**\$799.95 m.s.r.p.**

Perfect for beginners  
of all ages!

"What's in the ground is on the screen."  
As the Prizm™ passes over a ring, you  
hear a beep and the arrow on the  
display points to a ring. The display  
also shows you the ring's depth, in  
inches, so you know how deep to dig!

(Depth Reading on Prizm IV and III.)

All Prizm's carry White's full  
2-year warranty

# PRIZM Metal Detectors

MADE IN AMERICA BY WHITE'S ELECTRONICS

## Fun, Affordable and Packed with Features!

Metal detecting has never been so easy or so much fun. Built with White's legendary quality and performance, the Prizm's are perfect for the first-time treasure hunter. These are *real* metal detectors - all built to White's exacting design standards. All 3 are packed with high-end features at unbeatable prices.

These rugged, feather-light metal detectors feature Target I.D. to show you what's in the ground as you hunt. Plus, they give you the ability to adjust the level of discrimination depending on what you're hunting for and where. Low settings work great for areas with little or no trash like farm fields. Adjust DISC up for parks and yards where there's lots of trash.

### PRIZM™ IV, III, and II feature:

**Target I.D.** Display shows I.D. of target as you hunt. Hear and see targets!

**5-Range Discrimination** adjusts so you pick what you want to see and hear. Hear and see it all, or just the good stuff.

**Adjustable Sensitivity** maximizes detection depth in varying grounds.

**PinPoint/All-Metal Mode** makes locating your target a snap. Just push the pad!

**8-inch waterproof search coil.**

**Rugged, water resistant control box.** Just 2.5 pounds, too.

**Low Battery Alert.** Powered by 2 9-volt batteries (included).

**1/4" headphone jack.**

### PRIZM™ IV and III feature:

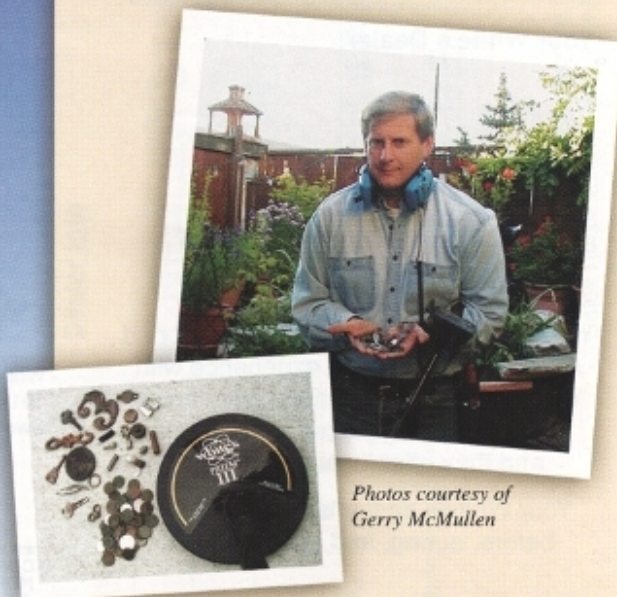

**Depth Reading** as you hunt. Once you've detected a good target, the screen shows you how deep to dig. No extra steps, it's automatically on the screen!

### PRIZM™ IV exclusive features:

**Smart Notch.** You choose ... detect or ignore them. Just push a pad and nails, foil, and tabs are in or out. The "Smart" system notches each zone based on your discrimination setting. You'll wonder how you ever did without Smart Notch!

**Tone I.D.** 3 distinctly different audio tones instantly cue you to the target's desirability. LOW signals nails and iron. MEDIUM is rings and jewelry. HIGH indicates coins.

**First time out with Prizm III yields treasure trove of old coins and relics!**

Photos courtesy of Gerry McMullen

*One of my neighbors had just finished removing the top inch of sod from the yard of an older house. I thought this would be a great place to try my new Prizm III. So, I plugged in my headphones and started detecting - with great results. Many nice old relics and a variety of artifacts, some of them being quite collectible. As for coins, I found a total of 44 coins and 19 of them were old. The best part is that of the 19 old coins, 5 of them were silver. Yes, I found 5 silver coins the 1st day I used the detector in the 1st yard I detected! I was totally amazed at how well this detector works and it's "right-out-of-the-box" ease of operation.*

*My two favorite finds were sterling silver military captain bars and a gold scale weight which reads "1 TROY OZ.". The scale weight probably dates from the mid to late 1800's. My neighbor and I were amazed that all these coins, relics, artifacts and odds/ends came from one small yard.*

*Thanks again Whites for making a top-notch, quality product with great features. At a price that can't be matched!*

Gerry McMullen, Idaho

## PRIZM™ ACCESSORIES

### PRIZM PeeWee Rod Kits (not shown)

Replacement lower rod makes the Prizm usable by even small children. Two lengths: 4" and 9" shorter than standard lower rod ..... \$9.95 ea.

### PRIZM 950 Search Coil

More depth and a wider search pattern that covers more ground. This 9 1/2" coil is standard on top-of-the-line detectors ..... \$99.95

### PRIZM Headphone

Hear those targets loud and clear without distracting background noise. Large, comfortable earcups, stereo sound, adjustable volume, Coiled cord, 1/4" right angle jack ..... \$24.95

## Mother & Son Relic Team!

*It's not everyone who finds a coveted CS Tongue. And, it's certainly not everyone who manages to find one before his 7th birthday. But that is exactly what happened for Logan.*

*"I found it in the back yard where you are digging for the fish pond," Logan answered when questioned by his Mom, Nina. Within the next few days Nina and Logan sifted the area behind their 1860's log home and discovered over a dozen buttons, some bullets, and a few coins - all without a metal detector. But that was soon to change. Nina visited her local metal detector dealer and was soon the owner of a new White's XLT. With this new addition to their arsenal, Nina and Logan began a thorough search of the area. They were rewarded with a vast assortment of relics, some pre-dating the Civil War. The mother and son team went on to unearth many interesting items from the early 1700's right up to the mid-1900's.*

*Logan has recently received his own brand new Classic II detector. Now approaching 8 years old, he is a regular partner for Mom and her XLT as they search near their home for more exciting recoveries, and build memories to share together.*

*(Excerpted from a story written by Keith Zorger. Read the complete story at: <http://www.whiteselectronics.com/stories2.html>)*

## DFX Yields Silver First Time Out

*I have an interesting story on my first day out with my new Whites DFX. I decided to check out my own backyard. I live in an old area, and I was sweeping the ground when I dug up my first coin. It was covered in dirt and by the size I could tell it was dime. When I rubbed the dirt off, I couldn't believe what I had in hand, an 1895-S Barber dime!*

*Since that first find, I have found a 1919 Lincoln cent, 1906 Barber quarter, 1904 Indian head penny, an old Chinese coin, and a 1969 dime. I also found a perfect square nail, a beat up thimble dated 1892, and a gold button I believe is from the Spanish-American War.*

*Paul K., Santa Barbara, CA*
