

# Metal Detectors

*"What's in the ground  
is on the screen!"™*

*They did it and  
you can, too!  
A White's metal  
detector pays  
you back - in fun,  
exercise, and  
treasure!*

**AMERICAN MADE SINCE 1950**

# DFX™ E-Series

## DFX™ FEATURES:

- **Multiple Frequency Operation.** Hunt in 3 kHz, 15 kHz, or both frequencies simultaneously. BEST DATA analyzes and displays data from the most reliable frequency. Used for: Parks, beaches, yards and most other general hunting. Correlate compares both frequencies and displays target info. only when both frequencies "agree". Used for: Homesteads and areas where nails and other iron are bothersome.
- **4 EEPROM hunting programs.** Use these Pro-designed programs or erase them and create, name and store your own custom programs.
- **DSF™ Digital Signal Filtration.** Change your ground filtering - use 2 for quick response in high-trash areas or 3, 4, 5, up to 6 to optimize depth in mineralized grounds.
- **Sweep Speed Adjust.** Use higher settings to move quickly through an area with few targets, and lower settings when you want to move more slowly through areas where you need to get in between trash.
- **Hot Rock Rejection.** A complete accept/reject range.
- **9 Turn-on-and-Go! Programs** - ready to hunt right out of the box. Completely automatic, professionally engineered for high performance.
- **10 Basic Adjustments and 34 Pro Options.** Adjust every aspect of your hunting. Popular adjustments include Tone I.D., Sweep Speed, Silent Search, Fade Rate, Recovery Speed, Block Edit, and AutoTrac® Speed.
- **Complete Visual Display.** Target icons, VDI numbers and White's exclusive SignaGraph® target signature. 3 independent and precise ways to define a target. Squeeze the trigger and activate the depth screen.
- **Automatic Ground Balance with AutoTrac®.** Tracks and adjusts to changing grounds as you hunt.
- **High Definition megapixel display.**
- **Powerful, waterproof 9 1/2" search coil** for optimum depth and versatility.
- **Slide-in Nicad Battery System.** Up to 15 hrs. of power-packed hunting on a single charge. Backup penlight pack also included.
- **Two-year Parts and Labor Warranty.**

*I purchased the DFX last year and I have to tell you this is ONE SUPERB detector! I've been detecting since I was 12 - never have I been so impressed with a detector. In the last 6 months, I have found a ton of neat coins and relics. I love to coin hunt but my real passion is Civil War relic hunting. The DFX has performed brilliantly. The picture is of me at a battlefield that I recently hunted. The bullets that were found were no match for the DFX.*

**DFX's multiple frequency concentrates the power for maximum depth and dead-on target information.**

### SHARPSHOOTER VS. SHOTGUN APPROACH.

Only DFX transmits 16 powerful frequencies and processes 2 concentrated, voltage-packed frequencies. The result? Optimized depth and target information.

### DFX™ exclusive technology

- ✓ *Simultaneous discrimination and target identification at each of two different frequencies.*
- ✓ *Best Data Mode (patent-pending) examines the target in both frequencies and displays the most reliable results.*
- ✓ *Correlate Mode (patent-pending) compares target responses at both frequencies and rejects as trash if they don't agree.*
- ✓ *Concentrated signal power at two strongest frequencies.*
- ✓ *Optional single frequency detection.*

*It has been a year now since I purchased my DFX. I have found over \$400 in change, several rings (including one from Tiffany's), a \$400 dollar watch, several necklaces, earrings and other items. Thanks again for making such a great machine!*

Carl, CA

## Choose DFX™ for concentrated all-out horsepower that finds the oldest, deepest targets.

Here it is. The finest all-around metal detector. DFX™ is simply unsurpassed in its ability to find treasure - older, deeper and smaller items that other detectors pass over.

DFX™ brings together the ultimate combination of sophisticated microprocessor technology, and turn-on-and-go simplicity. You're out and hunting right away, but there are dozens of adjustments available if you choose.

White's patented multifrequency method partners with the target I.D. you get only from DFX. "See through" minerals in the ground and detect coins, jewelry and relics other detectors miss. Hunt in 3 kHz or 15 kHz (the two best frequencies for finding treasure) or use both together for unequalled hunting. Choose Best Data and the DFX™ displays data from the most reliable frequency. Choose Correlate and questionable targets, including iron, are rejected. All happening automatically while you hunt!

