. section, I got a very loud signal. I dug down 4 1/2 inches and looked into the bottom of the hole and saw this big hunk of GOLD! It was round, had a reeded edge, and was a very deep yellow color. It was a gold coin! The coin book values it at \$600. Value to me ... priceless!*

*Paul F.  
Missouri*

## The City is a Treasure Trove

City or country, with a little research, you can uncover some great metal detecting. Your public library is a great place to start. If you live in the city, take advantage of the sheer numbers of people there. Old maps can uncover surprising historic areas. Look for places where people have congregated over the years- fairgrounds, train depots, stage stops, parks ...

### XLT® KEY FEATURES

- Powerful, waterproof 9 1/2" search coil for maximum depth and versatility.
- Automatic Ground Balance with AutoTrac®.
- Lightweight, all day hunting at 4 lbs.
- Slide-in Nicad Battery System . Up to 15 hrs. of power-packed hunting on a single charge. Backup penlight pack also included.
- White's exclusive SignaGraph®. What's in the ground is on the screen.
- High definition, megapixel luminescent display for sharp target and depth readouts- adjustable for low light.
- 5 Turn-on-and-Go! Programs, 10 Basic Adjustments, and 29 Pro Options. Adjust virtually every aspect of your hunting. Popular adjustments include Tone I.D., Sweep Speed, Silent Search, Fade Rate, Recovery Speed, Block Edit ... and more.

**\$119.95**  
mfrs. sugg. ret.

### The ultimate tool for precision pinpointing.

Bullseye works side by side with our detectors to make short order out of locating and digging detected targets. Plus, with Bullseye you'll minimize the

odds of damaging a valuable coin, relic, piece of jewelry or even a gold nugget.

It's easy. It's fast. Just locate the target with your detector, push the button and "zero in" on the target's exact location.

# MXT™ & GMT™ E-Series

MXT is a versatile new high performance detector that's as comfortable hunting for coins in the park as it is relic hunting an old battle site. Plus, it's designed by prospectors for the tough task of finding gold.

*"I want to do a little prospecting, but I also want to hunt for coins and try a little Civil War relic hunting, too".*

MXT™ is the detector for you. It combines easy operation with all the performance and versatility you need to find coins, rings and jewelry, relics, and gold nuggets.

## FEATURES

- 3 completely separate easy-access hunting programs -
  - COIN & JEWELRY
  - RELIC
  - PROSPECTING

Unique target responses, display information and audio frequencies.

- Automatic Ground Balance keeps the detector perfectly balanced even in the harsh grounds in prospecting areas.

- 3 easy-adjust controls -
  - GAIN maximizes sensitivity and depth.
  - THRESHOLD allows you to hunt with a slight hum or hear only the sound of detected targets.

DUAL control fine tunes discrimination in the Coin & Jewelry and Relic programs. Adjust the full range of discrimination - ignore trash or hear all targets. In the Prospecting program, DUAL adjusts the S.A.T. speed - an essential for serious prospecting detectors.

- 3-position Mode switch. Works in conjunction with your hunting program to give plenty of options. Each mode functions differently in each program. Pull the trigger forward and the Pinpoint mode "zero's" in on detected targets.
- Operating Frequency - 14 kHz.
- Drop-in Battery Pack. 40-hour operation from 8 "AA" batteries. (Nicad Rechargeable system available.)
- Waterproof Eclipse 950 9" search coil for maximum depth. Optional Eclipse accessory search coils available.

VDI=+14 5¢, Rin9

**Coin & Jewelry Program** displays VDI #, target blocks, and coin/jewelry/trash labels.

VDI=+30 BUTTON

**Relic Program** I.D.'s buttons, buckles and bullets. Unique Mixed Mode audio response.

VDI=-31 GND=83  
IRON TARGET? 80%

**Prospecting Program** features Goldmaster's patented display information.

DEPTH= 5  
PP■■■■■■■

Flip the trigger and zero in on your target. Read depth for accurate digging.

*Detecting worked-out parks, schools, and old military campsites is fun again. The MXT™ has excellent depth and precise target identification. Works just as well on a saltwater beach.*

*Mike B.  
Ohio*

## GOLD ... is where you find it

Sure, there's gold in California's Mother Lode country, but did you know that gold has been found in 39 states?

If you're interested in prospecting for gold, the best place to start is where gold has been found before.