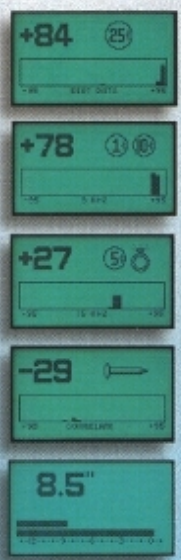

There are dozens of features that come together in the DFX™ to create the world's best metal detector. It's built on White's proven digital platform, with the features that give you more flexibility to find it all!

Equipped with  
*SignalGraph*  
"What's in the Ground  
is on the Screen."

See what's in the ground before you dig!

Big, bold VDI number read out with target icons, and White's exclusive SignalGraph®. Then just squeeze the trigger, activate the depth screen and see how deep to dig.

9 Turn-on-and-Go! Programs including our new, user-designed EEPROM programs you can override with your own custom programs.

Listen for the distinctive sound of "treasure", then see what you've detected on the screen. Pull the trigger and DFX™ shows you how deep to dig.

\$1,099.95  
\*msrp

# MXT™ E-Series

## MXT™ is 3 metal detectors in one.

A versatile high performance detector that's as comfortable hunting for coins in the park as it is relic hunting an old battle site. Plus, it's designed by prospectors for the tough task of finding gold.

MXT™ combines easy operation with all the performance and versatility you need to find coins, rings and jewelry, relics, and gold nuggets.

*"I want to do a little prospecting, but I also want to hunt for coins and try a little Civil War relic hunting."*

*MXT is your detector!*

VDI=+14 5¢, Rin9

DEPTH= 5  
PP■■■■■■■■

VDI=+30 BUTTON

VDI=-31 GND=83  
IRON TARGET? 80%

*Squeeze the trigger and zero in on your target. Read depth for accurate digging.*

3 separate programs with distinct hunting screens.

The **Coin & Jewelry Program** displays VDI number, target blocks, and coin/jewelry/trash labels.

The **Relic Program** I.D.'s buttons, buckles and bullets. Unique, Mixed Mode audio response.

The **Prospecting Program** features Goldmaster GMT's patented display information.

*My very first day out with the MXT was to a local park that I'm sure was hunted thousands of times. I pulled \$3.78 out of the soccer field area. Then, I decided to get off the beaten path and check some of the tree line areas. I was walking a path through the tree line and came across a good strong signal. Upon digging, I found the following jewelry all piled up neatly, along with the colored stones and amulets. One of the five rings is a Navajo Kokopelli mens ring, that just so happens to fit me perfectly. What a great find for my first time out with my new MXT!*

*John B., California*

\$799.95  
\*msrp

*\*All prices are manufacturer's suggested retail in U.S. dollars*

## MXT™ FEATURES:

3 completely separate easy-access hunting programs -

- COIN & JEWELRY
- RELIC
- PROSPECTING

Unique target responses, display information and audio frequencies.

### 3 easy-adjust controls:

**GAIN** maximizes sensitivity and depth.

**THRESHOLD** allows you to hunt with a slight hum or hear only the sound of detected targets.

**DUAL** control fine tunes discrimination in the Coin & Jewelry and Relic programs. Adjust the full range of discrimination - ignore trash or hear all targets. In the Prospecting program, DUAL control adjusts the S.A.T. speed - an essential for serious prospecting detectors.

*Last year I did so well with my White's MXT in Alaska (almost 20 ounces of gold) I bought a new MXT and gave the old one to my wife. This year, within a few hours of turning the detector on, up comes this 20-ounce nugget at six inches deep. One nugget beat my entire gold hunting finds of 2003. Thank you, White's!  
Dave R., Alaska*

**Automatic Ground Balance** keeps the detector perfectly balanced even in the harsh grounds of prospecting areas.

**3-position Mode switch.** Works in conjunction with your hunting program to give plenty of options. Each mode functions differently in each program. Pull the trigger forward and the Pinpoint mode "zeros" in on detected targets

**Operating Frequency - 14 kHz.**

**Drop-In Battery Pack.** 40-hour operation from 8 "AA" batteries (Nicaid Rechargeable system available.)

**Waterproof Eclipse 950 9 1/2" search coil** for maximum depth. Optional Eclipse accessory search coils available.

**Two-year Parts and Labor Warranty.**

### ACCESSORY SPOTLIGHT

## Eclipse Deep Scan DD 1400

A powerful detecting tool, this 8"x14" coil enhances the deep-seeking ability of DFX and MXT, especially over difficult (mineralized) ground. The DD 1400's elliptical design creates a wedge-shaped detection field covering more ground with each sweep.

Designed by serious detector aficionados, the DD 1400 isn't for everyone. It's a little heavier than the 9 1/2" standard coil, but the DD coil construction reduces 75% of ground mineralization for improved depth in hard-to-hunt ground.

### Q: Why would I need an accessory search coil?

A: The 9 1/2" search coil, standard on White's top-of-the-line detectors, is calibrated to provide optimum overall depth and sensitivity to average-sized targets at average depths. Accessory coils add versatility to your detecting. As a general rule, smaller coils are best for trashy areas and pick up even tiny targets. Larger coils have greater depth and a wider detection area.

### A veteran relic hunter on the DD 1400 ...

*"This is a great loop for extended depth. The folks at White's didn't believe it, but I dug a Civil War buckle at 30 inches - which my hunting buddies walked right over. I've been using it ever since."* Bob Buttafuso

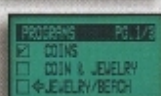

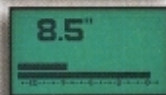

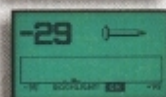

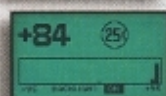

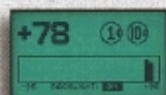

For DFX & MXT \$249.95

\*msrp

# XLT® E-Series

Listen for the distinctive sound of "treasure", then see what you've detected on the screen. Squeeze the trigger and XLT® shows you how deep to dig.

5 Turn-on-and-Go! Programs, plus four more you create, name, and store to use over and over.

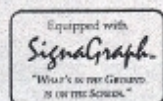

I have been relic hunting with White's detectors for many years. Last Sunday, with my XLT, I found a silver I.D. shield with the soldiers name and co. engraved on it. He was awarded the Medal of Honor for capturing a confederate battle flag at the battle of Sailors Creek, Virginia, the last battle that the confederates fought before their surrender at Appomattox.

Don in Virginia

**XLT® is high-performance simplicity and versatility at it's best.**

High tech treasure hunting is as easy as turning on the XLT® and selecting a Turn-on-and Go! program. With 5 expertly-designed programs to choose from, you've got virtually every kind of hunting covered. It's easy to enhance a program, too, for your particular hunting with one of 10 Basic Adjustments or even a Professional Option. Completely automatic or totally adjustable!

See what's in the ground before you dig!

\$899.95  
\*msrp

## XLT® FEATURES:

- **5 Turn-on-and-Go! Programs** - ready to hunt right out of the box. Completely automatic, professionally engineered for high performance.
- **10 Basic Adjustments** Adjust every aspect of your hunting. Popular adjustments include Tone I.D., Sweep Speed, Silent Search, Fade Rate, Recovery Speed, Block Edit, and AutoTrac® Speed.
- **29 Pro Options**
- **Complete Visual Display.** Target icons, VDI numbers and White's exclusive SignaGraph® target signature. Squeeze the trigger and activate the depth screen.
- **Automatic Ground Balance with AutoTrac®.** Tracks and adjusts to changing grounds as you hunt.
- **High Definition megapixel display.**
- **Powerful, waterproof 9 1/2" search coil.**
- **Slide-in Nicad Battery System.** Up to 15 hrs. of power-packed hunting on one charge. Backup penlight pack also included.
- **Two-year Parts and Labor Warranty.**

\*All prices are manufacturer's suggested retail in U.S. dollars

# GMT™ E-Series

**GMT™ is designed specifically for the tough task of finding tiny gold nuggets.**

The GMT™ simplifies the tough task of ignoring the harsh ground minerals found in gold-bearing areas. The GMT's Fast AutoTrac® cancels ground mineralization faster and more accurately than ever before.