Old mining techniques left a lot of gold behind, and a White's detector can pick up pieces as small as the head of a pin!

Working the area where I found this 3 oz. piece of gold in quartz was quite the challenge. This site is not only highly mineralized but was also used as a dump in the early 1900's. With the Iron I.D. on, and V-Sat set at max, I was able to distinguish this piece of gold even though it was inches away from a fragment of iron.

Christine O., California

The GMT™ is our microprocessor-driven, prospecting detector. The GMT™ simplifies the tough task of ignoring the harsh ground minerals found in gold-bearing areas.

The GMT's Fast AutoTrac® cancels ground mineralization faster and more accurately than ever before. One or two quick pumps and the ground is gone!

There are now 3 ways to I.D. iron without losing sensitivity or depth. Use the distinctive bar graph alone or in combination with the new iron audio signal. You've got options and you choose what's right for you.

Veterans and weekenders alike are finding more gold and having more fun hunting, too!

## FEATURES

- Automatic Ground Balance with fast AutoTrac® cancels the ground minerals in seconds and then tracks to changing conditions as you hunt. The microprocessor monitors and stores the ground mineralization value and displays it.
- The Grab pushpad instantaneously sets the ground balance with just a touch of the pushpad. In both Auto. and Manual modes.
- Full-time Iron ID Bar Graph displays the percent-probability of iron. Important info. to help decide whether or not to dig a target!
- Optional-use Audio Iron ID "Grunt" comes at the end of the GMT's "zip-zip" sound. Instantly alerts you to a high-probability iron target.
- Iron Target Analyzer - Squeeze the trigger and the GMT stops tracking and begins to analyze the target. Data is added or subtracted with each sweep and sent to the bar graph and to the Audio "Grunt" alert feature. Release the trigger and you're off and hunting again.
- "Follow the Paystreak" displays the amount of magnetic minerals in the ground. Gold hides in streaks, so follow the streaks.
- Variable Self-Adjusting Threshold (VSAT)
- Initial Control Settings on each control get you out hunting right away.
- Slide-in "AA" Battery System with 40 hours of use. (Nicad Rechargeable System available.)
- Powerful, elliptical "DD" search coil helps cancel the ground, and presents an elongated "window" for detecting the tiniest nuggets.
- 48 kHz operating frequency.

# IDX Pro™, QXT Pro™ and XL Pro™

**Pro Series detectors are proven winners in the field.**

**All offer full-featured performance and versatility. Hunt in a wide range of conditions to find all kinds of treasures.**

## IDX PRO™ FEATURES

- Automatic Target I.D. The display shows the identity of detected targets as you sweep the coil. Easy-to-read graphics.
- Two Primary Controls: Discriminate and Sensitivity with Preset range settings for easy operation. Ring Range detects all jewelry and coins. For trashy areas, set at the higher Coin Range to ignore junk and pick up most coins.
- Black Sand Switch. Boost your sensitivity when hunting extremely mineralized ground.
- Frequency Adjust Control. Hunt side by side with other White's detectors without interference.
- Trigger Pinpointing switches to "Zero Disc" for easy pinpointing.
- 3-Piece Rod Set breaks down into a compact package for travel.
- Silent Search Discrimination. Hear just the treasure.
- Very Slow Sweep and Quick Recovery. Great for trashy areas.
- Optional Adjustable Ground Balance. Can be adjusted to accommodate extreme ground minerals.
- 9 1/2" waterproof search coil.
- Slide -in "AA" battery system for up to 50 hours of hunting. (Optional rechargeable system available.)

*Since I got my Classic IDX, I started out working in parks. When I learned how to use my detector, I started to look for deeper coins at old homesteads. Shown are things I found in parks within a month. My best find so far is an 1864 Medal of Honor.*