*Planning my summer metal detecting trip included stopping at a few places that I knew had nuggets of various sizes. The first day, using White's GMT (my weapon of choice because of its hot rock cancellation abilities and follow the black sand numerical logging) I retrieved several nice nuggets in a crack of bedrock that someone had removed the overburden from years ago. That was a 3/4 oz. day. The next day, a few stone-throws away, 2 large nuggets for a 1/4 oz day. Next, I moved a large rock and heard some nice responses from the detector. Out of the decomposed bedrock up emerged a big beautiful gold nugget over 4 nickels thick. I call it "The 12-12 nugget" because its weight is 12 DWT 12 GRS. Total in gold nuggets was 1 1/2 oz., .5 grains.*

*Doug  
Washington*

## GMT™ FEATURES:

- **Automatic Ground Balance with fast AutoTrac®** . Tracks and adjusts as you hunt.
- **Grab pushpad** instantaneously sets the ground balance.
- **Full-time Iron ID Bar Graph** displays the percentage probability of iron.
- **Optional Audio Iron ID "Grunt"** comes at the end of the GMT's "zip-zip" sound.
- **Iron Target Analyzer** - Analyze the target to determine its probability of being iron with each successive pass of the search coil.
- **"Follow the Paystreak"** displays the amount of magnetic minerals in the ground. Gold hides in streaks, so follow the streaks.
- **Variable Self-Adjusting Threshold (VSAT)**
- **Slide-in "AA" Battery System** with approx. 40 hours of hunting. (Optional Nicad Rechargeable System available.)
- **Powerful, elliptical waterproof "DD" search coil** helps cancel the ground.
- **48 kHz operating frequency.**
- **Two-year Parts and Labor Warranty.**

**\$799.95**

# What People Find

Aundrea L. of Portland, Oregon found this 1908 \$5 Gold Piece under the swings at a local park. She says the wood chips under the swings are a great place to hunt.

She attributes her "great luck" at metal detecting to her Classic ID - and digging everything while some of her hunting partners will ignore a broken or faint signal. Aundrea even got her husband hooked. After he saw all the great stuff she's found, he had to get his own metal detector!

It's not everyone who finds a coveted CS Tongue. And, it's certainly not everyone who manages to find one before his 7th birthday. But that is exactly what happened for Logan S.

"I found it in the back yard where you are digging for the fish pond," Logan answered when questioned by his Mom, Nina. Within the next few days Nina & Logan sifted the area behind their 1860's log home and discovered over a dozen buttons, some bullets, and a few coins - all without a metal detector. But that was soon to change. Nina visited her local metal detector dealer and was soon the owner of a new White's XLT. With this new addition to their arsenal Nina and Logan began a thorough search of the area. They were rewarded with a vast assortment of relics, some predating the Civil War. The Mother & Son team went on to unearth many interesting items from the early 1700's right up to the mid-1900's.

Logan has recently received his own brand new Classic II detector. Now approaching 8 years old, he is a regular partner for Mom and her XLT as they search near their home for more exciting recoveries, and build memories to share together.

(excerpted from a story written by Keith Zorger.)  
Read the complete story on [whiteselectronics.com](http://whiteselectronics.com)

For a little over a year now my brother, who lives on the other side of the country in Vermont, has been telling me stories about all the wonderful things he has been finding with his White's Classic ID. Every week or so in the summer months the pictures would flow in, e-mail after email, each find better than the last. Enough is enough, and I decided that this year would be different. I purchased a White's Quantum® XT. We detected for one week over 8 hours a day and we had the most wonderful time we have ever spent together, not to mention the incredible list of finds. Between the two of us we found the following:

1782 King George III Irish Half Penny, 1837 Canadian Bank Token Penny, 1847 US Large Cent, 1901 and 1913 Barber Dimes, 1887 and 1906 Indian Head Pennies, 1945 Mercury Dime, 1901 Epworth League Token, 1887 Counterfeit Half Dollar (copper), 1923 Chambres De Commerce De France 1 Franc, 1945 P Silver War Nickel, 21 Wheat Cents, 58 Cal. Minnie Ball, 2 Musket Balls, 2 Crotal Bells, 1 Railroad Switch Key, 18th Century Door Key, 1 Grand Army of the Republic Button, 1 Ox Shoe, 2 Horse Shoes, and 1 Spanish American War Silver plated spoon.

The best find of all was my Model 1851 US Sword Belt Plate. I am now already on the airline website, planning my return trip later this year. For now, I am doing some research in my area to find some interesting places to detect here.

Rick C., California

On June 12 this year, using my DFX, I found a class ring from a local high school from the class of 1931. I had been detecting in a friend's cherry orchard and showed him the ring the next day. The initials were N.S.T. and after a few moments he said that his mother's initials were N.S.T. She is still alive and will be 88 this summer. He talked with her about the ring and she said that she had given it to her fiancée in the spring of 1936 after she had received an engagement ring from him. He lost it later that summer while working in the orchard. She said that she was not happy with him for losing it, since she had saved all her earnings to pay for it. This was during the depression when jobs and money were hard to come by.

The ring had been in the orchard for 68 years and had been damaged by farming equipment. I had a jeweler straighten and solder it together and it looked brand new when I returned it to her a week later. She was amazed the ring was ever found and surprised at how nice it looks. She now wears it on her finger after 68 years of being lost.

Lloyd, New York

Read more stories from White's customers at: [whiteselectronics.com](http://whiteselectronics.com)

I had contemplated and researched buying a metal detector for over a year. Last month, I decided on a White MXT™ after being able to talk to your New England distributor, by simply dialing the 800 number - on a Saturday no less! The second time out with this device, I found the gold shown in the vial. The third time out, the impressive quartz with gold was found!! This piece could only have been found with a metal detector. I actually had tossed the piece to the wayside while searching for the target. Once I realized the target was gone, I simply used the MXT to find it again, in the water behind me.

Bill M.

I bought a Whites MXT™ as a gift for my wife, who has been begging me for a metal detector for a few years. Well, our first outing was to the beach. She asked me to set the control knobs and try it first (since I had read the instruction manual). Less than 2 minutes later I made an "X" in the sand and told her to dig our first hole. She pulled out a gold ring! Can you believe it? The first "hit" we got was a gold ring on our first day with the metal detector. We also pulled out a handful of coins and an earring. Pretty cool. The detector was for my wife, but now I'm the one who's hooked!

Ben C., California

I'm only 38 years old but have 2 herniated disks in my lower back. I was given the detector to help me get out more. Today I'm doing active things with my children that were considered impossible 2 years ago. I truly believe this hobby has saved my life.

This was my first year detecting. I got my detector, a Whites XLT®, in April and only detected local parks until July, when I moved into a 230 year old house. Then the cool finds started happening. In the summer, I got my first silver dollar hit with the detector. Instead of getting a silver dollar I found something much better, a Silver Colonial shoe buckle. Here is an excerpt of a letter I received from a museum curator:

"Dear John, In reference to your colonial shoe buckle. It was made by Christopher Hughes, Baltimore Maryland. ca. 1771, partnered with John Corman in 1774. Married a Peggy Sanderson in 1779, and if you can find it, he had a portrait of himself painted by a Charles Wilson Peale, you can see the face of the guy who made your buckle. Nice Find. He was a pretty important guy and I found a single spoon made by him going at almost \$1,200. A buckle would more than likely fetch much more."

John, Pennsylvania

Just wanted to share the gold nugget I found using my brand new MXT detector and the Whites probe. This was found on a claim I belong to up on the Yuba River, in northern California, in August 2004.

Gerry McMullen

One of my neighbors had just finished removing the top inch of sod from the yard of an older house. I thought this would be a great place to try my new Prizm III. So, I plugged in my headphones and started detecting - with great results. Many nice old relics and a variety of artifacts, some of them being quite collectible. As for coins, I found a total of 44 coins and 19 of them were old. The best part is that of the 19 old coins, 5 of them were silver. Yes, I found 5 silver coins the 1st day I used the detector in the 1st yard I detected! I was totally amazed at how well this detector works and it's "right-out-of-the-box" ease of operation.

My two favorite finds were sterling silver military captain bars and a gold scale weight which reads "1 TROY OZ.". The scale weight probably dates from the mid to late 1800's. My neighbor and I were amazed that all these coins, relics, artifacts and odds/ends came from one small yard.