*Ditter C.  
Ohio*

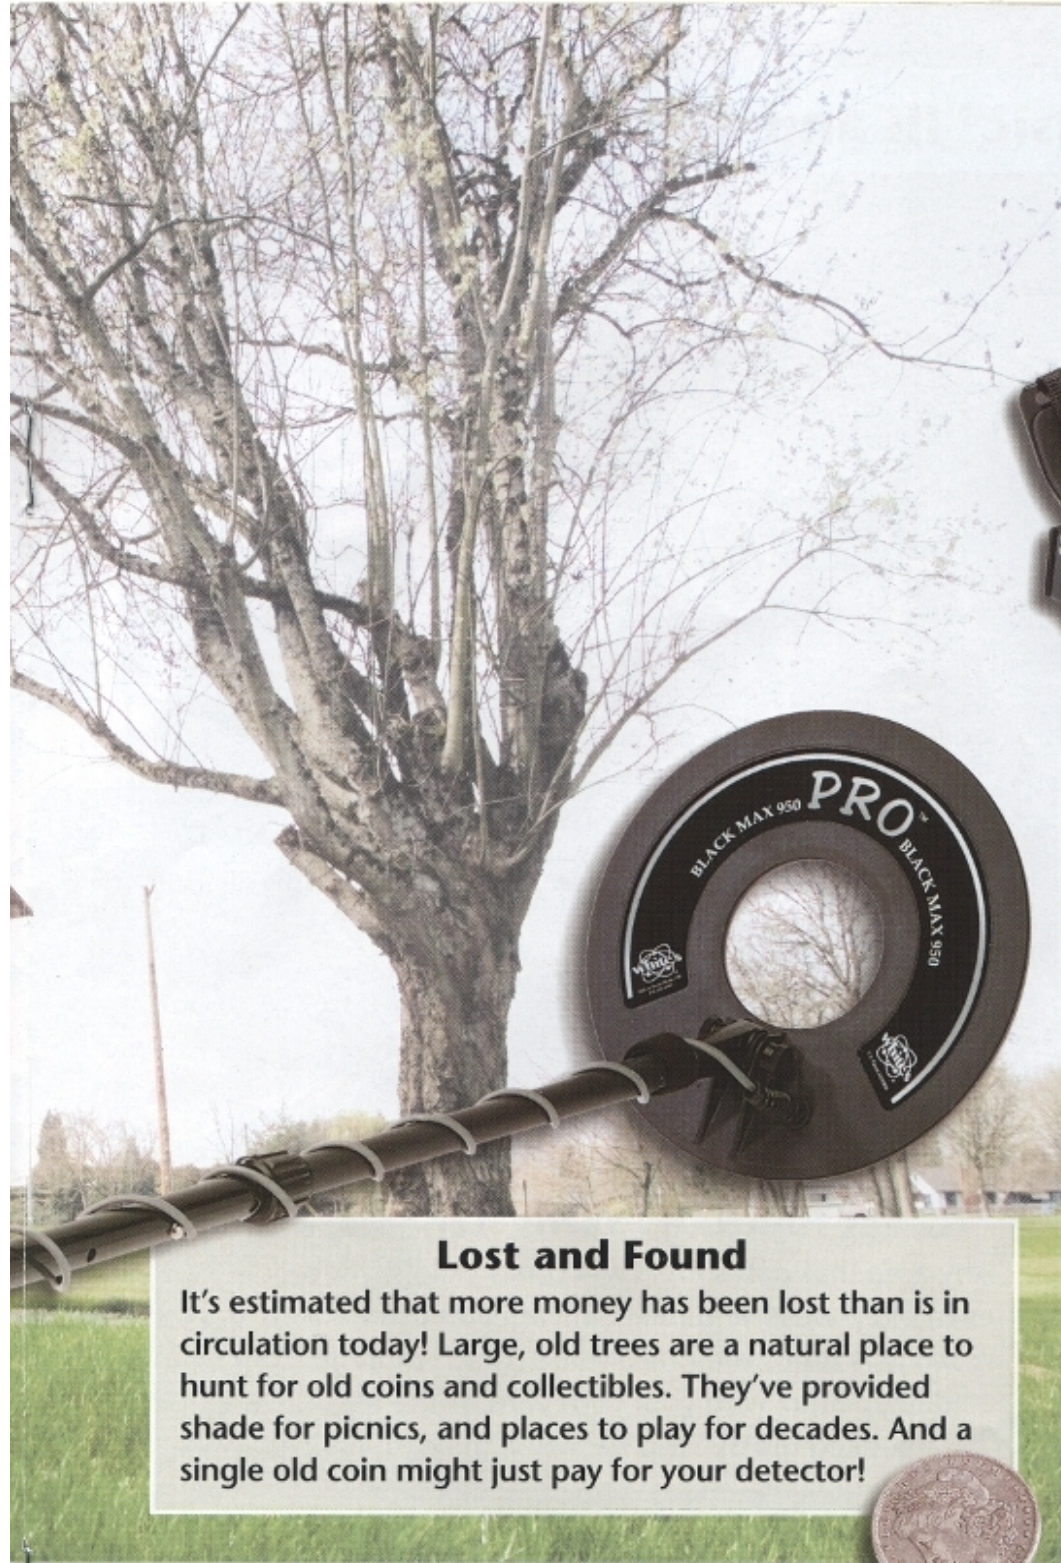

*Improved design! Patented flash-phase "hot circuit" picks up treasures 30% deeper.*

*IDX users love the turn-on-and-go simplicity!*

**\$549.95**  
mfrs. sugg. ret.

## Lost and Found

It's estimated that more money has been lost than is in circulation today! Large, old trees are a natural place to hunt for old coins and collectibles. They've provided shade for picnics, and places to play for decades. And a single old coin might just pay for your detector!

*Our best analog detector. Powerful and versatile for all kinds of hunting.*

**\$699.95**  
mfrs. sugg. ret

### PRO XL™ FEATURES

- AutoTrac® samples the ground, adjusts for maximum depth and sensitivity.
- PRESET control settings and on-the-box instructions.
- Meter ID's target and then reads depth.
- 4 hunting modes ranging from full discrimination to detecting all metals.
- Disc. control adjusts the level of trash you reject. Tuner control sets the optimum threshold.
- Signal Balance control adjusts for improved performance and cleaner target signals.
- 9 1/2" waterproof search coil.
- Slide-in "AA" battery system. (Optional rechargeable Nicad system.)

### QXT PRO™ FEATURES

- 4 Preset Turn-on-and-Go! Programs- Coins, Coins & Jewelry, Jewelry/ Beach, Relic/Prospecting
- 14 User Adjustments
  - Volume
  - Threshold
  - Search Sens.
  - Pinpoint Sens.
  - Viewing Angle
  - S.A.T. Speed
  - Tracking Speed
  - Transmit Frequency
  - Discrimination On/Off
  - VCO Audio
  - Noise Reduction
  - Mixed Mode Audio
  - Disc. Edit/Zones 1-8
  - Tone Alert
- One-Step Ground Balance. Not a factory preset setting.
- Target Intensity Graph. Bar graph holds the target history and updates 12x per second.
- 9 1/2" waterproof search coil.
- Slide-in "AA" Battery System. (Optional rechargeable system available.)

*Ignore groups of targets with the push of a pad. 8 target zones to accept or reject!*