Thanks again Whites for making a top-notch, quality product with great features. At a price that can't be matched.

Gerry McMullen, Idaho

## PRIZM™ V, IV, III, and II feature:

**Target I.D.** Display shows I.D. of target as you hunt. Hear *and* see targets!

**5-Range Discrimination** adjusts so you pick what you want to see and hear. Hear and see it all, or just the good stuff.

**Adjustable Sensitivity** maximizes detection depth in varying grounds.

**PinPoint/All-Metal Mode** makes locating your target a snap. Just push the pad!

**8-inch waterproof search coil.**

**Rugged, water resistant control box.** Just 2.5 pounds, too.

**Low Battery Alert.** Powered by 2 9-volt batteries (included).

**1/4" headphone jack.**

**Two-year parts and labor warranty.**

## PRIZM™ V, IV and III feature:

**Depth Reading** as you hunt. Once you've detected a good target, the screen shows you how deep to dig. No extra steps, it's automatically on the screen!

## PRIZM™ V and IV feature:

**Smart Notch.** You choose ... detect or ignore them. Just push a pad and nails, foil, and tabs are in or out. The "Smart" system notches each zone based on your discrimination setting. You'll wonder how you ever did without Smart Notch!

**Tone I.D.** 3 distinctly different audio tones instantly cue you to the target's desirability. LOW signals nails and iron. MEDIUM is rings and jewelry. HIGH indicates coins.

**Built with White's legendary quality and performance, the Prizm's are perfect for the first-time treasure hunter.**

These are *real* metal detectors - all built to White's exacting design standards. All 4 are packed with high-end features at unbeatable prices.

These rugged, feather-light metal detectors feature Target I.D. to show you what's in the ground as you hunt. Plus, they give you the ability to adjust the level of discrimination depending on what you're hunting for and where. Low settings work great for areas with little or no trash like farm fields. Adjust DISC up for parks and yards where there's lots of trash.

*I took the Prizm to an area I've hunted for years and made some great finds including a silver half, Mercury dime, a small gold and diamond ring, and silver jewelry. It's a heck of a metal detector.*

*Bob Canaday*

**Built on the proven Prizm™ platform, the Prizm™ V is loaded with even more options for better performance!**

**PRIZM™ V exclusive features:**

**MultiTone™.** Hear instantly whether it's a nail, ring, or quarter! 8 distinct audio tones - one for each discriminate zone - range from VERY LOW for nails up to HIGH for silver dollars. Just press MultiTone and listen as Prizm™ V tells you what kind of treasure you've found, OR, if you prefer the Prizm IV-style 3-tone I.D., it's here, too!

**VCO Pinpointing.** Voltage Controlled Oscillation gives a higher pitch as you approach the target. It's a simple and intuitive way to pinpoint. Prefer standard, volume-controlled pinpointing? It's here, too!

**Prizm™ 950 search coil.** Standard on all White's top-of-the-line detectors. Increased depth, and a wider search pattern.

**Plus, all of the proven Prizm features at left.**

**MultiTone™ is a full musical scale of target ID's!**

MultiTone™ uses a distinctly lower pitch on Iron/Nails and a graduated, but easily distinguishable frequency for each of the other 7 target ranges.

# Beach & Surf

*The BeachHunter® ID ignores junk and picks up just the treasure. Hunt in and out of the water.*

*I.D. detected targets in a snap with a glance at one of the color-coded LED's.*

\$799.95  
\*msrp

*The Surf PI Pro combines turn-on-and-go ease and unbeatable depth and sensitivity.*

*The PI Pro's power circuit reaches new depths even in the worst beach conditions, like black sand.*

\$699.95  
\*msrp

(Also available with weighted search coil)

## BEACHHUNTER® ID FEATURES

- **Dual frequency detection** provides optimum detection on the sand and in the water.
- **Two Search Modes:** Toggle between All-Metal and Motion Discrimination for easy pinpointing and versatility.
- **3 Controls** - Threshold, Sensitivity, and Ground. The versatility is all here!
- **Salt and Freshwater versatility** for all kinds of beach hunting.
- **Waterproof Piezo headphones** included.
- **Drop-in "AA" battery system** and battery test.
- **Detachable control box** with hip or chest-mount pouch included.
- **Completely waterproof to 25 feet.**
- **Two-year Parts and Labor Warranty.**