**\$649.95**  
mfrs. sugg. ret

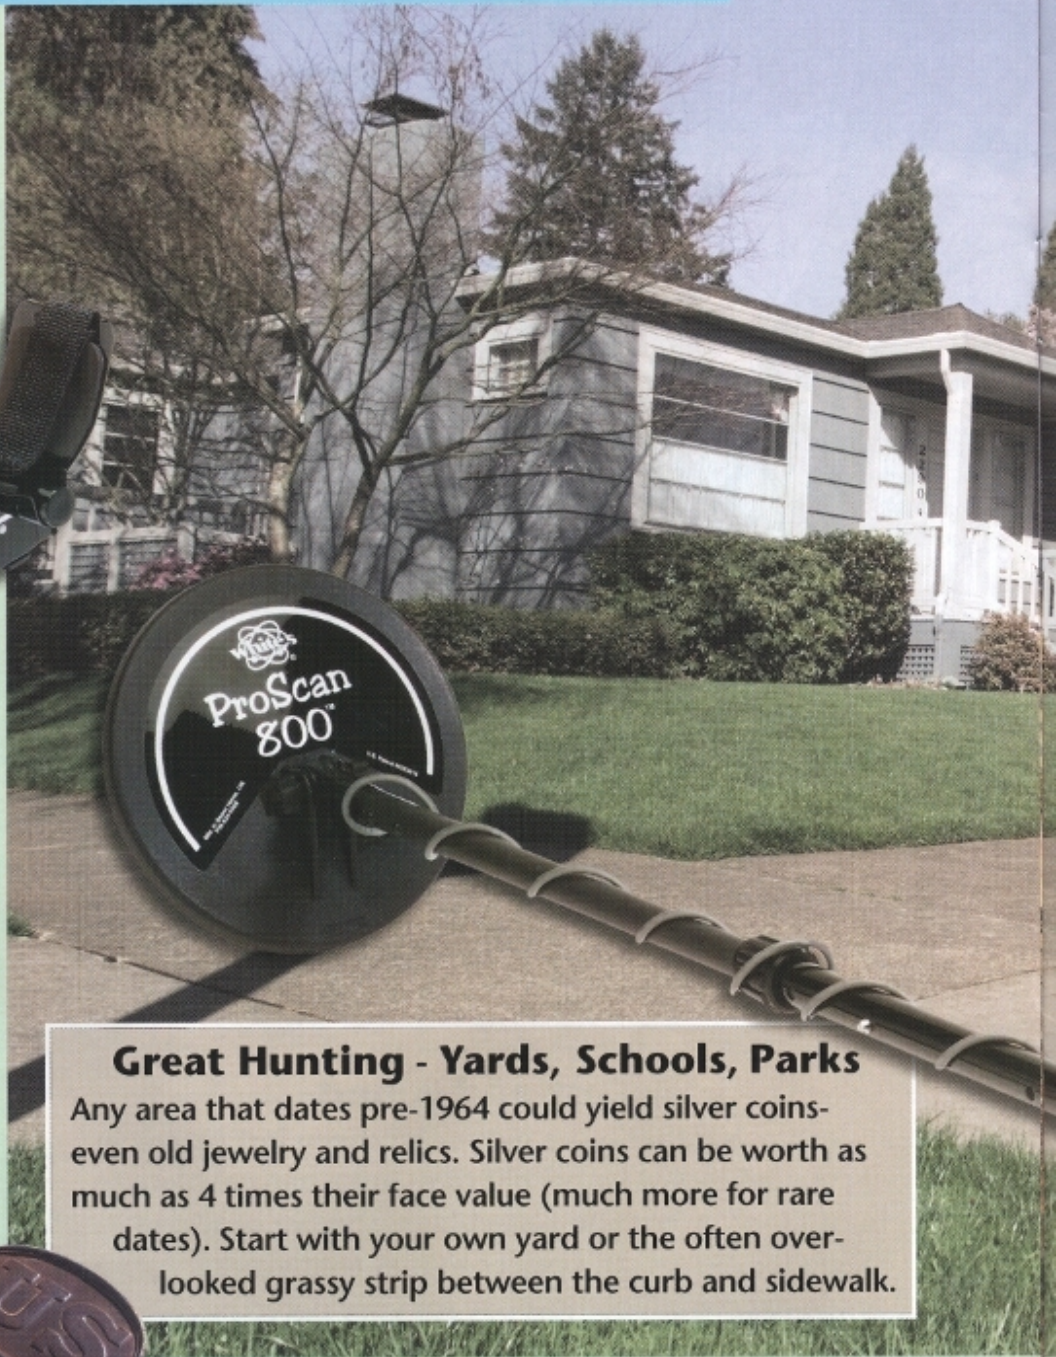

# Classic® ID, Classic® III and Classic® II

*Our affordable Classic Series-  
packed with White's performance!*

\$349.95  
mfrs. sugg. ret.

## CLASSIC® III FEATURES

- All of the items on the Classic® II plus:
- NEW! Designed in conjunction with diehard Classic® users in the field- the powerful new "hot" circuitry delivers 30% more depth!
- Powerful 9 1/2" waterproof search coil for maximum performance.
- Black Sand Switch boosts the sensitivity for hunting in highly mineralized ground.
- Frequency Adjust Control eliminates interference so you can hunt side by side with other detectors.
- Great for competition hunts.

## Great Hunting - Yards, Schools, Parks

Any area that dates pre-1964 could yield silver coins- even old jewelry and relics. Silver coins can be worth as much as 4 times their face value (much more for rare dates). Start with your own yard or the often overlooked grassy strip between the curb and sidewalk.

## CLASSIC® II FEATURES

- The versatility of two controls. Sensitivity and Discriminate Controls with Preset Coin and Ring Range settings.
- Trigger Switch flips to "Zero Disc." to define the target for easy pinpointing.
- Optional adjustable ground balance. Factory preset for good performance in most areas but adjusts for specific conditions. You choose!
- Silent Search. Targets sound out clear.
- 8" waterproof search coil.
- Slide-in "AA" battery system delivers up to 60 hours of hunting.

*Economical  
Classics detect  
50 hours or  
more on one  
battery set!*

I found all these relics from two Civil War campsites in Southern Missouri using a White's Classic ID. This machine is great!

Damon  
Missouri

A Two Day Find *by Joe Hayes*

My name is Joe Hayes. I'm 10, and I've only had my detector for about a month and it works great! I got my metal detector for Christmas, but I couldn't use it because there was too much snow. So I had to wait a couple weeks until it melted. When it did I went detecting in my own back yard! I got five signals and when I dug them up there was six coins and they were a Columbian Half dollar, a mercury dime, a Barber Half dollar, a shield type nickel, a war penny, and a 2 cent piece!

### CLASSIC® ID FEATURES

- Automatic Target I.D. The display shows the identity of detected targets as you sweep the coil. Easy-to-read graphics.
- Two Controls: Discriminate and Sensitivity with Preset settings for easy operation. Ring Range detects all jewelry and coins. For trashy areas, set at the higher Coin Range to ignore junk and pick up most coins.
- Trigger Pinpointing switches to "Zero Disc" for easy pinpointing.
- 3-Piece Rod Set breaks down into a compact package for travel.
- Silent Search Discrimination. Hear just the treasure.
- Very Slow Sweep and Quick Recovery. Great for trashy areas.
- Optional Adjustable Ground Balance. Can be adjusted to accommodate extreme ground minerals.
- 8" waterproof search coil.
- Slide-in "AA" battery system delivers up to 50 hours of hunting.

Our most  
affordable  
target ID  
detector!  
Improved design  
now goes 30%  
deeper.

# Surf PI Pro and BeachHunter® ID

*Working the beach is one of the most rewarding ways to treasure hunt and get some exercise, too. The day after a big winter storm is one of my favorite times to hunt. Big waves move a lot of sand and make it easier to find the deeper treasures.*

*Gerry E.  
California*

**The Surf PI Pro combines turn-on-and-go ease and unbeatable depth and sensitivity. The PI Pro's all-new power circuit reaches new depths, especially on the most prized jewelry - smaller gold, platinum and white gold. Even in the worst beach conditions like black sand. Now, beach and surf detection has a new, deeper layer of hunting!**

## **SURF PI PRO FEATURES**

- Pulse Induction detection for exceptional depth on coins and jewelry, especially in saltwater and mineralized ground.
- Enhanced sensitivity to gold - the most sought-after beach targets (gold jewelry) respond at maximum depths.
- NEW! Gain control adjusts for your particular beach conditions so you get every inch of PI depth and sensitivity. Every beach is different and now your Gain can match the beach.
- Quick Target Recovery so you hear good targets even mixed in with junk.
- Tuner Control adjusts the threshold tone and checks battery strength.
- Variable sweep speed - sweep from slow to very fast with no loss of depth.
- Automatic Ground Rejection.
- Completely waterproof to 100 feet.
- Power Supply: 8 "AA" penlight batteries for up to 25 hrs. of hunting.

**\$699.95**

*mfrs. sugg. ret.*

*\*Also available with weighted search coil*

## The Beach - Treasures Galore

Gold medallions, silver coins, diamond rings, watches ... lost yesterday, or a hundred years ago. Yours to recover with a White's metal detector. The beach and water near you is a veritable treasure trove. People have congregated for centuries at beaches and freshwater swimming areas. Warm weather signals your continual source of treasure. Replenished daily!

The BeachHunter® ID ignores junk and picks up just the treasure. Hunt in and out of the water without missing the good stuff. Identify detected targets in a snap with a glance at one of the color-coded LED's.

### BEACHHUNTER® ID FEATURES

- Dual frequency detection provides optimum detection on the sand and in the water.
- Two Search Modes: Toggle between All-Metal and Motion Discrimination for easy pinpointing and versatility.
- 3 Controls - Threshold, Sensitivity, and Ground. The versatility is all here!
- Salt and Freshwater versatility for all kinds of beach hunting.
- Drop-in "AA" battery system and

Target ID at it's easiest! 3 high intensity color-coded LED's pair up with three distinctive audio tones to help easily ID your detected target - Iron, Jewelry, or Coins. Hear it and see it!

battery test. 20 hrs. of hunting.

- Detachable control box with hip or chest-mount pouch included.
- Waterproof to 25 feet.