## SURF PI PRO FEATURES

- **Pulse Induction detection** for exceptional depth on coins and jewelry, especially in saltwater and mineralized ground.
- **Enhanced sensitivity** to gold at maximum depths.
- **Gain control** adjusts for your particular beach conditions so you get every inch of PI depth and sensitivity.
- **Quick Target Recovery.** Hear good targets even amid junk.
- **Tuner Control** adjusts the threshold tone and checks battery.
- **Variable sweep speed**, from slow to fast with no loss of depth.
- **Waterproof Piezo headphones** included.
- **Automatic Ground Rejection.**
- **Completely waterproof to 100 feet.**
- **Power Supply: 8 "AA" batteries.**
- **Two-year Parts and Labor Warranty.**

*I've been using a metal detector for the past five years. Last week, I purchased a BeachHunter® ID. I have been working this one particular beach for the past several years with good results - hundreds of old gold and silver rings and hundreds of old coins. But after hunting this beach for years, I needed a machine that would give me more depth. Today while hunting for the first time with my new BeachHunter ID in an area where I probably have been a 100 times before, I came across an 1855 \$1 Gold Indian that was very deep. At first I didn't recognize it, thinking that it was just another religious medallion, but with a closer glimpse I realized what it was. It has a small hole drilled through. It could have possibly been a pendant. This is my first gold coin! I'm so happy I decided to upgrade to the Beach Hunter ID.*

Daniel S.

\*All prices are manufacturer's suggested retail in U.S. dollars

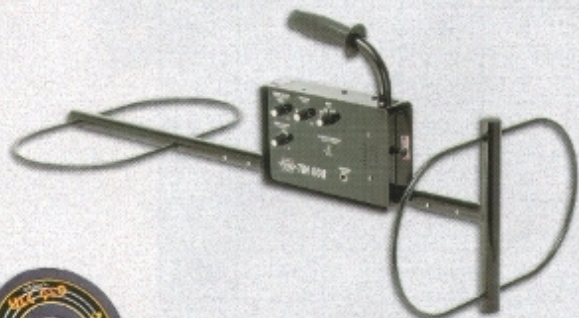

# Specialty

**XL™ PRO** is a powerful and versatile detector for all kinds of hunting. Analog controls for complete adjustability.

- AutoTrac® samples the ground, adjusts for maximum depth and sensitivity.
- PRESET control settings and on-the-box instructions.
- Meter ID's target and then reads depth.
- 4 hunting modes ranging from full discrimination to detecting all metals.
- Disc. control adjusts the level of trash you reject. Tuner control sets the optimum threshold.
- Signal Balance control adjusts for improved performance and cleaner target signals.
- 9 1/2" waterproof search coil.

# Essential Accessories

## Bullseye Pinpointer

The ultimate tool for precision pinpointing. Bullseye works side by side with your metal detector to make short order out of locating and digging detected targets. Plus, with Bullseye, you'll minimize the odds of damaging a valuable coin, relic, piece of jewelry or even a gold nugget. It's easy. It's fast. Just locate the target with your detector, push the button and "zero in" on the target's exact location. .... \$119.95

## Digging Pouch

Slides onto any belt (not included) for easy collection of your finds. Separate pouch for trash and treasure. Room for additional digging tools, too. .... \$14.95

## Lesche Digging Tool

The ultimate digging trowel. Heat tempered, serrated edge. Sheath included. .... \$39.95

*Headphones increase detector battery life and increase your ability to hear signals clearly without background noise. White's offer 3 "made-for-detecting" models to choose from!*

★★★  
**GOOD**

## Basic Headphone

Hear those targets loud and clear without distracting background noise. Large, comfortable earcups, stereo sound, adjustable volume, coiled cord, 1/4" right angle jack. .... \$24.95

★★★★  
**BETTER**

## Royal GT Headphone

Packed with features to help you hear those smaller, deeper targets. Right and left volume, 30-ohm Mylar stereo speakers with titanium coating, gold-plated 1/4" right-angle stereo jack. .... \$49.95

★★★★★  
**BEST**

## E-Series 9000 Headphone