\$799.95  
mfrs. sugg. ret.

*My dissertation research project involves tagging and tracking freshwater turtles in the rainforest of southern Veracruz, Mexico. One population of turtles I am studying lives in a temporary lake that holds water for only half the year. When the lake is dry, the turtles make small burrows in the leaf litter of the forest floor. We found the Surf PI to be extremely useful in helping us locate the tagged turtles.*

# Specialty Metal Detectors

**5900/DI PRO** has the power, sensitivity and features relic hunters demand. 10-turn G.E.B. control provides precision tuning. Large Meter I.D.'s target, reads depth when you flip the trigger. 4 Hunting Modes and Discriminate control to adjust the level of trash you reject. Self-Adjusting Threshold (S.A.T.) keeps the detector stable. 9 1/2" search coil. .... \$499.95 sugg. ret.

**Classic I** features one control simplicity. Discriminate control with preset setting for Coin Range and Ring Range. Ring Range detects all jewelry. Coin Range discriminates out most junk when hunting in trashy areas. Optional adjustable ground balance. Factory preset for good performance in most areas but adjusts for specific conditions. Silent Search. 8" search coil. .... \$199.95 sugg. ret.

**Sierra Madre/ULA-3** was designed for both industrial use and serious treasure hunting when searching for large and deep treasures and metal items. The Sierra Madre is has a 9 1/2" search coil standard. With the optional 15" search coil, it is capable of depths up to 5 feet. .... \$599.95 sugg. ret. *Packed with both English and Spanish instruction manuals.*

**Surfmaster II** is great for freshwater-beach and water hunting. Discriminate control with 3 Preset settings; All-Metal, Low Disc. (detects small gold rings with some discrimination), and High Disc. (detects most coins and ignores most junk). Quick target-to-trash recovery picks out treasure mixed in with junk. Completely waterproof to 100 feet. .... \$499.95 sugg. ret.

**TM 808** rejects ground minerals to detect deep - even through mineralized soil. It is ideal for locating coin caches, treasure chests, and hordes of gold or silver. Use the Cave mode to locate caves, wells, or tunnels. The TM 808 is also perfect for finding septic tanks, tools, equipment, metal pipes, and relics. . \$649.95 sugg. ret. *Instruction Manual available in both English and Spanish.*

**AutoScan** is built to handle today's toughest security requirements. Only AutoScan offers you an increase in volume and pitch depending on a metal's size. Large metallic objects respond with a strong, high-pitched sound. Smaller metals respond with a clear, lower frequency tone. Totally automatic. With the unequalled sensitivity and reliability security professionals demand. .... \$229.95 sugg. ret.

**PRL-1** is designed to locate property stake pins, valves, sprinkler heads, shallow pipes and cables. It is very simple to use, and can be adjusted to either detect all metals or discriminate out junk. .... \$299.95 sugg. ret.

**The PCL 600** accurately traces residential and commercial gas lines, water and sewer pipes and electrical cabling within access or service depths. 2 modes of tracing - "Clip-On" when you can access one end of the line, and "Inductive" when the line is completely inaccessible. .... \$499.95 sugg. ret.

***Thank you for your interest in White's metal detectors!***

Here at White's, we build every metal detector today with the same philosophy my family started the company with over fifty years ago, *give our customers the world's best metal detectors and build them right here in Sweet Home, Oregon.*

Today, we're very proud of our legacy of satisfied customers, who have found treasures of every kind in every corner of the world. Relics of the Revolutionary and Civil Wars, coins from the Roman Empire, gold nuggets, jewelry from the ocean's beaches, and scores of coins and collectibles found in neighborhoods just like yours from California to Maine. Some are worth thousands of dollars to collectors, and the "priceless" value of others is only to those who found them. In the process, these people have become part of the White's "family", discovering a lifetime hobby that gets them out in the fresh air with family and friends *and* the indescribable rush from "never knowing what you might uncover next"!

If you're like many of the people we hear from, "It's something I've always thought I might like to try". Right now is the best time to get started. We're extremely proud of our new lineup of metal detectors-easier than ever to use and loaded with the very latest in metal detector technology. There's a detector for everyone, in every price range. When you're ready to get started, your Local Dealer is ready to help you make the best choice.

There's adventure out there waiting for you and a White's metal detector. Happy hunting!
